The Best of All.

The "Safford" Radiator is the climax of radiator manufacturing. It's taken some years to reach that climax but the "Safford" is there, and alone acknowledged leader of them all.

It's a simple radiator made without bolts or packing. It's for hot-water and steam heating.

Don't decide on a heating plant until you hear about the "Safford". We are at the end of a two-cent stamp with a bundle of information cheerfully given. Send for catalogue.

Manufactured by A. R. Woodyatt & Co., Guelph, Canada.
Sold only through the Wholesale Trade.

KEMP'S Broad Hoop Roll Rim Milk Can Bottoms

possess all the points which go to make perfection in Can Bottoms. They have been used by a criticizing public for three seasons, and their popularity is evidence of the satisfaction which they gave. The Roll Rim has no sharp turns which break the grain of the metal and lessen its wearing qualities. It has a broad wearing surface and will not damage floors. They do not cost more than an inferior Bottom. **The IRON-CLAD TRIMMINGS** are made the same as the broad hoop, and differ from them only in having a narrower and thicker hoop which does not require the Roll Rim, and, therefore, can be sold cheaper. For durability and finish our trimmings are unequalled.

KILL THE BY-LAW.

ON Monday next the ratepayers of Toronto will vote on the by-law empowering the City Council to vote $133,500 for the purpose of erecting new buildings for the Industrial Exhibition.

It is well that the ratepayers should carefully consider the matter. Doubtless the Exhibition is a good thing for the "Queen City." Of late, however, we know that it has for some years been steadily deteriorating as an exhibition pure and simple, while it has been expanding as a variety show and a race track. As we have time and again pointed out, this policy has led to an antagonism of the manufacturing, dairying and mercantile interests of the country.

While some new buildings are undoubtedly needed (a main building, for instance), what is needed most, first of all, is a new policy. As the management have so far refused to recognize this, it is obvious a new management is necessary before a new policy can be secured.

The ratepayers over a year ago refused to concur in a by-law to raise money for erecting new buildings, because they had lost faith in the administration. As the same administration is still in existence the ratepayers of Toronto should deal with this by-law as they did with its predecessor.

IMPROVEMENT SOCIETIES.

In the United States, leaders in the work of village improvement have sought to interest the teachers alone in this scheme, but not only should this work interest the teacher, it should interest the business man as well.

In Danvers, Mass., a local improvement society with a membership of 150, most of whom are children, has been doing good work in the improvement of sidewalks, roads, and lawns; the removal of old buildings and fences; the planting and care of trees; the destroying of canker-worms and other insect pests; and other good things generally. By means of concerts, lectures, and contributions generally, the sum of $5,000 has been realized, with which a large park of 25 acres has been purchased. After the society has done its best at improving the park it will throw it open to the public.

It should not be impossible for business men in Canada to excite interest in their several communities on this most laudable movement.

VOTE FOR BUSINESS MEN.

ON Monday next the different municipalities in Ontario will be called upon to elect their representatives to the local governing bodies.

The opinion obtains among not a few that the quality of the representatives in our municipal councils has for some years been steadily deteriorating. It certainly has not been improving, for the ward heeler and not the practical business man is only too often the power that rules. If, however, the business men in the several municipalities were to be guided by the same principles as they are when selecting their own employes, the ward heeler and the professional politician would soon be a thing of the past.

The management of a municipality is as much a matter of business as the management of a purely commercial enterprise. And it is because so many electors do not realize this—or, at any rate, do not vote as if they did—that we have a deterioration in the quality of the men who sit in our council chambers as our representatives.

Like begets like. And if the business men of this country will exercise their power in the right direction it will only be a matter of time before our municipal institutions will become more businesslike in their character.

Work for business men. Vote for business men.

HOW A BANK CLOSED UP A BUSINESS.

WHEN some 20 months ago it was announced that The Copp Brothers Co., Limited, stove manufacturers, Hamilton, Ont., had been forced into liquidation a great deal of regret was expressed in many parts of Canada.

Those who then expressed regret will now, doubtless, find matter for gratification in the fact that the outgoing year of 1901 saw every creditor, direct or indirect, paid in full. But this is not all: in spite of the enormous sacrifices necessary in order to wind up the business so rapidly, a handsome surplus remains, and that without disposing of any of the company's property except the foundry, or without discounting customers' paper.

From the very fact that the affairs of the company have been so satisfactorily wound up, one is naturally led to examine the circumstances which brought about the liquidation.

As our readers are doubtless aware, the direct cause of the liquidation was the demand of the Merchants Bank for the immediate payment of the sum of $37,000 owing that concern. Why the bank should have made this peremptory demand is something we cannot understand.

As we have already intimated, the demand for a settlement of the liabilities to the bank was made early in 1900. The business of the Copp Company in 1899 was the largest in its history. And not only was its paper under discount of better quality than at any other period during 20 years, but it was reduced from over $44,000 in April, 1899, to less than $24,000 in 1900, while during that period the business of the company increased by over $15,000. It was true that the company was at the time a little hard up, because of a rather extra heavy stock on hand, but it must, we think, be obvious to most people that its financial condition was by no means unhealthy, particularly when we consider that the stove trade in Canada during the year or two previous to the demand of the bank being made was more than usually prosperous. Furthermore, the business of the company had been increasing in volume for some five or six years. And it has been estimated that, had it been allowed to continue in business, it would have closed 1900 with a profit of at least $20,000. This, in the face of the handsome surplus with which the liquidation proceedings have been concluded, certainly does not seem an exaggeration.

Another feature of the affair was that only four or five days previous to the demand for payment, which was to be satisfied by 3 p.m. of the day on which it was made, one of the members of the company was informed that the head office of the bank was agreeable to making the usual advance.

An effort was made to get accommodation from other banks, but, the action of the Merchants Bank having become known, it was, of course, abortive. Liquidation then followed.

That the action of the bank was a mistake is evident. If there was any doubt about the wisdom of it when the demand for payment was made on April 2, 1900, the result of the liquidation settles it beyond all peradventure. It was a grave mistake. And the Merchants Bank, no doubt, fully realizes it.

In the meantime, however, an old and honorable firm has been forced out of business, for which even the satisfactory winding up of its affairs is but poor compensation.

The old firm whose career was thus closed began business in 1848. In that year Messrs. Anthony and William J. Copp commenced a general stove and tin business in Hamilton, which was carried on successfully for a number of years. Nine years later, viz., in 1857, the brothers bought the old Vulcan Foundry of Woodstock and went into the manufacture of stoves, the business at Hamilton also being continued. The Woodstock Company was known as Copp, Finch & Co. The Woodstock business was successful but it was felt many advantages would be gained in consolidating all under one management. Consequently, in the year 1864, the foundry was moved to Hamilton, the first heat being taken off on August 5 of that year. At first the premises consisted only of a three-storeyed building and moulding shop; to this were added from time to time various additions. In 1891 the old firm was incorporated under the style of the Copp Brothers Co., Limited, with William J. Copp as president and Harold E. Copp as secretary-treasurer.

THE "WANT BOOK."

A correspondent writes that now would be a good time for retailers and general store keepers to commence using a want book in different departments of their stores. Some use them at present, but not in the right way. When a line of goods is getting low, the fact should be immediately noted in the want book.

If a customer asks you for something you have not got or never heard of, don't turn him away, but make an effort to secure the article and please him.

When a traveller calls on you and you have a few specials on your list, ask him if his firm makes the article called for, or where he can secure it.

Don't keep your want book for an ornament, but use it to full advantage. As you order the wants, score them off or mark who you order from, and also the date in the margin. This will save a lot of confusion and annoyance.

Have every clerk in the store and heads of departments use the order book. If any storekeeper has not used a want book, give it a trial and see for yourself the trouble you save your customers, clerks and the trade generally. Do it now.

RAW AND BOILED OIL DOWN 4C.

This week the prices of raw and boiled linseed oil for Ontario have been lowered to 77c. for the former and 80c. for the latter per gallon, a reduction of 4c. per gallon. Toronto, Hamilton and London prices are 2c. less.

Raw linseed is still firm, but in England there has lately been two kinds of oil placed on the market, an inferior and a better grade of Calcutta. The latter sells at a price equivalent to ours here, but the former threatens to come in and compete with ours on account of its cheapness. But the fact that oils have been very stagnant lately, little or no movement being noticeable, has had some weight with the paint and oil merchants. They therefore hope that by lowering the prices of oil their customers will be induced to place their orders early this season. In accordance with this they have marked prices down.

BUSINESS AND ITS MANAGEMENT

Some Ideas and Hints.

Relation of Profit and Loss Statement to Balance Sheet.

BY A. D. KITTREDGE.

THE profit and loss statement gives the results of the transactions of the business for a fiscal period, and must certainly precede the balance sheet in order to bring into it in a single amount that which represents the results of the business. You may call this item undivided profits, general loss and gain, or surplus, or it may be indicated by some other term. In any event, something in the balance sheet stands for the accretion of capital during the period passed. The profit and loss statement must always precede the balance sheet in order to put into the latter the quantity which it is necessary to have in order to state the condition which the balance sheet is to show. A correct balance sheet must show all the assets of the business, and likewise all the liabilities of the business, and from every point of view, capital, whether invested direct or being the accumulation in the way of profits, is an important part of the liabilities of the business. It is a necessary element to make the statement balance.

In order to produce a profit and loss statement, and after that to properly frame a balance sheet, there must be a proper classification of accounts or the sorting of accounts into classes. A moment's consideration will show that in each of those divisions of the accounts of a business, namely, the profit and loss statement and balance sheet, we can have two classes of accounts, and only two. The profit and loss statement can have nothing but expenses, including, of course, losses and revenues, or earning or income, whichever you may prefer to call it. In turn, the balance sheet can contain nothing but assets and liabilities.

If we begin to make out a balance sheet, particularly if we allow that plan which has been specified by various definitions already presented, namely, from the books of the business and upon the assumption that the books have been conducted along the usual lines, we encounter at once certain difficulties. We find certain accounts that are, in character, straddles. For example, there is the merchandise account, which is made to perform two functions. It is an asset account to the extent of the goods on hand and a revenue account to the extent of the profit that has followed from the trading. Again, we have a straddle in the way in which the account called interest and discount is commonly conducted. It includes both expenses and earnings.

If we are going to classify our accounts in such a way as to have them in most convenient form for a balance sheet, we must arrange them according to the requirements of these two main divisions. We must have in one class sufficient accounts to indicate all our assets, and in another sufficient accounts to indicate all our liabilities. There must be likewise sufficient accounts to indicate all our expenses, and also our income items or revenues, whatever the term may be that is applied to the class.

The merchandise account to which I have referred as an example of a straddle is certainly a greatly overworked account, when we take it as we find it in the ordinary business establishments into which the account is called.

The Expenditure Proportion in Business.

The proportion of expense to the total amount of business transacted in a year is often a stumbling block in the way of an assured profit, says Stoves and Hardware Reporter. In some cases the expense is made greater than the business will bear, and in others not a sufficient allowance is made for the moving of the business, with the result that extravagance on the one hand or a too careful saving on the other results in a loss which may be often past recovery. It has been figured out that on an average business of $10,000 to $12,000 a year, the expenses should not exceed 15 per cent., including the living expenses of the proprietor at $15 per week, and not allowing for clerical hire, but charging up insurance, rental and interest on the value of the stock, which represents, as an illustration, an investment of $3,000. To do a business of $12,000 on this investment requires that the capital should be turned over four times a year, which may be possible under exceptional conditions but is hardly so when there is but one man in the store to attend to it. The above illustration has been given as an actual fact, but an examination of the figures shows that there must have been an unusually hard amount of work to accomplish such a result, and also the exercise of a power of saving the pennies that might have been used to better advantage in looking after the dollars. It is a very difficult matter nowadays to make money without spending it in the effort, and while there is a waste in injudicious expenditure there is also a saving in the use of money in the right way for the bringing in of new business.

THE LATE REAL ANGERS,
Of Frothingham & Workman, whose death was announced last week.

Economy.

How a man uses money—makes it, saves it and spends it— is, perhaps, one of the best tests of practical wisdom, remarks Pickles. Although money ought by no means to be regarded as a chief end of man's life, neither is it a trifling matter, representing as it does to so large an extent, the means of physical comfort and social well-being. Some of the finest qualities of human nature are intimately related to the right use of money; such as generosity, honesty and justice as well as economy and providence.

The provident and careful man must necessarily be a thoughtful man, for he lives not only for the present but makes arrangements for the future. He must be a temperate man and exercise self-denial; a virtue that gives strength to character.

It is the duty of the prudent man to live so that in case of sickness or lack of employment he will suffer as little as possible. Viewed in this light, the honest earning and the frugal use of money are highly important. Though money represents many objects without real worth, it also represents many things of great value; food, clothing, personal self-respect and independence. Thus a store of savings secures a man a footing and enables him to wait, hopefully and cheerfully, until better days come round.

To secure independence the practice of simple economy is all that is necessary. Economy requires neither superior courage nor eminent virtue; it is satisfied with ordinary energy, and the capacity of average minds. Economy, at the bottom, is but the spirit of order applied to domestic affairs; it means management, prudence and the avoidance of waste. Economy teaches the lesson of carefulness. The small change that many throw away uselessly, or worse, would often form a basis of fortune and independence. In the words of our honored employer, "Make all you can honestly, spend all you can wisely and save all you can prudently."

J. B. Paquette, general merchant, Riviere a Pierre, Que., has had his stock sold at 61c. on the dollar to J. Lapointe, St. Charles, Bellechasse, Que.

THOS. DAVIDSON MFG. CO. ANNUAL "ROUND UP."

"BROKEN PROMISES."

Composed and Sung by H. J. Chalmers.

Into the private office of a factory president,
There strolled a lot of foremen, who from working hard were bent—
With shaky knees, with shattered nerves, and palpitating heart,
They listened to his little speech, which caused the tears to start;
He spoke of broken promises, and wanted to know why
They made so many of them, but to keep them did not try.
They straightened up their worn-out frames, and an endeavor made
To soothe his ruffled feelings, as in plaintive tones they said:

CHORUS.

"To promise is so easy,
But to keep one is so hard:
We quite forget about them
Though we write them on a card.
O' please forgive us this time
Though your feelings we have jarred,
To promise is so easy,
But to keep one is so hard."

"I've listened to your tale of woe, and surely you'll rejoice
To hear that I forgive you all through hearing Barratt's voice,
It makes me think of "Crescent Ware," the medals it has won,
And as the firm's record year has been nineteen ought one
I'll promise that a million I will give to each of you
If all your promises your keep in the year nineteen ought two."

That promise of a million
Seemed to strike them deaf and dumb,
It made them lose their senses
And their equilibrium:
Hello! "Up one two nine one,"
Dr. H. was called by phone.
To cure them was quite easy,
For at curing he's no drone.

To some he prescribed whiskey blanc, to others ginger ale,
And soon they were upon their feet, though looking very pale.
They held a "kickers' meeting," but decided not to kick,

Staff of the Thos. Davidson Manufacturing Co.

Their quaint appeal was made in such a quiet, pathetic way,
It gave the President a shock—he nearly swooned away,
And while the foremen looked for help to come from anywhere,
In walked Sir Francis Barratt, he of famous "Crescent Ware."
He'd heard the conversation that took place inside the room,
And with "Foxy Quiller" courage, prepared to meet his doom:
With tearful eyes and long-drawn sighs, he joined the motley throng,
And with his Steel Enamelled voice he sadly sung this song:

"To promise is so easy,
I assure you without jest
I very seldom break one,
I'm not half as bad's the rest.
Just make to us some promise
And then put us to the test,
But try and make it easy,
And you'll find we'll do our best."

'Tis true, that music hath the charms to soothe the savage breast,
For, rising up, the President, his foremen thus addressed:

But prayed that to his promise the kind President would stick.
"Oh! have no fear of that," quoth he, "what I say always goes,
In proof of which, I have no doubt, the office staff well knows."
And thus assured these foremen, from Departments A to Z,
Assumed an air of wealth and fame, and this is what they said:

"To promise is so easy,
But in twelve months' time, we vow
We'll promise to remind you
Of the promise you make now:
Just have those millions ready
And our jobs we will forsake—
Our promises in future
We like 'Crescent Ware' wont break."

Unequalled success attended the fifth annual dinner given by the directors of The Thos. Davidson Mfg. Co. to their travellers and heads of departments, on the evening of December 23, at Her Majesty's Cafe, Montreal.

One would imagine that the resources for unique features had been exhausted, but the 75 guests (an increase of 10 over last year) were pleasantly surprised by two decided "hits," the first being a presentation of a (planished tin) cup to Mr. H. B. Chadburn (Maritime Provinces) for being champion "kicker" of the "kickers'" party. In making the presentation, the president, Mr. Jas. Davidson, humorously stated that it was given as a mark of appreciation not only of the intrinsic value of his (Chadburn's) remarks, but the force with which they were delivered.

Replying, Mr. Chadburn said that, when taking into consideration the disappointed look of the fourteen other aspirants, he felt proud of his achievement.

The other "hit" was a song entitled "Broken Promises," composed and sung by H. J. Chalmers, eliciting hearty laughter and applause as the sly hits on some member of the staff were comprehended.

Mr. Jas. Davidson, in proposing the toast of "The King," spoke of past similar occasions, and said he was glad that these annual gatherings had come to stay and were conducive to a better understanding between employer and employe. Reviewing the year's business, he found that while 1900 had been exceptionally good, the first year of the twentieth century had shown a decided increase.

Mr. T. C. Davidson (vice-president), in a few well chosen remarks proposing the health of "Our Guests," dwelt upon the strides in development the business had had, and took the new faces as an indication of this, as the time-honored, familiar "old ones" were still with them.

Taylor Webb (British Columbia), responding, spoke of his trip to Manitoba and British Columbia and the opportunities that that country afforded to an organization thoroughly disciplined and equipped.

Dr. Haldimand, of The Thos. Davidson Mfg. Co. Mutual Benefit Society, added much to the enjoyment of the evening, rendering several songs in his charming tenor voice.

Mr. Edward Goodwill spoke feelingly of the "Knights of the Grip" and their great value to an organization such as theirs, that their training was of inestimable importance in enabling them to grasp the opportunities that the near future of this Canada of ours will afford. In welcoming Mr. Chas. S. Clarke (the firm's youngest traveller), he kindly alluded to Mr. Clarke's experiences in South Africa and said that men who could acquit themselves with honor in the battles for their country should also possess the

right material for battles in the commercial arena.

Mr. M. Lachapelle's song, "La Petite," touched his hearers in the right spot.

Mr. A. Bindlay, responding to the toast of "The Office Staff," caused considerable merriment by his lucid and graphic description of a young clerk's experience in "walking the carpet."

Mr. Chas. Watt, of Messrs. Blyth & Watt, Ottawa, an old traveller of the firm, wired regrets at being unable to attend, stating that he was too busy selling "Crescent" ware.

Mr. J. N. Young proposed Mr. Watt's health, and requested that a telegram be se sent Mr. Watt mentioning the enthusiasm with which his health had been honored.

Mr. Chas. P. Clarke excellently recited Dr. Drummond's "Le Vieux Temps," which was greatly appreciated, especially by the French guests.

The table was in the unique form of a horseshoe, an arrangement that facilitates the rendering of songs and speeches, and blending nicely with the general equipment of Her Majesty's Cafe. The invitation and menu cards were on tin, and were designed and lithographed at the firm's works; the cartoons portraying the travellers and heads of departments were cleverly executed, while the blending of colors was a harmonious indication of the state of perfection to which this industry has reached.

Messrs. J. N. and R. C. Warminton, Toronto, and Colin C. Brown, Rossland, traveller for the Kootenays, were the special guests of the evening.

The toasts, songs and recitations were given with that willingness and good-fellowship that has dominated previous gatherings of this kind and which augments greatly the harmony that exists between employer and employe, and the directors of The Thos. Davidson Co. may justly feel proud at the happy consummation of their hospitality.

SCOTT MCKERROW.

THE AUSTRALIAN TARIFF.

In the opinion of Dr. W. H. Montague, who has just returned from Australia, the new tariff levied by the new Commonwealth will greatly affect imports from Canada and the United States. He is very sanguine that a market would be found, however, for wheat, machinery, manufactured fabrics and other goods from this continent. This new high tariff is one of the great political questions in Australia, the other being colored labor.

SILVER ANNIVERSARY.

HARDWARE AND METAL is in receipt of a handsome sterling silver paper cutter from a well-known veteran hardware salesman, Mr. Walter Grose, of Montreal, as a memento of his twenty-fifth year selling hardware.

Mr. Grose has represented the well-known corporation, The Plume & Atwood Manufacturing Co., of Waterbury, Conn., brass and brass goods manufacturers, for a quarter of a century, and is considered by the trade an authority on this line of goods.

He has also taken an active interest in the manufacturing of locks and builders' hardware in Canada for the past 15 years. He was during a portion of this time connected with The Peterborough Lock Manufacturing Co., but for some years past has represented The Gurney-Tilden Co., of Hamilton, who are now engaged in the manufacture of an extensive line of locks and knobs in a great variety of finishes, in addition to their large stove business.

Mr. Grose was largely interested in The Globe File Manufacturing Co., Port Hope, for over 13 years, and was mainly instrumental in disposing of this industry recently to The Nicholson File Co., Providence, R.I., who are now the largest file manufacturers in the world. They have doubled the capacity of these works, and Port Hope now rejoices in having one of the most important industries in the Dominion. A large amount of money has been expended to make this one of the best equipped and most modern file manufactories on this continent, which will enable them to produce about 500 doz. files daily. Mr. Grose has been engaged by The Nicholson File Co. to sell the entire output of their Dominion works, and he has the best wishes of his many friends for his future prosperity.

TWO GOOD MEN.

Mr. Theo. Korb, whom we announced some weeks ago to be coming to Montreal to take charge of Lewis Bros.' advertising and catalogue department, has arrived in Montreal and taken over his new duties. Mr. Korb has been identified with W. B. Belknap & Co., of Louisville, Ken., is a hustler and is enthused with the importance of advertising in modern business.

Mr. C. M. Strange, who has represented Lewis Bros. on the road for seven years in different parts of Canada, has assumed his new position as warehouse manager, and is busy these days extending the glad hand to his many friends who are calling upon him. He is one of the best known men in the Canadian hardware trade.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

GURNEY & CO., general merchants, Acton, Ont., have assigned to R. J. McNabb.

M. Lefebvre, builder, Laprairie, Que., has assigned.

The estate of Joseph Heroux, contractor, Yamachie, Que., has assigned.

The Brampton Gas Co., Limited, has assigned to Robert Hiscocks, Brampton, Ont.

The creditors of M. Deslauriers & Co., contractors, Montreal, demand an assignment.

Jas. A. Bolesby, general merchant, Kintore, Ont., has assigned to Archibald McPherson.

The creditors of F. D. Peters, general merchant, Whitewater, Man., held a meeting recently.

The assignment of The National Iron Works, Limited, has been transferred to J. P. Langley, Toronto.

R. G. Gaucher, grocer and dry goods merchant, Huberdeau, Que., is offering 25c. on the dollar cash.

George D. D'Entremont, general merchant, Yarmouth, N.S., has assigned to the official assignee, and his creditors will meet on January 6.

PARTNERSHIPS FORMED AND DISSOLVED.

G. A. Corriveau & Frere, lumber merchants, D'Israeli, Que., have dissolved.

D. & G. Herrington, planing mill, etc., Unionville, Ont., have dissolved, and D. Herrington continues.

George C. Brown, general merchant, Port Maitland, N.S., has admitted as partners Harry R. Brown and George C. Curry.

Hyman Epstein and Philip Ein have registered as partners in a general store, at Louisburg, N.S., which they will conduct under the name of Epstein & Ein.

SALES MADE AND PENDING.

H. E. Boulaine's stock of general merchandise, Les Grandes Berferones, Que., has been sold.

The stock of A. R. Dionne & Co., general merchants, Mille Vaches, Que., has been sold at 47c. on the dollar.

The stock of A. M. Bechard, general merchant, Beauce Junction, Que., has been sold at 66½c. on the dollar.

CHANGES.

The Canadian Wringer Co., Toronto, has sold out.

McDonald & Rivest, electricians, Montreal, have registered.

Howard Pinnell, painter, Kamloops, B.C., is out of business.

Downham & Hastings, electricians, Montreal, have registered.

Bert. Fogarty has registered for Fogarty Bros., electricians, Montreal.

Mrs. E. St. Amour has registered for St. Amour & Cie., roofers, De Lorimer, Que.

The Durham Natural Gas and Oil Co., Limited, Durham, Ont., has obtained a charter.

The Canadian Steel and Wire Co., Limited, Hamilton, Ont., has obtained a charter.

Amsy Snider, blacksmith, Didsbury, N.W.T., has sold his business to George Jamieson.

A. A. Shrenk, agricultural implement agent, Clinton, Ont., has removed to Harriston.

Mrs. P. Denis has registered for Denis & Lemaire, general merchants, St. Cesaire, Que.

W. H. Bingham, hardware merchant, Grand View, N.W.T., is succeeded by Grant & Werdenhammer.

McPherson & Humpsherger, agricultural implement agents, Didsbury, N.W.T., have sold out to Christie & Johnston.

W. E. Smith is successor to the store business of W. E. Piggott, who conducts a general store and a flour and feed business at Kingston Station, N.S.

FIRES.

The sawmills of Emerie Cariere, St. Canute, Que., have been burned.

Alex. Sauriol, general merchant, Montebel'o, Que., was burned out. His stock was only partially insured.

The office of The Ottawa Electric Railway Co., Ottawa, was damaged by fire. The loss is covered by insurance.

DEATHS.

Peter F. McCullough, of S. B. McClurg & Co., stove and hardware merchants, Trenton, Ont., is dead.

GOING INTO LARGER PREMISES.

Lewis Bros., Montreal, expect to be moved into their additional premises at 26 and 28 St. Sulpice street, by February 1. B. & S. H. Thompson will by that time be settled in their large new warehouse at the corner of De Bresoles and St. Sulpice streets.

PAST AND FUTURE

THE PAST with us has been a prosperous and successful career of 31 years' standing. During the time we have developed a large business and perpetuated for our products a lasting reputation.

THE FUTURE will be an endeavor to surpass the achievements of past years, an endeavor to enlarge the scope of our influence, and to create additional favor for

THE GROWTH OF A BUSINESS.

IN 1871, F. Wesson and Gilbert H. Harrington started at 18 Manchester street, Worcester, Mass., in a very small way to manufacture one style of a single-action revolver fitted with a shell-ejecting device invented and patented by Mr. Harrington. It is believed to have been the first successful device applied to revolvers for ejecting empty shells without removing the cylinder. Mr. Wesson's interest was bought out in 1874 by Mr. Harrington, who shortly afterwards formed a partnership with William A. Richardson under the firm name of Harrington & Richardson. The business was rapidly growing, and in 1876 it became necessary to move to more commodious quarters at 31 Hermon street. Four years later the firm became sole licensees to manufacture in the United States double-barrel hammerless shotguns under the famous Anson & Deeley patents. These guns ranged in price from $85 to $300, and, during the five years they were manufactured, won an enviable reputation for durability, simplicity, accuracy and finish.

In 1888, the business was incorporated as The Harrington & Richardson Arms Co., since which time it has had a steady and healthy growth, due to the fact that the H. & R. revolvers are made with the same precision and accuracy in every part that would be required in constructing a fine watch, and hence have achieved a reputation that is the envy of all firearms manufacturers. It is a business built up on honor, and each revolver or gun manufactured by the company is made with the same care and the same regard to absolute safety as though the entire reputation of the company was at stake on each one. In 1893, the erection of the present main four-storey and basement factory building, at the corner of Park avenue, Chandler and Abbott streets, was begun, and it was completed in the spring of the following year. It covered an area of 50 x 180 ft., affording accommodation for the 250 men employed. A two-storey and basement addition, 50 x 60 ft., was built in 1900, and another addition, 50 x 90 ft. in area and four storeys and basement in height, has just been completed. The present number of employes is over 500. Their catalogue now shows 157 separate and distinct revolvers, besides automatic and non-ejecting single guns in two gauges, with both steel and twist barrels. About January 1 they will also be able to supply these guns in 20 gauge. They manufacture what is without doubt the most complete line of firearms on the market, and the great demand for their revolvers and guns is proof of it.

PERSONAL MENTION.

Mr. M. F. Derby, general merchant, Selkirk, Ont., was in Toronto this week. He reports an immense Christmas trade, and trade in general is very good in his district.

Mr. F. G. Karstedt, hardware merchant, Flesherton, Ont., was in Toronto last week on business, and called on HARDWARE AND METAL. He reported business booming in his town.

Mr. Chas. F. Smallpeice, who for 15 years has been connected with the wholesale department of Rice Lewis & Son, Limited, hardware merchants, Toronto, has severed his connection with that firm to accept a position with the wholesale hardware firm of Lewis Bros. & Co., Montreal. Mr. Smallpeice will contine to travel over his old territory in Northern and Northwestern Ontario.

TO MAKE SULPHURIC ACID.

The extensive and valuable pyrites ore areas at Rowsell's Harbor, Labrador, that were owned by Joseph Ripey, of St. John's, Nfld., and others, have been secured by The Dominion Iron and Steel Co., who will immediately send a force of men and mining apparatus to work these deposits. The company will manufacture sulphuric acid on a large scale.

IS RAPIDLY PROGRESSING.

The Cape Breton Extension Railway is rapidly proceeding towards completion, and two thirds of the track between the Strait of Canso and St. Peter's has already been graded. Five miles of rails are also laid, while the smaller structural works, such as culverts, have been finished above the above two points. Two gangs of men are now engaged on the route. Another is starting out immediately under the direction of James Purvis.

OPENED WITH AN "AT-HOME."

On the evening of December 28, the new factory of The Petrie-Taylor Magnet Cream Separator Co., Guelph, Ont., was formally opened by an enjoyable At Home. Over 300 guests were present, when a delightful musical programme was rendered and many speeches were made. Light refreshments were served and dancing was indulged in till the early hours of the morning.

INDUSTRIAL GOSSIP.

Those having any items of news suitable for this column will confer a favor by forwarding them to this office addressed to the Editor.

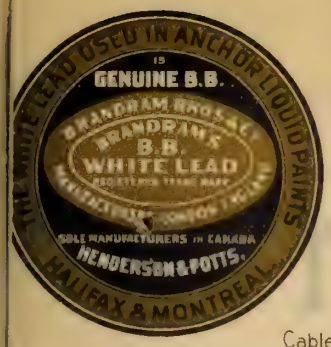
The Ottawa Car Co., Ottawa, has just completed a pontoon bridge for the War Office, which is for use in South Africa.

The Carbon Creek Lumber Co., Michel, B.C., has just placed in working order a new 80 horse-power boiler obtained from The James Cooper Manufacturing Co., Rossland, B.C. The latter firm has also delivered a 25 horse-power boiler to The Crow's Nest Coal Co., Fernie, B.C.

A large refinery is being erected at the Black Diamond graphite mine, Brougham township, Renfrew county, Ont., from which the large block of graphite that formed the foundation for the statue in the Ontario exhibit at the Pan-American was procured. The mill, which is to have a capacity of 40 tons per day, will be in operation inside of a couple of months.

SYDNEY AND THE FAST LINE.

The Sydney, C.B., Board of Trade is making a vigorous campaign in favor of making that port a calling place, if not a terminus of the new fast Atlantic line. It has sent George Dobson to Ottawa, where he is interviewing members of the Government, inducing them to take hold of this project, and collecting data from the officials bearing on this fast line project.



POSTAL SERVICE REFORMS.

Many improvements are being made in the postal service of Newfoundland. Wm. Smith, secretary of the Dominion Post Office Department, has been in that colony for some time on the invitation of the local Government perfecting the money order service. Hitherto, a delay of one or two weeks had been necessary outside of St. John's before the payment of Canadian and foreign money orders, but under the new system there will be no further delay than exists in Canada. The system of accounts has also been changed.

NOVA SCOTIA PAINT & VARNISH WORKS.
HALIFAX AND MONTREAL
by arrangement with **BRANDRAM BROS. & CO.**, London, England.
SOLE MANUFACTURERS IN CANADA
OF THEIR REGISTERED BRANDS OF WHITE LEAD, ZINC & COLORED PAINTS.

Cable Address: "HENDERSON"
A.B.C. Code.

Halifax and Montreal, January 2nd, 1902.

BRANDRAM'S B.B. GENUINE WHITE LEAD
IN ANCHOR LIQUID HOUSE PAINTS.

Dear Sir:—

The much increased demand for liquid paints during the past few years clearly shows that the tendency of the day is towards a more general use of ready mixed paints for house painting.

We have made and sold ANCHOR BRAND LIQUID PAINTS for a quarter of century, and they have always met with the commendation of our customers, but we are constantly studying how they can be improved, and have lately come to the conclusion that the one improvement desirable is the use of BRANDRAM'S B.B. GENUINE WHITE LEAD in their manufacture, and have just completed arrangements with Messrs. Brandram Bros. & Co. to use their lead for this purpose.

The merits of B.B. GENUINE WHITE LEAD have long been known. It is, without question the best White Lead made, being unequalled for Whiteness, Fineness and Body, and will cover more surface than any other White Lead Paint.

The introduction of this Lead into ANCHOR LIQUID PAINTS means the making of a ready mixed paint that is as far in advance of other liquid paints as B.B. GENUINE WHITE LEAD is superior to all other White Leads.

We anticipate that this will make a largely increased demand for ANCHOR LIQUID PAINT and we wish you to co-operate with us in pushing the sale of it.

Our advertising matter will be attractive and supplied liberally, and if you do not handle ANCHOR LIQUID PAINT, you should at once apply for the exclusive agency in your town and district. Please write for general information as to price, terms, etc., and state what territory you desire.

From this date ANCHOR LIQUID PAINTS will have a top label on the cans, like the one shown above, our guarantee of the highest quality of Liquid Paint obtainable.

Yours truly,

HENDERSON & POTTS.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, January 3, 1902.

HARDWARE.

NATURALLY business has been seriously interrupted by the holiday and there is not much activity in any line. Most of the houses are busy getting travellers' samples ready for the first trips of the year. There is little new to report in prices. Wire nails are a subject of contention just now and a general price is conceded to be $2.60 to $2.65. There is but little business doing. The manufacturers' associations meet here next week. On account of easy primary markets, pig tin and copper show material declines.

BARB WIRE.—There has been little doing in wire this week. The price is still $3 per 100 lb. f.o.b. Montreal.

GALVANIZED WIRE.—Little attention has been given to galvanized wire this week and there is nothing fresh to report. We quote as follows : Nos. 6, 7 and 8 gauge, $3.45 ; No. 9, $2.80 ; No. 10, $3.55 ; No. 11, $3.65 ; No. 12, $2.95 ; No. 13, $3.05 ; No. 14, $4.05 ; No. 15, $4.55 ; No. 16, $4.80 ; No. 17, $5.20 ; No. 18, $5.45.

SMOOTH STEEL WIRE — Featureless. We quote oiled and annealed as follows : No. 9, $2.80 ; No. 10, $2.87; No. 11, $2.90 ; No. 12, $2.95 ; No. 13, $3.15 per 100 lb. f.o.b. Montreal, Toronto, Hamilton, London, St. John and Halifax.

FINE STEEL WIRE — There is but little doing. The discount is 17½ per cent.

BRASS AND COPPER WIRE — The demand is of a holiday nature. The discount on both copper and brass wire is 55 and 2½ per cent.

FENCE STAPLES — There is virtually nothing doing. We quote $3.25 for bright and $3.75 for galvanized per keg of 100 lb.

WIRE NAILS — Although prices are nominally unchanged, few transactions are occurring at these figures. The bulk of business is passing at $2.60 per keg and even lower figures are mentioned. Developments are expected next week. We quote as follows : $2.85 for small lots and $2.77½ for carlots f.o.b. Montreal, London, Toronto, Hamilton and Gananoque.

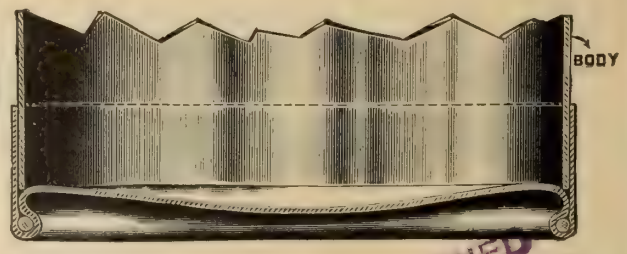
CUT NAILS — There is an ordinary demand at steady prices. We quote: $2.55 per keg for small and $2.45 for carlots ; flour barrel nails, 25 per cent. discount ; coopers' nails, 30 per cent. discount.

HORSE NAILS — Shipments are light this week. "C" brand is sold at a discount of 50 and 7½ per cent. off the new list. "M" brand is quoted at 60 per cent. off old list on oval and city head and 66 2-3 per cent. off countersunk head.

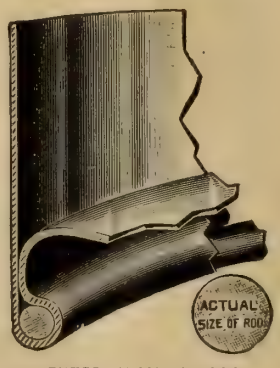
HORSESHOES — The volume of business that is being done is not large this week. We quote as follows : Iron shoes, light and medium pattern, No. 2 and larger, $3.50 ; No. 1 and smaller, $3.75 ; snow shoes, No. 2 and larger, $3.75 ; No. 1 and smaller, $4 ; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60 ; No. 1 and smaller, $3.85 ; feather-weight, all sizes, $4.85 ; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal ; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS — A sorting trade is being done at unchanged prices. The discounts are as follows : Flat head bright, 87½ and 10 per cent. off list ; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.

BOLTS — Fair movements are reported for the week. Discounts are : Norway carriage bolts, 60 and 5 per cent. ; common, 55 and 5 per cent.; full square carriage bolts, 60 and 5 per cent.; machine bolts, 55 and 5 per cent. ; coach screws, 70 per cent. ; sleigh shoe bolts, 70 per cent. ; blank bolts, 60 per cent. ; bolt ends, 60 per cent. ; plough bolts, 55



"Samson" Milk Cans and Trimmings



PATENTED, JULY 23, 1900

"Samson" Railroad or Delivery Cans and Trimmings.

"Samson" Dairy Pail Bottoms.

Section of "Samson" Milk Can Bottom.

PATENTED, JULY 23, 1900

RETURNED JUL 10 1902

The "Samson" is the strongest and **ONLY ONE-PIECE** bottom made.
Has no place for dirt or sour milk to lodge—therefore the only sanitary bottom made.
Every bottom in each size is of an exact diameter. Being stamped with a die there can be **NO** variation, as in a bottom made in several pieces.
"Samson" Railroad or Delivery Cans and Trimmings are always furnished with Seamless Neck, and Seamless or Bell Cover, which, combined with the "Samson" Bottom, makes this unquestionably the best Railroad or Delivery Can ever placed on the Canadian market.
The "Samson" Dairy Pail Bottom is made the same as the "Samson" Milk Can Bottom, and therefore has all its good features.

A complete stock of Tinned Sheet Iron in all gauges and sizes always kept on hand.

and 5 per cent.; tire bolts, 67½ per cent.; stove bolts, 67½ per cent. To any retailer an extra discount of 5 per cent. is allowed. Nuts, square, 3¾c. per lb. off list; hexagon nuts, 4c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER — As yet there has not been much business done for spring, but a good trade is looked for next week. We quote as follows: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 55c. per roll; tarred fibre, 65c. per roll; O.K. and I.X.L., 70c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

RIVETS AND BURRS — There is a fairly good trade doing. Discounts are: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, 35 and 5 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

CORDAGE — The market is firm but rather inactive at the moment. We quote as follows: Manila, 15½c.; British Manila at 13½c.; sisal, 12c. and lathyarn at 10½c. Manitoba prices are: Manila, 16c.; British Manila, 14½c.; sisal, 13c. and lathyarn, 12c.

SCREEN CLOTH — Business is quiet this week. The ruling price is $1.25 per 100 square feet.

POULTRY NETTING — A fair trade for spring is still reported. English or Canadian is quoted at a discount of 60 per cent. off 2 x 2 mesh, 19 wire, and 55 per cent. off 2 x 2 mesh heavier, Canadian list.

HARVEST TOOLS — Values are steady at a discount of 70 per cent.

FIREBRICKS — Business is quite active ex-store. We quote: Scotch at $19 to $23.50 and English at $18.50 to $22.50 per 1,000.

CEMENT — Trade now is very quiet. We quote: German cement, $2.30 to $2.40; English, $2.25 to $2.35; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.20 to $2.30 ex-cars.

METALS.

The feature of the metal market is the drop in the price of copper and tin. Pig lead is also somewhat weaker.

PIG IRON — Prices are steady with a fair amount of business being done in contracts for the coming season. Prices are steady at $21 to $21.50 for Summerlee and $18.50 to $19 for Canadian.

BAR IRON — The demand is fairly well maintained for the holiday week. Merchants' bar is worth $1.87½ in carlots and $1.95 in smaller quantities. Horseshoe is worth $2.15 to $2.20.

BLACK SHEETS — A good number of small orders are again reported this week. We quote as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON — Business is as usual. We quote as follows: No. 28, Queen's Head, $4.40; Apollo, 10¾ oz. $4.40; Comet, $4.25 with 10c. extra in less than case lots.

INGOT COPPER — The market is 2c. lower this week, dealers asking 14½c.

Fac-Simile Elastilite Tin.

Elastilite Varnish is popular down by the Sea.

ELASTILITE is doing what no other Varnish has ever done in the MARITIME PROVINCES, acknowledged to be the hardest climate in Canada on Varnish.

It is DEFYING the Salt Air and the HOT SUN by day and DAMPNESS by night peculiar to that part of Canada.

ELASTILITE has pleased EASTERN MERCHANTS because it has SATISFIED their customers.

EASTERN PAINTERS are delighted with it because they say WITH ELASTILITE IT IS EASY TO DO GOOD WORK, and it REMAINS GOOD for a REMARABLE LENGTH OF TIME.

ELASTILITE is as durable as the best Foreign or Domestic Outside Wearing Coach Body Varnishes and is only half the price of either.

Having stood the Atlantic Coast it is good enough for any country. Write for particulars and names of some merchants as references in your own district handling it.

ELASTILITE IS ALL OVER CANADA.
IN TINS ONLY WITH OUR BRASS SEAL.

INGOT TIN — For Straits, 27c. is a market price. There is but little doing.

PIG LEAD — The market is slightly lower and business is being done at $3.15 to $3.20.

LEAD PIPE — There is no change to report. We quote 7c. for ordinary and 7½c. for composition waste, with 30 per cent. off.

IRON PIPE — Shipments have been fairly heavy this week. The market is firm. We quote as follows: Black pipe, ¼, $3.00 per 100 feet; ⅜, $2.95; ½, $3.10; ¾, $3.45; 1-inch, $5; 1¼, $7.10; 1½, $8.50; 2-inch, $11.35. Galvanized, ¼, $4.40; ⅜, $5; 1-inch, $7.15; 1¼, $10; 1½ $12; 2-inch, $15.95.

TINPLATES — Business is not active and prices are not changed. Cokes are worth $3.75 to $4 and charcoals $4.25 to $4.50.

CANADA PLATE — There is nothing new to report this week. We quote as follows: 52's, $2.65 to $2.70; 60's, $2.75 to $2.80; 75's, $2.80 to $2.85; full polished, $3.75 and galvanized, $4.25 to $4.35.

STEEL — The market is firm with sleigh shoe selling in rather large quantities. We quote: Sleigh shoe, $2.05; tire, $2.15; bar, $2; spring, $2.75; machinery, $2.75, and toecalk, $2.60.

SHEET STEEL — We quote: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL — Black Diamond, 8c. and Jessop's, 13c.

TERNE PLATES — There is a fair inquiry for terne plates. We quote $7.75 to $8.00.

COIL CHAIN — Probably an improvement is to be noted in the demand this week. We quote as follows: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7¼c. per lb.; 5-16, $4.80; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.85; 9-16, $3.75; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC — Is selling at $5.75 to $6.25.

ANTIMONY—Quiet at 10c.

ZINC SPELTER—Steady at 5c.

SOLDER—We quote: Bar solder, 18c.; wire solder, 20c.

GLASS.

The winter trade is not very brisk. We quote as follows: First break, 50 feet, $2.10; second, $2.20 for 50 feet; first break, 100 feet, $4; second break, $4.20; third break, $4.70, and fourth break, $4.95.

PAINTS AND OILS.

The feature of the market this week is a drop of 4c. per gallon in the price of linseed oil. This is in sympathy with the decline on early delivery which we have noted for some time. Otherwise trade is without any feature this week. We quote:

WHITE LEAD—Best brands, Government standard, $6; No. 1, $5.62½; No. 2, $5.25; No. 3, $4.87½, and No. 4, $4.50 all f.o.b. Montreal. Terms, 3 per cent. cash or four months.

DRY WHITE LEAD—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC — Pure dry, 6¼c.; No. 1, 5¼c.; in oil, pure, 7¼c.; No. 1, 6¼c.; No. 2, 5¼c.

PUTTY — We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200 lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL—Casks, 7c.; 100 lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD — Genuine red lead in casks, $4.50; in 100-lb. kegs, $4.75; less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE—Ground, casks, 5c.; less, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL—Raw, 75c.; boiled, 78c. in 5 to 9 bbls., 1c. less, 10 to 20 bbl. lots open, net cash, plus 2c. for four months. Delivered anywhere in Ontario between Montreal and Oshawa at 2c. per gal. advance and freight allowed.

TURPENTINE—Single bbls., 58c.; 2 to 4 bbls., 57c.; 5 bbls. and over, open terms, the same terms as linseed oil.

SHELLAC VARNISH — Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS—$1.20 to $1.45 per gal.

CASTOR OIL—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL—47½ to 49c.

COD OIL—32½ to 35c.

PARIS GREEN — Petroleum barrels, 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30

days, or four months from date of delivery.

SCRAP METALS.

The price of copper is easy. Trade is rather quiet on the whole. Heavy copper and wire, 13½ to 14c. per lb.; light copper, 12 to 12½c.; heavy brass, 12 to 12½c.; heavy yellow, 9½c.; light brass, 6½c.; lead, 2⅝ to 2⅝c. per lb.; zinc, 2 to 2¼c.; iron, No. 1, wrought, $10 light brass, 6½c.; lead, 2½ to 2⅝c. per lb.; zinc, 2 to 2¼c.; iron, No. 1, wrought, $10 to $15 per gross ton f.o.b. Montreal; stove plate, $8 to $9; machinery scrap, $14; light iron, No. 2, $5 a ton; malleable and steel, $4; rags, country, 60 to 70c. per 100 lb.; old rubbers, 7 to 7¼c. per lb.

HIDES.

There has been no change in the hide market since our last report, business being confined to limited sales for immediate requirements. No. 1 hides are worth 7½c., No. 2, 6½c., No. 3, 5½c. Sheepskins are bringing 60c.

MARKET NOTES.

Sheepskins are 5c. higher.

Linseed oil is 1c. per gallon lower.

Wire nails are selling at a discount.

ONTARIO MARKETS.

Toronto, January 3, 1902.

HARDWARE.

WITH the travellers in the houses and stock-taking on the boards, a somewhat quiet and uneventful trade is all that can be expected. Quite a few letter orders for sorting up parcels have come to hand, but business through that medium naturally does not make up for what the travellers bring. A few changes have taken place in prices. The most important are advances in Stanley Rule and Level Company's products and in Champion scales. The different manufacturers' associations meet in Montreal next week. It is expected some changes will be made in prices, particularly in wire nails. Staple products of all kinds are seasonably quiet, but a week or two hence, will, of course, see trade again in a normal condition.

BARB WIRE. Business is still practically nil. The market is firmer in the United States. We quote as follows: f.o.b. Cleveland, $2.77½ for less than carlots and $2.65 for carlots. From stock, Toronto, $5.

GALVANIZED WIRE.—Prices are firmer in the United States. Here, trade is quiet and prices unchanged. We quote: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—Trade is quiet and featureless. We quote the net selling prices as follows: Nos. 6 to 8, $2.90; 9, $2.80; 10, $2.87; 11, $2.90; 12, $2.95; 13, $3.15; 14, $3.37; 15, $3.50; 16, $3.65. Delivery points, Toronto, Hamilton, London and Montreal, with freights equalized on those points.

WIRE NAILS.—The manufacturers meet in Montreal next week, and there are some who look for a reduction in prices. The Iron Trade Review of this week says that there has been a notable stiffening in the price of wire nails in the States in sympathy with the advancing rod market. Base price is unchanged at $2.85 for less than carlots, and $2.77½ for carlots. Delivery points, Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—Still dull. The base price is $2.55 per keg with 10c. allowance on carlots.

HORSE NAILS.—Very little doing. Discounts are as follows: "C" brand, oval, head, 50 and 7½ per cent. off new list, and on "M" and other brands, 50, 10 and 5 per cent. off the old list. Countersunk head 60 per cent.

HORSESHOES.—Demand is still light. We quote f.o.b. Toronto as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. (all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

SCREWS.—A moderate trade is being done for this time of the year. The discounts are as follows: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze at 70 per cent.

RIVETS AND BURRS.—There is a moderate demand. We quote: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets and burrs, 25 and 5 per cent.

BOLTS AND NUTS.—Trade is keeping up fairly well for this time of the year. We quote as follows: Carriage bolts, common ($1 list), 55 and 5 per cent.; carriage bolts, full square ($2.40 list), 60 and 5 per cent.; carriage bolts, Norway iron ($3 list), 60 and 5 per cent.; machine bolts, all sizes, 55 and 5 per cent.; coach screws, 70 per cent.

RULES AND LEVELS.—As noted in another column a new list of prices and discounts has been issued by The Stanley Rule and Level Co. There appears to be an advance of at least 10 per cent.

SCALES.—The price of "Champion" scales has been advanced about 25 per cent., the discount now being 55 instead of 65 per cent.

ROPE.—Very little doing. Pure manila, 15½c.; British manila, 13½c.; sisal, 12c. per lb.

CEMENT. There is no movement in cement worth mentioning. Prices are steady. We quote as follows: Canadian Portland, Rathbun's "Star," $2.25 to $2.65; "Beaver," $2.10 to $2.50; "Ensign," $1.90 to $2.30; German, $3.15; English, $3; Belgian, $2.50 to $2.75; Canadian hydraulic, $1.25 to $1.50 per bbl.

We have on hand a large stock of steel sheets for making

EMBOSSED CEILINGS,

etc., and are now prepared to make prompt shipment of anything required in our line, and shall be pleased to receive your orders which shall have our best attention.

The Metallic Roofing Co.
LIMITED
Wholesale Manufacturers
TORONTO, - - - CANADA

METALS.

Trade is keeping up fairly well in metals. Galvanized sheets and lead are quoted a little lower.

PIG IRON—Buyers are again beginning to look around for their future requirements, and a little more business is being done. Prices are firm and in the United States Bessemer iron continues to advance. Locally the idea as to price is still $17.50 to $18 on track Toronto.

BAR IRON—In sympathy with pig iron the price of bar iron naturally rules firm and the demand is fair. Base price $1.95 to $2.05. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

STEEL—The strength of prices is still the feature of the steel market. In the United States there has been another advance on wire rods, and billets are firmer. We quote as follows: Merchantable cast steel, 9 to 15c. per lb.; drill steel, 8 to 10c. per lb.; "BC" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe-calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2.25; reeled machinery steel, $3, hoop steel, $3.10.

BLACK SHEETS—Demand is fairly active. We quote: Common, $3 15 for 28-gauge; and dead flat, $2.50 for 26 gauge.

CANADA PLATES—Still going out freely. We quote: All dull, $3.05; half polished, $3.15; all bright, $3.75.

GALVANIZED SHEETS — Demand keeps good. Quite a few case lots have changed hands. We quote as follows: "Queen's Head" brand at $4 60 in case lots, and $4.75 in less quantities.

TIN—The demand is confined to a few small lots. The idea as to price is $30 per ton.

TINPLATES—Trade has been good, but prices are being shaded. The idea for coke plates is still $4.25 for I. C.

TINNED SHEETS — Quite a few small orders have been received this week. We quote as follows: 72 x 30, up to 24 gauge, 7½c.; ditto, up to 26 gauge, 8c.

TERNE PLATES—Dull. We quote: I.C., 20 x 28 gauge, at $8 50.

COPPER—Spot stocks of ingot copper are getting limited. Sheet copper continues in fair demand. We quote ingot at $16 per 100 lb. and sheet at $23 to $25 per 100 lb.

BRASS—Quiet. Discount is 10 per cent. on rod and sheet.

SOLDER—Trade is still quiet. We quote: Half-and-half, guaranteed, 19 to 19½c.; do., commercial, 19c.; refined, 18½c.; wiping, 18c.

LEAD—Prices are 25c. lower, and business is good at the decline. We quote: $3 50 to $3.75 for pig lead and $5 for bar.

IRON PIPE — Trade is still quiet and prices firm. We quote: Black pipe, $5.40 for 1-inch.

SPELTER—A moderate trade is being done. We quote $5.50 to $6 per 100 lb.

ZINC SHEET—Trade is quiet at $6 to $6.25.

ANTIMONY—There has been a little more activity during the week. We still quote 10½ to 11c.

PAINTS AND OILS.

Trade in paints and oils shows a very pronounced quietness this week. The houses are preparing to send out the travellers to commence their work for the coming season. The large amount of building operations that has been going on in city and country indicates a most successful season's trade. Cash sales bave been good, and the retailers are more hopeful and ought to buy more readily. The prices of paris green are very firm, and already there are a number of inquiries for that article. The prices of raw and boiled linseed oil have been lowered 4c. per gal. Otherwise there has been no change. We quote:

WHITE LEAD—Ex Toronto, pure white lead, $6.12½; No. 1, $5.75; No. 2. $5.37½; No. 3, $5.00; No. 4, $4.62½; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb. $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.

BENZINE—In barrel lots, 16½c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING — 65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC — In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2 25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY —Bladders, in bbls., $2.25; bladders, in 100 lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

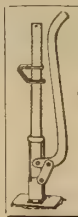
PUMICE STONE — Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1.20 to $1.30 per gal.

CASTOR OIL — English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 4 barrels, 77c.; boiled, 80c.; 5 to 9 barrels, raw, 76c.; boiled, 79c., delivered. To Toronto, Hamilton and London, 2c. less.

TURPENTINE—Single barrels, 59c.; 2 to 4 barrels, 58c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.



GLASS.

There is still a fair trade doing in glass, but some of the glass merchants are running short of the stock sizes again. The prices are unchanged. We quote as follows: Under 26 in., $4.25; 26 to 40 in., $4.65; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5.75; 71 to 80, $6.25; 81 to 85, $7; 86 to 90, $7 75; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days.

OLD MATERIAL.

The prices still continue very weak owing to the unsettled condition of the copper market. The movement is quieter. We note no further change in prices. We quote: Agricultural 60c. per cwt.; machinery cast, 60c.; heavy copper, 12c. per lb.; stove cast, 40c.; No. 1 wrought, 50c. per 100 lb.; new light scrap copper, 10c. per lb.; bottoms, 10c.; coil wire, 12c.; light brass, 6c.; heavy yellow brass,

MACKENZIE BROS.
HARDWARE
MANUFACTURERS' AGENTS,
Travellers covering Manitoba, Northwest Territories and British Columbia. WINNIPEG MAN.
CORRESPONDENCE SOLICITED.

"PULLMAN"
TROUSER or SKIRT HANGERS.
TWO SIZES

PULLMAN SASH BALANCE CO.,
ROCHESTER, N.Y., U.S.A.

8c.; heavy red brass, 10½c.; scrap lead, 2¼c.; zinc, 2c.; scrap rubber, 6¾c.; good country mixed rags, 50 to 60c.; clean dry bones, 40 to 45c. per 100 lb.

HIDES, SKINS AND WOOL.

Hides and skins are quiet. Wool continues weak. The prices quoted below are what are paid by buyers here on arrival:

HIDES—We quote: No. 1, green, 8c.; No. 2 green, 7c.; No. 1 green, steers, 8½c.; No. 2 green, steers, 7½c.; cured, 8¼ to 8¾c.

SKINS—We quote: No. 1 calfskins, 9c.; and No. 2, 7c.; deacons (dairies) 55 to 60c. each; sheepskins, 65 to 75c.; deerskins, 12½ to 14c. per lb.

WOOL—We quote: Fleece, 13c., and unwashed, 7 to 8c. per lb.

SEEDS.

The foreign demand still drags, but local competition has forced upward the price of red clover from 15 to 20c. We quote: Red clover, $5 to $5.40; alsike, $6.50 to $8.50, and timothy, $2.25 to $3 per bush.

COAL.

The situation in soft coal has become much worse and some of the local foundries will have to close down. There is plenty of hard coal, excepting in the nut size. The prices are very firm. We quote at international bridges: Grate, $4.75 per gross ton; egg, stove and nut, $5 per gross ton; soft coal, $2.50 to $3.25 in bond, according to grade.

PETROLEUM.

There is still a good trade doing. We quote: Pratt's Astral, 16½ to 17c. in bulk (barrels, extra); American water white, 17 to 17½c. in barrels; Photogene, 16½ to 17c.; Sarnia water white, 16 to 16½c. in barrels; Sarnia prime white, 14½ to 15c. in barrels.

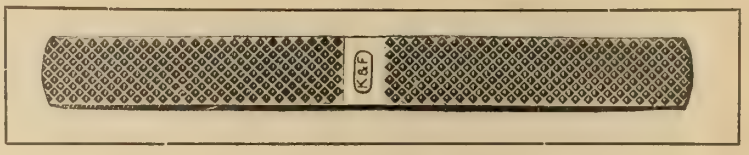
MARKET NOTES.

Pig lead is quoted 25c. per 100 lb. lower.

Raw and boiled linseed oil are 4c. per gallon lower.

The price of Champion scales is about 25 per cent. higher.

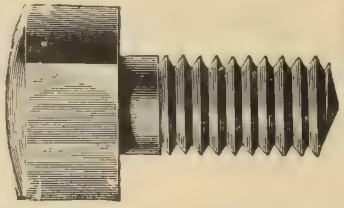
The products of The Stanley Rule and Level Co. are higher.



There have been numerous inquiries recently for paris green.

The scarcity of soft coal and coke still continues, and factories here are threatened with a coal famine.

KEARNEY & FOOTE BRAND



FILES AND RASPS

(Warranted)

Files of the above brand are standard, and are well known for their excellence of cut, temper and finish, and the K. & F. Horse Rasp is one of the leaders in this line, and is in demand in all parts of the Dominion. These goods are stocked by the following wholesale hardware merchants, and may be procured from either of them at bottom prices:

THE JAMES ROBERTSON CO., Winnipeg, Man.
H. S. HOWLAND, SONS & CO., Toronto, Ont.

TRADE CHAT.

THE St. Catharines City Council has passed a by-law providing for the purchase of a site for a new armoury.

The question of lighting Souris, Man., by electricity is now under consideration.

P. Robitaille & Fils have registered as wood and coal merchants at Levis, Que.

The Beaver Asbestos Co., of Thetford Mines, Que., has closed down for the winter.

A. O'Borne, wood and coal merchant, Montreal, has assigned, and his creditors met January 3.

R. Whitely, of Hollin, Ont., has sold out his blacksmith business and has moved away from there.

James Corbett, hardware merchant, Kingston, Ont., and his sister, Miss Corbett spent Christmas as the guest of their sister, Mrs. J. C. Hardy, Napanee.

On Thursday morning, December 26, the stables of The People's Coal Co., on Walnut avenue, Toronto, were damaged by fire to the extent of $300 or $400.

A CLERK GETS $1,500,000.

A clerk in Geneva, N.Y., has fallen heir $1,500,000. His good luck was the result of good work. As a clerk he conceived it to be his duty to master the details of the business and to be industrious. A wealthy relative who was watching his career was so gratified that he remembered him in his will to the extent of the sum named.

It is not often that industry excites the beneficence of millionaires to such an extent as this, but industry and proficiency are certain in the long run to earn recognition and reward.

It is not simply because they are ISLAND CITY PAINTS that our products are so popular with Canadian painters and with Canadian merchants--but because they are the best, go furthest, last longest, give best satisfaction.

Are you capturing your share of the Paint trade? If not, there's something wrong—Paint users cannot be satisfied with what you have been selling them, and are going elsewhere for something better. There is no necessity for this condition of affairs existing. Thousands of merchants in every section of Canada are doing a large and profitable trade in

ISLAND CITY PAINTS

Because they give entire satisfaction to their customers—they need seek no further for something better. Half the pleasure of doing business lies in the amount of satisfaction you give your customers in the quality of the goods you sell. There is much pleasure and profit attached to selling **ISLAND CITY PAINTS,** because **THEY ARE THE BEST.**

ISLAND CITY FLOOR PAINTS--dry hard in eight hours.

ISLAND CITY HOUSE PAINTS--only purest and best materials used.

ISLAND CITY PURE WHITE PAINT--
is non-poisonous—two coats cover as much as three coats of pure lead.

ISLAND CITY PURE WHITE LEAD--
pure decorators' lead.

WE MAKE OUR DRY COLORS—**Dry Vermilions, Dry Chrome Yellow, Golden Ochre, Dry French Green for Blinds, Dry Chrome Green, Dry Prussian Blue a Specialty.**

P. D. DODS & CO.

MONTREAL. TORONTO.

Mr. J. H. Morin has been appointed Managing-Partner at our Toronto Office from January 1st, 1902.

20 YEARS IN THE PAINT TRADE.

P. D. Dods & Co., Montreal and Toronto, have been in the manfacturing business for over 20 years, and each recurring year finds them better prepared to furnish everything needed in the paint trade, from dry colors to varnishes of all kinds. Their capacity has been more than doubled in the last few years, which enables them to deliver goods in almost any quantity promptly. Owing to the increased demand for their goods, they decided to open a branch in Toronto in 1896, and it has been a marked success. On January 1, this year, they admited Mr. J. H. Morin (who has been connected with R. C. Jamieson & Co. for nearly 30 years) as a partner in their Toronto branch. That gentleman will move to Toronto at once to take charge of that branch. The firm will be thoroughly represented in Western Ontario by their travellers, and they consider that it will be an advantage to the trade to wait for their representatives before placing orders.

SYDNEY BEGINS MAKING STEEL.

On the evening of December 30, the first steel cast was made at the works of the Dominion Iron and Steel Co., Sydney, C.B., in the presence of a number of the chief officials of the company, when about 50 tons of steel were turned out from No. 10, open-hearth furnace. This is the telegram sent the directors that night by General-Manager Moxham :

"Poured first lot of steel at 8 o'clock to night. Everything worked well. Steel made by ordinary pig and scrap process, 60 per cent. Belle Island pig and 40 per cent. scrap. Quality of steel is excellent."

Their blooming mill will be finished in a week or so, which will enable them to convert the ingots into billets.

HEATING AND PLUMBING

SOME BUILDING NOTES.

At Chatham, N.B., a new schoolhouse has just been completed from plans prepared by R. C. John Dunn, of Halifax. John McDonald, of Chatham, was the contractor. The building is of freestone, 76 x 104 feet, two and one-half storeys high, with a basement. There are three entrances to the main building, which contains 10 class rooms, nearly all of which are 25 x 32 feet, besides cloak rooms and an assembly hall, 31 x 51 feet. The total cost of the building is $43,000.

A new church is being erected at Concessions, N.S.

H. C. Mantz has erected a new dwelling in Goodlands, Man.

The brick work has been commenced on the Arthur Hotel, Port Arthur.

At Waterford, Ont., tenders have been taken for the erection of a new hotel.

Morlock Bros., Guelph, Ont., will immediately rebuild their upholstery factory.

The new brick residence of Thos. Vickerman, Speedsville, Ont., is being plastered.

A. Sweet & Co., Winchester, Ont., will build a new addition to their store next spring.

A project for the building of a new flour mill, at St. Marys, Ont., is under consideration.

The new High School at Victoria, B.C., is nearly completed, being now ready for the lathers and plasterers.

M. Donohue has obtained permission to erect two brick-veneered cottages on Wellington street, London, Ont.

Thos. Cutteral, builder, has been awarded the contract for extensive alterations to the Dallas Hotel, Vancouver.

G. Bishop, of Victoria, B.C., has received the contract for the building of a large new hotel, at San Juan, B.C.

Dalton & Everleigh, architects, have received tenders for the new boiler house for The British Columbian Electric Railway Co.

George Snider has secured the contract for the erection of a new brick store house at the naval yard at Esquimalt, B.C., to cost about $9,000.

Early next spring work will be commenced on the new building which is to be erected in connection with St. Michael's College, St. Joseph street, Toronto. The new structure will cost between $75,000 and $100,000.

The Guardian Fire and Life Assurance Company, Limited, have secured the vacant lot belonging to the Barrow estate, on St. James street, Montreal, and will commence a new eight-storey building next spring on that site. The property has a frontage of 68½ feet and a depth of 80 feet.

BUILDING IN MOOSE JAW.

Building operations in and around the town of Moose Jaw, N.W.T., although not so brisk as in the last two years, when over $1,000,000 were spent in buildings and improvements, yet show very substantial progress for the last year. A very conservative estimate places the aggregate amount of improvements and new buildings at between $500,000 and $750,000.

The most important structure commenced this season is the new Presbyterian church, which will cost about $15,000 when completed. The building is 75 x 71 feet, and will seat comfortably 600 souls when ready for occupation in the coming spring. Operations were commenced last May and the edifice is now under roof. Besides this, the Roman Catholics have built a church at a cost of $3,000. A large number of new schoolhouses have been built throughout the district.

BEST BUILDING YEAR SINCE 1891.

In the year 1901 there were building permits issued in Toronto representing a value of $3,518,883. 678 permits were issued in 1900, having a value of $1,903,136. In 1899, 710 permits were issued for buildings worth $2,010,446. The million-dollar hotel accounts for this startling total, which is the largest since 1891, when the permits for the new city hall brought the values up to $4,000,000.

The $3,518,883 is divided as follows: 513 brick houses, valued at $1,421,000; 95 alterations to brick houses, $96,178; 93 roughcast houses, $78,775; 5 alterations to roughcast houses, $12,000; 39 stables and sheds, $39,040; 29 stores and offices, $89,110; 43 alterations to stores and offices, $140,075; theatre alterations, $3,500; brewery alterations, $4,000; 8 summer residences, $6,375; two hospital alterations, $8,000; 2 alterations to banks, $29,000; 5 alterations to churches, $40,850; 21 warehouses, $135,200; 8 hotels, $1,048,900; 26 factories, $207,605; 11 alterations to factories, $63,175; alterations to schools, $19,500; alterations to colleges, $57,000; city buildings, $19,500.

BUILDING IN ST. JOHN, N B.

In St. John, N.B., the value of buildings constructed during 1901 is estimated at $130,000, as compared with $203,000 for the year 1900. This is a decrease of $73,000, and is attributed to the fact that the building of manufactories has been rather small and that the designs in dwelling houses has been moderate, chiefly of the two-storey wooden type.

NEW PLUMBING PLANT STARTED.

On Christmas Day the new auxiliary pumping plant at Ottawa, which cost that city $95,000, was set in motion for the first time in the presence of about 100 citizens. This new plant has a capacity of 8,000,000 gallons of water a day, and is very complete. The new pumps were made by The Ker Engine Works, of Walkerville, Ont., and cost $22,000. The shafting and turbines cost $6,700, and were constructed by The Jenckes Machine Co., of Sherbrooke, Que. Holdbrook and Sutherland were the builders of the station and its foundation, which cost nearly $67,000, the balance. The details in connection with the above were drawn up by W. J. Cranston, assistant city engineer for Ottawa, while N. J. Kerr attended to the construction.

TORONTO BUILDING PERMITS.

For the last week of the year building permits have been issued from the Toronto City Commissioner's office, to James Paul, for a two-storey brick dwelling on Robert street, to cost $2,100; to C. R. Dennick, for a two-storey and attic detached brick dwelling, at 208 St. George street, for $6,000; to the City Corporation, for a brick chimney stack at the western crematory on Srachan avenue, for $2,000; to J. McMullen, for a two-storey and attic brick residence, on Murray street, for $2,500; to The Battle Creek Pure Food Co., to erect a one-storey brick addition to their boiler house on the corner of Mowat avenue and King street, to cost $100; and to Christie, Brown & Co., Limited, to erect a five-storey brick and stone warehouse on the corner of Duke and George streets, for $50,000.

WINNIPEG'S GROWTH.

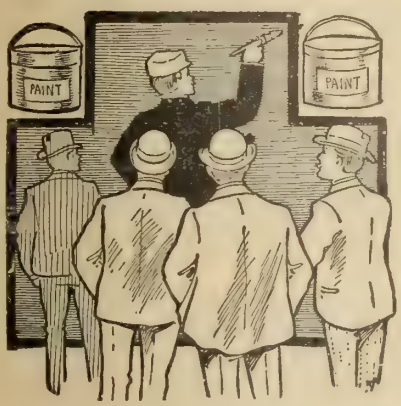
In the year 1901 the amount spent in buildings at Winnipeg was $1,587,227. And in 1900, buildings valued at $1,350,000 were constructed. This shows an increase of $237,000 for this year. The principal buildings constructed were the Alexandria block, valued at $52,000; the sheds of The Electric Street Railway Co., costing $50,000; the addition to the Bank of Hamilton, costing $35,000, and J. Leslie's furniture store, valued at $25,000.

MONTREAL PLUMBERS ELECT OFFICERS

The Master Plumbers' Association, of Montreal, held their annual meeting in the rooms of the Liberal Contractors' Club, recently, St. James street. The attendance was large. The annual reports were read and then the election of officers was proceeded with. The following were elected for 1902:

Hon. President—John Date.
President—Thomas Moll.
First Vice-President—Thomas O'Connell.
Second Vice-President—Joseph Thibault.
Third Vice-President—W. G. Graham.
Secretary—J. A. Gordon.
Financial Secretary—J. C. Brunet.
Treasurer—Captain Giroux.
English Corresponding Secretary—J.W.Hughes.
French Corresponding Secretary—Ald. Joseph Lamarche.
Chairmen of Committees—Sanitary, P. C. Ogilvie; audit, J. A. Watson; apprenticeship, P. J. Carroll.

PLUMBING AND HEATING NOTES.



Dawson & Blackwood have opened a plumbing shop at Fort William, Ont.

Mrs. J. H. Yorkston, of 250 Brunswick avenue, was sued for a plumber's bill of $4.75, which F. McLeod had against her. The denial of her being made liable for it was contradicted by two witnesses, who swore flatly that she had said, "If the landlord doesn't pay for it, I will," in their presence. The court ruled that she should pay the bill, and then may sue the landlord to recover the money.

CURIOUS MISTAKES.

SOME very curious and even comical mistakes are made sometimes by people who would not ordinarily be supposed likely to fall into such errors. A story was recently published about a farmer who ordered some repairs for a mower. When they did not arrive at the expected time he wrote to the dealer inquiring about them, receiving the reply that they had been shipped on a certain date. Inquiry resulted in the discovery that the dealer had made a slight mistake and had shipped the goods to himself. But this was not all. The customer obtained the repairs after considerable delay, and in order to impress the dealer with the value of being on time he mailed him a check for the amount of the bill, but made a mistake on his own account by making the check payable to himself and signing it with the dealer's name. This comedy of errors is about on a par with a story told by a hardware dealer from Texas who was in St. Louis last week. A regular customer walked into the store one day and bought a bill of goods amounting to a considerable sum.

"Do you wish to pay cash for the bill?" asked the dealer.

"No; I'll settle in the regular way."

"But your last bill hasn't been paid yet."

"I know it has. It was paid over a month ago and I've got the receipt in my pocket."

After considerable search he produced, not a receipt, but a post office money order for the amount of the bill and which he had supposed was actually a receipt, not knowing that the payee must have the order before he can obtain the money. It seems that he had never had any experience with remitting money through Uncle Sam's bank and thought that payment to the postmaster was equivalent to paying his creditor. He got the asked for credit, together with an explanation of post office methods.—Stoves and Hardware Reporter.

NUMBER OF DEER KILLED.

The number of deer-hunting licenses issued this year in Ontario is estimated at 5,000, complete returns not yet having come to hand. At the moderate allowance of 1½ to each hunter, this would mean that 7,500 deer were killed. The Canadian Express Co. carried alone 2,372, an increase of 878 over last year. Taking into account the number killed by settlers, Indians and half-breeds, and by those hunters who did not have to express them to their homes, there could not have been less than 8,000 or 9,000 deer killed this season.

ORILLIA AS A SUMMER RESORT.

The Orillia Board of Trade is already preparing for its summer work of extensively advertising that town as a pleasant and attractive summer resort. The Grand Trunk Railway will get out 15,000 of their Orillia and Couchiching folders, through the efforts of the board. Besides, 5,000 guide books for Orillia have been contracted for with Desbarats & Co., of Montreal, and the usual space in Smily's Summer Resort Guide, has been taken. Altogether there will be distributed over 20,000 beautifully illustrated booklets, attractively gotten up, dealing exclusively with the natural advantages for tourists and others offered by Orilla and the surrounding district. The usual amount of newspaper advertising will also be done.

NEW LIST ON RULES, LEVELS, ETC.

THE Stanley Rule and Level Company, New Britain, Conn., have issued a new list of prices and discounts to the hardware trade. The list price on boxwood rules has been entirely revised and the coming year will be subject to a base discount of 60 per cent. in place of the base discount of 75 per cent. in use the past year.

The list price of those wooden plumbs and levels, which last year were subject to a base discount of 70 per cent., has been revised, and the new list takes a base discount of 40 per cent. The same applies to the list prices of common pocket levels.

The list prices of rosewood-handled T bevels No. 25 and rosewood handled try squares No. 20, heretofore subject to a base discount of 60 per cent., has been revised, and the new list takes a base discount of 33 1-3 per cent.

A great number of the standard Bailey and Stanley planes, both iron and wood, have been regrouped and new lists issued subject to base discounts of 20 or 25 per cent. instead of the former lists subject to a base discount of 50 per cent.

A GOOD CUTLERY TRADE.

Mr. G J. Crowdy, of James Hutton & Co., Montreal, representatives in Canada of Joseph Rodgers & Sons, Limited, Sheffield, was in Toronto a few days ago. He reports hat business has been excellent, the only difficulty being inability to get orders for cutlery filled fast enough to supply the demand.

CATALOGUES, BOOKLETS, ETC.

THE SECOND OF A SERIES.

M. & L. Samuel, Benjamin & Co., Toronto, have hit upon the happy idea of issuing calendars, which may be termed companions of those of preceding years. Last year the calendar showed an interesting old-time coaching scene. This year's calendar shows a modern tandem turnout with an attractive young lady sitting in the driver's seat with a natty little footman at her side. This year's, as well as last year's calendar, is in natural colors. The issue is being rapidly exhausted, but there are still a few on hand, which will be sent out to the trade on application.

Alex. Hunter has returned to Neepawa, Man., where he will resume his former position in R. H. Hamilton's hardware store. During the summer he was in charge of a hardware store in Yorkton, N.W.T.

NEW YEAR'S DAY

WEDNESDAY, 1st JANUARY, 1902

The Directors and Officers of THE CANADA PAINT COMPANY, LIMITED, desire to send this word of good will to their constituents in Canada and abroad on entering upon a New Year's business.

A word of thanks for confidence and support in 1901, which has been the most important in our history.

Of explanation, that owing to the prevailing strife in Linseed Oil, the handling of Paints and Varnishes must be less profitable to maker and distributor until the laws of supply and demand assert themselves, which we hope will soon be realized.

Of expectation, for the business outlook of 1902 is the most promising in all Canada's history. We venture to hope that our Canadian clients will anticipate a large business, and provide for it early.

On preparation.—For the new season, and to avoid all possible delays, we commenced on 3rd December, at full Spring speed in all departments, the preparation of stock. We will thereby have in readiness 150,000 to 200,000 tins prepared and filled, in excess of anything attempted in previous winters.

On representation.—We have revised the districts, and added, where necessary, to our travelling staff, in order to have our home clients called upon more regularly than during last season. Our technical staff is also at the disposal of our friends in any matter connected with their several departments.

New features —There are several. Our 1902 Catalogue will be mailed in January to every name on our books, and it will be found worthy of careful and constant perusal.

With every good wish for 1902,

THE CANADA PAINT COMPANY,

LIMITED.

MODERN CONSOLIDATIONS EXPLAINED BY MR. SCHWAB.

CHAS. M. SCHWAB, President of The United States Steel Corporation, was the chief speaker at the banquet of The Bankers' Club of Chicago, on the evening of December 21. His address, as reported in the Chicago dailies, is as follows :

" I notice that I am down on this card to respond to the toast, 'The Natural Growth of Business Enterprises ; the Consolidations Thereof.' I have been thinking a little about this and had some notes prepared to speak on the subject of consolidations here in Chicago, but when I picked up the evening paper I saw two things that particularly struck me. The first was that the colleges in this vicinity had combined—Presbyterian colleges, I think.

" Could there be a stronger argument as to the good that comes of consolidation than that these staid college professors, with all their thought, had decided that it was to their advantage to combine their colleges ? What were they going to combine for ? They were not going to combine for the purpose of making education more expensive to the students, that is evident. But they were going to combine for mutual protection and information and good.

" Now, that is just the basis on which great business enterprises have consolidated. The trust of old is a mistaken idea. The consolidation of to-day is the proper policy. It has been borne out in every thing, even in Genesis, and so on down. The rivers combine to make the great seas ; the trees combine to make the forests. Combinations have gone on in nature forever, and they will go on in politics and business.

CONSOLIDATION IS NATURAL.

" You might just as well try to dam the Mississippi or sweep back the tides as to stop the natural consolidation of business interests. You may regulate the commerce of the Mississippi as you will, and I think its course ought to be regulated by wise and judicious legislation, but you cannot stop it. It will go on in spite of everything.

" Now, the old-trust idea was just as fallacious as anything could well be. In the first place, it was founded upon the principle of restricting the output or increasing the prices or in some other artificial way regulating the business. That is doomed to failure.

" The proper business consolidation is one that is formed with exactly opposite views. It is formed with the view of encouraging trade, of enlarging trade, and, above all, of cheapening the production of the article of which it becomes the manufacturer, and in that way increasing the trade.

" Now, it is difficult for me to exemplify this without pointing to some instances, and naturally I am apt to select that instance with which I am most familiar. I am not going to talk stocks or values. You couldn't get me to do that. But I hope you will pardon me if I refer to an industry with which I am connected. I only refer to it because I am most familiar with it and because I think it typically represents the idea of the great consolidations.

SAYS STEEL IS KING.

" The great steel industry of this country is now first of all. A few years ago cotton was king. King Cotton is now dethroned and King Steel has taken his place. The steel industry last year, to the best of my knowledge, exceeded the cotton industry by more than $100,000,000, and this year it is our belief that the steel industry will exceed the cotton industry by more than $250,000,000, so that I think steel is justly entitled to be throned and crowned.

" The advantages I will very briefly refer to as showing you an ideal consolidation. These great steel companies were not put together with the view of avoiding competition, because, except in very rare instances, they were engaged in different lines of business. But they were put together for the purpose of cheapening and strengthening the steel products and developing the interests of this country.

" In the great northwest, where we have all those ore mines, each individual company could not own the particular mine that would enable them to make the best mixture for the respective qualities of iron and steel, but by consolidation of all these interests it was possible to group these mines as one, to take the ores from the various mines to the works best suited to make the ideal mixture, to do it at the least cost and to produce the best article.

" So in transportation. Instead of a small fleet, whose steamers would have to wait at the docks for loading and unloading, as suited their respective owners' works, they now come down in rotation. They are loaded and their cargoes are not assigned to the various works until after they are well down on the lakes. Now, anyone familiar with the shipping industry will appreciate at once the great saving in economy in such a method of operation.

" So now the mills that formerly made a dozen products run continuously on one. The result of that is cheapening the product in every line, of making the steel available for many purposes for which it is not available at present, and the idea of business consolidation has been reached.

" Now, to come to the second part of my remarks, and that is this : The two things about The United States Steel Corporation that seemed to be best known and most generally discussed were, first, their capitalization, and, second, the salary of their President. Of the first of these I am not afraid to speak. Of the second, I am a little like our Hebrew friend in New York, who, when asked what he would do for $10,000 said he was ashamed to tell.

OWE DUTY TO THE PUBLIC.

"Now, these great consolidations owe a duty to the public. I am in hearty sympathy with President Roosevelt when he says that publicity is the thing that we require in all things pertaining to great industries. I second that proposition most heartily. The great combinations of capital that are not formed on a basis that will permit of a publication of their affairs are founded on an erroneous assumption, and I am not with them.

" There are many other advantages to the public in these great consolidations. The steadiness of business and the control largely of business within their power, will be well understood by the gentlemen here if they stop to reflect one moment upon present business conditions.

"In years gone by if you have looked at a diagram of fluctuations in prices you have found it a series of valleys and peaks. These great consolidations will keep that on a level. To-day the demands for steel are so great that an individual concern would undoubtedly have put the price 20, 30 or even 40 per cent. higher than it is to-day. What would have been the result ? People with enterprises in their mind would have hesitated and would have said : ' Wait, we will buy it a little cheaper later on.'

PAINTS A DARK PICTURE.

" What would have been the result of that ? Construction would have been stopped. Builders would have waited for lower prices ; railroads would not have extended until they could have done better ; but now we believe we are getting the confidence of the public in that respect. The result will be that building will go on. Railroads will be built and business generally will be on a more permanent and level basis.

" Now, I am the most enthusiastic man in the world upon the future of American industries. I believe that we are on the very threshold—I don't believe that we have reached the summit by any manner of means.

" I first became identified with the steel industry in the year 1879, and I remember very well that we prided ourselves—the whole United States—upon having produced about 600,000 tons of steel. In the year 1895 there were produced about 6,000,000 tons of steel, and in this year just ending, as nearly as we can estimate, there will be produced about 15,000,000 tons of steel in the United States.

" Now, I come to the last and most important part of my subject, and that is the relation of these great consolidations to labor. That is the subject that is nearest my heart. It is the subject of most importance to the welfare of this great United States.

COMPARES TWO NATIONS' LABOR.

" I see some of my good English friends here present. I had intended to modify somewhat what I was going to say in that respect, but I know they will be glad to hear it. I was asked by The British Iron and Steel Institute a short time ago to tell them why the English steel industry did not compare with the American.

" There are two reasons, I told them. The first is that the attitude of your labor in England will never permit you to run your mills and factories as we do in America.

" You will be surprised when I tell you that a careful survey of the whole field would seem to show these facts, that the English laborer receives on an average less than one-half of what the American receives year in and year out ; that notwithstanding that fact the costs, which I have been able to compare with the American costs, have been nearly double,

WE have the nicest set of Hose samples ever shown to the Canadian trade. Don't fail to see them.

solely by reason of the attitude of the combination, the trust of labor that predominates in England.

"It was my pleasure to speak a short time ago before a lot of labor people we brought together for the purpose of settling these questions in New York, and I said this thing, which I think is fundamentally true: 'I am in favor of labor unions. I am not opposed to labor unions, as many people think. I favor them when properly organized. I am opposed, and decidedly opposed, to labor unions where they have as their basis the restriction of output.'

CALLS ATTENTION TO WAGES.

"There is another mistaken idea about this labor question. Many people, speaking of the capitalization of the steel industry, refer to its great bond issue, but I would like to call attention to this fact—that the laborers are the first people who have a first mortgage on this great property. We pay out in round numbers $160,000,000 annually for labor. That is the interest on $3,000,000,000 of capital that must be paid before a penny of the interest on those bonds can be paid.

"Gentlemen. I stand here and say that we are not going to have any disagreement with labor over the fair return they ought to receive. We will be more than liberal with them in that direction, but we insist that we shall be treated with equal fairness; that we shall manage our works as we see fit and shall not be controlled by a trust that will regulate the output of their labor.

"We want the men to stand upon their own merits. We want the good men to come forward and we want the poor man to stand still, and that is as it should be. Many organizations insist that all men shall be leveled to the standard of the poorest, and that is on the wrong basis.

"Now, I am going to tell you the most serious thing, to my mind, in regard to the future of the great organizations of capital. The great business enterprises of the past have been built up by the individual interest and individual efforts of certain individuals. If you will look back over the great businesses that have been built up you will find that they have been the result of some one great mind, which has had all his interest in that business, who has had all his mind in that business—in other words, who has had all his eggs in that basket.

"The result of that individualism was great progress, great extensions, great economies and great successes. The difficulty with these great combinations of capital is going to be to get people to manage them.

WILL MAKE EMPLOYES PARTNERS.

"Now, I believe that difficulty can be met, and the way we intend to try to meet it is this: It is the intention of the United States steel organization to put every man in charge of a little branch of business, even a department of business, not on a salary, but on a percentage of the profits, which will be paid to him in cash and which he can invest in the securities if he wishes, and in that way get his individual effort upon his individual work.

"We don't believe that we get that from salaries, but we do believe that we can come as near making a man a partner in that direction as in any other way that has yet been devised, and, commencing with the first of the coming year, it is our intention to operate every one of our great departments on that basis.

"We shall be glad at your next annual banquet, if we have the privilege of attending, of telling you the result of that experiment."

A BRITISH FIRM'S TRADE WITH CANADA.

Richard Johnson, Clapham & Morris, Limited, Manchester, England, who have been doing a trade in metals with Canada for a great many years, have recently extended their operations here. One of their travellers visited the Dominion last year and arranged with the following firms to look after their business:—Messrs. Copland & Co., of Montreal, in the Provinces of Quebec and Ontario; Messrs. Grant, Oxley & Co., of Halifax, N.S., in the Maritime Provinces; Mr. Chas. Stimson, of Vancouver, B.C., in the Far West; Mr. E. H. Bissett, of Winnipeg, in Manitoba.

As the results of these combined efforts they have considerably increased their business operations in the Dominion in all branches, and specially in their well-known "J. C. M." brands of galvanized iron, which they claim to be fully equal to anything offered in the market, a proof of this being the number of repeat orders constantly being received.

In tinplates their "Relever" brand is largely in demand, and they look forward to an increased share of the trade for the future. They have a large and competent staff prepared to deal promptly with all orders from the Canadian market, and intending purchasers may rely on their orders being executed with every care and attention.

R. Johnson, Clapham & Morris, Limited, are manufacturers on a large scale of all kinds of wire netting, woven wire, wire work, and have an extensive brass foundry, brass-finishing establishment, and engineering works. Some two years ago they purchased a very favorably-situated site on the outskirts of Manchester, of some eight acres in extent. On this they have erected an extensive modern works, of which the main building is 360 feet long by 220 feet wide, divided into six bays of 50 feet, and one of 60 feet wide. These bays are supported by iron pillars. Early next year the firm will move into their new works, which will be electrically lighted and fitted with the most modern machinery of every kind. In addition to these works, they have erected one of the best-equipped and largest brass foundries in the North of England. The works offices, which are very extensive, are situated in a separate building adjoining the main works.

"Hardware and Metal" hopes at no very distant date to furnish illustrations of these works.

A BOOK FOR ACCOUNTANTS.

"Book Keeping for Joint Stock Companies," by David Hoskins, C.A., a treatise that has just been issued, is a valuable text-book not only for accountants, but for all employes of joint stock companies. Mr. Hoskins' long experience and exhaustive study of accountancy has enabled him within the 150 pages of his book to give many valuable hints and much information. It also contains chapters on the duties of secretary-treasurers of companies and extracts from the Ontario Companies Act, the provisions of which it is essential that company officers should be familiar with. Mr. Wm. Eddis, F.C.A., president of the Institute of Chartered Accountants of Ontario, speaks of the volume as a "valuable addition to accountancy literature. The bookkeeping and forms illustrated therein are thoroughly practical and worked out from the accountancy's standpoint." Mr. Hoskins is principal of the British-American Business College, Toronto, and vice president of the Institute of Chartered Accountants of Ontario. The book is substantially bound in cloth and gold, and published at $1.50. Copies may be had by addressing Mr. Hoskins.

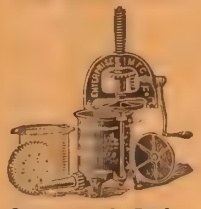
BRADSTREET'S

Capital and Surplus, $1,500,000. Offices Throughout the Civilized World.
Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.



Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

1902 GARDEN HOSE. 1902

We manufacture the most popular and best selling lines of Garden Hose in Canada. Our "Maltese Cross" brand we confidently recommend as the finest Garden Hose on the market.

We have other grades not quite so expensive, but good reliable brands, viz.: "Lion" (the popular medium-priced hose), "King" "Sun" and "Leader."

Our "Kinkproof" (wire wound) hose is wired by a special process controlled solely by ourselves, and is so constructed that it may be cut at any wind of the wire without loosening or uncoiling, the wire being self-gripping throughout each length.

Our Fame Has Been Won in World Competition.

RETURNED JAN 21 1902

We are starting out this year still far ahead in the race. We're likely to stay there, because we have something that can't be improved on—

The "Safford" Radiator.

It won fame against a world of competion. The joints of the "Safford" are its success—made without bolts or packing—can't leak.

Any information you desire will be gladly given. Write for a little booklet on heating.

Philadelphia, Pa., U.S.A.

Millions of pounds of "C" brand Horse Nails have been used in shoeing horses in Canada since 1865, and every pound has proved them to be the best Horse Nail made in Canada. They always give the farrier the most satisfactory results in every respect. They cost a trifle more, but are the most economical to use and the easiest for the merchant to sell.

We thank every dealer who has sold "C" Horse Nails in 1901, and convey to them our sincere wishes for a Happy and Prosperous New Year.

CANADA HORSE NAIL COMPANY, MONTREAL.

CHURCH'S ALABASTINE. The only Wall-Coating that is extensively advertised and in demand. That is known to be permanent, because it has stood the test of time, and that sells on its own merits. ALL DEALERS will recognize the importance of having goods in stock when customers want them. Don't put off. Order early, to get and be able to give prompt service. **Alabastine** is ready for use by the addition of **Cold Water**, a feature that is protected by patents. Beware of imitations. Write **The Alabastine Co., Limited, Paris, Ont.**, for special inducements to practical men. The trade supplied by Wholesale Hardware and Paint Dealers. Also by

THE ALABASTINE CO., Limited, Paris, Ontario.

PAGE METAL GATES are so low in price no one can afford to use wooden ones. Light, and yet strong enough to support a heavy man on the end while he swings around the circle without causing them to sag. They are neat in appearance, will last a lifetime. Will not sag nor get rickety. They are supplied with latches which allow them to be opened either way and are self acting. The only good metal gate that is low enough in price for General farm purposes. We also make Farm and Ornamental Fence, Poultry Netting, Nails and Staples. **The Page Wire Fence Co., Limited, Walkerville, Ont.**

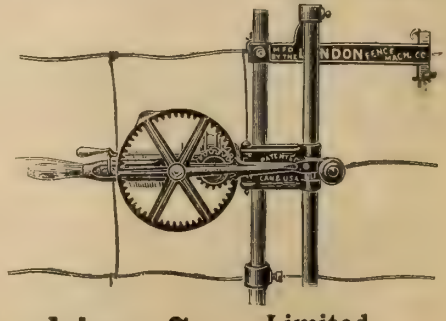
A London Fence Machine is what every farmer needs.



THEY SAVE 50 per cent.

A little trouble to introduce them will create a permanent demand. One agency only in each town.

Kinkora, Perth Co., July 15th, 1901.

Gentlemen,- I have b en successful in placing with farmers of this township about thirty London Fence Machines and a large amount of other fence supplies. My patrons are all well pleased, and speak of the London as the best machine to build a good cheap fence. I expect to sell a great many more next season, as they cannot be beaten.

I am, yours truly, D. HARAGAN.

KEMP'S Broad Hoop Roll Rim Milk Can Bottoms

possess all the points which go to make perfection in Can Bottoms. They have been used by a criticizing public for three seasons, and their popularity is evidence of the satisfaction which they gave. The Roll Rim has no sharp turns which break the grain of the metal and lessen its wearing qualities. It has a broad wearing surface and will not damage floors. They do not cost more than an inferior Bottom. **The IRON-CLAD TRIMMINGS** are made the same as the broad hoop, and differ from them only in having a narrower and thicker hoop which does not require the Roll Rim, and, therefore, can be sold cheaper. For durability and finish our trimmings are unequalled.

TORONTO LOSES A GOOD CITIZEN.

BY the death of the late Walter S. Lee Toronto loses a good citizen whom she can ill afford to lose. He was a type of the man all too rare in this Canada of ours. A business man every inch of him, yet a public man esteemed by all shades of politicians, and respected by all classes of citizens.

The greater part of his useful life was spent in that great school of finance and commercial training, the loan and savings institutions, to say nothing of the experience he gained in his connection with the Board of Trade, the Toronto and Nipissing Railway and the Toronto Industrial Exhibition Board. In 1864 he became manager of the Western Canada Loan and Savings Co., and 23 years later managing-director. At the time of his death he was the general manager of the Canada Permanent and Western Canada Mortgage Corporation, the company that was formed in 1899 as a result of the amalgamation of the Canada Permanent Loan and Savings Co., the Freehold Loan and Savings Co., the Ontario and London Loan and Investment Co., and the Western Canada Loan and Savings Co.

Great as were the demands of his business connections upon him, the late Mr. Lee took a great deal of interest in the affairs of the city of Toronto, and particularly in its educational institutions. For 35 years he was a member of the Public School Board, during several years of which he occupied the honored position of chairman. And on Monday last his name was on the ballot paper for reelection, he having died near midnight on Saturday, and after the ballots had been printed. He also served some years as a member of the Collegiate Institute Board, and the chair there fell to his honor. The presidency of the old Mechanics' Institute and the chairmanship of the Toronto General Hospital were among the many other public positions which were bestowed upon him.

The deceased came from good commercial stock, his father, the late Ald. Joseph Lee, being a general merchant in York. Messrs. A. B. Lee, president of Rice Lewis & Son, Limited; Thomas H. Lee, wholesale jeweller, and Alexander Lee, of The Copp, Clark Co., are brothers of deceased. As a business man the reputation of Mr. Lee was high, and as a public man no one in Toronto was more respected.

CANADA AND CORONATION MEMENTOES.

MANUFACTURERS and others in Great Britain are busy preparing novelties and mementoes for the coronation festivities, and in the trade and daily newspapers are to be found many advertisements drawing attention to the different lines.

It is certain that a demand will be found in this country for some mementoes of the occasion, an occasion new in the experience of most of us. But, as far as we can learn, nothing is being done by the home manufacturers to cater to the demand. If they intend doing anything it is high time they were beginning.

And not only does it appear to us that the manufacturers of this country should make preparations for the home trade, but it is possible that something might be done in the British market as well.

Canada is just now much in the public eye in the Mother Country, and ingenious manufacturers ought to be able to devise a number of lines emblamatic of the Dominion which would sell readily in the United Kingdom while the coronation proceedings were occupying the public mind.

There is, however, no time to lose. Those who would act must act now.

A good many men are cyphers in the world because they have not the ambition to cut a figure in it.

THE BINDER TWINE OUTLOOK.

PRICES on binder twine for the ensuing season have not yet been issued by the Canadian makers; but it is expected they will be in about ten days or two weeks. We have not been able to ascertain what they will be. One thing, however, seems certain, they are not likely to be low.

Stocks carried over from the season of 1901 are unusually small; in fact, we understand they are practically nil. This, of course, is the result of the heavy grain crop of Manitoba and the Northwest Territories, when every pound that could be procured was wanted.

The season was also an unusually good one in the United States. The Cordage Trade Journal, of New York, in its issue of January 2, says that the "binder twine business for the harvests of 1902 will be practically all confined to the year 1902, for the new year opens with few sales of twine for delivery this season actually made." The same authority says that no general quotations have yet been made by even the largest factors, but gives the following as the nominal figures f.o.b. eastern points:

White sisal (500 ft. to lb.).....10 to 10½c.
Standard (500 ft. to lb.).....10 to 10½c.
Standard manila (550 ft. to lb.) ....10½ to 11 c.
Manila (600 ft. to lb.).....12¼ to 13 c.
Pure manila (650 ft. to lb.).....13¼ to 13½c.

By far the most important feature of the situation is the strength of the fibre market. Referring to this, The Cordage Trade Journal says: "Those who do not lose track of events in the fibre market after they have purchased their binder twine, know that the price of sisal fibre began to advance in August last, before the lowest figures of the previous year had been touched, and that manila fibre quotations started advancing in September. Since the advances were inaugurated there has been no important weakness shown by either fibre. In a few weeks the quotations for both manila and sisal had reached figures higher than were touched at any time between July 1, 1900, and July 1, 1901."

The spot price of manila fibre in New York is 3⅜ to 3½c. per lb. higher than it was at the beginning of 1901, and for shipment 4⅜c. higher. Sisal fibre is 2½ to 2¾c. higher than a year ago.

That the outlook, not only for binder twine, but all other products of sisal and manila fibre, is strong, is quite evident.

CONFERENCES BETWEEN BUSINESS MEN AND THEIR EMPLOYES.

QUITE a number of manufacturers and other classes of business men hold conventions with their travellers, heads of departments and other employes during the holiday season when trade is quiet. It is surprising that more do not do so.

When we see that the firms most zealous in this particular are those that are the most progressive and successful we cannot but be impressed with the idea that such conventions must be helpful.

We do not claim that to these conventions must be ascribed the success of the firms with whom they are peculiar. They are the outward and visible sign that the firms who annually utilize them are of a progressive type and possess the wisdom to utilize the opportunity of meeting their travellers and heads of departments at least once a year and discussing ways and means of promoting business.

We believe that this is a principle which is applicable to all business houses, no matter whether their employes be many or few; in fact, the smaller they are the more readily can the machinery be handled. For example, a retail merchant could have a little conference with his clerks, drivers and bookkeepers once a week with little or no inconvenience to anyone. At these conferences such subjects as the most salable and profitable goods to handle; the best methods of dealing with certain customers, and ideas for window dressing and advertising might be discussed with advantage to both employer and employe. But these are only a few of the many subjects that might be discussed.

Whether such conferences are held at short or long intervals, a definite time should be fixed for holding them. With the time fixed, all would be looking forward to it, and in looking forward they would also be fortifying themselves with suggestions and schemes. Some tangible recognition of such suggestions and ideas as are deemed the most practicable for the firm to adopt would undoubtedly stimulate the efforts of the employes.

We would like to hear from some of our readers in regard to this suggestion. We invite clerks and others, as well as employers, to contribute.

DECLINES IN BUILDERS' HARDWARE

A number of American travellers have been on the Montreal market during the past week, and the prices they quote on builders' hardware are, in many cases, lower than those now prevailing. Prices in this market will, of course, be altered to suit those quoted by representatives of American houses, so that on some lines we may expect declines in prices in the near future. These will not likely be very marked, but, such as they are, they will be welcomed by retailers. Just what lines will be affected by this it is difficult at present to determine. In a few instances, in fact, the new quotations given are higher.

IMPORTANT CHANGES IN WHITE LEAD.

Quite an important change is announced this week in the price of white lead. In Montreal, the price has been reduced 12½c. per 100 lb., and in Toronto, 25c. per 100 lb. By this arrangement prices are the same at Montreal, Ottawa, Toronto, Hamilton, London, Windsor, Ont.; St. John, N.B., and Halifax, N.S. Formerly, it will be remembered, there was a difference of 12½c. between eastern and western points.

Quotations f.o.b. the above points are now: Pure, $5.87½; No. 1, $5.50; No. 2, $5.12½; No. 3, $4.75; No. 4, $4.37½ per 100 lb. These quotations are for any quantity, except for packages of less than 25 lb.

TRADE IN COUNTRIES OTHER THAN OUR OWN.

IRON TRADE SITUATION.

THE new year opens with the iron trade still under the pains of prosperity and destined to be hobbled for many weeks by the breaking down of transportation agencies. There has been little in the developments of the week to suggest the closing of a year's business. Buying has gone right on and the iron trade has crossed the line under a pressure ordinarily found in the active consuming period of the year. Not that the buying is what it was some weeks ago, but the comparison is with the quiet time that usually precedes inventory. The coke embargo upon blast furnaces has reached an acute stage. In the Chicago district 11 furnaces were idle early this week, in the Mahoning and Shenango Valleys, 20, in the Pittsburg district 12, of Southern Ohio 3, several in Virginia and Alabama, in Cleveland 2, while in other districts there is a light cutting off of production by banking for a portion of the week. The locomotive works, which are now driven to their utmost, must be looked to for relief. The market activity of the week has been shared by all lines except the few affected by the season. Pig iron has advanced, Bessemer, foundry and gray forge selling from 25 to 50 cents higher. Buying of smaller quantities of Bessemer has followed the large contracts reported last week, and $16. Valley furnace, is now the basis for round lots, as high as $16.50 in the Valley being paid. Basic iron has advanced to $15.75. Valley furnace, northern gray forge to $15 at furnace, and No. 2 foundry to $15.50 at Valley furnace. Southern furnaces that have maintained $11.50 at furnace for No. 2 followed the advance of the minority on Monday of this week, and now quote $12. Though foundries were supposed to have covered generally for the first half there is still considerable buying, some of it for the entire year, with indications that not a few are contracting to make sure of deliveries, rather than to cover contracts in hand. It was only so recently as 1899 that this sort of buying left the furnaces practically without new business through the following year.—Iron Trade Review, January 2.

OILS, PAINTS AND DRUGS IN 1901.

In its review of the oil, paint, drug, chemical, dyestuffs and kindred trades in 1901 The Oil, Paint and Drug Reporter notes that as the year 1901 advanced and the business of each month was compared with that of the corresponding month of the year preceding it was found that there had been a gain, and the close of the year proves 1901 to have been a record year, exceeding all its predecessors for the volume of business and the prosperous condition of the merchants and manufacturers of the country. The year has been notable for the discovery of new processes, labor-saving devices, and by the largely increased volume of trade. Taking the principal trades separately, it is found that while speculative operations have not been so large as in previous years, there has been a healthy growth in the purchase and sale of drugs, while both the exports of indigenous drugs and manufactured products and the imports from foreign countries show a goodly gain. In the line of chemicals there has been an extraordinary increase in production of some articles, thus displacing large quantities which had formerly been imported. The consumption of nearly all classes of chemicals has increased at a rate far exceeding the increase shown by any preceding year, while the larger number of establishments is evidence of this growth. The manufacturers of and dealers in dyestuffs have also cause for congratulation, though the increase in this line has not been so great. The manufacture of various new dyeing materials, however, has kept well abreast of the times. The trade in paints, which early in the year was feared would not prove so satisfactory as during the year preceding, increased later, and for once the old saying that "trade once lost cannot be recovered" appeared at fault. The general prosperity extended to paints perhaps a little tardily, but the almost universal report now is that the volume of business of the past year greatly exceeds that of the year preceding. To find the increase in the oil business it is only necessary to glance at the record of exports, and that there has been a large increase in home consumption may be taken without saying. A continuance of satisfactory conditions is looked for.

FINISHED MATERIALS IN ENGLAND.

There are few, if any, fresh developments to report in the market for finished materials. The position of makers at the end of this year is not entirely satisfactory, for although they have a fair number of orders on hand still, yet the new business coming forward lately, has not been of sufficient weight to warrant any very confident views as to the course of trade on the resumption of business after the holidays. In some districts the competition of Continental and even Canadian material is being felt a good deal. In Manchester, for instance, the effect of Canadian competition on local brands is widely discussed. It is pointed out that the $2 bounty given by the Dominion Government, practically covers the cost of carriage to this country, and Canadian makers are, consequently, put in a position to compete keenly with the English manufacturer. There is no change to note in the bar trade, except that as we noted last week the demand for common iron in South Staffordshire seems to be falling away a little; but the basic price is still maintained at £7, although buyers are offering less, and best bars are selling fairly well at the full figure—£8 10s.—Iron and Coal Trades' Review.

PIG IRON IN GREAT BRITAIN.

The most notable feature of the pig-iron market during the past week, perhaps, was the remarkable collapse in Scotch warrants on Friday of last week, which was attributed to the tragic death of a well-known London metal broker, followed by an announcement of the failure of a well-known London firm. The market was apparently "hammered" by bears at Glasgow, and Scotch warrants went down to 48s. 7½d. cash, as against 55s. 7½d., the quotation in our last issue—a drop of 7s. in little more than a day. Cumberland warrants were also affected, and have not since recovered. In regard to makers' iron, trade during the few days during which business was done, was not brisk, and prices remained at about the same level; but had for the most part a somewhat weaker tendency. Not only ordinary pig, but hematite, has developed a slow tone, and prices show little of the strength which marked them up till about a fortnight or three weeks ago, when the fall which has since taken place commenced. There is a scarcity of grey forge pig in the Cleveland district, and buyers have been paying for it as much as they will give for No. 3.—Iron and Coal Trades' Review.

WELSH TINPLATE TRADE.

With the exception of stoppages for coal, the Welsh tinplate trade is said to have never been brisker than at the present time. The most satisfactory feature of this industry is stated to be the development which has taken place in the direction of seeking new markets for tinplates. It is confidently believed that after the conclusion of the war, there will be a splendid market opened in South Africa. The smelting works at Briton Ferry steelworks and at the Albion works at the same place are reported to be in full operation, which is the case with the tinplate works in the same locality.—Iron and Coal Trades' Review.

DEATH OF MR. G. CRAWFORD.

The Canada Paint Co., Limited, record with deep sorrow the decease of their esteemed representative, Mr. Gabriel Crawford, which took place at his home, St. John, N.B., on the 6th inst.

Mr. Crawford's fine personality and sterling integrity endeared him to many friends, who are deeply sensible of the loss sustained by his death.

The officials and travellers of The Canada Paint Co. feel the passing of Mr. Crawford very keenly, as he was extremely popular, not only with them but with every employe of the company. His name was a household word throughout the Maritime Provinces, and The Dominion Travellers' Association, of Montreal, lose an active worker and friend, he having been connected with that organization for 17 years.

Mr. Robert Munro, manager of the company, left on Tuesday, to attend the funeral at St. John.

THE LATE MR. RUTLEDGE.

There passed away in Toronto at an early hour on Monday, the 6th instant, one of the best-known hardwaremen in Canada, in the person of Henry George Rutledge. Several months ago deceased received a paralytic stroke, from which he never fully recovered, and on the 1st instant still another was received. This one proved fatal.

Deceased was for many years buyer for M. & L. Samuel, Benjamin & Co., retiring from that position a couple of years ago when that firm sold out the hardware branch of its business and confined itself to metals.

The announcement of his death will be received with a great deal of regret, not only by the hardwaremen in Canada, but by a good many manufacturing firms in the United States who were brought into contact with him during his many years of active connection with the wholesale hardware trade.

At the time of his death the deceased was in his 63rd year.

HOW BUSINESS SUCCESS MAY BE WON IN THE 'TWENTIETH CENTURY.

By Charles R. Flint - - - - In Saturday Evening Post.

THE specialist will be the dominating force in the business world of the 20th century. The road to success lies along that line. Let the young man who starts out in life to-day or to-morrow concentrate on one thing, and he has the golden key.

The day of the all-round man is over. New conditions have come into business life; and they have come to stay. These new conditions are unfavorable to the man who can do half a dozen things. He must master one business.

UNDER THE READJUSTMENT

there is no place for the all-round man. Nobody wants him, nobody cares for his peculiar kind of ability. Industries have been rearranged. They are now separated into departments instead of plants. At the head of each department is wanted a man who knows all about this particular division, who has concentrated his entire mind and ability on its requirements and possibilities, who is, in fact, a highly trained, highly developed specialist. Men like these are scarce to-day. Hundreds of institutions are looking for them. Salaries ranging from $5,000 to $15,000 are waiting for them. My own concern is looking for half a dozen specialists to-day, rubber men, lumber men, etc. We would cheerfully pay them $5,000, a year, and even more cheerfully $15,000, for a $15,000 man is a great deal more valuable to his concern than the $5,000 man. But he has got to be a $15,000 man. Naturally he is not plentiful.

Business in a concrete form has existed as long as the world's record runs, and until recently its course of development has been practically the same as in the beginning. Now, however, we are suddenly

FACE TO FACE WITH A NEW SCHEME

There has been a complete revolution. It is doubtful if the mass of the people appreciate this, yet it is palpable to the man who has his eyes open as is the knowledge that to-day electricity is the motive power of the world. In a few years we shall wonder that we continued in our own time the crude business system of our forefathers.

Let no man delude himself with the belief that we shall ever again go back to the old methods. As soon might we expect to see the electric cars put away in the sheds to give way to the old stages. And unless the boys who are starting out in business life appreciate this and train themselves accordingly, they will be woefully handicapped.

THE NEW METHOD

is the scientific, the civilized one. It is built on the knowledge of the interdependence of men. It explodes the fallacy of "independence." There can be no independence in the world except among savages; the wild man is the only human being who is really independent. The moment you get away from the savage state you leave independence behind. All government, all society are interdependent. The new business idea, call it the "trust," if you will, recognizes this principle and develops it to its highest form. That this recognition did not come long ago simply argues a backward mental state. The old order of "independence" in business ranks with the times when every baron was independent, when he levied on the crops of his feudal retainers and was the master of their lives and families. As constitutional, scientific government has come to supplement the feudal system, so the "consolidation era" in business has come to supplant the old system.

CONSOLIDATION IN BUSINESS

has bred the demand for the specialist, and as consolidation grows, as it will, the demand for specialists will grow. That it is subversive of independence and manhood is absurd. The man who directs a department for a big corporation to-day is more independent than he could possibly be under the old conditions when he went into business for himself. He is not worried with the financial troubles and a thousand-and-one details that consumed his time without adequate return. He devotes all the time he has to that which he can do the best. Naturally the result is higher production, and a consequent betterment for the world dependent on production. Nor does the new systen make for concentration of wealth, as is so generally stated. The reverse is the fact. Out of my experience this is proven. When I was in

BUSINESS UNDER THE OLD SCHEME

there were two profit sharers in the firm, my partner and myself. Everybody else connected with our business was a salaried employe. They had no share in the earnings. Everything they produced they produced for us. Later another partner was added, but there we remained. And what is the condition now? I have 300 partners, men who share in the profits of the concern, and who are interested in preventing losses. Last year $150,000 in profits was divided among the heads of departments with us. Our clerks own $60,000 worth of stock in our establishment. Carnegie, the greatest business man in the world, has 32 partners, young men, who, having demonstrated their fitness for special lines of work, were given interests. And we are in the infancy of the new order of things.

THE CORPORATE SYSTEM.

Such a distribution of interest is impossible only under a corporate system. No man in his senses would dare risk business association with 300 men under the old partnership plan, where anyone of the 300 might involve the firm. Therefore the business remained a close corporation: the good things were distributed among relatives when they were distributed at all. Now everybody comes in on his merits. There are stock allotments, so that the able, frugal, painstaking man may almost any time acquire an interest. That this works to the interest of the man controlling the corporation is made evident from the better service we get. Almost any evening you may see clerks at work in our office. They put in this overtime because of the interest they take in the affairs of the house under the new conditions. It is never required of them that they work out of hours. It is entirely voluntary.

ALL WORK FOR THE GENERAL SUCCESS

All these things work for the general success of the business by the modern methods, and they emphasize the necessity of preparing to work under the methods. Naturally where there are great consolidations the work must be systemized. Production falls into departments, and at the heads of these departments must be specialists. The science of consolidation is not to bring competing interests together in order that prices may be raised. That is a foolish system and can only beget more competition. A combination to be persistently successful must be so managed that the same goods or better goods, may be produced at lower prices. This can only be brought about by scientific supervision. And there is the source from which springs the demand for expert specialists. It is for the young men to take advantage of this demand.

Of course, the young man who starts out with an inherited fortune is not constrained to follow this plan. He can diversify his interests. It is the part of wisdom for him to do so. He protects himself if he is not dependent on one industry alone. But even a rich man's son might very well train himself as a high class specialist. It will give him knowledge and power that in after life may prove exceedingly useful.

AN EXAMPLE.

J. J. Hill, President of The Great Northern Railway, is a magnificent example of the possibilities that lie before a specialist. Mr. Hill is a specialist, has always been a specialist. He has devoted his entire time, attention and ability to railroading. He is to-day the greatest railroad operator in the world. There is nothing about the business that he doesn't know thoroughly. He has studied the business from A to Z, and is master of all its details. Thanks to this thorough knowledge Mr. Hill has made himself one of the richest men in America.

Capital is always eager to associate itself with such men, but capital is mighty shy in having to do with men who are not master specialists. In my own case I always insist that my associates shall be specialists. I am always open to a good business enterprise, but I make sure that the men who are to handle the enterprise know all about it. And I also insist that they go into nothing else. It is distinctly stipulated in all our business contracts that the men in charge of our lumber interests have no other interests, that our rubber men con-

HAMILTON, ONT.

fine themselves to rubber, and so all along the line. It is to this rule and its enforcement that I attribute much of the success we have met with in our business enterprises. It has brought and holds for us a class of thoroughly trained specialists whose minds dwell continually on the one thing in which they are engaged. Thus we get better results than do concerns whose managers have to diversify themselves.

AMBITION.

Everybody who amounts to anything is ambitious. He wants to get to the top, to become rich, to control things; to be a power. This laudable ambition under the new way of the business world, will prove exceedingly dangerous if it leads the young man into general industries. In the formation period it was possible for men to go into different things and carry them through successfully. I, myself, for example, without any particular qualifications as a specialist, have been enabled to aid in organizing a number of diverse industries. But the situation with me was peculiar and unusual. I had been for years a member of a large commission firm which was the largest buyer in the United States of general manufactures for export. We handled evetything from needles to locomotives. When the era of consolidation came I was in a position to deal intelligently as the representative of the different interests. I knew all the principals from years of business association, and, in a superficial way, I was familiar with the requirements and shortcomings of the various industries.

Now the formation period is practically over. We have settled down to doing business under the new plan. We have done very well so far; we are going right along the same line. Nothing can stop the development and expansion of the new trade scheme. The business of the world is going to be divided up more and more into departments.

Success is to be won in getting at the head of one of the departments. It is the 20th century method.

Wise Preparation

for the painting season that will soon be here, means a good stock of

THE SHERWIN-WILLIAMS PAINT

We are planning for the biggest year we have ever known. We believe there will be more painting done this year than ever before, and we mean to get our share of the business. We have prepared for a big season.

If you join with us you can get the lion's share of the trade in your locality. We'll give you the methods and advertising to get it and the paint to hold it after you once get it.

There's money for you in our paint agency proposition. If you want to investigate send for our "B-13 Booklet," free, but full of valuable information for wide-awake paint dealers.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CLEVELAND.

CHICAGO, NEW YORK, NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY.

MARRIAGE OF A HARDWAREMAN'S DAUGHTER.

THERE was an interesting home wedding in Tottenham, on December 26, when Maude, the only daughter of L. P. Foucar, hardware merchant, was married to Mr. H. J. Strong, of Windsor, Ont. The ceremony took place in the parlor, which was softly lighted by candles and decorated with holly, a sprig of mistletoe being suspended immediately above the bride. Rev. Mr. I. Couch was the officiating clergyman. Miss Nellie Large, of Alliston, acted as bridesmaid, and Mr. Strong was assisted by his brother, Albert, of Toronto. As the bride entered the drawing room Lohengrin's wedding march was played with beautiful effect by Miss Maude Strong, sister of the groom. The bride was gowned in her travelling suit of navy blue camel's hair cloth and tucked with white taffeta blouse with chiffon applique trimmings, and carried a shower bouquet of white 'mums' and sacred lilies. Her going away dress included a navy blue taffeta silk blouse. Her hat was of white camel's hair felt, trimmed with navy blue panne velvet and white dove and ospreys. The bridesmaid was attired in a pale blue foulard silk gown. The groom's gift to the bride was an excellent fleurs de-lis brooch, set with pearls, and to the bridesmaid a pearl stickpin. The bride was also the recipient of many handsome and useful presents. At the conclusion of the ceremony the bride and groom received the hearty congratulations and good wishes of those present, after which all sat down to a wedding dejeuner very daintly served by Mrs. Crossland, caterer, Barrie. The guests were only the near relatives and intimate friends of the contracting parties, and included the following: Mr. and Mrs. J. G. Strong, Mrs. C. Bingham, Mr. Arthur Strong and Mr. W. E. Bulmer, of Toronto; Miss Bertha Nicol, of Tottenham; Miss Davis Ivy, Miss Pringle and Miss L. Elliott, Newmarket; Mrs. Wickens, Barrie; Mr. T. E. Langford, Shelburne; Mr. J. McCullough and Mrs. E. Munro, Hamilton; Dr. Hoggan, Windsor; Mr. and Mrs. R. E. Strong, Fernie; Mr. and Mrs. W. L. Newsom, Vancouver, B.C.; Mr. and Mrs. W. K. Foucar, Bradford. After the luncheon a very enjoyable time was spent in complimentary speeches and toasts and the happy couple departed amid a shower of good wishes extended in a very hearty way.

ENTERTAINED THEIR TRAVELLERS.

H. S. Howland, Sons & Co. entertained their travellers at luncheon on Saturday last at McConkey's, at the conclusion of which a conference on business matters was held.

TORONTO BOARD OF TRADE'S NEW SECRETARY.

The Toronto Board of Trade has appointed Paul Jarvis, as secretary, to succeed Edgar A. Wills, who has resigned his position to accept a situation with Hiram Walker & Co., Walkerville, Ont. The new secretary will enter upon his duties on January 15. He was educated at Trinity College School, Port Hope, Ont., and Upper Canada College, Toronto. His business career was started in the Dominion Bank. He has been in Winnipeg, and also in Buffalo, where he was chief accountant of The World Medical Dispensary Association, of Buffalo, and had charge of from 300 to 400 employes.

Mrs. Gray was appointed as assistant secretary. She has been in the secretary's office for nine years in the capacity of head clerk, and has proved herself a valuable and efficient official.

BAINES & PECKOVER.

R. A. Baines, manufacturers' agent, has removed from 39 Scott street to 124 Bay street, Toronto. He has taken Mr. C. R. Peckover into partnership, under the style of Baines & Peckover. The firm will carry a larger stock of the different lines it handles, with the addition of wood screws. The latter are made by The Chalcraft Screw Co., Brantford, Ont., who have recently gone into that branch of manufacture.

CATALOGUES, BOOKLETS, ETC.

THE B. GREENING CO.'S CATALOGUE.

We have received from The B. Greening Wire Co., Limited, an advance copy of their annual calendar for 1902. There is very little change in its make-up, the leading features being good bold type that can be read from some distance. The extra spaces of each month are filled in with attractive cuts illustrating the principal seasonable lines of manufacture.

We are pleased to hear that this enterprising firm have had a very successful years' business and prospects are bright for the coming year.

They report that some important changes are contemplated and being made. Contracts will be signed in a few days for the erection of fine new offices. Plans are being prepared for a large new paint tower that will contain all the latest improvements. They have just installed a new and up-to-date plant for the manufacture of poultry netting, lawn fencing, etc. Their last catalogue was issued in 1900 and should be in every hardware merchant's office.

GREETINGS FOR THEIR FRIENDS.

By way of extending their wishes and congratulations for the new year, the Dominion Radiator Co., Limited, Toronto, are issuing a neat and attractive folder and sending it to their friends and patrons. On the front cover is the picture of Old Time marching away with his sickle over his shoulder and his hour glass in his hand. In his rear is the figure of a red jacketed young woman standing fast to a Safford radiator. The motto engraved on it reads: "Time Flies, Safford Stays Forever."

SNOWDON & PATERSON'S CALENDAR.

Snowdon & Paterson, manufacturers' agents, Montreal, who represent firms having headquarters in Toronto, Montreal, London, England, and Glasgow, Scotland, have issued a neat calendar this year with the names of the firms they are agents for and their lines of goods carried by them printed thereon.

A VARNISH FIRM'S CATALOGUE.

The Imperial Varnish and Color Co., Limited, Morse street, Toronto, make a specialty of manufacturing high-grade varnishes. Their stock comprises all kinds, from the finest piano, boat and casket to agricultural implement and common house varnishes. Besides, they carry in stock a full line of dry colors, enamels and japans. Their new price list for 1902, just issued, has a neatly-embossed cover, with a neat design of a maple leaf and monogram in front, underneath is the firm's name in gold letters on a bluish background, surrounded by a gold border. Inside are views of the company's premises and of the various departments from the filter and melting to the storage tank rooms.

A USEFUL SOUVENIR.

The Canada Hardware Co., Limited, Montreal, are distributing among their friends a neat and useful New Year's souvenir in the shape of a celluloid-covered note-book. Besides blank space, it contains a good deal of interesting information of a general and particular nature. Readers of HARDWARE AND METAL can secure copies upon inquiry, mentioning this paper.

THE NEW MONTREAL SECRETARY.

Mr. E. H. Cooper, who during the last 18 months has been a member of the editorial staff of HARDWARE AND METAL, in Montreal, has severed his connection with this paper for the purpose of assuming the secretaryship of the Montreal branch of the Canadian Manufacturers' Association. While regretting that Mr. Cooper has severed his connection with our staff, we must congratulate the Manufacturers' Association on securing his services. He is energetic and has a large fund of commonsense. This, with his journalistic and university training, should make him a valuable secretary to such an important body as the Canadian Manufacturers' Association.

During this year nearly 17,000 bbls. of dynamite have been handled in Hull, Que., without a single accident.

TRADING-STAAMP LAW IN FORCE.

THE Act passed at the last session of the Ontario Legislature prohibiting the use of trading stamps went into force on January 1. On that day the various offices of the Dominion Trading Stamp Co. throughout Ontario were closed, and the following circular was sent out from the head office in Toronto to merchants using the stamps:

To Merchants using our Trading Stamps:

Gentlemen,—The statute prohibiting us giving, receiving or dealing with our trading stamps came into force this morning. The Court of Appeal has not yet delivered judgment on the question of the validity of the statute, and we find ourselves obliged by law to close our doors until such time as a decision is given and our right to continue business established. We must obey the law so long as it remains in force. In the event of judgment being given against us, we intend to appeal to the Supreme Court of Canada. We regret this delay, but cannot do anything to avoid it.

In the meantime the trading stamp business will remain at a standstill. We wish you would kindly request your customers to retain all trading stamps they have on hand until the matter is definitely settled.

You will please return any stamps you may have on hand, and pay for those used to our representative presenting this letter. Hoping to obtain a favorable decision and resume business at an early date, we are,

Yours truly,
Dominion Trading Stamp Co.

A DISSOLUTION.

The firm of Lamplough & McNaughton, Montreal, has been dissolved and a new partnership registered. The business will be carried on as in the past, by F. W. Lamplough and J. P. McNaughton, under the same name, as agents for Theile & Quack, Hamburg, and other European manufacturers.

PAST AND FUTURE

THE PAST with us has been a prosperous and successful career of 31 years' standing. During the time we have developed a large business and perpetuated for our products a lasting reputation.

THE FUTURE will be an endeavor to surpass the achievements of past years, an endeavor to enlarge the scope of our influence, and to create additional favor for

Iver Johnson - Guns, Revolvers and Bicycles

QUALITY OF ENGLISH LINSEED OIL.

The Editor HARDWARE AND METAL,—In your issue of January 4 I read an article in reference to English linseed oil of inferior grade being offered in this market, and, as one of the principal importers in Canada of English linseed oil, I feel it my duty to again refer to the matter through your valued columns with a view to relieving the minds of Canadian buyers generally from the erroneous impression they must naturally inherit from such a report. I have not heard of an inferior grade of English oil being offered in Canada and do not believe that any responsible firm would undertake to misrepresent the value or purity of such an article as linseed oil with a view to making sales, knowing that if they did, not only would they be liable for inevitable damages which would result from the use of adulterated oil but their reputation as linseed oil merchants would be gone forever. Furthermore, the Canadian trade is too wideawake these days to be taken in in such a manner, and I venture to say that not a single Canadian buyer of linseed oil would entertain doing business in an article as important as this with any outside firm or one whose reputation in the linseed oil trade is not already established.

Our firm have been in the linseed oil trade for many years, and while we handle Canadian manufactured linseed oil very largely, we also buy and sell considerable English manufactured linseed oil. Our principal brand of the latter is "Stewart Bros. & Spencer's," which is well and favorably known throughout Canada, and invariably commands a higher price than any other make.

In justice to the above firm, whom we represent in Canada, as well as our own firm, as dealers in "genuine" linseed oil only, it devolves upon me to at once clear the atmosphere of these unreliable and damaging reports, and in my effort to do so request that you kindly publish this letter in your next issue.

J. WATTERSON,
Of J. Watterson & Co., Montreal.

St. John, N.B., January 6, 1902.

THEY ARE AMENABLE TO THE LAW.

Editor HARDWARE AND METAL: Will you kindly answer in the columns of your valuable paper the following question in reference to the early-closing by-law? About two years ago the merchants of this village attempted to introduce an early-closing system and circulated a petition among the business people of the town, agreeing to close their places of business at 7 o'clock every night except Wednesdays and Saturdays, and to petition the town council to pass a by-law to this effect, and on anybody found gulity of violating such by law a fine of not more than $20 and not less than $5 be imposed. The above petition was signed by all merchants. The town council seeing nobody opposed to it passed such by-law. Since then a number of new concerns have opened a place of business and refuse to comply with this by-law, and also a merchant who formerly signed the petition. Now, the question arises can they be forced to comply with this by-law? By answering the above in your columns you will will greatly oblige,

MERCHANT,

New Hamburg, Ont., January 7.

[Remarks: Provided the by-law has been properly carried there is no question about the question of conformity to it by those who move into the town subsequent to its adoption by the council. The fact that they were not party to the petition asking the town council to enact the by-law does not absolve them from obeying its provisions. If the sentiment of the majority of the storekeepers is against the by-law it may be repealed, but until such time as that is done everyone is legally bound to close his store at the stipulated hour.—THE EDITOR]

MAY BUY FROM CANADA.

H. Becker, of Becker & Hoag, a well-known financial house having offices in Berlin and Paris, is in Canada, where he has come to look very thoroughly into the graphite and corundum prospects of the country. The firm which he represents will open a large trade with this country, providing they turn out as good as he expects. Hitherto they have secured all their raw materials from the United States.

A CASE OF COLOR.

J. D. Young had some painting done at 329 and 331 Markham street, Toronto. Wm. White did some work there for Young, and, as there was a dispute, sued him for $37.90. Young put in a counter claim of $8.22.

The case came up before Judge Morson in the Division Court on January 9. Young claimed that White was to paint the doors a dark oak, while the fronts were to be cream color, but neither the front or doors came out right. He said he was willing to pay for the work as soon as it was done properly.

White, who is a painter of 20 years' experience, swore that he was to paint the houses white, but that Young afterwards changed the color to light cream. Cream then was put on two coats of white, which produced a stone color.

White obtained judgment for $35 84. All that was allowed on the counter-claim was $1.15.

PERSONAL MENTION.

Mr. Frank Child, of Aaron Child & Co., hardware merchants, Gravenhurst, spent part of the holiday season in Toronto.

Mr. C. F. Grover, who has travelled in Western Ontario for H. S. Howland, Sons & Co., Toronto, for some years, has accepted a position with the Dominion Wire Manufacturing Co., Limited, Toronto and Montreal, and will represent that firm in Ontario, west of Toronto, hereafter.

ST. JOHN, N.B., HARDWAREMEN.

At the eighth annual meeting of the St. John Iron and Hardware Association, held in their rooms, on Monday evening, January 6, 1902, the following officers for the ensuing year were elected:

President—Mr. S. Hayward.
Vice-President—Mr. P. McMichael.
Secretary-Treasurer—Mr. J. J. Barry.
Directors—Mr. W. H. Thorne, Mr. T. McAvity, Mr. R. B. Emerson.

It was moved that the association hold their annual dinner on or about January 22, 1902.

BLAZE IN HARDWARE STORE.

There was a fire in the hardware store of Magnan Freres, 306–308 St. Lawrence street, Montreal, at 10.30 o'clock on Wednesday night. It started in the cellar, where one of the corners and ceiling were burned, but the fire caused very thick smoke, which occasioned some damage to the stock in the upper store. The loss will probably be nearly $1,000, and it is covered by insurance. The firemen of the centre used a stream before the blaze was under control.

FOR SALE.

GOOD HARDWARE AND TINWARE BUSINESS and premises in small town, splendid farming locality. Excellent opportunity for two live men. Too much work for owner. Apply, Box 76, HARDWARE AND METAL, Toronto. (5)

FOR SALE.

STOCK OF HARDWARE IN A HEALTHY, growing town in one of the best farming sections of Nova Scotia. Every facility for doing a good and increasing business. Apply HARDWARE AND METAL, Box 74. (4)

WANTED.

BY A WINNIPEG WHOLESALE HARDware firm, two first-class Hardware Clerks. Must have a thorough knowledge of hardware in all departments. Address applications, stating age, experience, references, married or single, etc., Drawer 1475, Winnipeg. (1-tf.)

NOTES.

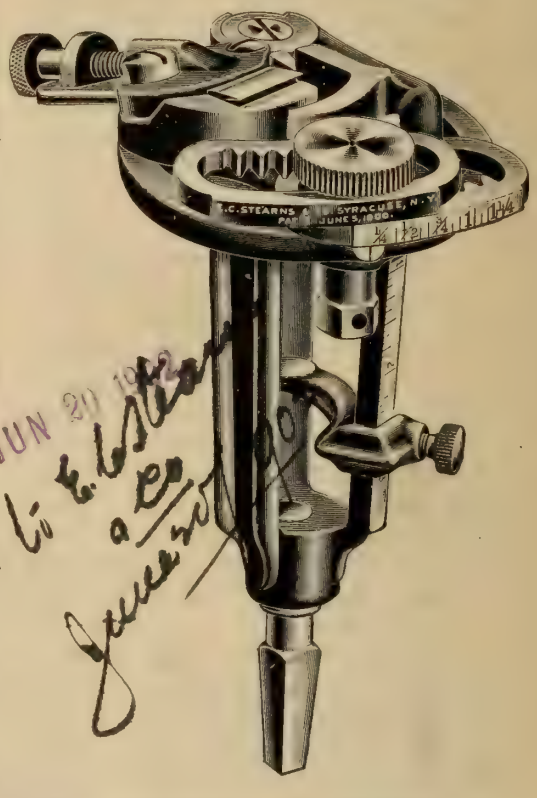
The Manitoba Society of Engineers and Architects is applying to the next session of the Legislature for a charter.

Winnipeg's first paint factory is in operation. The G. F. Stephens Co., Limited, have built one at the rear of their wholesale warehouses, and it is now in working order.

C. C. Macdonald, formerly Dairy Superintendent for Manitoba, has severed his connection with The Melotte Cream Separator Co., of which company he was a member. It is understood that Mr. Macdonald is likely to represent some other separator.

THEIR CAPITAL IS NOW $1,000,000

The enormous increase in the business of The Dominion Bridge Co., Montreal, has rendered it necessary for them to increase their capital. This they finally decided to do at a meeting of shareholders on December 27, when the capital was brought up from $500,000 to $1,000,000.



EMPLOYES DINE.

On Monday evening, December 30, the employes of The Portland Rolling Mills, Limited, St. John, N.B., held a reunion and dinner at the Park Hotel, when a delightful menu and an excellent programme of vocal and instrumental music, dancing, etc., were provided. It is needless to say that the sturdy iron-molders were just as good men in their recreation as in their business. About 60 were present, among the invited guests being D. J. Purdy, M.P.P.

The chair was occupied by Eben Perkins, superintendent of the mills. The entertainment closed at midnight by the singing of "God Save the King."

HOLLOW AUGER.

E. C. Stearns & Co., Syracuse, N.Y., have recently placed on the market a new auger, the No. 33 hollow auger, which combines all the desirable features of the well-known Stearns No. 3 hollow auger, with

other improvements, most prominent of which is a patent adjustment of the knife, doing away entirely with the use of a screwdriver and hammer in setting the knife. It cuts any size tenon from ¼ to 1¼ in. It is superior in style and workmanship to any on the market, with its lustrous black and red enamel and its bright parts heavily nickle plated and polished.

E. F. Cowan, storekeeper and lumber merchant, Novar, Parry Sound District, has made an assignment to Fredrick H. Lambe, assignee, of Hamilton. His liabilities are estimated at about $8,000, his creditors being chiefly in Toronto and Hamilton.

MACHINERY DEPARTMENT

THE EFFICIENCY OF TOOL STEEL.

UNDER the auspices of The Society of German Engineers, the largest and richest engineering society in the world, some interesting investigations have recently been made into the difficult problem of ascertaining the suitability of modern tool steels for high-speed cutting tools. The problem has been worked out with characteristic German thoroughness, and the report on the 800 tests involved, which has just been published, is a document of great interest and of permanent value.

The remarkable qualities displayed by the Taylor-White tool steel during the trials conducted by The Bethlehem Steel Co., at the Paris Exhibition of 1900, at once attracted the attention of engineers from all parts of the world, and, as an immediate consequence, many makers of special steels were induced to bestir themselves vigorously in search of new methods by which they hoped, if not actually to rival the performance of the Taylor-White brand, at least to increase very largely the cutting speed and the general efficiency of their own products. As the result of unflagging efforts in this direction, several firms have been able to place on the market steel-turning tools which show a notable improvement in cutting efficiency and resistance on the tool steels hitherto in ordinary use; but though the superiority of such steels is on all sides admitted, it was obviously desirable that the economic advantages to be derived from their use should be established by means of a direct comparison with former methods of working. The Berlin Section of the Society of German Engineers came forward with an offer of assistance towards the realization of this object. A committee was appointed consisting of a number of representatives from leading German engineering works, with Mr. O. Lasche, works manager to the Allgemeine Elektricitats-Gesellschaft, as president, for the purpose of carrying out all necessary arrangements for making the experiments. The German Niles Tool Steel Works placed at the disposal of the committee one of their large standard lathes, and Mr. Lasche's firm supplied an alternating-current motor for independent driving. After careful deliberation it was decided to invite the cooperation of the makers, whose steel was to be tested, because they were considered the best qualified to select the proper shape, and the most suitable brands for particular kinds of work. Most of the members of the committee were, moreover, unfamiliar with the new material and its possibilities, and they relied on the judgment of the makers to determine the limit of cutting speed, the rate of feed, and the depth of cutting which could with safety be permitted.

When all preliminary details had been completed, several steel makers of repute were requested to furnish samples of their new brands for purposes of testing. These firms, The Bergische Stahl-Industrie Gesellschaft, of Remscheid, Bohler Brothers & Co., and The Poldi Works, both of Vienna and Berlin, responded to the invitation, and devoted themselves unremittingly to the furtherance of the committee's plans. Trials were made of the endurance of the steels when working on all kinds of material of the most varied forms, but the chief tests were directed to show:

(1) What extent of surface could be machined in a given time, with a given depth of cut and any rate of advancement.

(2) What weight of cuttings with maximum depth of cut could be turned off in a given time.

Most of the steels were procured from the makers as finished tools. They had been hardened and prepared by a process which it was desired to keep secret, and it was therefore possible to grind them in the works to a certain extent only, for as soon as the hardened portion was worn off it became necessary to return them to the manufacturers for retempering. In any case, the forging of steels of such special compositions as these is beyond the resources of most works; and repairs can only be carried out properly at the original place of manufacture. The following table gives the name of the brands, and the number of test pieces from each firm of makers:—

Manufacturer	No. of Pieces	Self-hardened Brand	No. of Pieces	Hardened by Secret Process Brand
Bergische Stahl Industrie	64	L	—	—
Bohler Brothers	16	Titan-Boreas	78	Rapid
Poldi Works	86	Diamond 000	13	Schnelldreher

The three brands—"L," "Titan-Boreas," and "Diamond 000"—are hardened by heating them to a certain temperature and then allowing them to cool slowly in the air. Of the other two brands the committee could give no particulars as to composition or method of preparation, both being kept secret by the respective owners. In the case of the two first-named firms the steels in no way differ from the product which the firms have for some time past put on the market. The Poldi Works, however, have not yet fully tested the capabilities of the new brand "Schnelldreher" (quick-turner), and although the tools of this steel seemed to be of pre-eminent quality, the firm do not guarantee absolute uniformity of quality. A summary of results may be seen in the following table:

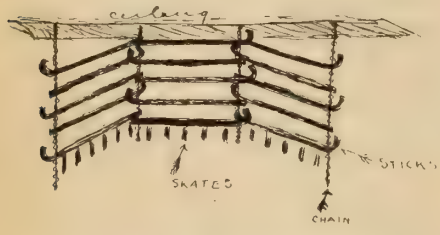
Firm	Speed of Cutting in Inches per Second	Total Weight of Cuttings per Sec. lb.	Total Surface Machined per Sec. Sq. Inches	Duration of Cutting-edge till Blunted Minutes
Bergische Stahl Industrie	0.29	0.321	0.0020	309.56
Bohler Brothers	0.29	0.423	0.0027	357.83
Poldi Works	0.29	0.213	0.0013	184.73

The grooving of chilled rolls, all of equal size and composition, formed the basis of the tests from which the above results were obtained.

The experiments made by the committee cannot be regarded as exhaustive, but they may induce others to compare the results with their own practice, and thus enable them to judge whether the tools and the tool steel made by them are as efficient as they might be, since it is only by studying the best available means that engineers can maintain a high degree of efficiency in their works. That an increased power is necessary for driving the machinery is in one sense true, but the power needed to turn off 1 lb. of cuttings is the same as before; it is, therefore, only the power used per unit of time that is greater. The question of the cost of special steels has not been taken into consideration, nor should the works-manager attach too much importance to the price of good tool steel. In any circumstances it only represents a small fraction of the total capital, and it is vastly more important to turn out heavy work in the least possible time than by mistaken economy to save a little extra money on high-class tool steel. The use of powerful machine tools with a high speed should be aimed at, and in the case of older workshops with slow driving the heavy tools might be readily adapted for independent driving.—Ironmonger.

ACTION RE PARIS GREEN.

Judge Sterling B. Toney, of the Circuit Court, of Jefferson County, Ky., recently rendered an opinion in a curious case. A man was employed last July to sprinkle paris green on potato vines to kill lady bugs, and on account of the heat he opened his shirt, with the result that he was poisioned by the paris green. He sued his employer, who entered a demurrer to the petition, and the learned judge sustained the demurrer for the following reasons: The plaintiff had no right, in foro conscientiae or in foro externo, to make an exposure of himself in the way he did while engaged in killing lady bugs; the defendant exceeded the scope of his employment in sprinkling paris green elsewhere than on the potato vines, as his special and exclusive agency was to kill lady bugs basking in the shade of said potato vines; the plaintiff's act in allowing defendant's paris green to come in contact with his flesh instead of with the flesh of the lady bugs, was unauthorized and ultra vires; the mental and physical suffering of which the plaintiff complains was the result of his own wrong in misapplying the defendant's paris green to purposes other than those for which he was employed to apply it, and, besides, is damnum absque injuria; the plaintiff, in opening his clothes and exposing himself to the lady bugs and the paris green, was guilty of contributory negligence; the plaintiff knew as well as the defendant that paris green was poisonous, and if he did not know that paris green was a poison, then this suit should not have been brought in his name, but by a committee appointed to represent him.



The estimated loss to the general store of John McConville & Co., Texada City, B.C., by fire, is $400; fully covered by insurance.

THE ART OF WINDOW DRESSING.

Hints by an Expert.

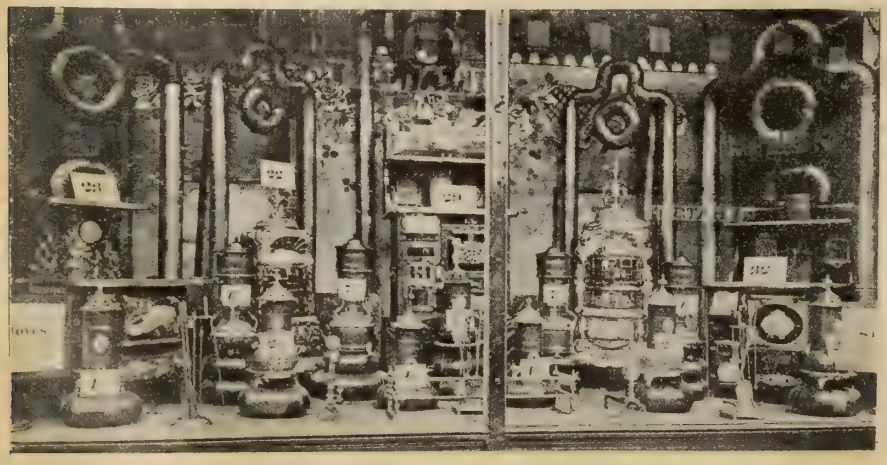
SKATE AND HOCKEY STICK DISPLAY.

NOW that the skating season is around again, one of the principal lines to be kept shown in the windows is hockey sticks, skates, pucks, straps, and everything pertaining to these lines. If your window is oblong or square the following suggestion may be of aid in making a display of these lines. Take four lengths of small jack chain (brass or nickel) and suspend them from the ceiling as shown in the rough sketch, and tie hockey sticks from one to the other and in this way you can make a good stocky overhead trim. Skates can be shown on them by shoving the handle of the stick through the front part of the skate after you have fastened the crooked end of stick to the chain. The cut will explain the idea.

No. 1—Skate and Hockey Stick Display.

To suspend the chain from the ceiling use a heavy screw-eye and see that it is well fastened so as to hold a good weight. This idea can be carried right down to the floor and the skates could be hung on every hockey stick. In place of the skates, straps can be shown on the sticks. Skates should also be shown on the floor on a white canton flannel which shows them up well. Black cambric or print makes a good ground for skates, but I think the white shows them up better, especially at night. This suggestion for a display of these wares is an excellent one, as it gives the trim a massive and stocky appearance and it is also very simple and inexpensive. If you intend to use the skates on the sticks the full height of window it would be advisable to use an extra heavy chain so as to insure safety. A neat card worded after the following would complete the trim:

A COMPLETE LINE

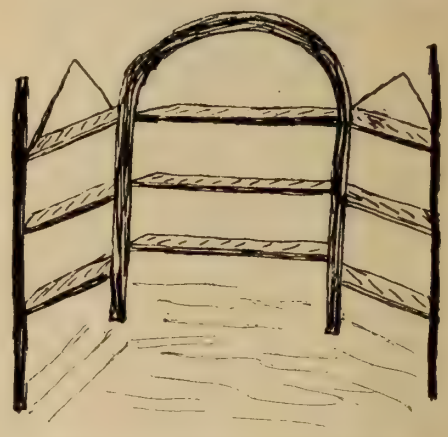


—: of :—

SPORTING REQUISITES

: : at RIGHT prices. : :

A STOVE DISPLAY.



The illustration No. 2 presents an idea that can be carried out on a smaller scale by the average hardware house. The back of the window is covered over with plain ingrain wall paper (red) with a border to match. The floor is carpeted with cheap straw matting, which can be bought for about 15c. per yard (1 yard wide). The red wall paper backing makes a warm, effective background for stoves, and is inexpensive, and can be used as a background for lots of different lines of hardware. Make a framework of rough strips of lumber the same size as the back of your window. Have it made in two sections hinged together, so that you can get in and out of the window. A backing of this kind can be made for a few dollars. Over the frame stretch cheap grey cotton, and on this paste the wall paper. Any wall paperer would do this for you at a very nominal cost. After the paper gets soiled or torn with frequent use it can be repapered in another color. The points to be observed in this display are: (1) The artistic arrangement of the stovepipes; (2) notice how each stove shows up prominently and that one does not crowd the other, and (3) the price cards, which is the main attraction in a display of this kind, or, in fact, of any kind. Any person contemplating purchasing a stove, seeing a display like the one presented in this magazine, could not help being impressed with it. Of course, this was an extra large window, and perhaps a little elaborate for the average hardware store, at the same time the ideas are there to be observed by the hardware window-trimmer, who will find them of great aid in making a trim of these goods in a smaller window with a less extensive stock.

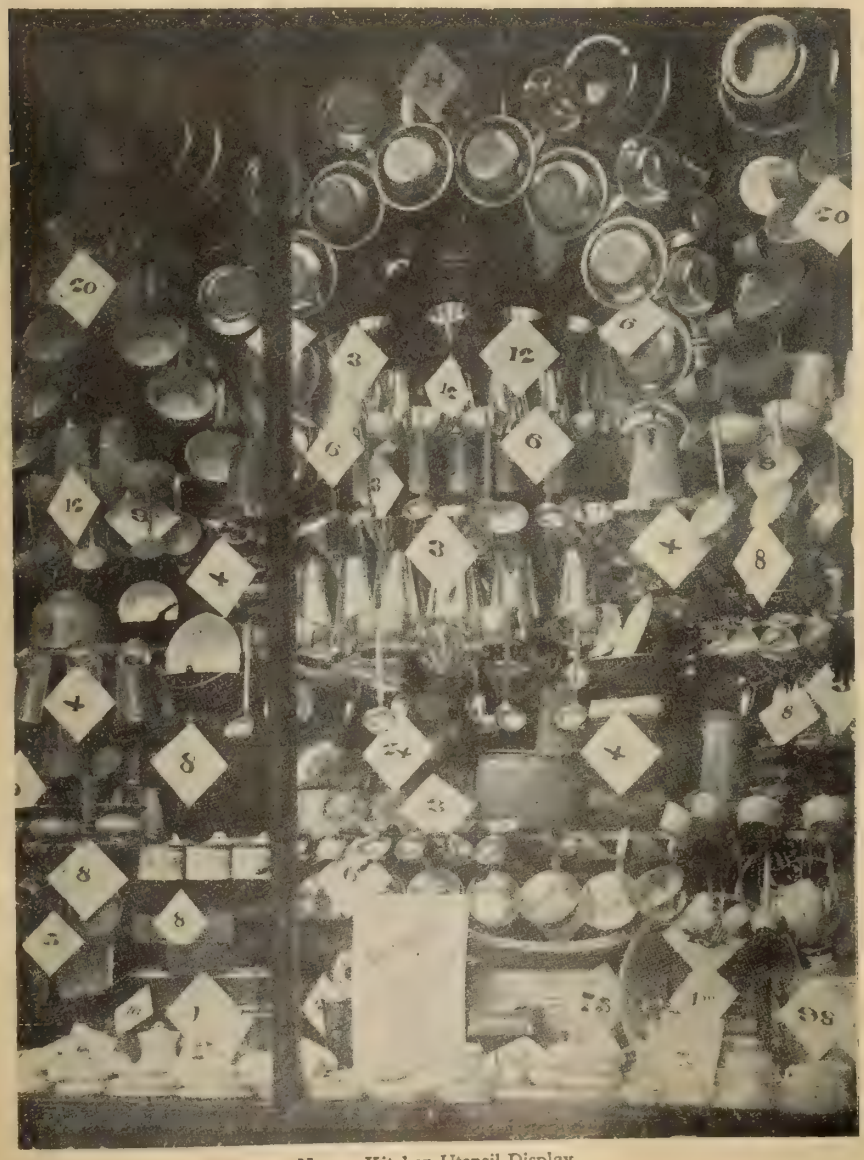
No. 2—Display of Stoves, Stovepipes and Fire Irons.

KITCHEN UTENSIL DISPLAY.

Illustration No. 3 is a business-bringing trim of kitchen utensils. The rough drawing will give the idea of the framework in this

Framework for Kitchen Utensil Display.

trim. The framework was covered with plain black print. The centre arch was made from a 6-inch board 1 inch thick, as were also the shelves.



PRICE CARDS.

A most particular point that is given very little attention by most hardwaremen in their window trims is that of price and descriptive tickets. To a large extent, the window display as a sales-bringer is useless unless price-ticketed. If you will just experiment on this you will find the ticketed

window will do twice the work that the unticketed trim will do. There are very few lines among a hardware stock that look attractive in themselves. A price ticket will generally make them attractive and interesting to the passing public. The large progressive stores all over the country do a large part of their business through window displays ticketed, and if it was not the best means of drawing trade it would have been discarded long ago. A little incident that happened some months ago, and which was narrated in the columns of this paper, would perhaps be worth repeating, as it will prove a point in favor of price cards in window displays, and as there are perhaps some of our readers who did not note it when it appeared in these columns before. I had a very attractive arrangement of household necessaries in agate and tinware in one of the large windows of the house I was employed in. Each line of goods was price-ticketed. People crowded about that window all day, attracted, no doubt, by the dozens of price cards. Everything really appeared a bargain, when actually it was nothing special, but all the articles marked at about the same value as they could have been bought anywhere. However, after the trim was completed and the curtain raised, there was a buying throng in the department in a short time, and it kept up for several days. One case in particular which came to my notice was this: A man went up to the department and asked the salesperson to give him "one of those 4c. tin cups like what was in the window." There was a large cooking range on display in the department (price $50), and while the cup was being parceled up the customer was examining the range. He asked the price of it from one of the men in charge, who told him what it was and explained the different parts to him. The customer then told the salesman he intended purchasing a range in the near future, as he was in the restaurant business, and he became so interested that before going out he left a deposit of $10 on the range, as he said it would suit him splendidly, and he was very anxious to have it. A few days afterwards he came in and paid the balance and had it shipped to his address.

Now, I'll venture to say that had it not been for a little 4c. ticket in the window, that it is dollars to doughnuts that range would possibly have been in the store yet. This is only one case among dozens that I have seen where price tickets "did the business." Therefore, I say, don't neglect this item of "trade catching." Any young man can in a very short time become quite proficient in card-making. It may be a little difficult at first, and one will generally become disheartened over his few first attempts, but you will be surprised how soon you will be able to execute a good business ticket with constant practice. Take stock how letters and figures on posters, almanacs, etc., are made, and copy them, and in a short time you will become familiar with the formation of them.

Don't attempt fancy letters, adopt the plain block letter, as it is the easiest read, and that is what the public of to-day require, something that can be read at a glance. Use the black lettering only. Drop black thinned with turpentine makes the best for general use. Get several brushes, sizes from 5 to 10, in sable. Keep these clean by rinsing them in turps. frequently. Put in your spare time practising. Sketch out the lettering in lead pencil. Outline the figures with the small size brush and fill in with the larger ones. After a time you will be able to do the lettering without penciling them first. Train the brushes flat by always using the same side. H. H.

No. 3—Kitchen Utensil Display.

THOS. DAVIDSON MANUFACTURING CO.

Under the cut which appeared in connection with the report of the annual dinner of the Thomas Davidson Manufacturing Co., Montreal, in last week's issue, appeared the line, "The Staff of the Thomas Davidson Manufacturing Co." It should have read, "Members of the firm and travelling staff of the Thomas Davidson Manufacturing Co."

MR. JOHNSTON TO GO SOUTH.

The many friends of Mr. James Johnston, who for many years has been representing the Dominion Wire Manufacturing Co., Limited, Toronto and Montreal, will regret to hear that he has been granted leave of absence on account of ill health and is leaving for the South to spend the winter.

HARDWARE & METAL hopes that his recovery will be speedy.

MANUFACTURE OF SPORTING GUNS AND RIFLES.

From The British Trade Journal.

DOUBTLESS it is one result of the sporting proclivities of the Englishman that the manufacture in this country of guns and rifles for all classes of game has attained its undisputed position. Cheap and common guns may be exported from the Continent, but whenever the nobility of Europe or the millionaires of the United States require a thoroughly serviceable and reliable weapon it is to the English market that they come.

THE ENGLISH GUN INDUSTRY

has attained this position by dint of constant attention given to it by capable men for centuries, and during the last 20 or 30 years the improvements which have been made in guns and rifles testify that it is still as full of life and vigor as ever. Perhaps no other gunmakers in the world have so wide a range of experience in designing weapons for various classes of sportsmen and of sport, not only in this country, but in India, Africa, Australia, and North America, from shot guns for partridges and rook rifles to rifles to bring down lions and bull elephants. In the home market it would be difficult to find, with the exception here and there of a rook rifle, any gun not made by English workmanship and from English material. For export requirements, where serviceable weapons are required, the same remark holds good. For the

BEST CLASS OF EXPORT TRADE

naturally an extensive assortment is necessary, for it must include the highest-class specimens of hammerless choke-bore guns and accurately bored rifles, with the finest types of steel barrels, as well as the cheaper but very serviceable and good-value guns. The minimum of weight for the export trade is of less importance, although the weight of birding guns has constantly downward tendencies. For colonial use, guns of good strength are needed, and strength of the parts naturally means increased weight. India, America, and Australia require heavier guns than the continent because of the heavier game met with. These requirements are fully met by really sound, good-shooting, but plainly-finished weapons, of which we could instance several varieties sent to all parts of the world by our leading makers.

Anyone who wishes to obtain an insight into the best practice of gun manufacture now pursued cannot do better than visit the works of one of the leading English firms in this trade. The various parts of the action and lock are received in the form of rough forgings. They are then subjected to the action of machine tools, such as milling and profiling, boring and slotting machines, by means of which each forging is reduced and shaped to the exact form and size required, being finished with the greatest possible accuracy and machined to the thousandth part of an inch. One part of the action alone undergoes no fewer than 179 operations before it is sufficiently finished to render it fit for putting together with the lock. In this department are also machines producing the screws and bolts by which the various parts of the action are held together. To carry out these processes

AN INFINITE VARIETY

of cutting tools is required, both as regards shape and size, and special arrangements are to hand for making such cutters and keeping them in the highest working condition. The barrels are bored, turned, and finished in another department, where also the ribs and locks are brazed to the barrels. In this part some of the most costly machinery can be seen, by means of which the grooves are cut in the barrels of rifles and the choke given to shot guns. The barrels must also be polished and then browned, and, of course, tested at the London proof house by means of charges of powder, shot or bullet far in excess of anything required in actual use. The construction of the modern gun-action requires even greater nicety and accuracy of workmanship than in a timepiece. Efforts are constantly made to

SIMPLIFY THIS MECHANISM,

and not without success, as will be seen by the new improved ejectors, in which only two parts are necessary, whereas formerly eight or ten were required. Working in the same direction is the wonderfully ingenious lock mechanism by which one trigger is made to serve two barrels. Then the arrangement of hammerless guns and the lever and bolt or grip action for opening breech-loaders and firmly closing them again with perfect rigidity necessitate an excellence of material and a perfect accuracy of workmanship which it would be difficult to parallel, and which, seeing that human life may often depend upon its soundness, is of the utmost importance. A walk through the action department, where rows of skilled artisans are at work, shaping and finishing and putting together the various parts, will convince any user of a gun that nothing is left undone to insure absolute reliability.

The barrels, ribs, actions and levers, and generally with ejecting mechanism, having been put together, the "stocking-room" is reached. Here the steel and iron portions of the weapon are fitted into the stock, and during recent years, as the advantages of using "fitted" guns have become more and more apparent, this operation has become of more importance, necessitating very careful measurement and adjustment by means of a "Try" gun. With the aid of this a sportsman can ascertain the exact shape, bend, length, and cast-off of the stock best suited to his build, and thus insure a perfectly-fitting gun, with which much better practice will be made than with the ordinary stock pattern.

Many of the parts are worked and finished in a comparatively soft state which necessitates the use of

HEARTHS FOR CASE-HARDENING.

This applies also to the action and trigger plates, which in high-class guns are generally covered with beautifully artistic designs, in which the true sportsman takes infinite pride. This work of engraving or chasing requires a considerable degree of skill and judgment. In guns and rifles for princes and wealthy sportsmen of every degree the designs are worked out with inlaid gold, and many sporting scenes are in this way depicted with striking success.

THE SHAPING AND CARVING OF STOCKS

necessitates another set of skilled operatives, and in elaborate designs a considerable amount of work can be bestowed upon this part of a modern weapon. The material mostly favored is English walnut, boldly figured and with contrasts of color. As this is becoming scarce, walnut from other countries must be used, equally strong and light, even when its appearance is less effective. To add to the steadiness and certainty with which a gun can be held, stocks are now shaped with what is well known as the pistol hand and with a cheek piece. The surface of the pistol grip is generally checkered to increase the firmness of grip. In another department such processes as sighting, fitting telescopes for long-range rifles, etc., are carried out.

A 16 BORE HAMMER

or hammerless, weighing only about 6½ lb., has been largely supplied to customers for use in Germany, Russia, Spain and other countries, where snap-shooting at heavy game is usual. Favorable reports as to its efficiency have also been received from British Columbia, Tasmania, and for use against wild boar, red deer, elk, and bear. It discharges shot with a penetration of a 12-bore and conical bullets up to 100 yards with the accuracy of an express rifle. When it was first introduced public trials were held, at which the operator shot 10 consecutive shots right and left at 50 yards' range with three drachms of powder and conical bullets, the whole of which were placed within a space measuring 2⅛ in. by 2½ in. Ten consecutive shots were then fired at 100 yards and put into a space of 3¾ in. by 5¾ in. The wind having dropped, another trial of 10 shots was made, when the 10 bullets were put into a space measuring 3½ in. by 4 3-16 in., nine of them being in a space 2¼ in. by 3½ in. For countries where large and small game are met with, the importance of such a weapon is obvious.

A TRAVELLER'S DEFENCE.

A somewhat sad instance of modern competition, remarks Grocery, especially amongst the travellers of different houses in their endeavor to secure orders for the firms they represent, is afforded by a case which came before the Gloucester assizes. A commercial traveller was charged with embezzling money belonging to his employers, and his defence was that he had not devoted the money to his own purposes, but had employed it in entertaining customers with a view to increased sales. Unfortunately for him, he had previously been in trouble for a similar offence and he was sentenced to three years' penal servitude, but there is very little doubt in our minds that, feeling himself incapable of securing trade in any other way, he had endeavored to obtain it by the means he stated. All this is very sad, but on the whole we doubt whether, in spite of the keen competition which exists, the treating evil is so bad by a long way as it used to be even 20 years ago. Then it was quite unusual for a bargain to be completed without the assistance of alcohol in some shape or form. Now it is the exception rather than the rule.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, January 10, 1902.

HARDWARE.

THOUGH just recovering from the holiday season, business on the whole, is satisfactory, and, compared with the same period a year ago, it is in a better condition. Orders for present delivery are merely given to fill immediate needs. Merchants throughout the country are stock-taking, and do not care to buy for spring just yet. On the other hand those houses whose travellers have been on the road, report that orders for spring delivery are encouraging, and that the outlook for spring business is bright. All the American travellers have been here this week and they are quoting a few changes on builders' hardware, most of which are slightly lower. This, of course, will affect the trade here in the near future.

BARB WIRE — There is practically no change, a quiet market continuing. We quote $3 per 100 lb. f.o.b. Montreal.

GALVANIZED WIRE — There is not much doing. Prices are steady, as follows: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE — The demand has taken a turn for the better. Oiled and annealed wire sell as follows No. 9, $2.80; No. 10, $2.87; No. 11, $2.90; No. 12, $2.95; No. 13, $3.15 per 100 lb. f.o.b. Montreal, Toronto, Hamilton, London, St. John and Halifax.

FINE STEEL WIRE — A moderate business is doing; discount 17½ per cent.

BRASS AND COPPER WIRE — There is not much movement in either. On both copper and brass wire the discount is 55 and 2½ per cent.

FENCE STAPLES — A dull market continues. We quote $3.25 for bright and $3.75 for galvanized per 100-lb. keg.

WIRE NAILS — A fair movement is noted. We quote as follows: $2.85 for small lots and $2.77½ for carlots f.o.b. Montreal, London, Toronto, Hamilton and Gananoque.

CUT NAILS — There is a moderate trade doing. Our quotations are: $2.55 per keg for small and $2.45 for carlots; flour barrel nails, 25 per cent. discount; coopers' nails, 30 per cent. discount.

HORSE NAILS — All the mills are now using the new list on horse nails. The demand continues rather light. "C" brand is sold at a discount of 50 and 7½ per cent. off the new list. "M" brand is quoted at 60 per cent. also off the new list, on oval and city head, and 66 2-3 per cent. off countersunk head.

HORSESHOES — There is not a very active market. We quote as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS — The movement is fair, being mostly in small quantities for immediate requirements. The discounts are as follows: Flat head bright, 87½ and 10 per cent. off list; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.

BOLTS — There is a pretty good demand. We quote as follows: Norway carriage bolts, 60 and 5 per cent.; common, 55 and 5 per cent.; full square carriage bolts, 60 and 5 per cent.; machine bolts, 55 and 5 per cent.; coach screws, 70 per cent.; sleigh shoe bolts, 70 per cent.; blank bolts, 60 per cent.; bolt ends, 60 per cent.; plough bolts, 55 and 5 per cent.; tire bolts, 67½ per cent.; stove bolts, 67½ per cent. To any retailer an extra discount of 5 per cent. is

"Samson" Railroad or Delivery Cans and Trimmings

"SAMSON" With Seamless Cover.

Supplied with "Samson" Seamless Bottom, Seamless Cover, Seamless Neck, Seamless Breast, and "D" Side Handles.

Cleanest, Easiest to Handle and most Durable Railroad or Delivery Can on the Canadian market.

Bodies made of extra heavy tinned iron.

"SAMSON"—With Bell Cover.

Seamless Cover has no seams in the rim to collect dirt or to work loose.

Being drawn from one piece of steel makes it of uniform size.

It is perfectly air-tight.

Seamless Neck is drawn from one piece of specially prepared steel and annealed to prevent any possibility of their cracking.

"SAMSON" Trimmings.

This Cover and Neck together with the "Samson" Bottom makes this Railroad or Delivery Can unquestionably the best ever put on the market.

The "Samson" is the **strongest** and **only one-piece** bottom on the market.

TINNED IRON, ALL SIZES AND GAUGES.

Prompt shipment always made.

"SAMSON" Seamless Cover and Neck.

allowed. Nuts, square, 3¾c. per lb. off list; hexagon nuts, 4c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER — The trade in building paper is picking up some, orders for spring having begun to arrive. As yet, however, the movement is not large. We quote as follows: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 55c. per roll; tarred fibre, 65c. per roll; O.K. and I.X.L., 70c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE — Trade is better than last week. Prices are still firm. We quote as follows: Manila, 15½c.; British Manila at 13½c.; sisal, 12c. and lathyarn at 10½c. Manitoba prices are: Manila, 16c.; British Manila, 14½c.; sisal, 13c. and lathyarn, 12c.

RIVETS AND BURRS — There is nothing new to note. A moderate trade continues. The discounts are as follows: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, 35 and 5 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN CLOTH — There is little doing. The prices remain at $1.25 per 100 square feet.

POULTRY NETTING — The demand for spring delivery is keeping up well. Canadian or English is quoted at a discount of 60 per cent. off 2 x 2 mesh, 19 wire, and 55 per cent. off 2 x 2 mesh heavier, Canadian list.

HARVEST TOOLS — There is no change. The discount is 70 per cent.

FIREBRICKS — The demand is fairly good. We quote as follows: Scotch at $19 to $23.50 and English at $18.50 to $22.50 per 1,000.

CEMENT — There is little doing. We quote: German cement, $2.30 to $2.40; English, $2.25 to $2.35; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.20 to $2.30 ex-cars.

METALS.

Business in most lines is rather flat this week. There have been no changes in prices since our last report.

PIG IRON — There is a small movement at steady prices. We quote: Summerlee at $21 to $21.50 and Canadian at $18.50 to $19.

BAR IRON — Business is not active. Merchants' bar sells for $1.87½ in carlots and $1.95 in smaller quantities. Horseshoe is worth $2.15 to $2.20.

BLACK SHEETS — A fair trade is doing, but it is mostly in small orders. Our quotations are as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON — There is not much change. Business is dull. We quote: No. 28, Queen's Head, $4.40; Apollo, 10¾ oz., $4.40; Comet, $4.25 with 10c. extra in less than case lots.

INGOT COPPER — Since the drop in price last week there has been no change. The price remains at 14½c.

INGOT TIN — There is only a small demand. The price for Straits is 27c.

FOR THE STREET

THE TRADE "M&M" MARK LIGHT

FOR THE STORE

What "M & M" Lamps Do.

They give a stronger, whiter, steadier light than the electric arc. Operate easily, safely, satisfactorily. Save money—actual 600 candle-power light at a cost of one-half cent an hour. Think of it! Write for circulars, etc. GOOD AGENTS WANTED- Exclusive territory allowed.

ACORN BRASS WORKS,
Dept. 11, 15-23 Jefferson Street - - CHICAGO, ILL.

What "M & M" Lamps Save.

Barrett Hardware Co, Joliet, Ill., write: "Gasoline and supplies for "M & M" Lamps cost us $15.46 last year, an average of 60c. a month per lamp. We believe we had as good a light as though we had six electric arc lights at a cost of $360." No wonder that over 30,000 "M & M" Lamps are in use all over the United States and Canada. THEY KILL BIG GAS AND ELECTRIC LIGHT BILLS. It will pay you to investigate. Write for circulars. AGENTS WANTED. Dept. 11, 15-23 Jefferson St., Chicago.

PIG LEAD — A fair and steady demand is reported this week. We quote: $3.15 to $3.20.

LEAD PIPE — Business is, as usual, at unchanged prices. We quote: Ordinary 7c., composition waste, at 7½c., with 30 per cent. off.

IRON PIPE — A good movement continues and prices are firm. We quote: Black pipe, ¼, $3.00 per 100 feet; ⅜, $2.95; ½, $3.10; ¾, $3.45; 1-inch, $5; 1¼, $7.10; 1½, $8.50; 2-inch, $11.35. Galvanized, ½ $4.40; ¾, $5; 1-inch, $7.15; 1¼, $10; 1½ $12; 2-inch, $15.95.

TINPLATES — There is not much doing. Cokes sell at $3.75 to $4, and charcoal at $4.25 to $4.50.

CANADA PLATE — Prices remain steady, and there is little doing. We quote: 52's, $2.65 to $2.70; 60's, $2.75 to $2.80; 75's, $2.80 to $2.85; full polished, $3.75 and galvanized, $4.25 to $4.35.

STEEL — The firm prices continue, and the demand is fair. Our quotations are: Sleigh shoe, $2.05; tire, $2.15; bar, $2; spring, $2.85; machinery, $2.85, and toe-calk, $2.60.

SHEET STEEL — There is no change. Quotations are as follows: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL — Black Diamond, 8c. and Jessop's, 13c.

TERNE PLATES — There is a fair inquiry for terne plates. We quote $7.75 to $8.00.

COIL CHAIN — There is a little better movement, but still the demand is small. We quote as follows: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7¼c. per lb.; 5-16, $4.80; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.85; 9-16, $3.75; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC — There is a small movement at $5.75 to $6.25.

ANTIMONY — The market is unchanged and the price is still 10c.

ZINC SPELTER — The trade is quiet at 5c.

SOLDER — We quote: Bar solder, 18c.; wire solder, 20c.

PAINTS AND OILS.

After a somewhat quiet fortnight, owing to the holidays, business in Montreal has started in briskly. All the factories seem to be preparing for a heavy spring business. Early ordering would be a wise policy, as business at present points to a general rush in February and March, in which the usual slow deliveries would occur. Changes this week are noted in ground white lead and turpentine. In the former, the reduction has been 12½c., which, it is thought, will lead to a good demand, as grinders are keeping these prices firm till May 15. There is a strong demand for turpentine in the South, and the visible supply not being excessive, prices have been advanced 2c. In the opinion of a few dealers, a rising market may be experienced for some time. The situation in linseed oil, which has been so erratic of late, is somewhat steadier, and no changes in prices have been made since our last quotations. Paris green is being inquired after freely. The country seems to be pretty short in stock and Canadian manufacturers have now a large quantity ready for shipment. We quote:

WHITE LEAD—Best brands, Government standard, $5.87½; No. 1, $5.50; No. 2 $5.12½; No. 3, $4.75; No. 4, $4.37½ all f.o.b. Montreal. Terms, 3 per cent. cash or four months.

DRY WHITE LEAD—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC — Pure dry, 6¼c.; No. 1, 5¼c.; in oil, pure, 7¼c.; No. 1, 6¼c.; No. 2, 5¼c.

PUTTY — We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200 lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL—Casks, 7c.; 100 lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD — Genuine red lead in casks, $4.50; in 100-lb. kegs, $4.75; less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE—Ground, casks, 5c.; less, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL—Raw, 75c.; boiled, 78c. in 5 to 9 bbls., 1c. less, 10 to 20 bbl. lots open, net cash, plus 2c. for four months. Delivered anywhere in Ontario

between Montreal and Oshawa at 2c. per gal. advance and freight allowed.

TURPENTINE — Single bbls., 60c.; 2 to 4 bbls., 59c.; 5 bbls. and over, open terms.

SHELLAC VARNISH — Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS—$1.20 to $1.45 per gal.

CASTOR OIL 8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL 47½ to 49c.

COD OIL—32½ to 35c.

PARIS GREEN — Petroleum barrels, 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25 lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

GLASS.

The movement is a small one, and there is no change in prices, which are firm. We quote as follows: First break, 50 feet, $2.10; second, $2.20 for 50 feet; first break, 100 feet, $4; second break, $4.20; third break, $4.70, and fourth break, $4.95.

SCRAP METALS.

There is a fairly good movement on most lines. Prices remain steady. We quote as follows: Heavy copper and wire, 13½ to 14c. per lb.; light copper, 12 to 12½c.; heavy brass, 12 to 12½c.; heavy yellow, 9½c.; light brass, 6½c.; lead, 2⅝ to 2⅝c. per lb.; zinc, 2 to 2¼c.; iron, No. 1, wrought, $10 light brass, 6½c.; lead, 2½ to 2¾c. per lb.; zinc, 2 to 2¼c.; iron, No. 1, wrought, $10 to $15 per gross ton f.o.b. Montreal; stove plate, $8 to $9; machinery scrap, $14; light iron, No. 2, $5 a ton; malleable and steel, $4; rags, country, 60 to 70c. per 100 lb.; old rubbers, 7 to 7¼c. per lb.

HIDES.

Business is somewhat quiet, and prices are unchanged. We quote as follows: No. 1 hides, 7½c.; No. 2, 6½c.; No. 3, 5½c. Sheepskins, 60c.

MARKET NOTES.

Turpentine is 2c. higher and prices are becoming firmer.

There has been a reduction of 12½c in ground white lead.

The new list adopted by The Montreal Rolling Mills Co. and by Peck, Benny & Co., is the same that has been in use by The Canada Horse Nail Co. during the past year.

ONTARIO MARKETS.

Toronto, January 10, 1902.

HARDWARE.

THE travellers have again resumed their respective routes, and business is beginning to recover from its holiday quietude. In volume, business is not yet large, but it is fair. The outlook for the spring trade is good. Quite a few orders for future shipment in such goods as harvest tools, spades and shovels, green wire cloth, spring hinges, ice cream freezers and poultsy netting are coming to hand. A number of orders for general hardware have come to hand from the Northwest during the past week. Some orders for fence wire are being booked. Bolts and rivets continue in good demand. Business is fair in screws. Very little is being done in nails. Horseshoes and horse nails are in moderate request. In sporting goods and cutlery, there is very little doing. White lead is 25c. per 100 lb. lower, and pure manila rope advanced another ½c. per lb. on the 9th inst. The various manufacturers' associations are holding their regular meetings in Toronto this week, but up to the time of writing, no changes have been made in prices.

BARB WIRE—A fair number of orders are being placed on import account. Advices from the United States report the demand there good, with prices rather easy, however. We quote, f.o.b. Cleveland, $2.77½ for less than carlots, and $2.65 for carlots. From stock Toronto, $3.

GALVANIZED WIRE — Some business on future account is being done this week. We quote as follows: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5 50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE—A few orders for spring delivery are reported for oiled and annealed. We quote net: Nos. 6 to 8, $2.90; 9, $2.80; 10, $2.87; 11, $2.90; 12, $2.95; 13, $3.15; 14, $3.37; 15, $3.50; 16, $3.65. Delivery points, Toronto, Hamilton, London and Montreal, with freights equalized on those points.

WIRE NAILS — As we go to press the wire nailmakers are considering the question of prices, but so far have come to no decision. The base price is nominally $2.85 for less than carlots, and $2.77½ for carlots. Delivery points, Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS—No change, trade still being dull. The base price is $2 55 per keg, with 10c. allowance on carlots.

HORSE NAILS—Business is just moderate. Discounts are as follows: "C" brand, oval head, 50 and 7½ per cent., and on "M" and other brands, 50, 10 and 5 per cent. Countersunk head 60 per cent. All the manufacturers are now understood to be selling off the same list.

HORSESHOES—The demand is moderate, with prices unchanged. We quote f.o.b. Toronto as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

We have on hand a large stock of steel sheets for making

EMBOSSED CEILINGS,

etc., and are now prepared to make prompt shipment of anything required in our line, and shall be pleased to receive your orders which shall have our best attention.

The Metallic Roofing Co.
LIMITED
Wholesale Manufacturers
TORONTO, - - - CANADA

SCREWS—Business keeps fairly good. The discounts are as follows: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze at 70 per cent.

RIVETS AND BURRS—A good demand is reported this week for rivets. We quote: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets and burrs, 25 and 5 per cent.

BOLTS AND NUTS — An active trade is being done this week in bolts, and prices are unchanged. We quote as follows: Carriage bolts, common ($1 list), 55 and 5 per cent.; carriage bolts, full square ($2.40 list), 60 and 5 per cent.; carriage bolts, Norway iron ($3 list), 60 and 5 per cent.; machine bolts, all sizes, 55 and 5 per cent.; coach screws, 70 per cent.

ROPE—Another advance of ½c. in the price of pure manila rope took place on January 9. We now quote: Pure manila, 16c.; British manila, 13½c.; sisal, 12c.

CUTLERY—Very little is being done in cutlery.

SPORTING GOODS—Trade is quiet and featureless.

STRUCTURAL MATERIAL—For all kinds of structural material the demand is good.

MILK CAN TRIMMINGS—These are going out quite freely this week, and a number of dealers are sending in requests for early shipment. Discount is 25 per cent., the same as last year.

GRANITE AND TINWARE—The demand for both these lines is only fair.

CEMENT—The outlook is a little better than last week, and a few inquiries have been made, but as yet no extensive orders have been placed, nor will there be till towards Spring. We quote: Canadian Portland, Rathbun's "Star," $2.25 to $2.65; "Beaver," $2.10 to $2.50; "Ensign," $1.90 to $2.30; German, $3.15; English, $3; Belgian, $2.50 to $2.75; Canadian hydraulic, $1.25 to $1.50 per bbl.

METALS.

Trade is, on the whole, fairly good. Tin is weak and lower, but in other metals prices are as a rule firm.

PIG IRON—The pig iron market continues firm, and further advances are reported from the United States. For Canadian iron we still quote $17.50 to $18 on track Toronto for No. 2 foundry.

BAR IRON—A good, steady demand is still to be noted, and prices rule firm. Base price $1.95 to $2.05. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

STEEL—Trade is quiet, but prices continue firm. We quote: Merchantable cast steel, 9 to 15c. per lb.; drill steel, 8 to 10c. per lb.; "BC" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe-calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2.25; reeled machinery steel, $3, hoop steel, $3.10.

BLACK SHEETS—A fairly good business is still to be noted. We quote: Common, $3.15 for 28 gauge; and dead flat, $2.50 for 26 gauge.

CANADA PLATES—Trade is still good for this time of the year. We quote: All dull, $3.05; half polished, $3.15; all bright, $3.75.

GALVANIZED SHEETS—Some fairly good sized lots have been turned over during the week, and the demand generally is good. We quote as follows: "Queen's Head" brand at $4.50 in case lots, and $4.65 in less quantities.

TIN—The outside markets are dull and lower. The idea as to price locally is $29 to $30 per 100 lb.

TINPLATES—There is a fairly good movement, but stocks are short with some jobbers, shipments having been delayed in coming forward. The idea for coke plates is still $4.25 for I. C.

TINNED SHEETS—Quite a number of shipments are going forward, quite a number of dealers being anxious to get delivery. We quote: 72 x 30, up to 24 gauge, 7½c.; ditto, up to 26 gauge, 8c.

TERNE PLATES—Business is almost nil. We quote: I.C., 20 x 28 gauge, at $8 50.

COPPER—The outside copper markets are a little firmer, although there does not appear to be much business doing. Locally, trade conditions are much about the same as a week ago. We quote ingot at $16 per 100 lb. and sheet at $23 to $25 per 100 lb.

BRASS—Quiet. Discount is 10 per cent. on rod and sheet.

SOLDER—Business is moderate. We quote: Half-and-half, guaranteed, 19 to 19½c.; do. commercial, 19c.; refined, 18½c.; wiping, 18c.

LEAD—At the time of writing lead is a little firmer in London but easier in St. Louis. Locally, business is fair at the recent decline. We quote: $3.50 to $3.75 for pig lead and $5 for bar.

IRON PIPE—Business is just moderate. We quote: Black pipe, $5.40 for 1-inch.

SPELTER—A moderate demand is being experienced. We quote $5.50 to $6 per 100 lb.

ZINC SHEET—Trade is fair at $6 to $6.25.

PAINTS AND OILS.

The movement in paints and oils is beginning to show signs of improvement after the last few weeks of depression. The travellers have all gone out to their fields, and a more hopeful feeling is experienced regarding the coming season's trade. The prices of white lead ground in linseed oil have been lowered 25c. per 100 lb. by the paint grinders' association, and now the prices are quoted the same as at Montreal and other centres. The prices of raw and boiled oil ought to be very firm, as raw linseed has advanced on the Chicago market. We quote:

WHITE LEAD—Ex Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2. $5.12½; No. 3, $4.75; No. 4, $4.37½ in pkgs. of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.12½.

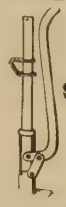
RED LEAD—Genuine, in casks of 560 lb. $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE—Genuine, 6 to 6½c.

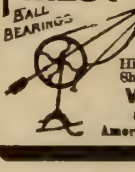
ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.

BENZINE—In barrel lots, 16½c. per gal.; less quantities, 25c. per gal.



PARIS WHITE—90c. to $1 per 100 lb.



WHITING—65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC—In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls.,

TWO SIZES

PULLMAN SASH BALANCE CO.,
ROCHESTER, N.Y., U.S.A.

$2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2.25; bladders, in 100 lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE — Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1.20 to $1.30 per gal.

CASTOR OIL — English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 4 barrels, 77c.; boiled, 80c.; 5 to 9 barrels, raw, 76c.; boiled, 79c., delivered. To Toronto, Hamilton and London, 2c. less.

TURPENTINE—Single barrels, 59c.; 2 to 4 barrels, 58c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

Things are quiet in glass. A little local retail trade is doing. We quote as follows: Under 26 in., $4.25; 26 to 40 in., $4.65; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5.75; 71 to 80, $6.25; 81 to 85, $7; 86 to 90, $7.75; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days.

OLD MATERIAL.

While there is no particular change in the copper market, it is conceded that bottom prices have now been reached, and that, while there may be no immediate rise, there will be no further decline. This week heavy copper has gone down 1c. per lb.; new light scrap copper 1c., bottoms 2c., coil wire 1c., heavy red brass 1c. and scrap rubber ¼c. per lb. We quote as follows: Agricultural, 60c. per cwt.; machinery cast, 60c.; heavy copper, 11c. per lb.; stove cast, 40c.; No. 1 wrought, 50c. per 100 lb.; new light scrap copper, 9c. per lb.; bottoms, 8c.; coil wire, 12c.; light brass, 6c.; heavy yellow brass 8c.; heavy red brass, 9½c.; scrap lead, 2¼c.; zinc, 2c.; scrap rubber, 6c.; good country mixed rags, 50 to 60c.; clean dry bones, 40 to 45c. per 100 lb.

HIDES, SKINS AND WOOL.

Trade is quiet. On account of their drop in the Chicago market green hides have gone down ½c. per lb. all around. This usually occurs every year, as the hides now marketed are of poorer quality, having longer hair and thinner skins. We quote prices paid by buyers on arrival:

HIDES—We quote: No. 1, green, 7½c.; No. 2 green, 6½c.; No. 1 green, steers, 8c.; No. 2 green, steers, 7c.; cured, 7¾ to 8¼c.

SKINS—We quote: No. 1 calfskins, 9c.; and No. 2, 7c.; deacons (dairies) 55 to 60c. each; sheepskins, 65 to 75c.; deerskins, 12½ to 14c. per lb.

WOOL—We quote: Fleece, 13c., and unwashed, 7 to 8c. per lb.

SEEDS.

No further change has occurred, but the foreign export demand is rather better. We quote: Red clover, $5 to $5.40; alsike, $6.50 to $8.50, and timothy, $2.25 to $3 per bush.

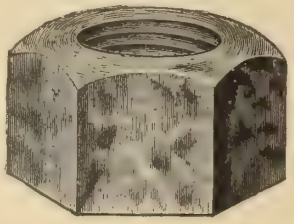
PETROLEUM.

The movement is steady, with prices firm. We quote: Pratt's Astral, 16½ to 17c. in bulk (barrels, extra); American water white, 17 to 17½c. in barrels; Photogene, 16½ to 17c.; Sarnia water white, 16 to 16½c. in barrels; Sarnia prime white, 14½ to 15c. in barrels.

COAL.

We see no change in the situation. Cars still are scarce. There has been no change in prices. We quote at international bridges: Grate, $4.75 per gross ton; egg, stove and nut, $5 per gross ton; soft coal, $2.50 to $3.25 in bond, according to grade.

KEARNEY & FOOTE BRAND



FILES AND RASPS

WARRANTED

Files of the above brand are standard, and are well known for their excellence of cut, temper and finish, and the K. & F. Horse Rasp is one of the leaders in this line, and is in demand in all parts of the Dominion. These goods are stocked by the following wholesale hardware merchants, and may be procured from either of them at bottom prices:

THE JAMES ROBERTSON CO., Winnipeg, Man.
H. S. HOWLAND, SONS & CO., Toronto, Ont.
THE SEYBOLD & SONS CO., Montreal, Que.
HOWDEN, STARKE & CO., Montreal, P.Q.
T. McAVITY & SONS, St. John, N.B.
H. H. FULLER & CO., Halifax, N.S.

THE JOHN MORROW MACHINE SCREW COMPANY, Limited

Manufacturers of

Set and Cap Screws, Special Milled Work, Engine Studs, Etc. Cold Punched Nuts of every variety of finish.

INGERSOLL, ONT.

MARKET NOTES.

Pig tin is quoted lower at $29 to $30 per 100 lb.

Pure manila rope is ½c. higher, being quoted at 16c. per lb.

The prices for white leads ground in linseed oil have taken a drop of 25c. per 100 lb.

The prices of heavy copper have gone down 1c. per lb.; new light scrap copper, 1c.; bottoms, 2c.; coil wire, 1c.; heavy red brass, 1c., and scrap rubber, ¼c. per lb.

CAP D'OR COPPER PROPERTIES.

In Cumberland County, N.S., a New York syndicate is working copper properties at Cap d'Or. Some of the ore is very rich, and the company has already expended over $100,000 in the work of development, employing over 100 men, who will shortly be increased to 150. A regular little village has sprung up around this mine, where many beautiful pockets of almost pure copper have been already found.

NOVA SCOTIA MARKETS.

Halifax, January 6, 1902.

THIS is the season of the year, above all others, in which the hardware trade is the dullest, and except the ordinary city trade, there is little doing except stock taking, and straightening up stock for the current year's business.

R. G. Dun & Co.'s report for the past year is summed up as follows. "Though profits generally were not so large as in 1900, a larger volume of trade was done; sales increased considerably, and markets showed firmness and steadiness, especially in heavy metals." With this report the dealers generally agree as a fair statement.

* * *

The boom in Sydney of the last two years, consequent on the introduction and installation of The Dominion Iron and Steel Co.'s works, has been of interest to the whole Province and Canada in general, and more especially to those engaged in the hardware trade. Iron, in large quantities, has been made for some months, but it remained for the closing days of 1901 in which to produce the first steel.

* * *

The following is the message sent over the wires to the directors of the company, by Mr. Moxham, the manager, on December 30, and which produced a flutter of excitement and comment in iron circles, not alone in Canada, but the world over: "Poured first heat of steel at 8 o'clock to-night. Everything worked well. Steel made by ordinary pig and scrap process: Sixty per cent. Bell Island pig and 40 per cent. scrap. Quality of steel is excellent."

* * *

The steel manufactured is in the form of ingots, and it is said that the company have already found a market for all they can produce. In about two weeks' time the blooming mill will be in operation, when the ingots will be converted into billets. As steel enters so largely in the various manufactures in all lines, its production insures the success of The Dominion Iron and Steel Company.

* * *

The first heat of steel produced about 30 tons of steel. This was from one furnace, of which there are 10, each having a capacity of 50 tons per day. The company is now making steel regularly every day, and soon all the furnaces will be in operation. The success of the company means much for Nova Scotia; it means much for Canada.

* * *

During the year 1901 the public accounts will show that the Dominion Government has paid the following amounts in bounties on iron manufactures: On pig iron, $351,259.07; puddled bars, $16,703.09; steel ingots, $100,157.74. Next year will see the amounts largely increased.

R. C. H.

TRAVELLERS WANT TO ORGANIZE.

The advisability of forming a local commercial travellers' association at Peterboro' was discussed by a well attended meeting last week at the Oriental Hotel there. It was decided to send a deputation to wait on the president of The Toronto Commercial Travellers' Association, and urge upon them the importance of the step contemplated. Another is to wait on The Dominion Commercial Travellers' Association, at Montreal, for the same purpose.

J. C. Grant, Secretary of The Peterboro' Association, was instructed to write the various commercial travellers' organizations, that the names of any members residing in that town might be obtained. He was also requested to write the chief officer of The Toronto Travellers' Association, for as much information as would be required before organizing a camp in Peterboro'.

THE COPP BROS. & CO. AFFAIR.

The Toronto Globe of the 9th instant, says: "'Hardware and Metal' tells a remarkable story of the liquidation of the firm of Copp Brothers & Co., stove manufacturers, Hamilton. When one reads an article on a failure or liquidation he expects to find some revelation of fraud or recklessness, resulting in heavy losses to creditors. In this case the remarkable fact is that every creditor has been paid in full, and that in spite of the enormous sacrifices made in winding up the business a handsome surplus remains. We used to hear a great deal about the evil of incompetent men in business. The evil in this case is the needless forcing out of business of honest and competent men, representing a firm which was established 53 years ago.

"The direct cause of the liquidation, it is said, was the action of the Merchants Bank in insisting on the immediate payment of $37,000. The bank, no doubt, had a legal right to enforce its claim, and must be presumed to have understood its own business; but the result of the liquidation certainly makes the case a very strange one. It might be supposed that a firm able to make so good a showing would have been able to raise the money elsewhere. Whatever may have been the cause, the result is very much to be regretted."

CANADIAN COAL FOR BOSTON.

The Dominion Coal Company have succeeded in securing an order of 80,000 tons for the Boston and Maine Railway, and a further order for some 15,000 tons for the Maine Central. At the present time in Boston there is delay in the moving of coal, causing a scarcity. The duty of 67 cents a ton is, however, a barrier to Provincial coal companies taking advantage of the scarcity. There is no foundation for the report that this company had sold 50,000 tons to a French railway. It is said that the company had an offer from Italy to send some 30,000 tons, but the conditions were such that the offer had to be declined. Some coal has been sold in Sweden and there is hope of further sales. The company will send one or two of its experts, with a steamer to carry about 7,000 tons to that country, to initiate Swedish firemen into the secrets of most effectively handling the coal. To sell coal in Europe at this time is not so easy a matter as it would have been a year ago. Then prices were stiff and steady, whereas now they are easy and uncertain. And yet there is hope that a good foreign trade may develop by degrees.—Mining Record.

HEATING AND PLUMBING

BUILDING IN TORONTO.

For the first week of 1902 the following building permits have been taken out in Toronto : Rose Ann Harrison, for a two-storey brick dwelling at 777 King street west, to cost $1,900 ; E. A. Drummen, for a two-storey and attic brick dwelling at 331 St. Clarence avenue, for $2,200 ; F. Caro, for alterations consisting of a stone cellar under his house at 968 Queen street west, for $450 ; to A. G. Strathy, for alterations and new front of brick, wood, and glass to his shop at 309 to 311 College street, for $200 ; Geo. Lasher, for two two-storey brick and stone stores and dwellings at 262 and 264 Dundas street, for $2,500 ; Catherine Corbett, for a two-storey brick dwelling on Brock avenue, for $2,500 ; John Waldie, for brick alterations and additions to dwelling at 75 Park Road, for $4,500 ; Toronto City Corporation, for two hay barns, one large sheep pen, and addition to stable at the cattle market, on Wellington avenue, for $3,750 ; Toronto City Corporation, for hay barns, stable and office, all frame, with gravel roofs, at the cattle market annex, on Strachan ave., for $1,250 ; and Marion Eastman, for a two-storey brick and roughcast dwelling on Woodbine avenue, for $900.

NEW HOTEL AT NEWCASTLE, N.B.

In a very short time a fine brick block, having a frontage of 103 feet with a depth of 70 feet, will be completed on N.B. It is faced with freestone and is the old Waverley Hotel site, at Newcastle, three storeys high, with a basement. The building is a very handsome structure with its neatly designed galvanized iron cornice, which adds much to its appearance. The building will contain a number of offices besides being used as a dry goods store, and as the quarters of the Bank of Nova Scotia for that town. The architect is H. B. McDonald, of Chatham, N.B., while the contractors are John McDonald & Co., also of Chatham.

BUILDING IN MONTREAL FOR 1901.

Montreal, during the year 1901, has been prosperous in the way of building operations, the revenue from the permits giving to the city alone the sum of $2,141.75. The total value of the new buildings erected during the past year is estimated at $2,568,372, and the repairs and alterations at $332,361, bringing the total up to $2,900,733. The total revenue for the Montreal Building Inspector's Department, for the past year, amounted to $6,526.42, including water rates, for which $2,991.71 was obtained.

IMPORTANT ARBITRATION CASE

By a document made two years ago between The Rathbun Co., of Deseronto, and The Standard Chemical Co., of Toronto, the former agreed to deliver a certain quantity of wood to the chemical company, by whom it was to be converted into charcoal. This charcoal was to be shipped to Deseronto, for use in the iron works there. The Standard Chemical Co. being entitled to the use of any gases or by-products obtained in the process of manufacture. This agreement is yet to remain in force six years, but a dispute recently occurred, and now the matter is left to arbitration before Judge Macdougall, Christopher Robinson, K.C., and S. Lazier, local master at Belleville. The amount involved is said to be large.

BUILDING IN GALT.

There have been 37 new houses erected at Galt during the year 1901, at a cost of $61,900, while alterations and repairs to buildings reached $31,135. Only $4,000 was spent on business blocks, but over $48,000 was expended for manufacturing establishments. There were $12,000 worth of unclassified building operations, the total of which was over $157,710.

BUILDING OPERATIONS IN SIX TOWNS.

Below is given a list showing the value of the building operations in the six towns of Galt, Woodstock, Stratford, Waterloo, Wingham, and Listowel, all neighborong rivals. Galt leads with $157,510, while Listowel comes last with $37,420 :

Galt	$157,510
Woodstock	150,000
Stratford	100,000
Waterloo	90,000
Wingham	75,000
Listowel	37,420

BUILDING NOTES.

The parish of Charlesbourg, P.E.I., has decided to build a new church.

Dennis Kelly is going to build a brick cottage, to cost $700, on King William street, Hamilton, Ont.

Peter Innes is building a new residence on his farm, at Coldbrook, Wolfville, Nova Scotia.

A new Roman Catholic church is to be built in the Little Farm district, Hull, Que. Tenders are now being received.

W. E. Tracey, of W. E. Tracey & Co., plumbers, Winnipeg, is dead.

C.P.R. LOWER RATES TO THE WEST

The Canadian Pacific Railway Company has issued a circular reducing its freight rates from the east to Manitoba and the Northwest points for the year 1902. By comparing the following the nature of these reductions can be seen :

Toronto to Fort William, old rate, first class, $1.35 ; second, $1.15 ; third, 90c.; fourth, 65c.; fifth, 57c.; sixth, 48c. New rate, first class, $1 ; second, 82c. ; third, 66c.; fourth, 47c.; fifth, 40c.; sixth, 34c.

Toronto to Winnipeg, old rate, first class, $1.81 ; second, $1.55 ; third, $1.24 ; fourth, 97c.; fifth, 82c.; sixth, 74c. New rate, first class, $1.78 ; second, $1.52 ; third, $1.21 ; fourth, 95c.; fifth, 80c.; sixth, 73c.

There are also corresponding reductions to Northwestern points. Under the Crow's Nest Pass agreement tariffs, the commodity rates have also been lowered.

MARITIME PROVINCE BUSINESS MEN.

I had a talk the other day with W. H. Seyler, who for over five months has been travelling through Quebec, New Brunswick, and Nova Scotia, for The F. F. Dalley Co., of Hamilton.

It was Mr. Seyler's first visit to the Maritime Provinces, and he was naturally busy forming his impressions as well as selling goods, and he appears to have succeeded well in both respects. "It is pleasant," he said, "to do business with the merchants in the Maritime Provinces. They are conservative in their way of doing business, but they are most friendly and sociable, and I received every courtesy. Most of them complain, however, that the balance of trade between the Maritime Provinces and Western Canada is largely in favor of the latter.

"One thing I regretted to learn and that was that there appears to be a house here and there in Ontario that thinks it can use the Maritime Provinces as a dumping ground for cheap and inferior goods. The result has been to bring a discredit upon western goods and to make it extremely difficult to introduce new goods there."

Mr. Seyler said that Sydney was a revelation to him on account of the extent of the steel and iron works and the magnificence of the harbor. "Business," he said, "is rather overdone, too many merchants having opened up there. This, of course, will remedy itself in time.

"Wherever I went I saw 'Hardware and Metal.' This was a source of gratification to me, for it kept me well in touch with trade conditions in the west during my five months' absence."

The business men of the Province of Quebec, Mr. Seyler speaks most highly of, and particularly their quickness in coming to a decision and their general courtesy.

A GOOD MOVEMENT.

In the Maritime Provinces of Nova Scotia and New Brunswick tourists' associations have been working effectively for a number of years. The towns and cities have been beautified, and thousands of tourists have annually come from the New England States, Boston, and New York, and other cities farther south. The residents of these Provinces have reaped a golden harvest, while everybody has been benefited by the increased steamship service, the enlargement of the hotels and other public improvements rendered necessary to accommodate these visitors.

Now, in Victoria, B.C., a number of leading citizens have met together, formed themselves into a tourist association, adopted a constitution and have laid out plans whereby they hope to greatly beautify the town, and by extensive advertising through the newspapers, guide books and circulars, attract from all points tourists during the summer. Comment in many other centres of population and trade has been excited and people are largely watching to see what the results will be.

The Ottawa Showcase Co., who have carried on their business on the corner of Florence and Bay streets, Ottawa, have made an assignment to William A. Cole.

For some time a number of Winnipeg and United States capitalists have been taking into their serious consideration the scheme of transmission of electric power to Winnipeg from an outside point. Now, preparations are under way to establish a plant to furnish that city with motive power at half the present cost. This was announced at Winnipeg by F. W. Thompson, at the travellers' banquet.

PAINTERS PERFECT WHITE LEAD

Manufactured by the Latest and most Approved Method, Securing Whiteness, Permanence, and the Greatest Covering Power.

This Lead is a new and scientific combination of materials which are in themselves perfect pigments, ground in pure refined Linseed Oil. It will be found on trial to be the whitest lead ever introduced, besides which it has great covering power, works well under the brush, and shows up tints sharp and clear. In thinning, it takes more Oil than any other Lead, and will, therefore, cover more surface. It will also wear better either on inside or outside work than any paint ever offered before.

Toronto.

DICTATED BY

January 11, 1902.

To the Trade:--

With the object of placing our businesses on a more permanent footing and not subject to the interruptions which are liable to occur in an ordinary partnership or company, we have consolidated into "UNITED FACTORIES, Limited," which will enable us at the same time to greatly extend our manufacturing and marketing facilities.

The policy of the Company will be to supply the trade, and through it the consumers of Canada, with a better article than has been possible in the past, and at no increase in cost, and having ample capital will be in a position to buy its raw materials for cash to the very best possible advantage, and, through carrying large and complete stocks of finished goods, be able to serve you with the greatest promptness.

As the personnel of the management will not be changed in any way, we are not writing as though the pleasant connections, which have existed in the past, were to be severed; in fact, the well-known brands of Boeckh's Standard Brushes and Brooms, Bryan's London Brushes, and Cane's Newmarket Woodenware, will continue to be our leading standard lines, and with the same push and energy that has characterized these businesses in the past we look to an increased and continued connection with your house in the future.

All accounts due to Boeckh Bros. & Company, Toronto; Thos. Bryan, London, and The Wm. Cane & Sons Manfg. Co., Limited, Newmarket, are to be paid direct to them, and they will settle all accounts due by them respectively, as the new Company does not assume any book debts or liabilities.

Our Catalogue for 1902 is now under way and will be distributed at an early date, and our travellers will have the pleasure of calling on you very shortly with complete sets of samples, and as our prices have been very carefully revised and a large number of new lines added, we would ask you to kindly withhold your orders until they have the opportunity of seeing you and quoting prices.

Yours very truly,

Signed,

THE ADVERTISING ARENA.

Hints and Ideas for Business Men.

Mail Orders.

A GOOD paying mail order business is appreciated most by the fellow who had to work hardest to establish it. You never saw a summer snap that was satisfactory after the thermometer had tumbled 20 degrees.

The mail order man's ad. is his fortune.

Little conscience or no conscience at all has no place in the mail order business.

There are but two kinds of ads. The one takes money out of your till; the other puts money in.

Don't get discouraged in your advertising. Success comes in a way and at a time we little dream of.

Don't write a misleading ad. The fellow who buys a chestnut horse is not going to be satisfied with a horse chestnut.

The good reputation of a mail order man is worth more to him than a degree of Doctor of Divinity from a State university.

The line between failure and success is so closely drawn that mail order men frequently do not know which side they are on.

If you want to succeed in the mail order business, scheme! scheme! all the time. Out-scheme the other fellow is the only safe way.

If some mail order men would spend as much time and exercise, as much care in writing their ads. as they did in writing their first love letter, the failures in the business would be reduced one-half.—Jabs.

The Time to Advertise.

When the grain has all been gathered,
When the harvest is all through,
When the husbandman and family
Have not a thing to do
But sit around the fire
And read and talk about
The many things they have to buy
That can't be done without;
Oh, that's the time of all the year
A man should advertise—
When the frost is on the pumpkin,
And the pumpkin's in the pies.

—Jabs.

The Most Important Advertising.

Somebody has said that trade journal advertising as a class is the most impotent of all advertising.

Somebody struck it pretty nearly right.

This sad state of affairs cannot generally be laid at the door of the trade paper publisher. This scion of the shears and pen is generally anxious for his clients to furnish good copy.

It wasn't a hundred years ago that publishers deprecated generally the frequent changes of ads. They have had their eyes opened for quite a spell now. They realize that an advertisement must be fresh and newsy, like the rest of the journal. They have come to learn that the advertiser who sticks to them is the advertiser whose returns are satisfactory. They have sense enough to delve behind the whys of things and realize that the advertiser who gets returns is the advertiser who advertises.

And the advertiser who advertises well is the advertiser who changes his ads. every issue, unless (and it is a rare instance) he has evolved some peculiarly bright and particularly strong drawing card.

Even then it will lose a good share of its effectiveness after being run twice.

Besides this, its moral effect on the bulk of readers is bad.

For instance: There are large classes of people who take trade journals, and if they take them they look through them. It would be a rarity to find a dealer who looks through the editorial and news columns of his trade journal who does not look through the advertising pages.

He learns that Peter Jones & Co.'s ads. are always attractive and entertaining, and, as he turn over his pages every week or every month, he stops at Peter Jones & Co.'s say-so.

Should he find this week the same story that he read last week and the week before, it is a shock to him and a disappointment, and he is very apt to lose faith in Peter Jones & Co.'s advertisement—or at least lose interest.

Besides, he naturally gets the notion into his head that Peter Jones & Co. are going to tell the same story over and over indefinitely. This is all the more true of the man who has not made a particular note of Peter Jones & Co.'s advertising, but who has read it because it caught his eye and appealed to his reason, but who, as stated before, has never made any particular note of Peter Jones & Co.'s advertising.

One or two experiences like this will keep him away from these ads.

This is not only true of the reading matter, but even more so of the designs used for display.

This part of the work is first seen of all. That is its object.

The reader who notices your advertisement on account of its display design this week is, of course, impressed with it, else he would not have noticed it.

Next week, if he runs up against the same thing, he imagines it is the same all the way through, reading and everything, and he has no particular longing to review it.

There is nothing like keeping advertising green. It can be made just as newsy as the news column. It can be made more newsy for the pure and simple reason that it strikes the dealer right close to his heart—his own business.

It means dollars and cents to him. It means just exactly what he is in business to get.

If you tell a dealer that you can help him and furnish him a better line of goods for less money, or in which there is more profit for him, and if you make him believe it, you will interest him.

He can be made to believe it if he is kept after persistently enough and given good hard nuts of wisdom to ponder on, That can never be done by general statements and outlandish claims and high-sounding words and such doddering rot which the trade papers are about 90 per cent. full of, and which is the fault, first, last and all the time of the advertisers themselves.

A man who has accumulated enough worldly wisdom to accumulate enough coin of the realm to surround himself with a stock of goods is a man generally who likes common sense.

He isn't very sentimental or poetical. He is hard business. There isn't a great deal of difference between a farmer and a country merchant. One is usually the outcome of the other. One is horny-handed and the other is horny-brained. Such a dealer is not affected to any alarming extent by bare, bald statements. What strikes him is a pointed argument—pointed at both ends.

The sooner manufacturers and jobbers and wholesalers realize this and will quit soaring to heaven the minute they get a pencil in their clutches to write out their

advertisements, the sooner trade paper advertising will increase its effulgence several candle-powers for good.

Which means that it will increase the advertiser's wherewithal several tinkling dollars.

It is almost enough to give one goose pimples to run through the pages of the trade papers and see the good, costly, liberal spaces which are filled with mostly just about nothingness.

Would it not be more to the point and a better investment for the advertiser who has not the time or the inclination to prepare proper copy to put a little money into this part of the work alongside of the money he puts into the space itself?

Good copy and good space are inseparable for good. Divided, the whole thing falls. As a usual thing, good copy costs less than space. Generally it costs very much less.

But where a $100 space is not worth $1 if it lacks good copy, an additional outlay of from $10 to $25 to procure good copy will increase the worth of the space not only to what it actually cost, but more, and make it a gilt-edge paying investment.

Where is the philosophy of doing otherwise, unless the advertiser has a combination of the two—good space and good talk?—Current Advertising.

How to Judiciously Distribute.

An enormous amount of money is annually wasted through the injudicious distribution of advertising matter. This is true in many lines of publicity, from the unpretentious and annoying handbill of the country grocer to the elegantly-printed and expensive booklet or catalogue of the manufacturer and the manufacturer's agent. In many cases this waste is brought about through carelessness—in more cases it is a direct result of ignorance.

To begin at the bottom. The handbill, or "dodger," as it is more familiarly known, is practically a dead loss to the advertiser. From a business point of view there is absolutely nothing to it. People don't have time to read this kind of stuff, and even if they did there is nothing about a black and white piece of common paper to catch the eye, and granting that even if the attention were attracted there is ordinarily nothing in the character of the reading matter calculated to interest the reader. The handbill is a dead failure—that's flat.

Now, to leave the retail man and his ideas.

The expensively-designed and handsomely-executed folder and booklet so much in vogue at present is frequently distributed in a reckless and unprofitable manner. There are firms to-day who put a whole lot of money in this class of work without having any fixed or definite plan as to the distribution of the same. It would appear that, upon the delivery of this booklet or folder in question by the printer, all interest in the placing thereof ceases.

Lists are an unknown quantity to the careless advertiser, or even if such lists are used they are worked over indiscriminately without regard as to whether this person or that person will be in any way interested in the goods exploited. It is too often a case of "get 'em off as quickly as possible and have done with it."

When it comes to a matter of dollars and cents this carelessness or ignorance is bound to cost somebody dear. Just supposing, for instance, that a firm sends out 20,000 booklets costing 5c. each. Of this number, say, 5,000 are wasted by injudicious distribution. It's simply a case of $250 gone to the everlasting bow-wows, not counting postage.

Now, don't think this is painting the matter in colors too strong. Cases such as the above do exist, as the writer will affirm with positive knowledge to back him up.

Books, booklets, folders and other advertising novelties can and will prove an impetus to business if distributed with a proper amount of care and consideration; otherwise, this publicity scheme will be as futile as the endeavors of a man who tries to empty a tub of water through the use of a coarse-mesh coal screen.

There is just as much virtue in an intelligently-made up list as there is in the quality of the advertising matter sent out. An advertisement sent to one promising customer is worth 20 received by the waste-basket, because-not-in-my-line type.—Ad. Sense.

Lacking Nerve.

Many new advertisers are lacking in nerve, says a contemporary: They won't keep at it long enough. (All the better for the bulldog fellow who hangs on.) The public is a big thing. It is hard to stir up. It moves slowly sometimes, wants to get acquainted first. Likes to deal with well-known people. The only way to get acquainted and become well known is to keep on advertising. The first investment may not pay at once, but, like the foundation of a house, it is necessary even if it is underground. When additional storeys appear the house is a landmark, and not until then.—Agricultural Advertising.

The Hard-to-Get Customer.

Some advertisers stop short of the reader who is hard to convince, aiming their ads. and follow-up literature at the susceptible souls who are open to conviction, says Printers' Ink: But the reader who is hardest to transform into a customer is usually best worth going after. Not only will he make the staunchest customer, once he has been brought to book, but he will carry weight with his neighbors. He is almost invariably an arbiter of opinions in his community, and what he thinks or says is of more importance than what is said or thought by the fickle.

How to Do It.

Bright ideas in advertising or in other lines do not come merely as "inspirations," remarks an exchange. They come with hard work more often; with application and continued application. The man who keeps at advertising sends out the best ads. always, not the occasional writer who picks up tablet and pencil, announcing mentally to himself: "Now I'll write a regular stunner."

As you look over the field who are the men distinguished by brilliant advertisements? They are the firms who work at it daily—whose names and goods hold the public eye every hour of the day. You can name them at once.

Keep at it. That's the motto for steady as well as brilliant work.

Signs and Sayings for Advertisers.

A much-talked-of store.
Our patrons wear smiles.
Values that are revelations.
Our goods are this year's vintage.
Nothing worth having is not here.
Each day here is "bargain day."
Our low prices bring you back.
Every shelf teems with bargains.
Perfect service promptly rendered.
We expand values and condense prices.
Telephone us for what you forget.
We don't promise the earth for a nickel.
Our method of selling invites you back.
We are here to think of your interests.
Your coming merely to look pleases us.
Cross the street first; then come here.
Our clerks are here to assist, not to insist.
You don't wait here—you're waited upon.
What you buy thoughtfully we buy back.
The goodness of our goods goes without saying.
Incomparable values at unmatchable figures.
"Spoils from every clime" are congregated here.
Our clerks serve us well by serving you well.
It pleases us to say that we are here to please.
We couldn't afford to give you a bad bargain.
To see our goods is a "liberal education" in trade.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**
Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

1902 GARDEN HOSE. 1902

We manufacture the most popular and best selling lines of Garden Hose in Canada. Our "Maltese Cross" brand we confidently recommend as the finest Garden Hose on the market.

We have other grades not quite so expensive, but good reliable brands, viz.: "Lion" (the popular medium-priced hose), "King" "Sun" and "Leader."

Our "Kinkproof" (wire wound) hose is wired by a special process controlled solely by ourselves, and is so constructed that it may be cut at any wind of the wire without loosening or uncoiling, the wire being self-gripping throughout each length.

KEMP'S Broad Hoop Roll Rim Milk Can Bottoms

possess all the points which go to make perfection in Can Bottoms. They have been used by a criticizing public for three seasons, and their popularity is evidence of the satisfaction which they gave. The Roll Rim has no sharp turns which break the grain of the metal and lessen its wearing qualities. It has a broad wearing surface and will not damage floors. They do not cost more than an inferior Bottom. **The IRON-CLAD TRIMMINGS** are made the same as the broad hoop, and differ from them only in having a narrower and thicker hoop which does not require the Roll Rim, and, therefore, can be sold cheaper. For durability and finish our trimmings are unequalled.

STEEL RAIL MAKING IN CANADA.

THE Department of Railways at Ottawa has been informed by Mr. F. H. Clergue that his company, the Algoma Steel Company, Sault Ste. Marie, Ont., will begin the making of steel rails next month. The capacity of the mill is 1,000 rails a day and the materials necessary for the production of 50,000 tons are said to be now in stock. The Algoma Company will not at present produce its own pig iron, but will obtain the greater part of its supplies from the Midland furnace in which Mr. Clergue is also financially interested.

Mills to re-roll old iron rails were started a number of years ago in Toronto and Hamilton, but these went out of existence with the advent of steel rails, so that when the mill at Sault Ste. Marie begins operations next month it will have the honor of being the first to make rails in Canada, either iron or steel.

It will be remembered that in the House of Commons in April last the Minister of Railways, Hon. Mr. Blair, announced that his Department had placed an order with Mr. Clergue's company at Sault Ste. Marie for 25,000 tons at $32.60 per ton ex wharf Montreal or Levis, delivery to be made from June to September, 1901. A like quantity was to be taken during each of the following four years, the price to be the same as that ruling in the British market. It will be noticed that the period when the first 25,000 tons were to be delivered has elapsed and with it the price which the Government was to have paid for the same. We therefore presume that for whatever rails Mr. Clergue's company may supply the Government during the next four years the price paid will be that rate ruling in the British market. The price now ruling in Great Britain is 10 to 15s. a ton lower than a year ago.

A press despatch from Ottawa, under date of January 15, says that the Government has made a contract with an English firm for the supply of 15,000 tons of steel rails for use on the Intercolonial, presumably on account of the inability of The Algoma Steel Co. to begin to fill its contract as originally intended. It is, however, gratifying to know that next month will see the mill in actual operation.

The Dominion Iron and Steel Co., Sydney, began the making of steel ingots three weeks ago, and soon we may also expect to see that company turning out both plates and steel rails.

HON. MR. FIELDING'S "SCOOP."

THERE was nothing particularly clever about Hon. Mr. Fielding's action in inviting Marconi to visit Canada when the Anglo-American Company undertook to force him out of Newfoundland. He, however, did a wise thing. And, after all, what is most essential in public men as in business men is wisdom, not cleverness.

His action has certainly pleased the man who has given utility to wireless telegraphy and made the establishment of one or more stations in Canada all the more probable.

Mr. William Smith, secretary of the Post Office Department, who has recently returned from Newfoundland, says that Marconi was greatly perturbed when he was served with the now-famous notice by The Anglo American Cable Co., and that Mr. Fielding's invitation to visit Canada was a great relief to him.

Besides being a direct benefit to Marconi, the invitation of Mr. Fielding was indirectly at least a benefit to Canada itself, coupling as it did this country with the name of the great inventor, whose recent wonderful results in wireless telegraphy have astonished the world.

Canada is benefitting from Mr. Fielding's action because he did the right thing at the right moment. Like a trained newspaperman that he is, he saw there was a good thing in it for Canada. And by acting quick he got, to use a newspaper term, a "scoop" on his esteemed contemporary, the United States. He is to be congratulated.

LOWER PRICES ON WIRE AND NAILS.

SINCE we went to press last week a number of marked changes have taken place in prices. Not for a long time within the same period have so many taken place.

HARDWARE AND METAL last week said that the nail manufacturers had for three days been wrestling with the subject of prices, but that up to the hour of going to press no final result had been reached. Shortly after we went to press, however, it was decided to reduce prices 30c. per keg on less than car lots and 25c. per keg on car lots. The difference between car lots and less quantities is now therefore only 5c. per keg instead of 10c. as formerly.

The decline is scarcely due to the condition of the iron and steel market, which is strong now and has been for some months. Two or three weeks ago, owing to competition and a quiet market, prices declined $2 to $3 per ton in the United States, but since then the market over there has assumed a steadier tone. In fact, at a meeting held only on Tuesday last, January 14, prices were slightly advanced. In its report of the meeting, The Iron Trade Review of January 16 said: "At a meeting of representatives of the independent wire interests of the country and the American Steel and Wire Co., held here Tuesday, January 14, a new price list was estabilshed and an agreement reached to hold prices on a basis similar to the plate, bar and structural steel agreements. The meeting was in session all day, and, upon its conclusion, it was announced that prices had been established on a basis about equal to the ruling market. Wire nails, which have been selling on a basis of $2.05 to $2.10 per keg in carload lots, were fixed at $2.05 per keg to large jobbers, $2.10 per keg to carload buyers and $2.20 on less than carload lots."

Trade has been quiet during the past few weeks, but the direct cause of the decline in the price of wire nails is the keen cutting inaugurated by two or three houses. Some of these reduced their figures to as low as $2.50 per keg. And, although the price has again been made uniform, the feelings of some of those in the trade towards each other has not yet been materially softened, particularly as quite a quantity of nails were sold during the few days that the cutting was at its keenest.

The discount on miscellaneous wire nails has been fixed at 75 per cent.

Cut nails, in sympathy with wire nails, are 20c. lower on less than car lots, and 17½c. lower on car lots, making the quotations $2 35 and $2.27½ respectively.

Smooth steel wire is lower, and oiled and annealed is no longer quoted at net figures. Particulars of this will be found in our prices current. The base price of smooth steel wire is now $2.60 per 100 lb. Oiling is 10c.; coppering, 60c., and tinning, $2 advance. No change has been made in the list of fine steel wire, but the discount is now 22½ per cent. instead of 17½ per cent.

Other changes in prices are as follows: Pressed spikes, discount 25 per cent., was 22½ per cent. Staples, bright, $2.90; galvanized, $3.25, was $3.25 and $3.50 respectively. Lead pipe, discount 35 per cent., was 30 per cent. Shot, 22½ per cent., was 17½ per cent.

HON. SYDNEY FISHER'S MISTAKE.

IN an address at Leskard, Ont., on January 9, Hon. Sydney Fisher, Minister of Agriculture, said there was no Customs duty in Canada over 35 per cent.

Mr. Fisher is what a good many of his predecessors in his particular portfolio were not, namely, a practical farmer. And he has, on the whole, administered his Department with acceptance. But because Mr. Fisher is an efficient Minister, it does not follow that mistakes which he may make should go uncorrected. Indeed, the very fact that such can be said of him gives his utterances all the more weight, and makes it all the more necessary that they should be rectified when they are wrong.

In declaring that there was no duty over 35 per cent., Hon. Mr. Fisher was wrong. We cannot believe that he intentionally said what was not true; but as some of the articles on which the duty exceeds 35 per cent. appertain more to his Department than to any other in the Government, it is difficult to understand his digression from the facts.

On canned vegetables, for example, the duty is much larger than 35 per cent. The duty is a specific one of 1½c. per lb., and means, based on to-day's prices, a rate of at least 50 to 60 per cent. On jams and jellies the duty runs from 45 to 50 per cent. at the smallest calculation. Then, there is granulated sugar, the duty on which, according to the price at which importations are being made this week in Toronto, approximates closely to 50 per cent.

Then, there are some lines in the hardware trade, such as ammunition, hinges, etc., on which the duty collected is a great deal in excess of 35 per cent. of the cost of the goods.

It is not with any desire to be captious that we draw attention to the incorrectness of Mr. Fisher's remarks regarding the duty, but there is altogether too much recklessness on the part of public speakers in both political parties, and independent journals are only performing their duty when they expose them.

AN INCOMPETENT BODY.

EVERY movement Toronto makes to improve its municipal machinery appears to be abortive. When, some eight or nine years ago, the number of the wards was reduced it was hoped that the influence of the ward heeler would be weakened and that the quality of the aldermen would be improved. But it is only necessary to compare the members of the council of to-day with the council of ten years ago to prove how fallacious that effort has been.

Then came the Board of Control, into which was to be gathered the aldermanic cream. But here again the expectations of the municipal reformers have not been realized. And the composition of the Board for 1902 furnishes the most concrete example of this that we have had since that particular piece of municipal machinery was created.

To the business men of Toronto who concern the mselves in the affairs of the "Queen City," the Board of Control for 1902 in a travesty on municipal government even as we have it to-day. And it is no wonder. Not one among the four is a strong man. And yet the power which, under the Act of the Legislature the members thereof exercise, is great.

It is to be hoped that the glaring incompetency that is concentrated in this year's Board of Control, and, not only in the Board of Control, but in the chairmanships of the different standing committees of the Council, will awaken the business men of Toronto to a sense of their duty. It is a well-known fact that they do not now do their duty.

The predominating influence in the municipal politics of Toronto is the ward heeler. The business man is nowhere. And it is only because he, by his apathy, permits it.

TRADE IN COUNTRIES OTHER THAN OUR OWN.

TRADE OUTLOOK IN SHEFFIELD.

THERE is much searching of hearts among steel manufacturers as to the prospects of the new year, a point on which all seem to be in the dark. On account of the absence of work to commence with the outlook is regarded as decidedly gloomy, although some are of opinion that the South-African market will shortly furnish some business, and all agree that the complete reopening of that market would give a valuable stimulus to trade all round and restore general confidence. The result of our inquiries points to slackness for a considerable time in the demand for steel for railway, marine, and engineering purposes, nor are there any indications of early improvement in the crucible-steel department, the depression in which has already lasted for two years. The bar iron department is likely to be less strong than was the case in the past year, for manufacturers are not hopeful of reductions in the cost of raw material and fuel.—Ironmonger, January 4.

PLUMBERS' BRASS GOODS LOWER.

The sharp decline in copper will, it is expected, cause the announcement of lower prices on plumbers' brass goods after the meeting of the executive committee of The Brass Goods Manufacturers' Association, scheduled for the 14th inst. A revision of prices based on 13-cent copper is thought likely. The demand for brass goods, as is natural under the circumstances, has fallen to a very small volume. Buyers are not taking anything in this line beyond what their immediate needs dictate.

PRICES OF STOVES STIFFENING IN THE UNITED STATES.

Recently we gave notice that an advance of 5 per cent. in the price of stoves had been made in the west. This action stimulated the stove manufacturers of eastern Pennsylvania to profit by the example set, for at a recent meeting an advance of 5 per cent. in the price of stoves, to take effect on January 1, was made by them. So far, no evidence has reached us of a similar course being pursued by the up-State manufacturers of New York, who have held meetings frequently at the Waldorf-Astoria in New York City, nor has the apathy which seems to have seized the body of manufacturers which has hitherto met at the Astor House been shaken off to the extent of making an effort to adjust their prices in accordance with the recent increases in the cost of materials.

Notwithstanding that the year 1901 has been considered a good year in many other lines of trade, some stove manufacturers are emphatically of the opinion that the profit derived from the manufacture of stoves that have been sold in New York has been by no means satisfactory. It is also noted that the distribution of stoves in New York City and vicinity has practically gone from the old-time stove dealer to the department store, the furniture dealer and the installment house, some houses stating without hesitation that 75 per cent. of the names of buyers in New York City on their ledgers are of this class. The salesmen have also begun to remark that there is a scarcity of stove dealers in New York City. Whether the contention is true that New York is the dumping ground for the surplus stove stocks from all sections of the country at whatever price can be secured, or whether the new distributors are more shrewd in their buying than the old time stove dealers, is a problem the solution of which is often discussed.

TRADE OUTLOOK IN WOLVERHAMPTON.

Next month will prove a crucial time. In a few branches the future is well assured, but for the most part houses that start the year with enough employment for their hands and plants are anxiously awaiting the receipt of new contracts to replace those which are running out. The exceptional activity in the wagon-building yards accounts for a considerable output of iron and steel, and this is likely to prove a useful standby throughout the year. The outlook as regards bridgework and other constructional material is also hopeful, though orders have not been placed so freely of late as during the autumn. It is recognized that United States and German competition will have to be reckoned with, but leading makers in this district do not fear for the result if they are allowed to meet their rivals on equal terms.—Ironmonger, January 4.

PIG IRON IN GREAT BRITAIN.

The pig-iron market has been dull during the week, and with the influence of the holidays still abroad, business has been of a comparatively unimportant character. In Glasgow the warrant market has recovered, to some extent, from the collapse which ensued on the announcement of the failure of a London firm, but quotations are still quite 6s. below the level prevailing before the sensational drop referred to. It is considered probable that business in Scotch warrants will show an expansion at the reduction, and that more activity will result in the market. One outcome of the new level of prices will, no doubt, be a check in the exportation of iron from Cleveland to Scotland, the difference in the price of Cleveland and Scotch warrants having been appreciably narrowed. The former have not been much affected by the change North of the Tweed, and remain in the neighborhood of 42s. Hematites are in a rather better position than ordinary pig. In Barrow warrants are down, but makers are still asking 58 to 60s. for mixed numbers. The following is a statement of the stocks of pig iron in public stores :—

Public stores stocks, in tons :	Wednesday.
Connal's at Glasgow	58,400
Connal's at Middlesbrough	139,000
Connal's at Middlesbrough, hematite	300
West Coast hematite	15,000
N.E.R. Stores, Middlesbrough	1,460

Since the beginning of the year the stock of Cleveland iron in store has been increased by over 80,000 tons, while in Scotland and Cumberland there have been reductions of 12,850 and 7,600 tons, respectively.—Iron and Coal Trades' Review, January 3.

NEW YORK METAL MARKET.

TIN.—The cables from London to-day showed a further rise of £1 10s. in tin, and the New York market responded with an advance of about 25 points. Still there was very little business done here and trading in London was light, the upward movement in values there being due apparently to speculative manipulation. It is intimated that the position of the metal abroad is not so stable as might appear on the surface. The Chinese merchants in the East have been buying and piling up stocks; hence the light shipments in December. Much, it is claimed, depends upon what they do with their holdings. If, as is feared, they throw them on the market when they discover the actual condition of the metal trades in Europe and the United States, which has grown out of the copper war, a heavy slump in prices may result. Hence in London, as here, there is little disposition to buy, particularly for future delivery. The New York market closed firm but quiet at 23.35c. bid and 23.50c. asked for spot. January was quoted at 23.25 @ 23.50c.; February at 23 @ 23.30c., and March at 22.75 @ 23.30c. The Singapore quotation was 5s. higher, being £103 c.i.f. London. The Manitou, from London, is here with 150 tons, making the total arrivals since January, 1,970 tons.

COPPER.—The lower prices have not appreciably stimulated consuming demand, business being still on the hand-to-mouth order. The market is unsettled with an easy tone, and while official quotations are 11¼c. for Lake Superior ingot, 11⅛c. for electrolytic and 11c. for casting, it is reported that sales of Lake copper have been made at 11c. The London market continues to decline and closed weak to-day at 2s. 6d. below last night's figures on spot and 5s. lower on futures. Spot was more active there than for several days, the reported transactions aggregating 400 tons.

PIG LEAD.—The only feature of interest in this metal was the further decline of 2s. 6d. in the price of soft Spanish in London. Here the market was dull, with prices somewhat nominal on the basis of 4c. for lots of 50 tons or more. The St. Louis market was quiet at 3.87½ @ 3.90c.

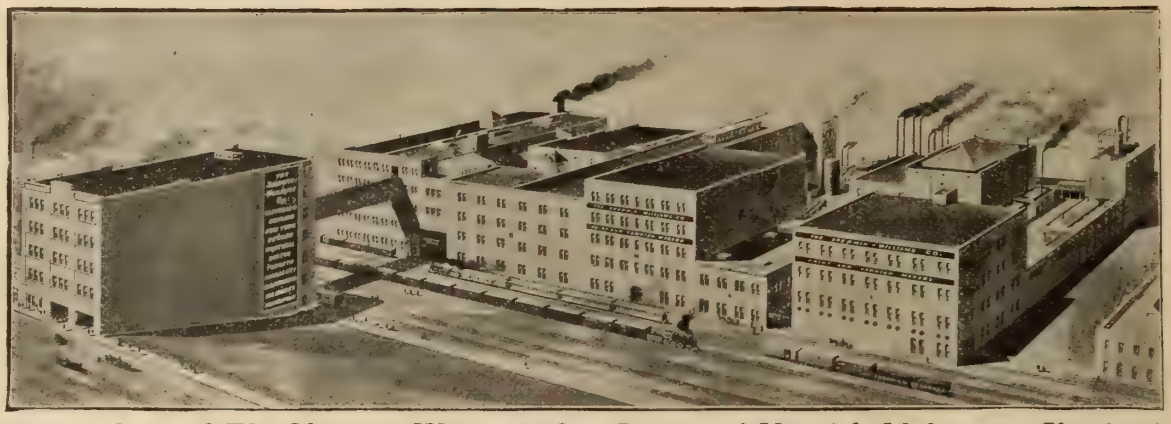
SPELTER.—Trade continues on a rather small scale and the tone of the market is easier, spot and January being now quoted at 4.35c., while February delivery is offered at 4.30c. St. Louis was dull at 4.15c. No further change occurred in London.

REGULUS ANTIMONY.—Prices are unchanged under a moderate demand at 10¼c. for Cookson's, 8¼c. for Hallett's and 7½ to 8c. for other brands.

IRON AND STEEL.—There is little inquiry for pig iron for delivery beyond the next six months, and in fact, not much disposition to buy even nearer futures. Spot iron is wanted, though not so much as previously, but the scarcity of available supplies keeps business within narrow limits. Advices from Philadelphia state that those who really need iron and cannot get deliveries on their contracts with the furnaces buy wherever they can on the best terms obtainable; but even this does not absorb any important tonnage. The lower prices named on steel are diverting attention from bar iron, for which it is being substituted. Sheets are reported to be dull and lower prices, it is thought in some quarters, may result from the continued lack of important demand and sharp outside competition. There is a good business in plates, however, and a considerable demand for structural shapes.

TINPLATE.—The market is still without features of interest, trade being dull and buyers showing a disposition to hold off awaiting developments.

THE SHERWIN-WILLIAMS PAINT AT CLEVELAND.



THE growth of The Sherwin-Williams Co., the paint and varnish makers, is an example of business progress that is full of encouragement to all manufacturers who believe in the success of good-quality merchandise.

For some 30 years they have held strictly to the principle of making and selling only the best goods, and in the face of cries for "cheap" paints, and of "cheap" competition they have built one of the largest and most substantial businesses in the world.

From a single one-storey building in 1870 their business has grown to require four large plants in Cleveland, Chicago, Montreal and Newark, with offices and warehouses in 11 cities. They have 95 travelling representatives on the road, covering the entire world.

Within the last five years their sales have trippled, and there seems to be no let up to the splendid growth they are enjoying. The accompanying illustration shows The Sherwin-Williams Plant No. 1, at Cleveland. This illustration is not exaggerated in the slightest; on the contrary, it does not show the box and printing and advertising departments, which occupy separate buildings a short distance from the main plant. When it is considered that this illustration shows but one of four plants, and that the company also controls warehouses and offices of its own in 10 cities outside of Cleveland, one can gather some idea of the extent of The Sherwin-Williams Co.'s business.

Visitors to Cleveland are invited to call and inspect The Sherwin-Williams Co.'s plant and premises.

Plant No. 1 of The Sherwin-Williams Co., Paint and Varnish Makers, at Cleveland.

In addition to this large plant the Company has three others at Chicago, Montreal and Newark, N. J., with warehouses and offices in New York, Boston, Toronto, San Francisco, Kans s City, Los Angeles and Minneapolis.

SOME TYPES OF LETTERS OF INTRODUCTION.

A gentleman who has been in a position to employ large numbers of educated young men in Boston, New York and Philadelphia, says he has become accustomed to three distinct types of the letter of introduction.

In Boston: "Permit me to introduce Mr. Jones, who graduated in highest honors in classics and political economy at Harvard, and later took a degree at Berlin. He speaks and writes French and German, and if you employ him I am sure his learning will make his services extremely valuable to you."

In New York: "The bearer, Mr. Brown, is the young fellow who took hold of Street & Company's Chicago branch when it was so run down, a few years ago, and built it up to a hundred thousand a year. He also made a great hit as Jackson & Company's representative in London. He's a hustler, all right, and you'll make no mistake if you take him on."

In Philadelphia: "Sir: Allow me the honor to introduce Mr. Rittenhouse Penn. His grandfather on his mother's side was a colonel in the Revolution, and on his father's side he is connected with two of the most exclusive families in our city. He is related by marriage with the Philadelphia lady who married Count Taugenichts, and his family has always lived on Spruce street. If you should see fit to employ him, I feel certain that his desirable social connections would render him of great value to you."—Atlantic Monthly.

A PROPOSED NEW BANK.

AT the last session of the Dominion Parliament a charter was obtained for the establishment of a new bank in Canada, to be known as the Sovereign Bank. The scheme is backed up by a number of Canadian capitalists, who are supported by a number of prominent financial men of the United States, including J. P. Morgan & Co., besides a number of others closely connected with The Standard Trust Co., of New York. The authorized capital of this institution is placed at $2,000,000, of which $1,000,000 has already been subscribed. An issue of 20,000 shares, each of a par value of $100, is being floated on the market at a premium of 25 per cent., which will enable the bank to commence business with a reserve fund of $250,000. The headquarters of the bank will be in Toronto; the executive offices in Montreal.

Duncan M. Stewart has been appointed general manager, while the first president is H. S. Holt, President of The Montreal Light, Heat and Power Co. The following are the board of directors: A. A. Allan, Toronto; Archibald Campbell, ex-M.P., Toronto Junction; Randolph Macdonald, contractor, Toronto; Senator Peter McLaren, of Perth; Senator D. McMillan, of Alexandria; John Pugsley, of Pugsley, Dingman & Co., Toronto; Sir Melbourne Tait, acting Chief Justice of the Superior Court, Montreal; Henry R. Wilson, of Wilson & Stephens, bankers, New York City.

All these are well-known men, the general manager, D. M. Stewart, having had many years banking experience both in Canada and the United States. He was connected with the Bank of Commerce for a number of years, afterwards filling the post of inspector for the Royal Bank of Canada, in Montreal. Henry R. Wilson, the New York director, is a prominent banker of that great commercial centre. In addition to him the bank will have there an advisory committee composed of W. M. C. Lane, President of The Standard Trust Co., New York; and Pane D. Cravath, of Guthrie, Cravath & Henderson. This is following the custom of other leading Canadian banks, who all have agencies in New York, as they usually have to keep a portion of their funds invested there.

The foreign bankers and correspondents are: J. P. Morgan & Co., New York; The Standard Trust Co., New York; J. S. Morgan & Co., London, Eng.; and Morgan, Harjes & Co., Paris, France.

The branches of the Sovereign Bank in Toronto and Montreal will be opened immediately. The site of the Toronto offices and the date of opening, it is expected, will be announced in a few days.

The stock of J. C. Chouinard, general merchant, St. Charles, Bellechasse, Que., has been sold at 45 cents on the dollar.

In conjunction with the mill of The Canada Wood Specialty Co., Orillia, Ont., there is being built a new veneer factory, 40 x 86 feet, a very substantial and roomy structure. It is now being fitted up with machinery taken from the old factory, and will be ready for work in about a week.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

A WINDING-UP order has been granted re The Brampton Gas Company, and E. R. C. Clarkson has been appointed interim liquidator.

Neil J. Gillis, general merchant, Glace Bay, N.S., has assigned.

J. N. A. Carriere, general merchant, St. Philippe, Que., has assigned.

J. T. Fradette, general merchant, St. Prime, Que., has assigned to V. E. Paradis.

D. W. McClure, general merchant, Fort William, Ont., has assigned to Charles W. Jarvis.

L. J. Palmer, general merchant, Conway Station, P.E.I., has assigned to Carvell Bros.

L. H. Cormier, general merchant, Mount Carmel, N.B., offers to compromise at 40c. on the dollar, secured.

J. A. Duval, hardware merchant, Montreal, has assigned, and a meeting of his creditors was held on January 16.

PARTNERSHIPS FORMED AND DISSOLVED.

Scott & Gray, builders, MacLeod, N. W. T., have dissolved.

Poisson & Co., blacksmiths, Chartierville, Que., have dissolved.

The Vulcan Iron Works, Maisonneuve, Que., have dissolved and reregistered.

Cunningham & Anderson, electricians, etc., Greenwood, B.C., have dissolved.

Jones & Anderson, general merchants, Wyoming, Ont., have dissolved, Willard Jones continuing.

H. C. Barnaby & Sons, general merchants, Bridgewater, N.S., have admitted H. S. Barnaby as partner.

Hilliard & McKinley, builders and planing mill, London, Ont., have dissolved. Thos. Hilliard continues.

SALES MADE AND PENDING.

Heron & Youngs, general merchants, Embro, Ont., have sold out.

J. E. Pedlow, general merchant, Vienna, Ont., is advertising his business for sale.

James H. Jackson, blacksmith, Keady, Ont., is advertising his business for sale.

S. J. Reynolds, blacksmith, Stroud, Ont., is advertising his business for sale.

The Manitoba Steam Laundry, Brandon, Man., are advertising their business for sale.

The assets of J. L. Aubert, general merchant, St. Eloi, Que., are to be sold on January 17.

B. F. Reid, general merchant, Aylwin, Que., is to have his assets sold by tender on January 17.

The stock of H. Levasseur, general merchant, Fannystelle, Man., was advertised for sale by auction on January 14.

CHANGES.

Myrand & Cie., machinists, Deschambault, Que., have registered.

John Cober, carriagemaker, Ethel, Ont., is removing to Brussels.

E. V. Demers & Co., foundrymen, Maisonneuve, Que., have registered.

The Dominion Subway Co., Limited, Montreal, has obtained a charter.

The T. W. Hand Fireworks Co., Hamilton, Ont., has obtained a charter.

Wise Preparation

for the painting season that will soon be here, means a good stock of

THE SHERWIN-WILLIAMS PAINT

We are planning for the biggest year we have ever known. We believe there will be more painting done this year than ever before, and we mean to get our share of the business. We have prepared for a big season.

If you join with us you can get the lion's share of the trade in your locality. We'll give you the methods and advertising to get it and the paint to hold it after you once get it.

There's money for you in our paint agency proposition. If you want to investigate send for our "B-13 Booklet," free, but full of valuable information for wide-awake paint dealers.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CHICAGO, NEW YORK, CLEVELAND, NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO, KANSAS CITY.

Capsey & Bockers, general merchants, Frelighsburg, Que., have registered.

The J. H. Ashdown Hardware Co., Limited, Winnipeg, have obtained a charter.

The New Richmond Lumber Co., New Richmond, Que., has applied for a charter.

The Colonial Portland Cement Co., Limited, Wiarton, Ont., has obtained a charter.

MacColl's Electrical Works, electrical supplies, etc., Ottawa, have retired from business.

J. O. Clement has registered for The Addressograph Co., addressing machines, Montreal.

Manson Bros., general merchants, Wolseley, N.W.T., have sold out to J. Curtis & Co.

The New Ontario Builders' and Contractors' Supply Co., Limited, Sault Ste. Marie, Ont., has obtained a charter.

The Moody, Matthew & Sons Co., manufacturers of agricultural implements, Terrebonne, Que., have applied for a charter.

FIRES.

The mill of The Cleveland Sarnia Sawmills Co., Limited, Sarnia, Ont., was slightly damaged by fire.

The premises of Rhodes, Curry & Co., Limited, builders, etc., Amherst, N.S., were damaged by fire; insured.

The stock of Magnan Freres, hardware merchants, Montreal, was partially damaged by fire and water. There was some insurance on the stock.

DEATHS.

R. R. Dobell, of Dobell, Beckett & Co., wholesale lumber merchants, Quebec, Que., is dead.

MINOR CHORDS.

Do not "blow" about your business to customers. They might conclude that you are doing too much.

Do not ask two prices. Your customer might think that the other fellow gets the lowest.

Do not keep a clerk down. Your competitor might lift him up.

Do not fail to keep your engagement with the travelling salesman. His time is money.

Do not expect returns from your first advertisement the same day. It takes time for seeds to take root.

Do not say a word in your advertisement that you will have to "eat." Indigestion is troublesome.

Do not try to be funny in your advertisement. There's a wide divergence of opinion as to what constiutes fun, and the joke may be on you.—The Keystone.

INQUIRIES ABOUT CANADIAN GOODS.

THE following were among the recent inquiries relating to Canadian trade received at the Canadian Government Office in London :

1. Inquiry has been made for the name of a first-class firm of engineers and ironfounders in Canada who would undertake to make a patent grinding machine, and to represent an English house supplying machine tools.

2. An important firm of soap manufacturers wish to enter into communication with a Canadian firm who would be prepared to buy their goods and with whom they would be ready to enter into an exclusive arrangement. They would prefer to correspond with a reliable firm having travellers calling upon druggists and others interested in high-class toilet soaps and perfumery.

3. The same firm would also like to correspond with a Canadian business house in a position to handle household soap.

4. A Rotterdam firm is asking for the names of firms in the Dominion dealing in ores of various kinds.

5. A correspondent in the west of England asks to be furnished with particulars of the export timber trade of the Province of British Columbia with a view to opening up business relations.

Inquiries received at the Canadian section of the Imperial Institute :

6. A manufacturers' agent who is established both in London and Canada seeks a few additional agencies of Canadian manufacturers wishing to develop trade in the United Kingdom; Canadian references furnished.

7. A manufacturer of gelatines, glues, greases, etc., asks to be placed in touch with a first-class Canadian house prepared to handle same.

[**The names and addresses of the firms making the above inquiries can be obtained on application to the Editor of** HARDWARE AND METAL.]

THE CAR SHORTAGE.

THIS fall and winter the shortage of grain cars to carry the stores of grain has been keenly felt by all the towns and shipping points of Manitoba. Excepting at competing points, such as Brandon, Hartney and Portage la Prairie, the crop has not been handled at all satisfactorily. But it is said that the C. P. R. has supplied plenty of cars and motive power at points on the C. P. R. line system in the United States. To protest against this state of affairs the citizens of the town of Griswold, Man., and the surrounding country, held an indignation meeting and resolutions were unanimously passed and copies of these were ordered to be sent to the officials of the C. P. R. and the Dominion Government.

In these the above facts are stated and it is pointed out that cars are now being supplied, contrary to the Railway Act, to Oak Lake, to ship out flour equal to 1,300 barrels a day.

It is said that if cars were supplied there would be an average delivery of 2,000 bushels of grain a day till spring.

Attention is also called to the shortage in coal, one dealer only receiving two carloads since November, although he had contracted for one carload a week to be shipped from the mines.

It is also stated that there has been no grain cars at Griswold elevator since December 14, but every day trains composed of empties are passing west.

A GOOD AIM

In manufacturing **SINGLE GUNS** it is a **GOOD AIM** to make the **GOOD BETTER,** and with that end always in view, to keep everlastingly at it.

APPLYING FOR INCORPORATION.

A NUMBER of leading capitalists are being incorporated with a capital of $1,000,000 to conduct the old John Abell business in Toronto on a large scale. For nearly 50 years John Abell has been making machinery and shipping it from his fine and well-equipped factory on Queen St., Toronto. The only need for the complete success of this business in the past was the want of money. But now the necessary funds to work the plant are forthcoming.

Within a short time, part of the new organization's issue will be offered to the public. The English method of underwriting stock has been followed. The board of directors is to be an unusually strong one. Among the applicants for the Government charter to the new organization are: Hon. S. C. Wood, vice-president of The Toronto General Trusts Co.; Robert Kilgour, president of The Carter-Crume Co.; Clarkson Jones, president of The Wilkinson Plough Co.; W. R. Brock, president of The Canadian General Electric Co.; H. P. Dwight, vice-president of The Canadian General Electric Co.; W. D. Matthews, director of the Canadian Pacific Railway; Samuel Barker, M.P., Hamilton, and E. L. Goold, manufacturer, Brantford.

At the present time Canadian manufacturers cannot supply the demand coming from Manitoba and the Northwest for portable engines and threshing machinery, so the United States manufacturers are able to ship their goods in against a duty of 25 per cent. They are now supplying three-quarters of the demand for this class of machinery, but, owing to the rapidly-increasing grain-growing area of this country, there is an opportunity open for the development of such a manufacturing industry in Canada.

RECEIPTS FOR REMITTANCES.

Iron Age: The following communication from a hardware house in New Hampshire mentions some objections to the practice of discontinuing sending receipts for remittances, as the matter is seen from our correspondent's standpoint:

"We have noticed articles in The Iron Age on the subject of manufacturers and jobbers not sending receipts for remittances in payment of invoices, looking upon the indorsed check sent as receipt enough. How does that work when payments are made with bank drafts, which, of course, go back to the bank? There is great effort made now to have all payments in that manner, many refusing to take private checks.

"It seems to us that it is very much better to have a receipt. We pay, as is universal now, by sending statement on remittance blank with items, often two or three, and deducting cash discount and any overcharges or shortages. That blank we want back receipted, as we often want to look back for some reason to the statement. If the merchant has no receipt and the cashier's check is in the bank he is badly off.

"We also want to know at the time whether parties have received the remittance and not have to wait to find out until perhaps two months or so afterward, when they send statement with notice of draft or a request for payment. The proposed way would work to the advantage of large manufacturers or jobbers to save expense, but we don't think their customers would like it. We should not."

ELECTRIC RAILWAY BUILDING IN ONTARIO.

TWELVE electric railway companies are applying for charters at the present session of the Ontario Legislature. They project the construction of not less than 1,046 miles of railway to be added to our present system. If all these lines are built there will be a continuous line from Cornwall to Windsor, excepting a short break from Glencoe to Tecumseh, and from London to Owen Sound, skirting the shores of Lake Huron. Many of these lines will open up territory not now conveniently tapped by railways.

The companies applying for incorporation, and the routes and approximate mileage of their lines are shown in the table below:

Ontario Electric Company—	Miles.
Cornwall to Toronto	266
Ottawa to Brockville	55
Total	321

THE TAX ON MACHINERY.

At a meeting of the Montreal Executive of the Canadian Manufacturers' Association, held on January 9, the machinery tax was taken up, and a committee was appointed to interview the assessors concerning its enforcement in a uniform way. A resolution was passed as follows:

That the various candidates for municipal honors be requested to define their position in the matter of abrogating the machinery tax, which, in the opinion of this association, is detrimental to the interests not only of the manufacturers, but of Montreal as a manufacturing city, inasmuch as it is driving important industries from the city and building up suburban districts at Montreal's expense.

Joseph Adelard Duval, hardware merchant, 1313 St. Catherine street, Montreal, has made an assignment at the instance of Henri La Belle. His principal creditors are The Sherwin-Williams Co., $446; Caverhill, Learmont & Co., $429; Seybold, Son & Co, $223, and Henri La Belle, $228.

TRADE BETWEEN CANADA AND THE WEST INDIES.

Some Things That Are Being Done to Encourage It.

A CHAT WITH MR. PICKFORD.

I HAD a brief chat with Mr. Charles Pickford, of Pickford & Black, before he left Toronto for Halifax en route to the British West Indies. As the readers of "The Canadian Grocer" are well aware, Mr. Pickford has spent about five months in Western Ontario, with headquarters in Toronto, working up business on British West-Indian account. In reply to an inquiry of mine as to the result of his efforts, he said :

ONTARIO PEOPLE WAKING UP.

"The people of Ontario are waking up to the importance of the West-Indian trade, but the car-shortage has been playing the mischief with us. I have in my mind at the moment one man who is shipping flour to the West Indies by way of New York simply because he cannot get cars to ship it by way of Halifax.

"The people here seem anxious to know what is going on and the possibilities of trade with the West Indies. Some of them, however, tell me that they have got so much business on hand for the home market that they cannot attend to foreign business. One manufacturer to whom I, in the autumn of 1900, gave the names of some West-Indian firms, has begun to work up an extensive business, but he has been compelled to send a good deal by way of New York on account of being unable to get cars enough to ship by way of a Canadian port. This particular shipper has been sending split peas, bran, oats, and flour."

"Do you think the outlook for trade between Western Canada and the West Indies is improving ?"

A SHORTAGE OF CARS.

"Yes ; I am certain it is," declared Mr. Pickford, with some emphasis. "Had it not been for this car-shortage I am sure we would have had a big business out of Ontario during the last few months. There is one thing, however, I fear, and that is that we Canadians are rather slow in reaching out after this West-Indian trade. What I mean is we are

NOT KEEN ENOUGH AFTER NEW BUSINESS.

Many of us are too easily satisfied with home business and not energetic enough in reaching out after foreign trade. I am in hope that the trip of the representatives of The Canadian Manufacturers' Association to the West Indies will be productive of good results. We will arrange to see that they get into touch with good houses in the West Indies."

CLASS OF CANADIAN GOODS WANTED.

"In what lines do you think it is likely we can most expand our export trade with the West Indies ?"

"There is no reason why the boot and shoe men should not walk in there and get a good business. Then there are canned goods, biscuits, ready-made clothing —a good deal of which is now coming from the Old Country. There are also condensed milk, butter, cheese, agricultural implements, carriages, harness. In fact, a market can be found in the West Indies for nearly everything we manufacture. Samples of the agricultural implements used in the West Indies are on exhibit in the Toronto Board of Trade building. They will show Canadian manufacturers what are wanted in that line."

EXPORT TRADE OF WEST INDIES TO CANADA.

"What about the export trade from the West Indies to Canada ?"

"It is growing. Our steamers are bringing more merchandise from the West Indies to Canada than ever before. The Bendict brought 3,000 tons of Demerara sugar and the Oruro 1,000 tons quite recently."

"Your steamers, how often is it they run to the West Indies ?"

"A steamer leaves St. John and Halifax fortnightly for Bermuda, St. Lucia, Barbados, Trinidad and Demerara. Every month a steamer leaves St. John and Halifax for St. Kitt's, Antigua, Montserrat, Dominica, St. Vincent, Grenada, Tobago, Bermuda, St. Lucia, Barbados, Trinidad and Demerara. On the 15th of each month a steamer also leaves Halifax for Kingston, Jamaica, calling at Bermuda and Turk's Island, both going and coming."

AN ENTHUSIAST.

Aside altogether from his position of representative of Pickford & Black, Mr. Charles Pickford is an enthusiast in regard to trade between Canada and the West Indies, and during his stay in Western Ontario preached its advantages and possibilities wherever occasion offered. During the next five or six months he will reside in the West Indies, and he was due to leave for there on the 13th inst. Before leaving Toronto he told me he would be only too glad to try and supply information regarding West-Indian trade matters to anyone seeking it. During his residence in the West Indies his headquarters will be in Barbados, and any communication addressed to him in care of Da Costa & Co., Barbados, will reach him.

OMAR.

JAMAICA SERVICE VIA ST. JOHN, N.B.

A MEETING of the Board of Trade, St. John, N.B., was held on the 10th inst., chiefly to consider West-Indian trade matters.

Mr. Robert Munro, Montreal, President of The Canadian Manufacturers' Association, who leaves for the West Indies on the 27th inst., was present. He was pleased to learn of the proposed Jamaican service and referred at length to the situation in the West Indies. The transportation companies were not solely to blame for the lack of development of this trade. Canadian manufacturers and merchants

MUST SELL THEIR OWN GOODS

in the West-Indian market and not depend upon the transportation companies to sell for them. Something must be done for the West-Indian sugar trade and the Canadian merchants should press for preferential trade under the fiscal arrangements of all British dependencies. Canada was leading the way for this and should suggest that she receive similar treatment on the part of other colonies. He told of the object of his approaching visit to the West Indies and urged that a representative of maritime manufacturers should accompany him. If so, he thought the chance of success of the mission would be considerably increased.

D. W. Marsh, of Toronto, was next called upon to tell the meeting something of the plans of The Canada-Jamaica Steamship Co., for the service between St. John and Jamaica. He said he did not expect to have to address a meeting so soon.

HIS MISSION

was to find out what goods New Brunswick could send to Jamaica and what amount of trade could be worked up. He assured the meeting that the company would do all in its power to develop business between Canada and Jamaica. Though the original plan was to run only between Canada and Jamaica, and this would be carried out—yet, if the trade warranted it, arrangements would be made at Jamaica to connect with other islands.

THE JAMAICAN TRADE

was a most important one and courted development. He paid some attention to the position Jamaica occupies among the other islands. It was the most important of all the British islands. It does ten times as much business as the other islands, is of much greater area than any of them, and the proportion of whites in its population is much larger. He had paid much attention to Western Canada and could say that the feeling there is that a large business could be worked up.

Speaking of the articles Canada could supply to Jamaica, he mentioned that there was a large demand for flour, oats, and potatoes. The flour would come from the west, but the oats and potatoes would be principally supplied by the Maritime Provinces. Jamaica imports annually

600,000 BARRELS OF FLOUR

and of this vast quantity only a few thousands barrels are sent by Canada. The supply is not steady, and consequently there is great opportunity for a profitable trade. The Canadian millers have recently been put in communication with Jamaica, and he expected more Canadian flour would, in the future, find its way there.

Fish, he characterized as one of the largest of Jamaican imports, and he be-

lieved Canadian fish could be delivered at Jamaica very profitably if transported quickly on a steamer making no intermediate stops. The vessels between St. John and Jamaica would have to pass through heated waters, and if the vessel was forced to stop while in these waters the resulting depreciation in value of the cargo would be considerable, as the heat would obtain access to the cargo, and the vessels' ventilating apparatus would be of practically no value, unless she were in motion.

The Canada-Jamaica Steamship Co. would devote much effort to the importation of fruit, including bananas, oranges, cocoanuts, etc., and would make a feature of the ports on the south shore of the islands. This shore embraced a large fruit-growing country, and hitherto the steamship facilities for getting out this fruit were not of the best. If the proper facilities could be found here, the company would bring in some fruit.

CANADIAN GOODS JAMAICA WOULD TAKE.

W. E. L. Marsh, also of Toronto, devoted his attention first to the class of products Jamaica would take from the Dominion, and in this connection mentioned framed boards and lumber, which would find a ready sale there. High-class butter, nicely put up, was also in large demand, but it would require good transportation facilities to develop a trade, as no large stock of butter could be laid in. Owing to the heat, it was necessary to place the butter on the market by every steamer. Cheese of good quality and a superior class of meats would also find a market. The island imported large quantities of condensed milk, most of which was at present furnished by Denmark or Michigan, but he thought a good Canadian article could supplant them. The inward cargo would include bananas, oranges, limes and pineapples, and a good trade should be developed as time goes on.

W. S. Fisher asked what the length of passage would be, how many days would be consumed on the voyage, and what the steamers' facilities would be for perishable products?

THE BOATS.

In reply, D. W. Marsh said the Ask, which would be the first boat, would have a speed of 10 knots, and would make the trip from St. John to Jamaica in 7½ days. The boats were thoroughly equipped for carrying fruit. The Ask could be obtained only until March, when it will be under charter to The United Fruit Co. The fruit company's steamers were used only for carrying bananas from Jamaica to the United States, and took no cargo back to the islands.

The Banta was a new steamer and the conditions under which she was chartered specified that she should have good facilities for carrying perishable articles in good condition. If the dairy product or meat trade develops, a cold-storage equipment will be provided. The facilities needed here include possibly a heated warehouse, and the steamship company relied on the assistance of the St. John merchants to make the business a success. On their part, the steamship company would agree to make the service meet the demands.

W. Frank Hatheway asked what facilities the boats possessed for passenger traffic?

NOT PASSENGER BOATS.

Mr. Marsh replied that the company would not make a feature of passenger service at present. The capacity of the boats was limited to four or six passengers.

E. A. Goodwin asked for information as to the freight rates on oranges, pineapples and other fruits.

Mr. Marsh replied that the company would secure the fruit on the island and lay it down in St. John on the same plan as pursued by other fruit companies. The cost would, of course, depend on the trade. While the steamer had regular ports of call, yet the timetable permitted her to call at any port on the island. The company now has arrangements with the C.P.R. to give through bills of lading to all places on that line, and doubtless similar arrangements could be made with the I.C.R.

Geo. Robertson referred to the manner in which The Elder-Dempster Steamship Co. was developing the fruit trade in Great Britain. He felt there was business in the proposed line, and would be delighted if a profitable trade could be worked up without a subsidy.

Col. Tucker, M.P., assured the company they would have his best efforts for forwarding any scheme for the development of Canadian trade.

Mayor Daniel, in a brief speech, welcomed Messrs. Marsh and Munro to St. John.

Superintendent Osborne, of the C.P.R., referred to the success of the winter-port business as a good criterion from which to judge the outlook for West-Indian trade. It showed St. John merchants had enterprise and they would doubtless provide large cargoes for the new line.

F. L. Potts, J. N. Sutherland, Colonel Tucker, John Sealy and others also spoke on the future of the line.

CANADIAN PAINT IN THE WEST INDIES.

OUR readers will remember that some two months and a half ago we mentioned in The Merchant that Mr. W. S. Fallis, of The Sherwin-Williams Co., paint and varnish makers, had sailed on a voyage of trade discovery to the British West-Indian Islands. Mr. Fallis has, for two years, had charge of The Sherwin-Williams' interests throughout the Maritime Provinces, and his selection as an ambassador of the firm in the colonies to the south, was a fitting tribute to the success which has crowned his efforts since enlisting in the services of the company.

He sailed from Halifax by the Erna, of The Pickford & Black line, on September 23, and calling at Bermuda, St. Lucia, Barbados and Trinidad, arrived in Demerara on October 7. At Demerara he remained three days and was successful in opening accounts with several of the most prominent importers. He found the opportunity for trade by no means discouraging despite the fact that the people have been for centuries handling English paints almost exclusively. Prepared paints have been practically an unknown quantity in all of the West-Indian markets up to the present time, but Mr. Fallis expressed the opinion that the same measures which have been taken by his company to introduce The Sherwin-Williams paints throughout Canada, would eventually secure satisfactory results in the various markets visited. He opened accounts at Demerara, Trinidad, Barbados and St. Lucia and reports the outlook for future business most promising. Trinidad, to his mind, is the market which seems to indicate the greatest possibilities, as the natural resources of the Island are rich and varied. While there, he appointed as agent, T. Geddes Grant, a former Nova Scotian, who is doing all that he can to encourage more trade with Canada. Mr. Fallis expressed himself as surprised that a more general effort has not been made by Canadian manufacturers to capture West-Indian trade. At all the ports visited he saw thousands of packages of freight being landed from New York, the bulk of it similar in character to what is produced in Canada. He found the people very hospitable and disposed to listen to what he had to say, but New York has such a hold that it will require a strong and continuous effort on the part of Canadian exporters to break it. Mr. Fallis named a number of Canadian-manufactured articles which he felt sure could be marketed in the West Indies at a considerable profit. He thinks that, with the present steamship connection from Canada, our people are losing a great opportunity if they do not go out and see what the trade possibilities are. —The Maritime Merchant.

TO VISIT THE WEST INDIES.

A change has been made in the personnel of the representatives of The Canadian Manufacturers' Association, who leave on the 27th inst. for the West Indies. Mr. Robert Munro, the President, will go, as originally intended, but Mr. E. M. Wilcox, Assistant Secretary, having resigned to take a position with The Robert Simpson Co., will have to give place to another, and the choice has fallen on Mr. J. F. N. Stewart. The deputation will visit Bermuda, St. Kitt's, Antigua, Montserrat, Dominica, St. Lucia, Barbados, St. Vincent, Grenada, Tobago, Trinidad, and Demerara, then returning by the Island of Jamaica.

It is reported from Trail, B.C., that The Canadian Smelting Works will immediately set about the construction of a refinery at that place. The plant will have a capacity sufficient to handle the present bullion output of that country, and, although it will be to a certain extent experimental, it will be extended and enlarged as soon as it was shown that sufficient bullion can be secured to insure its commercial success.

At the next session of the Legislative Assembly of Manitoba an application will be made for the passing of an Act incorporating The Winnipeg River Power Co., Limited, with power to develop water powers on or near the Winnipeg river in the Province of Manitoba, to generate electricity therefrom, to carry on the business of furnishing electric and other light and heat, to construct and operate a line or lines of electric railway between a point at or near the city of Winnipeg and the town of West Selkirk, and between Winnipeg and some point or points on the Winnipeg river either via Selkirk or otherwise, or between intermediate points; to construct a line or lines of pipes from the Winnipeg river to or in the city of Winnipeg or such other point or points as may be determined for the purpose of supplying water, to acquire all necessary lands, water powers and privileges, to erect all necessary dams, works and ways, and generally for such other powers as may be necessary or convenient to or for such a company.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, January 17, 1902.

HARDWARE.

TRADE is better this week and more travellers are on the road, working especially on import goods. Buying for spring commences with an encouraging number of orders, and prospects for the coming year are bright. A number of changes are noted this week. The list on Stanley rules has been altered and the new one published gives a discount of 55 per cent. A few prices on Stanley planes have also been changed. Reductions have been made in wire nails, cut nails, fence staples and smooth steel wire.

BARB WIRE — Though the market is rather quiet, quite a number of orders have been booked for spring delivery. We quote $3 per 100 lb. f.o.b. Montreal.

GALVANIZED WIRE — There is only a light movement. We quote as follows: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95, No. 13, $3.05; No. 14, $4.05: No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE — Business is better this week. There have been changes all round. Bright iron and annealed is on a $2.60 base for 0 to 9 gauge. Extras are as follows: No. 10, 6c. instead of 7c.; No. 11, 12c. instead of 14c.; No. 12, 20c., the same; No. 13, 30c. instead of 35c.; No. 14, 40c. instead of 47c.; No. 15, 55c. instead of 60c.; No. 16, 70c. instead of 75c. We quote per 100 lb. f.o.b. Montreal, Toronto, Hamilton, London, St. John, and Halifax.

FINE WIRE — There is still only a small business doing. The discount has been altered from 17½ per cent. to 22½ per cent.

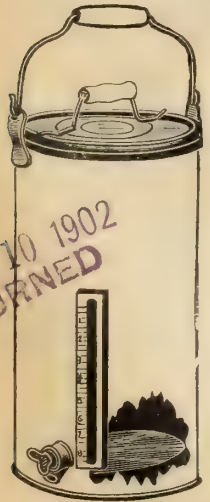
SPRING WIRE — This is $1.25 extra, in place of $1.

COPPERED AND TINNED WIRE — Coppered, extra, is 60c.; tinned, $2 per 100 lb.

BRASS AND COPPER WIRE — The demand is a small one. On both wires the discount has been changed from 55 and 2½ per cent. to 60 per cent. off.

FENCE STAPLES — A little better movement prevails. We quote per 100-lb. keg, $2.90 for bright, a reduction of 35c., and $3.25 for galvanized, a reduction of 50 cents.

WIRE NAILS — A reduction has taken place of 30c. for small lots and 27½c. for carlots. Under the new prices business has improved considerably. We quote: $2.55 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.



CUT NAILS — Trade is picking up. Reductions are 20c. for small lots and 17½c. for carlots. Discounts on all are now 40 per cent. instead of 25 per cent. and 30 per cent. We quote $2.35 per keg for small lots and $2.27½ for carlots. Flour-barrel nails, 40 per cent. discount; coopers' nails, 40 per cent. discount.

HORSE NAILS — There is not much demand. "C" brand is 50 and 7½ per cent. off and "M" brand at 60 per cent. off on oval and new city heads, and 66 2-3 per cent. off new countersunk heads.

HORSESHOES — The market continues inactive. We quote as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS — There is a light demand. Prices are the same. The discounts are as follows: Flat head bright, 87½ and 10 per cent. off list; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.

Manufacturers of

Charcoal Pig Iron

BRAND "DESERONTO."

Especially adapted for Car Wheels, Malleable Castings, Boiler Tubes, Engine Cylinders, Hydraulic and other Machinery where great strength is required; Strong, High Silicon Iron, for Foundry Purposes.

BOLTS — There is a fair movement at unchanged prices. These are: Norway carriage bolts, 60 and 5 per cent.; common, 55 and 5 per cent.; full square carriage bolts, 60 and 5 per cent.; machine bolts, 55 and 5 per cent.; coach screws, 70 per cent.; sleigh shoe bolts, 70 per cent.; blank bolts, 60 per cent.; bolt ends, 60 per cent.; plough bolts, 55 and 5 per cent.; tire bolts, 67½ per cent.; stove bolts, 67½ per cent. To any retailer an extra discount of 5 per cent. is allowed. Nuts, square, 3¾c. per lb. off list; hexagon nuts, 4c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER — The demand for building paper is slightly better, but the movement is still small. We quote: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 55c. per roll; tarred fibre, 65c. per roll; O.K. and I.X.L., 70c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE — The demand, though small, shows some improvement. Manila has advanced to 16c., ½c. higher than last week. Prices on all lines of cordage are quite firm. Our quotations are as follows: Manila, 16c.; British Manila at 13½c.; sisal, 12c. and lathyarn at 10½c. Manitoba prices are: Manila, 16c.; British Manila, 14½c.; sisal, 13c. and lathyarn, 12c.

RIVETS AND BURRS — The demand is very light. No changes have occurred. The discounts are as follows: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, 35 and 5 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH — There is a better trade doing this week. Prices are steady at $1.25 per 100 square feet.

POULTRY NETTING — Orders for spring delivery are coming in satisfactorily, and trade is in a healthier condition. Canadian or English is quoted at a discount of 60 per cent. off 2 x 2 mesh, 19 wire, and 55 per cent. off 2 x 2 mesh heavier, Canadian list.

HARVEST TOOLS — In harvest tools there is a fair movement—a considerable improvement over last week. The discount remains at 70 per cent.

FIREBRICKS — There is a moderate demand. We quote as follows: Scotch at $19 to $23.50 and English at $18.50 to $22.50 per 1,000.

CEMENT — There is only a small demand. We quote: German cement, $2.30 to $2.40; English, $2.25 to $2.35; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.20 to $2.30 ex-cars.

METALS.

There has been little improvement in the metal market since our last report. Trade is quiet. Prices on iron pipe show a firm tendency.

PIG IRON — The demand is small and prices are unchanged. We quote: Summerlee, $21 to $21.50; Canadian, $18.50 to $19.

BAR IRON — The movement is still light. Merchants' bar is quoted at $1.87½ in carlots and $1.95 in small lots. Horseshoe iron sells for $2.15 and $2.20.

TORONTO, ONT., CANADA

You can buy lots of paint that will cost you less money, and you can sell it to those who do not know—once. Just once will you sell it. Then you wonder why your paint trade is not so brisk as it was a year ago. And lucky you are if there is not a decline in other branches of your business. You cannot build up business on poor goods.

"Ark Brand" Paint

is not a cheap paint, and every can is guaranteed to be good. It will not sap your business, but build it up.

Send for our Booklet: "Paint, and How to Use It."

THE FRANCIS-FROST CO. Limited

TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

BLACK SHEETS - There is but little doing. Retail stocks have been pretty well sorted up, and this demand has fallen off. We quote as follows : 28 gauge, $2.65 ; 26 gauge, $2.60 ; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON — Trade remains very quiet. We quote as follows : No. 28, Queen's Head, $4.40 ; Apollo, 10¾ oz., $4.40 ; Comet, $4.25 with 10c. extra in less than case lots.

INGOT COPPER — The market is not active. The price is 14½c.

INGOT TIN — The price of Straits remains at 27c. The demand is light.

PIG LEAD — The demand keeps up and a fair movement is reported. We quote $3.15 to $3.20.

LEAD PIPE - A change has been made in the discount, it now being 35 per cent. instead of 30 per cent. on ordinary composition and waste. We quote 7½c. for composition waste and 7c. for ordinary.

IRON PIPE — No changes have been made in prices, but they are, if anything, still firmer. The demand is good. Our quotations are as follows : Black pipe, ¼, $3.00 per 100 feet ; ⅜, $2.95 ; ½, $3.10 ; ¾, $3.45 ; 1-inch, $5 ; 1¼, $7.10 ; 1½, $8.50 ; 2-inch, $11.35. Galvanized, ¼ $4.40 ; ⅜, $5 ; 1-inch, $7.15 ; 1¼, $10 ; 1½ $12 ; 2-inch, $15.95.

TINPLATES — Trade is quiet. Cokes are worth $3 75 to $4 and charcoal, $4.25 to $4.50.

CANADA PLATE — There is not much doing. We quote : 52's, $2.65 to $2.70 ; 60's, $2.75 to $2.80 ; 75's, $2.80 to $2.85 ; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL — There is only a moderate business doing. Prices are firm. We quote: Sleigh shoe, $2.05 ; tire, $2.15 ; bar, $2 ; spring, $2.85 ; machinery, $2.85, and toe-calk, $2.60.

SHEET STEEL — There is not much doing. We quote as follows : Nos. 10 to 20, $2.50 ; 3-16, $2.50 ; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL — Trade is a little better. We quote : Black Diamond, 8c.; Jessop's, 13c.

TERNE PLATES — There is not much business being done this week. Prices are $7.75 to $8.

COIL CHAIN — There is only a light movement. We quote as follows : No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7½c. per lb.; 5-16, $4.80 ; 5-16 exact, $5.25 ; ⅜, $4.25 ; 7-16, $4.05 ; ½, $3.85 ; 9-16, $3.75 ; ⅝, $3.55 ; ¾, $3.50 ; ⅞, $3.45 ; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC — Trade is dull. Prices remain at $5.75 to $6.25.

ANTIMONY — There is little doing. We still quote 10c.

ZINC SPELTER — The price is 5c. with little doing.

SOLDER - Trade is moderate. We quote : Bar solder at 18c.; wire solder, 20 cents.

PAINTS AND OILS.

The brisk business which sprang up a week or so ago is still keeping up. White lead is selling well under the new prices. The feeling in turpentine is becoming stronger and advances are expected. We quote :

WHITE LEAD—Best brands, Government standard, $5.87½ ; No. 1, $5.50 ; No. 2 $5.12½ ; No. 3, $4.75 ; No. 4, $4.37½ all f.o.b. Montreal. Terms, 3 per cent. cash or four months.

DRY WHITE LEAD—$5.25 in casks ; kegs, $5.50.

DRY WHITE ZINC — Pure dry, 6¼c. ; No. 1, 5¼c. ; in oil, pure, 7¼c. ; No. 1, 6¼c. ; No. 2, 5¼c.

PUTTY — We quote : Bulk, in bbls., $1.90 per 100 lb. ; bulk, in less quantity, $2.05 ; bladders, in bbls., $2.25 ; bladders, in 100 or 200 lb. kegs or boxes, $2.40 ; in tins, $2.55 to $2.65 ; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL—Casks, 7c. ; 100 lb. kegs, 7½c. ; smaller quantities, 8¼c.

RED LEAD — Genuine red lead in casks, $4.50 ; in 100-lb. kegs, $4.75 ; less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE—Ground, casks, 5c. ; less, 5½c. ; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL—Raw, 75c.; boiled, 78c. in 5 to 9 bbls., 1c. less, 10 to 20 bbl. lots open, net cash, plus 2c. for four months. Delivered anywhere in Ontario between Montreal and Oshawa at 2c. per gal. advance and freight allowed.

TURPENTINE — Single bbls., 60c.; 2 to 4 bbls., 59c.; 5 bbls. and over, open terms.

SHELLAC VARNISH — Pure white, $2.35 to $2.45 ; orange, $2.25 to $2.35.

MIXED PAINTS—$1.20 to $1.45 per gal.

CASTOR OIL—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.
SEAL OIL—47½ to 49c.
COD OIL—32½ to 35c.
PARIS GREEN — Petroleum barrels, 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½ lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

GLASS.

Though the market is not very active, quite a few orders have been booked for spring delivery. Prices remain firm. We quote as follows: First break, 50 feet, $2.10; second, $2.20 for 50 feet; first break, 100 feet, $4; second break, $4.20; third break, $4.70, and fourth break, $4.95.

SCRAP METALS.

A fairly good movement prevails. Prices remain steady, as follows: Heavy copper and wire, 13½ to 14c. per lb.; light copper, 12 to 12½c.; heavy brass, 12 to 12½c.; heavy yellow, 9½c.; light brass, 6½c.; lead, 2⅝ to 2¾c. per lb.; zinc, 2 to 2¼c.; iron, No. 1, wrought, $10 light brass, 6½c.; lead, 2½ to 2¾c. per lb.; zinc, 2 to 2¼c.; iron, No. 1, wrought, $10 to $15 per gross ton f.o.b. Montreal; stove plate, $8 to $9; machinery scrap, $14; light iron, No. 2, $5 a ton; malleable and steel, $4; rags, country, 60 to 70c. per 100 lb.; old rubbers, 7 to 7¼c. per lb.

HIDES.

We quote: No. 1 hides, 7½c.; No. 2, 6½c.; No. 3, 5½c. Sheepskins, 60c.

MARKET NOTES.

Spring wire is now $1.25 extra, an advance of 5c.

The discount on fine wire has been changed to 22½ per cent.

Smooth steel wire, both bright iron and annealed, is now on a $2.60 basis.

Fence staples are 35c. lower per keg for bright, and 50c. lower for galvanized.

Brass and copper wire are discounted at 60 per cent. instead of 55 and 2½ per cent. off.

Wire nails have been reduced 30c. for small lots and 27½c. for carlots. Cut nails, 20c. for small lots and 17½c. for carlots.

ONTARIO MARKETS.

Toronto, January 17, 1902.

HARDWARE.

THE feature of the hardware trade this week is the reduction in the price of a number of staple lines. These lines are in wire, wire nails, cut nails, pressed spikes, lead pipe, shot and staples. Trade, generally, is fairly good. The demand principally is on future account, some orders being taken even for such autumn goods as stovepipes, elbows, etc. The sorting-up trade for skates and hockey sticks is good. A few horseshoes and horse nails are going out. Some business on future account is still being done in barb and plain galvanized wire, poultry netting, harvest tools, green wire cloth and screen doors and windows.

BARB WIRE.—A fair business is being done on importation account at steady and unchanged prices. We quote, f.o.b. Cleveland, $2.77½ for less than carlots, and $2.65 for carlots. From stock Toronto, $3.

GALVANIZED WIRE.—Some business is also being done in this line on importation account. We quote: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—There has been quite a change. The base price has been fixed at $2.60 per 100 lb., and oiled and annealed is no longer sold at net figures. Oiling, 10c.; coppering, 60c., and tinning $2 per 100 lb. extra. A few orders are being placed for oiled and annealed for future delivery. Delivery points, Toronto, Hamilton, London and Montreal, with freights equalized on those points.

WIRE NAILS.—The base price is 30c. per keg lower on less than carlots and 25c. lower on carlots. We quote $2.55 for less than carlots, and $2.50 for carlots. Delivery points, Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—These are 20c. lower on less than carlots and 17½c. lower on carlots. We quote base price $2.35 per keg with 7½c. allowance on carlots.

HORSE NAILS.—A fair demand is reported this week. Discounts are: "C" brand, oval head, 50 and 7½ per cent., and on "M" and other brands, 50, 10 and 5 per cent. Countersunk head 60 per cent. All the manufacturers are now understood to be selling off the same list.

HORSESHOES.—There are a few going out. We quote f.o.b. Toronto, as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

SCREWS.—A fair trade is still being done. The discounts are: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.

RIVETS AND BURRS.—The demand continues good. We quote: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets and burrs, 25 and 5 per cent.

BOLTS AND NUTS.—Trade is still active. We quote: Carriage bolts, common ($1 list), 55 and 5 per cent.; carriage bolts, full square ($2.40 list), 60 and 5 per cent.; carriage bolts, Norway iron ($3 list), 60 and 5 per cent.; machine bolts, all sizes, 55 and 5 per cent.; coach screws, 70 per cent.

ROPE.—There is only a moderate trade being done. We quote: Pure manila, 16c.; British manila, 13½c.; sisal, 12c.

CUTLERY.—Only a moderate sorting-up trade can be reported.

SPORTING GOODS.—Quiet a few hockey sticks and skates are still going out, but trade, generally, in sporting goods, is quiet.

DAIRY SUPPLIES.—The movement in tinned iron and milk can trimmings has continued brisk during the week. Discount on milk can trimmings, 25 per cent.

CEMENT.—Owing to the cold weather no orders of any extent are expected till the spring commences to open up. Prices are steady. We now quote as follows:

Canadian Portland, Rathbun's "Star," $2.25 to $2.65; "Beaver," $2.10 to $2.50; "Ensign," $1.90 to $2.30; German, $3.15; English, $3; Belgian, $2.50 to $2.75; Canadian hydraulic, $1.25 to $1.50 per bbl.

FENCE STAPLES.—These are lower in price, now being quoted at $2.90 for bright, and $3.25 for galvanized.

POULTRY NETTING.—An occasional order for future delivery is being received. We quote as follows: 2-inch mesh, 19 w.g., discount 60 per cent.; 2-inch mesh, 18 w.g. and heavier, 50 and 10 per cent.

METALS.

The metal trade for this time of the year continues fairly good.

PIG IRON—The tone of the pig iron market is still firm. According to advices from Pittsburg the United States Steel Corporation has this week purchased 100,000 tons of Bessemer iron. Locally, trade is fair. We quote $17.50 to $18 on track Toronto.

BAR IRON—The demand continues good. Base price $1.95 to $2 05. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

STEEL — Prices are being well maintained, but the demand is moderate. We quote as follows: Merchantable cast steel, 9 to 15c. per lb.; drill steel, 8 to 10c. per lb.; "BC" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe-calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2.25; reeled machinery steel, $3, hoop steel, $3.10.

BLACK SHEETS—The demand during the past week has been good. We quote:

Common, $3.15 for 28 gauge; and dead flat, $2.50 for 26 gauge.

CANADA PLATES—The demand has fallen off during the week, although a fair business is still being done for this time of the year, We quote: All dull, $3.00; half polished, $3.10; all bright, $3.75.

GALVANIZED SHEETS — Some import orders are being placed for Spring delivery, and business generally is good. We quote as follows: "Queen's Head" brand at $4.50 in case lots, and $4 65 in less quantities.

TIN—The outside markets are still somewhat irregular, but their tone is rather better. New York is rather firmer, while London is slightly lower. Locally we still quote $29 to $30. The demand is fair for small quantities.

TINPLATES — The demand on spring delivery account is good, and a few small orders from stock are reported. We still quote I C coke plates at $4.25.

TINNED SHEETS — Quite a few small orders from stock are being taken care of this week. We quote: 72 x 30, up to 24 gauge, 7½c.; ditto, up to 26 gauge, 8c.

TERNE PLATES—Trade is quiet. We still quote: I C, 20 x 28 gauge, at $8.50.

COPPER — An active business is being done this week in ingot copper at lower prices, namely, $15 per 100 lb. There is still a good trade being done in sheet copper at $23 to $25 per 100 lb.

BRASS—A fair business is being done this week. Discount is 10 per cent. on rod and sheet.

SOLDER — The demand is good with prices lower. We quote: Half-and-half, guaranteed, 19c.; do. commercial, 18½c.; refined, 18c.; wiping, 17½c.

LEAD—The demand is good. London was 2s. 6d. higher on Monday. We quote: $3.50 to $3.75 for pig lead and $5 for bar.

IRON PIPE — Business keeps moderate. We quote: Black pipe, $5.40 for 1-inch.

LEAD PIPE—Prices are lower, the discount being 35 per cent. instead of 30 per cent.

Antimony—A fair business is being done at 10 to 11c. per lb.

SPELTER—Trade is quiet. We quote $5.50 to $6 per 100 lb.

ZINC SHEET — Trade is quiet at $6 to $6 25.

PAINTS AND OILS.

Owing to the reduction in white lead, it has been quite active, a number of orders being booked for future delivery. Linseed oil is unsetted, the lower quotations of the English product being the cause. Turpentine has been advanced 2c. per gal. There is no other change. We quote:

WHITE LEAD—Ex Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2. $5.12½; No. 3, $4.75; No. 4, $4.37½ in pkgs. of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½ lb. pkgs.; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb. $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.

BENZINE—In barrel lots, 16½c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING — 65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC — In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY —Bladders, in bbls., $2.25; bladders, in 100 lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

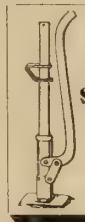
PUMICE STONE — Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1.20 to $1.30 per gal.

CASTOR OIL — English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 4 barrels, 77c.; boiled, 80c.; 5 to 9 barrels, raw, 76c.; boiled, 79c., delivered. To Toronto, Hamilton and London, 2c. less.

TURPENTINE—Single barrels, 61c.; 2 to 4 barrels, 60c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.



GLASS.

Trade in glass continues slow, the retail business having greatly falling off. We quote as follows: Under 26 in., $4.25; 26 to 40 in., $4.65; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5.75; 71 to 80, $6.25; 81 to 85, $7; 86 to 90, $7.75; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days.

OLD MATERIAL.

The prices are more stable, no change this week being noticed. Trade is quiet but steady. We quote as follows: Agricultural, 60c. per cwt.; machinery cast, 60c.; heavy copper, 11c. per lb.; stove cast, 40c.; No. 1 wrought, 50c. per 100 lb.; new light scrap copper, 9c.

per lb.; bottoms, 8c.; coil wire, 12c.; light brass, 6c.; heavy yellow brass 8c.; heavy red brass, 9½c.; scrap lead, 2¼c.; zinc, 2c.; scrap rubber, 6c.; good country mixed rags, 50 to 60c.; clean dry bones, 40 to 45c. per 100 lb.

HIDES, SKINS AND WOOL.

There is a quiet movement with steady prices. We quote prices paid by buyers on arrival:

HIDES—We quote: No. 1, green, 7½c.; No. 2 green, 6½c.; No. 1 green, steers, 8c.; No. 2 green, steers, 7c.; cured, 7¾ to 8¼c.

SKINS—We quote: No. 1 calfskins, 9c.; and No. 2, 7c.; deacons (dairies) 55 to 60c. each; sheepskins, 65 to 75c.; deerskins, 12½ to 14c. per lb.

WOOL—We quote: Fleece, 13c., and unwashed, 7 to 8c. per lb.

SEEDS.

The red clover market is fairly steady. Alsike is very dull owing to the absence of export orders making it difficult to quote prices, and jobbers are not inclined to pay above $6 to $7.50 f.o.b. at outside points. Timothy is 25c. per bush. higher. The following figures are what dealers are paying at outside points. We quote: Red clover, $5 to $5.40; alsike, $6.50 to $8.50, and timothy, $2.50 to $3 25 per bush.

PETROLEUM.

There is a good trade doing with unchanged prices. We quote as follows: Pratt's Astral, 16½ to 17c. in bulk (barrels, extra); American water white, 17 to 17½c. in barrels; Photogene, 16½ to 17c.; Sarnia water white, 16 to 16½c. in barrels; Sarnia prime white, 14½ to 15c. in barrels.

COAL.

Soft coal and coke still continue scarce, as are also nut and hard coal. The situation is not much different than formerly. We quote at international bridges: Grate, $4.75 per gross ton; egg, stove and nut, $5 per gross ton; soft coal, $2.50 to $3.25 in bond, according to grade.

MARKET NOTES.

Fence staples are quoted lower.

The discount on shot is 22½ per cent.

Wire nails are 30c., and cut nails 20c. lower.

In turpentine there is an advance of 2c. per gallon.

Discount on lead pipe has been increased to 35 per cent.

HARDWARE FIRM INCORPORATED.

At the office of the Secretary of State of Canada, the J. H. Ashdown Hardware Co., Limited, of Winnipeg, has applied for and obtained incorporation as a joint stock company, with a total capital of $1,000,000 divided into 10,000 shares of $100 each.

INDUSTRIAL GOSSIP.

Those having any items of news suitable for this column will confer a favor by forwarding them to this office addressed to the Editor.

Already the new foundry of K. C. Beach & Co., at Winchester, Ont., has been made ready for business. Much larger than the old establishment, the facilities for turning out most modern work with greater promptness have been increased, and a nickle plant has been installed. This is a new and important addition to their plant. It is operated by an expert.

It is expected that the blooming mill of The Dominion Iron and Steel Company, at Sydney, C.B., will be ready between the first and 15th of February, when the manufacture of steel will be commenced. Only steel ingots can be cast at present, three castings having so far been made at the open hearth, all of which have turned out very satisfactory.

The total value of the output of all the manufacturing establishments of Amherst, N.S., for 1901, was $2,380,000. Over $155,200 was paid out in wages in the different factories of the town, during the same period.

In connection with the I.C.R. a new coal hoist will be built at Sydney, C.B., as soon as the round house, which is now under construction, is completed. A two-storey building, 50 by 70 feet, is what the plans call for. The foundation work will require over 2,000 yards of concrete for its completion. The new hoist is of a United States patent. The coal will be dropped into a receptacle underneath the track from the cars. From there it will be carried up to the second floor by a conveying belt, and stored. The ashes from the engines will be loaded on a car on the opposite side of the building in a similar manner.

Thomas Lougheed, Shallow Lake, Ont., has purchased the hardware business of Irwin Rusk, Southampton, Ont., who intends going South for his health.

A fire in the hardware store of Magnan Freres, St. Catherine street, Montreal, on January 8, did $1,000 damage. This is covered by insurance.

MANITOBA MARKETS.

WINNIPEG, January 13, 1902.

THE usual calm and absence of news pervades hardware circles. Business is very fair, and prices are firm with a tendency to advance. There has been an advance in manila in the east, but we have not as yet put it into force here. Paints and oils are practically the same. Travellers are booking a good many orders for spring delivery, but at the present time little is being done. The cutter trade has been very seriously reduced owing to the general absence of snow, and agents are now trying hard to clear up remaining stocks, and considerable inducements are being offered to that end. Already orders are being booked for the buggy and wagon trade of the spring, which promises to be a large one.

NOTES.

Mr. Cowan, an extensive owner of lumber mills and timber limits at Prince Albert, was in the city last week on his way east to participate in a family reunion. Mr. Cowan reports an immense lumber trade in their section last season and excellent prospects for the coming spring. Their cut will be about 4,000,000 feet.

The Western Lumbermen's Association are expected to meet during the bonspiel. The implement men will also meet at that time.

Mr. Hiram Miller, of the firm of Miller, Morse & Co., has returned from an extended eastern trip.

MANUFACTURERS' ASSOCIATION.

AT a meeting of the executive of the Canadian Manufacturers' Association in Toronto on January 16, how the tide of emigration from Great Britain may be diverted to Canada formed the chief topic of consideration. Jas. P. Murray in an address in which he mentioned the fact that out of people leaving Great Britain last year, only 19,000 came to Canada, 15,000 went to Australia, 27,000 to South Africa, and over 100,000 to the United States, moved a resolution asking the various boards of trade of Canada to join the Association in sending representatives to Great Britain to invite the various trade boards there to cooperate in diverting the tide of immigration to this country. He touched upon the various advantages offered by each Province in support of this, and suggested that to finance that deputation, each Province through its representative board of trade might grant a contribution, and that the Dominion Government might also contribute something towards it.

Before any action should be taken it would be necessary to obtain an expression of opinion from the members of the Association. On the report of the exhibition committee, a letter will be sent to the city council saying that the Association is not in favor of an all Canadian exhibition for 1902, and think that it is not possible to take that matter up before 1903.

The executive committee do not think that the Government will deal with the Patent Act this year, so some changes were suggested that might be made without taking up the question of the entire Act. They state that they are in favor that on certain articles the words "Copyrighted in Canada" should be used instead of the present lengthy notification; that special arrangements be made to protect all labels, etc., with slight cost, and a special effort be made to catch up with arrears of work in Patent Office by the appointment of special examiners.

To urge upon the Government the adoption of the suggestion of the Association regarding the appointment of Canadian agents abroad, the chairman of the commercial intelligence committee and the secretary will go to Ottawa next week.

They received the resolution of the Halifax Board of Trade regarding the handing over of the I.C.R. to the C.P.R. The railway and transportation committee will deal with this matter.

The secretary was asked to send a letter to Sir Wilfrid Laurier asking him to invite the Hon. Edmund Barton, the Premier of Australia, and Hon. R. J. Seddon, Premier of New Zealand, to pay a visit to Canada when they are returning home from the coronation ceremonies.

TALK WITH A MEDICINE HAT HARDWAREMAN.

THIS week HARDWARE AND METAL had the pleasure of interviewing W. B. Marshall, a hardware merchant and prominent citizen of Medicine Hat, in the Canadian Northwest, who is in Toronto on business. Our reporter found him at the Iroquois Hotel conversing with a number of friends who had called on him. Mr. Marshall appears to be endued with unlimited confidence in the future of the great Northwest.

Prospects are bright for Medicine Hat," he affirmed. "We only want more settlers, and then our fine climate, which is never excessively cold (it was 70 above when I left there three weeks ago) is bound to attract. Our ranching facilities are such that immense herds of cattle and sheep can be left out to graze all winter. Numbers of settlers came in from across the line last summer, and this season prospects are very bright for a greater influx from the United States.

"Another inducement is the quite recent discovery we have made," he continued, "and that is that the town of Medicine Hat is located in the midst of a large area rich in natural gas. This we obtained at 225 pounds pressure after we had reached a depth of 213 feet, when we were utilizing it for our new waterworks system, which we succeeded in installing last summer and fall."

"You think that your town will be the centre of numerous manufactures in consequence, I suppose?"

"Several inquiries have already been made by several glass manufacturers who may locate there, as they make use of much gas in glass making. But nothing definite has yet been decided upon," he added.

"You have other mineral deposits out there besides gas?"

"Coal is found very close to our town, which can be mined and sold for less than $3 per ton," he replied. "It is of a soft variety, and exists near the surface, seams of it cropping out along the banks of the Saskatchewan river. I know of no other minerals," he said, "that are found in our neighborhood, but, as we are only 160 miles from the Rockies, doubtless they can be found.

"Just now there is an agitation on foot to make Medicine Hat the capital of the Territories, instead of Regina. That, I believe, will shortly come to pass," he concluded.

The Francis-Frost Co., Limited, Toronto, are issuing this week a very handsome catalogue.

CATALOGUES, BOOKLETS, ETC.

One of the neatest and most unique greetings for the New Year sent out by a business firm was that of The Francis Frost Co., Limited, of 223 Queen Street east, Toronto. It was printed on imitation parchment, and in one corner impressed in imitation sealing wax was the trade mark of the firm in gold.

PERSONAL MENTION.

S. H. Stevenson, who has been superintendent in the works of the Guelph Iron and Steel Co., has severed his connection with that firm and accepted a situation in Macdonnell & Co.'s works, Toronto.

The Francis-Frost Co., Limited, Toronto, are making wonderful strides in placing their celebrated "Ark Brand" Paint. For some time the Toronto house supplied Ontario and the West. Last fall it was found necessary to establish a warehouse at Vancouver. Since then the Western demand has increased so rapidly that in order to cope with the trade they have been compelled to open a warehouse in Winnipeg.

WANTED.

WANTED TO PURCHASE—Foundry Cupola and Equipment; second-hand preferred. P.O. Box 660, Winnipeg. (4)

FOR SALE.

GOOD HARDWARE AND TINWARE BUSINESS and premises in small town, splendid farming locality. No opposition. Excellent opportunity for two live men. Too much work for owner. Apply, Box 76, HARDWARE AND METAL, Toronto. (5)

FOR SALE.

STOCK OF HARDWARE IN A HEALTHY, growing town in one of the best farming sections of Nova Scotia. Every facility for doing a good and increasing business. Apply HARDWARE AND METAL, Box 74. (4)

WANTED.

BY A WINNIPEG WHOLESALE HARDware firm, two first-class Hardware Clerks. Must have a thorough knowledge of hardware in all departments. Address applications, stating age, experience, references, married or single, etc., Drawer 1473, Winnipeg. (1-tf.)

BREWERS' ENGINEERING BUSINESS.

HEATING AND PLUMBING

BUILDING IN TORONTO.

SINCE last Wednesday, January 8, the following permits have been issued from the Toronto city commissioner's office: To W. Scanlon, for brick cellars under four houses on 46 to 52 West Lodge avenue, to cost $1,100; to The Standard Chemical Co., for a one-storey woodshed, covered with galvanized non-corrosive iron, for storing charcoal, at the foot of Spadina avenue, in the G.T.R. yard, to cost $300; to Thomas McIlwain, for a two-storey and attic detached brick dwelling on Springhurst avenue, to cost $3 500; to Alice Brown, for a pair of semi-detached, two-storey and attic brick and stone dwellings on Albany avenue, to cost $4,500; to Thos. Farley, for a brick cellar and brick front to dwelling on 350 Wellesley street, to cost $150; to the Macpherson trustees, for a two-storey and attic brick and stone dwelling on Cluny avenue, to cost $6,000; to The T. Eaton Co., Limited, for a four-storey brick outside stairway near Terauley street, to cost $400; to Mrs. C. Chilliman, for a two-storey roughcast dwelling on Dufferin street, to cost $400; to W. Wilson, for a concrete cellar under store at 113 Bay street, to cost $60; to Douglas K. Ridout, for a two-storey and attic brick residence on Crescent Road, to cost $5,000; to The Toronto City Corporation, for a two-storey brick office and bank building at the cattle market in Stanley Park, Wellington avenue, to cost $10,000.

BUILDING OUTLOOK IN ST. JOHN, N.B.

In St. John, N.B., prospects are bright for a successful building year. Already there are being put under way the rearing of three large structures. The first of these is a large warehouse for Emerson & Fisher, on Canterbury street, besides a new factory for D. F. Brown & Co. T. S. Simons & Co. are having a big factory and warehouse built on Union street, while a new roundhouse for the I. C. R. will also be erected.

PLUMBING INSPECTOR IN OTTAWA.

The Ottawa Plumbers, Steam and Gasfitters' Union are being assisted by two union men of the Ottawa City Council in their endeavors to have a plumbing inspector appointed for that city. They say that such an official is needed there because of a good deal of defective plumbing which is done by unskilled workmen who are not capable of doing properly the work given them to do. It is claimed that an inspector would find plenty of work in examining all jobs, and thus protect the public against unsanitary plumbing.

PLUMBING AND HEATING NOTES.

The partnership of H. Brown, of Brockville, Ont., and James F. Reid, of Smith's Falls, Ont., who conducted a plumbing business at Smith's Falls, has been dissolved. James F. Reid will continue.

Bishop & Gilsby, plumbers, etc., Greenwood, B.C., have dissolved.

SOME BUILDING NOTES.

John Baxter, Brownsville, Ont., is busy preparing for the erection of his new house.

Tenders are being advertised for for the erection of a new Roman Catholic church at Lanark, Ont.

Work on Haslan, Irons & Co.'s new foundry on Market Place, Carleton, N.B., has been commenced.

Chas. Miller, Ottay Lake, North Burgess, Ont., is drawing brick for a new residence which he is going to build next summer.

The Liverpool, London and Globe Insurance Co. is contemplating the erection of an eight-storey office building at the corner of St. James street and Place D'Armes, Montreal.

Laurie & Colby have been awarded the contract for the erection of a club house at Victoria, B. C., for the Victoria West Athletic Club, and are commencing work immediately.

Thos. Hy. Matthew & Son, builders, Victoria, B.C., are reported to be making arrangements with an Old Country syndicate for the erection of 50 good-sized houses in various parts of that city.

OFFICERS OF THE TORONTO ASSOCIATION.

Several new members were admitted into the Master Plumbers' Association of Toronto, held in Pythian Hall, but the chief event of the evening was the election of officers for the year 1902, which resulted as follows:

President.—R. Ross.
First Vice-President.—Geo. Clapperton.
Second " —Jas. Sherlock.
Secretary.—Chas. Doughty.
Treasurer.—H. Hogarth.
Sergeant-at-Arms.—Geo. Cooper.

At the next meeting of the Association which will be held on January 27, these officers will be installed.

BUSY KINGSTON PLUMBERS.

Kingston plumbers and steamfitters are finding so much work to do that they are advertising for plumbers and tinsmiths. This is an unprecedented thing, as it is usual for them to discharge most of their hands this time of the year. But a wave of prosperity is extending over that city which promises to roll money into the pockets of its tradesmen.

A $7,500 CREMATORY FOR OTTAWA.

Street Commissioner Jones, of Toronto, accompanied City Engineer Ker, of Ottawa, on a visit to several cities in regard to crematory plants. Now a $7,500 crematory is being planned for Ottawa. Work on the remodelling of Toronto's crematories is also going on, they having been found far too small for the work they have to perform.

STRIKE IN A FOUNDRY.

There is a big strike in Moncton, N.B., about 40 moulders and apprentices employed in the Record Foundry and Machine Works going on strike on January 10. This was owing to the manager refusing to recognize the Moulders' Union when its representatives called on him to ask an increase of pay. Subsequently, it is claimed, some half a dozen members of this union were discharged, so the members thereof walked out. It is understood that by the new scale of wages demanded piece-workers would get an increase of 20 per cent. and time hands a minimum of $2.50 per day, instead of the $10 to $12 per week now paid.

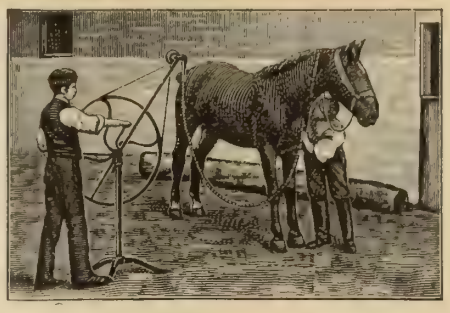
FALL LIST ON AXES.

The following is the fall, 1902, price list of the Dundas Axe Works. These prices will go into effect in July:

Seconds	$ 5.00
Royal Wood Chopper	5 50
Western Gatineau, Hickory Whacker	6 00
Empire, Western pattern	6.50
Empire, wedge or half-wedge	6.50
Pine Tree, round head	6.50
Dundas Champion	6.50
Peerless, round head	7.00
Keen Cutter, bevelled	7.00
All Steel, full polish	7.50
Dundas Leader	7.75
Flint Edge, hand-made	7.75
Crown Jewel	8.00
Perfect Phantom, Bevelled	8.25
Perfect Jewel	9.00
Scoring	9.50
Canadian, up to 4 lb.	7.00
Joiners	7.50
Framing	9 00
Peerless, double bits	10.00
Dumb Champion, double bits	10.00
Crown Jewel, double bits	11.00
Handling, extra, No. 2 handles	1.50
Handling, extra, No. 1 handles	2.00

A HIGH PAINT BUSINESS.

Don't stay on the lower step of the paint business. Take a higher position. Watch the rapid upward march of this business—there's money in it for you. Look out for the paint that pays—cheap paints are out of it—the cry is more and more for good paint—the best paint.



RAMSAYS PAINTS

are the best in the line of paint making; sold at a price that will yield a profit to you—advertised intelligently, honestly, in a helpful way. They will help you if you will take hold—help you to get a paint business and keep it. That's what we all do business for, isn't it? Write us, or give our travellers a little hearing.

WHAT TO DO IN JANUARY.

THE first month of all the 12 to follow—the month of new resolutions—the month of changes and that one which decides for us the result of the inventory as to whether we have made a dollar in the business or see staring us in the face the fact that we have lost many of them.

After closing inventory books, after the dividend, if any, and after closing every possible account on the old books, it is a good time to get ready for

THAT NEW SET OF BOOKS AND COLLECTIONS.

No time is quite so good as the first of the year to start the clerical department entirely new, as to material to be used. There are many good reasons for it. In the first place everyone expects to pay his debts, if he pays at all, at that time. It is more convenient for him—as a rule he has more money, and he well knows it is expected of everybody.

This season should lessen by almost hundreds the number of accounts to go into your transfer to a new and clean ledger, and a little printed paster slip put on your statement, to the effect that you are changing, will aid greatly in the collection of them. Something like this, which the writer has used to good advantage :

The new year is at hand, we expect to open an entire new set of books ; will you very kindly help us in this by favoring us with amount of above account ?

Many people who would not ordinarily respond, knowing and appreciating the attending labor, will make it a point to see the account paid.

Now, as to your books. If possible at all have them made to suit your wants, particularly ledger and cash book. Many bookkeepers and many proprietors prefer special ruling of ledger, and it costs no more than to buy made-up or shelf goods.

In a special column cash book—that is, one in which the columns are ruled for freight, drayage, interest and discount, merchandise, expenses, etc.—a great saving in time is made and endless waste of pages in the new ledger are avoided. The matter of simplifying and shortening is a great item where many accounts are carried.

JANUARY THE TIME FOR CHANGES.

There are frequent changes in firms at this season, but the minor changes in store room and arrangement are more particularly referred to. You have, perhaps, more time at your command during the first two weeks of this month for such work than at any other season of the year. It is neither pleasant to the eye nor profitable to keep the same arrangement of your store running from year to year. The appearance of the store must be the loadstone to attract, and customers tire greatly of an everlasting sameness, and are very liable to make the assertion that you are drifting into what is termed old fogyism.

It costs so little to change the arrangement, the placing and filling of showcases and to add new ones where and when needed, and practically just as little for fresh paint and bright, attractive shelving. The addition of a wall-case occasionally adds wonderfully to the appearance of a room. Let every effort that is made in this line tend toward the showing of more goods and making the silent salesman. A line of goods, such as hammers and hatchets, or saws, will sell themselves when exhibited in a case, while on the other hand customers will not ask for them under any cirsumstances unless their errand be directly for that article.

A NEW SET OF RULES

for employes, if your old ones do not meet your views or have not been observed as they should be, or perhaps you have gone along without any.

Men do not object to sets of rules in a store unless they be extremely arbitrary ones—on the contrary, they prefer working under a system that tells them when and where and what to do without the continual asking, and beyond what their own intuition would dictate.

In the case of but two or three employes it may be thought not worth the trouble, but the writer assures you that few or many sensible right lines laid down for their direction are appreciated by the men themselves and the results are greater and much better than where none at all exist.

A little system is a help to the green man and a law to the older one, saving proprietor, too, many moments of anxious worry during the day.

HOW ABOUT ADVERTISING ?

Has yours been a success during the past year ? Have you bought space and handled it as you would the buying of goods you put on your shelves Do you get more out of locals than you do out of display, or have you watched the results of either ?

Are you using good cuts or putting up the same old ones you have had for years ? Do you make frequent changes, and do you confine yourself as nearly as possible to one line of goods in advertising, or jumble many together ? In the latter case, of course, the real object of your work is lost sight of and much of it goes for naught.

We should ask ourselves fairly and honestly these questions and look the matter of our advertising squarely in the face. More money is thrown in the fire through poor advertising and little attention to it than any of us can estimate.

Do you advertise at all ? Many hardware merchants do not. If not, get at it and see the difference in your business. You will wonder where all the barnacles came from that will drop away as you sail along with increased trade.

MONEY IN NEW LINES OF GOODS,

and there is money in them. January is a good time to decide what they are to be. It's very much like your old shelving and your showcases that are never changed as to arrangements and contents ; people get tired of seeing them, and in these hustling days are looking for new lines. You will have had continual calls for some one class of goods you do not carry—perhaps house paints, box paints or brushes—all profitable goods, perhaps more so than you imagine. It takes but little capital to add them, and in doing so it is not necessary to sell the worthless paints—the man who doesn't pay his debts is a part of every class of trade You will find there are great quantities of these lines you have not carried, sold all the time and at a good profit and for cash.

Enameled or grey or blue ware is a great seller. Hollow ware is good, carpet sweepers, fishing tackle and sporting goods in a small way. Put in lines that competitors don't handle ; there are any number of them, and they attract customers.

LEST WE FORGET,

and what should be the first thing in the new month, don't neglect to see the carried-over holiday goods, that positively do not sell during the year, put away safely and put away dust-proof and dirt-proof. For a great many goods paper bags are capital for this. Some of it can go along through the month with the chance of selling it, but the time comes for fire irons, brass sets, candelabra and candle sticks, brass fenders, brass hods and all the smaller pieces of plated, brass and bright goods, and their value gets away unless properly wrapped and bagged and packed in a clean, dark corner.

START WITH A CLEAN STORE.

This month and the new year should see every part of the store spick and span and clean as clean can be. Of course, the inventory helps much if carried through rightly, but all of us do not clean up thoroughly as we go, while it is a fact that every man doing calling off should have a brush or feather duster near at hand, and not depend so largely on an after going-over, for which time and opportunity may never come.

It is wonderful the amount of filth, etc., that gathers during the year on shelves, in boxes, and throughout every corner of a hardware store, and the time to clean up rightly is early in the first month of the year.

THE OPPORTUNITY FOR CLEARING DEAD STOCK

is in January. No other month gives you the same, and in no other month of the year, perhaps, is there as much time to give to it. If inventory has been rightly taken it has developed all the worthless and unsalable goods in the house. It now remains for us to get rid of them, and with many this is a sort of nightmare, while properly handled and displayed it is not a hard job at any time. Give them a table of their own : show them at their best, with a price that will move them, and if that price don't do it give them another. Lump them off to contractors, shopmen, factories or what not. Sell them at some price, and you will have done the best job of the month, leaving you in good shape for the 11 months to follow.—H. C. W. in Iron Age.

At Chatham, N.B., all the merchants, excepting two, have signed an agreement whereby they agree to close their places of business at 6 o'clock p.m. each week night, except Saturday, during the months of January, February and March. The above agreement took effect on Monday, January 6, 1902.

FOSSIL FLOUR IN NEW BRUNSWICK.

IN Colchester county, Nova Scotia, lies Bass River Lake, resting almost on the mountain top, 1,340 feet above Cobequid Bay. About 20 years ago this lake ran dry for a time, and then as mysteriously refilled again. But there was discovered between the various strata, lying on its rocky bed, a curious white, chalky substance, which was found to be indestructible, the most intense heat having no effect upon it, and insoluble, besides being a non-conductor of heat.

Various unsuccessful attempts were made to manufacture this, and it was not till 1893 that a company consisting of capitalists from Portland, Providence, New York and Pennsylvania, was organized to go on with the work of development. Davis S. Collins went to Nova Scotia to superintend the operations. A building 200 feet, two storeys and a half high was erected, in which was placed machinery, resembling that used in an ordinary flour mill. Boilers and an engine were added, and a wooden tramway, 12 miles long, built from the works to the shore of Cobequid Bay. The lake was drained by means of trenches, and the work of getting at the substance which they propose to manufacture, began. The difficulty, however, of drying this mineral, which had puzzled many before, came up and the attempt almost failed. But by great energy and persistence, new and special machinery was installed, and was found to work very successfully. That was in 1896.

Large quantities of wood are required and large numbers of men are employed in cutting and hauling it, while about 50 men are employed about the works during the summer, working day and night. The amount of money expended for labor exceeds $20,000 annually.

Analysis of the product of the Bass River Lake and tests of its usefulness, made by Gray Stanton, a New York chemist and metallurgist, shows that the flour consists of boat-shaped diatoms. These diatoms differ in different deposits. Some deposits are in dead moors. The deposit used by The Fossil Flour Company is "live" and consequently is, according to the above-named expert, superior. Fossil-flour diatoms are of cellular formation. Those of whiting and zinc are hard and flat. Fossil flour grips, clinches, and is absorbent, insuring a single compound or material—not a mixture of two distinct articles—when used to assist in other manfactures. Fossil flour is absolutely neutral, and by means of the process of refinement nothing in the refined material is left of animal or vegetable matter. It is a drug mechanically but not chemically. Four grades, comprising two varieties, are manufactured at Bass River, to which separate names are applied, viz., Fossil Flour and Tripolite. Practically they are the same except in color. The finest grade is a beautiful snowy white, and in this only one and fifteen-one-hundredth per cent. of impurity remains.

Fossil flour is used for various purposes, as in making rubber compounds, in producing ultramarine dyes, as covering for steam pipes, boilers, etc., to prevent heat radiation; it is made into silver polish of the finest quality; also polish for tinware and the baser metals. New uses are being discovered continually for this remarkable flour, and it is rapidly superseding whiting and zinc.

This industry is the only one of its kind known to be in existence. Last year the profits of the company are stated to have been most satisfactory, and as enough of this deposit exists at the bottom of the lake to last 60 years, doubtless more extensive works will follow.

THE ARSENIC INDUSTRY.

THE only arsenic works in America are located at Deloro, Hastings County, Ont. They have a capacity of 1,000 tons per annum and employ from 160 to 180 men, their monthly payroll being $7,000, besides outlay for wood, timber, etc. This arsenic is of very high quality. The refined product that is placed on the market by this company is said to be the purest in the world. It is and can be produced in Canada at less cost per ton than anywhere else in the world. This is only possible by reason of the gold contents in the ore from which the arsenic is eliminated. The gold value now goes towards paying the cost of mining and treating, but unless the arsenic also is extracted, the gold contents of the Hastings mispickel would not alone pay.

On account of its low cost of production there is a good chance for Canadian arsenic to displace the English and foreign article in the markets of Canada and the United States. Into the latter country in 1900 there were imported 7,046,353 lb. of arsenic; value, $333,153. For the year 1899, 10,539,439 lb.; value, $415,066. In 1899 there were imported into the United States and Canada, 5,567 tons of arsenic. Canada, during the four years ending 1898, imported 2,224,783 lb., valued at $82,103.

Since 1898 the Dominion users have purchased the Canadian product in increasing quantities instead of the foreign importations. The present import figures, then, would not indicate the consumption in this country.

ACETYLENE GAS CASE.

In the High Court, Toronto, on Monday, January 6: Bowerman v. Town of Amherstburg.—Judgment (E.B.B.) in action tried at Sandwich, brought by plaintiff on behalf of himself and other ratepayers and the Attorney-General for Ontario, to have declared invalid a resolution of the council of the corporation allowing defendant Fraser to lay metal pipes under the surface of certain streets to convey acetylene gas to his neighbors, to restrain defendant from laying pipes, and for a mandamus to defendant Fraser to restore the streets to their former state of repair. Held, that the council had power under the Municipal Act, sec. 566 (3), as amended by 62 Vict. (O.), sec. 35, article (a8), to authorize defendant Fraser to lay the pipes, notwithstanding 1 Edw. VII., 26, sec. 24. The defendant Fraser is not supplying light for his own purposes only, but for municipal and public purposes of the municipality, and the public see fit to avail themselves, so far as the streets in question are concerned. Held also, that the by-law passed pending the action and confirming the resolution is valid, though not signed by the mayor, R.S.O., ch. 223, sec. 272, but the presiding officer who had power to sign. Action dismissed without costs between plaintiff and defendants, or between defendants. A. H. Clarke (Windsor), for plaintiff. D. R. Davis (Amherstburg), and F. H. A. Davis (Amherstburg), for corporation. J. H. Rodd (Windsor), for defendant Fraser.

THE PAINTERS PERFECT WHITE LEAD

is beautifully soft and fine in the grain. It mixes well with Linseed Oil, forming a creamy smooth paint of great covering power and undoubted durability. Every atom is paint — perfect paint — and there is no loss or residue of any kind. The Painters Perfect White Lead has become very popular everywhere. Book early to ensure early shipment.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

1902 GARDEN HOSE. 1902

We manufacture the most popular and best selling lines of Garden Hose in Canada. Our "Maltese Cross" brand we confidently recommend as the finest Garden Hose on the market.

We have other grades not quite so expensive, but good reliable brands, viz.: "Lion" (the popular medium-priced hose), "King" "Sun" and "Leader."

Our "Kinkproof" (wire wound) hose is wired by a special process controlled solely by ourselves, and is so constructed that it may be cut at any wind of the wire without loosening or uncoiling, the wire being self-gripping throughout each length.

KEMP'S Broad Hoop Roll Rim Milk Can Bottoms

possess all the points which go to make perfection in Can Bottoms. They have been used by a criticizing public for three seasons, and their popularity is evidence of the satisfaction which they gave. The Roll Rim has no sharp turns which break the grain of the metal and lessen its wearing qualities. It has a broad wearing surface and will not damage floors. They do not cost more than an inferior Bottom. **The IRON-CLAD TRIMMINGS** are made the same as the broad hoop, and differ from them only in having a narrower and thicker hoop which does not require the Roll Rim, and, therefore, can be sold cheaper. For durability and finish our trimmings are unequalled.

B.C. MINERAL OUTPUT INCREASES 25 PER CENT.

THE British Columbia Bureau of Mines has just issued a bulletin giving the estimated mineral production in that Province last year. The total value of the minerals produced was $20,713,501, an increase of 25 per cent. over 1900. The gold amounted to $5,600,000; silver, $2,600,000; copper, $5,000,000; lead, $2,000,000, and coal, $4,587,630. The Kootenay contributed about $7,000,000 to the mineral production; Yale nearly $3,000,000, and the Coast districts about $5,000,000.

That there should have been an increase of 25 per cent. over the previous year is surprising, for 1901 cannot be called a favorable year for those engaged in mining in British Columbia. As a miners' journal recently remarked, it has been "a period of marking time."

In the Rossland district the labor trouble has been a severe drawback, to say nothing of the demoralizing influence of the collapse of certain well-known properties whose stock had been boomed to a high figure in the market. The British Columbia Review, published in London, England, in its issue of January 4, said: "It is now proved that the average ore in the Le Roi, War Eagle and Centre Star mines is of too low a value, after deducting the cost of smelting, to leave sufficient profit to make an adequate return on the heavy capitalization of these mines. In the case of the Le Roi, the information published by the old management has proved to have been extremely misleading, and, unless substantial economies are effected both at the mine and smelter, the dividend outlook cannot be regarded as satisfactory. It is now becoming recognized that resort will either have to be had to concentrating the lower grade ores before shipping to the smelters, or else some new method, such as the oil process, must be employed in order to obtain the full benefit of the metal contents of the ores."

The results have not been satisfactory in the Lillooet and Bridge River districts. Operations in the Cariboo country were rather disappointing, although good results are anticipated from certain new gold-bearing creeks that were discovered towards the end of the season.

Owing to the low price of lead and the excessive charges of refiners in the United States, the silver lead mines in British Columbia have suffered a great deal, but relief in this particular is looked for—in part, at least — by the action of the Dominion Government in deciding to give a bounty of $5 a ton on all lead refined in Canada.

While the Atlin district has not been up to expectations, the outlook is promising and the hydraulic companies expect good results this season.

Mining operations in the Boundary country have made excellent progress. With modern machinery and appliances all previous records have been broken, and with improved railway facilities the outlook is most gratifying.

Probably in no part of British Columbia have the results been more gratifying than in East Kootenay. The Crow's Nest coal mines were the scene of a great deal of activity during 1901. As will be noticed from a paragraph printed in another part of this paper, over 400,000 tons of coal were mined and 130,000 tons of coke made. The company have 424 coke ovens at Fernie and 212 at Michel, having in all a capacity of 1,200 tons per day. Some extensive iron deposits have been taken up in the district, and, with the Great Northern Railway in the near future tapping the district, as well as the C.P.R., one may confidently look for a great development in mining operations in East Kootenay, and particularly in the neighborhood of the Crow's Nest mines.

The indispensible man does not usually keep afloat very long. He is dragged to the bottom by the sense of his own importance.

BUSINESS MEN IN PUBLIC LIFE.

ONE of the daily newspapers attributes the defeat of its candidate in one of the constituencies in the recent bye-elections to the apathy of those professing fealty to its particular political party. This may or may not have been the cause of defeat. As a rule party men are not apathetic. It is business men who, as a rule, are weak in this respect.

Although there has been a great improvement during the last few years in this respect, we are still far from the ideal. The signs, however, are by no means discouraging. Lord Rosebery, as our readers are aware, some months ago declared, in a speech now famous, in favor of a government of business men. Mr. Edmund Robertson, M.P., similarly expressed himself in an article which he recently contributed to The Nineteenth Century. It is true that in Canada no statesman of relative importance has come out unequivocally in favor of such a doctrine, but it is significant of the trend of public opinion that if a candidate for Parliamentary or municipal honors is a business man the newspapers supporting him do not miss the opportunity of emphasizing the fact. Even should he, while not a practical business man, have some connection with a commercial enterprise, his friends usually make all they can out of this for campaign purposes.

There is still to be found a daily newspaper here and there that is prone to decry the usefulness of the business man in public life, but, on the other hand, it is common to hear either the Dominion or one of the Provincial Governments spoken of as a Government of business men.

It is evident, therefore, that the principle is making headway, and the more business men recognize that it is the best policy the better will it be, not only for themselves, but for the country as well.

A PRAYER THE GOVERNMENT SHOULD ANSWER.

A DELEGATION from the Canadian Manufacturers' Association is in Ottawa this week interviewing the Government on a number of subjects. One is the occasional recalling of our trade commissioners in order that they might obtain a more thorough knowledge of trade conditions in Canada, and thus be in a better position to intelligently discharge their duties.

Mr. Larke, the commissioner in Australia, is cited as a case in point. He has been away from Canada seven or eight years, and, although he is a man exceedingly well qualified for the position he holds, he must naturally have become somewhat stale as to trade conditions in Canada.

Since Mr. Larke left this country to assume the duties of commissioner in Australia, Canada has developed industrially to an astonishing degree. In no similar period has it been so marked.

Seven years ago our import trade was $110,881,682; now it is $181,257,988; our exports $113,638,803; now $196,487,632, while the total foreign trade was $224,420,485 against $386,903,157 in 1901.

When Mr. Larke left this country the iron industry scarcely had a name. Today Canada has a place among the nations of the world as an iron producer, the product of her furnaces now not only controlling the home market, but having become a factor in the British market as well.

In every phase of manufacturing, in every branch of agriculture, in mining, in financial institutions, there has been a development we believe far beyond the anticipations of the most sanguine of seven or eight years ago. In no branch of industry has the development probably been more marked than in the manufacturing arts. And in regard to no branch of industry is it more necessary that Mr. Larke and other trade commissioners should be well informed. It is to be hoped the Government will, therefore, answer the prayer which the Manufacturers' Association is presenting.

It is not the first time, however, that such a prayer has been presented. The matter has been brought to the attention of the Government more than once during the last year or two. It is to be hoped that there will now be no further delay, and that, as soon as the Parliament of the Australian Commonwealth has finally adopted the new tariff, Mr. Larke will be recalled to Canada for a few months in order that he may not only become acquainted with the trade conditions obtaining in Canada, but that he may be given an opportunity to acquaint exporters in this country with the conditions and possibilities in the antipodes more fully than he can through the medium of the reports which the Department of Trade and Commerce issues monthly.

A light weight in the prize ring may after all be an honest weight.

NEGLIGENT IN THE ESSENTIALS.

A GREAT deal of thought is being given to Canada's military representation at the coronation in June next, but little or no thought is being given to the representation of Canada industrially.

It is quite proper that the military units of Canada should be properly represented. It would be a mistake if they were not. But it is equally a mistake to concentrate our efforts in bringing to the foreground that which represents the arts of war, and, at the same time, neglect that which represents the arts of peace.

Canada is at all times ready to defend her own shores and to render service to the Motherland when occasion demands. But we are not a warlike people. We are an industrial people, and, if an effort is to be concentrated on any one phase of Canadian activity, it should be on that which is most representative of our national life.

It is because in the past we have been negligent in this most essential particular that Canada has often been misrepresented in tableau in Great Britain as the land of frost and snow; for instance, by blocks of ice in a Lord Mayor's show. And even now, as we pointed out a few weeks ago, it is proposed to have Canada represented in the coming coronation proceedings by mountains with snow-covered tops.

At the coronation proceedings will be men and women from every clime under the sun. As an opportunity to represent to many millions of people the varied industrial resources of Canada, it will be great. Not probably for a generation shall we have its equal. And yet if we are active in anything, it is in the non-essentials, while in the essentials we are surprisingly passive.

It seems to us that this is a matter in which the Trade and Commerce Department might concern itself.

NEW IRON MINES AT MICHIPICOTEN

(By W. Frank McClure).

THAT the vast iron resources of the Lake Superior districts of the United States should find their counterpart just across in Canada is not altogether an unlooked-for development. It has been a matter of wonderment in this country that Canada has been so slow to investigate the mineral resources of Algoma, in view of the favorable topography of the land, and the existence of the great ore bodies as near as Minnesota and Michigan.

To-day, the same capital from the United States that is building up the giant industries about Sault Ste. Marie, including the water-power canals, is opening rich mines at Michipicoten. This will result in Canada becoming the location of her own steel and iron industries. Already this evolution is rapidly progressing, and the Midland, Hamilton and Buffalo furnaces are using ore from the Helen mine, the first of the newly-discovered properties. The new steel mill at the Sault Ste. Marie, when completed, will use the Canadian product exclusively, and four vessels of The Algoma Steamship Co. are bringing Helen ore to Ohio ports, from whence it reaches the Pittsburg furnaces. Some 350,000 tons have already been shipped to the United States at a profit in spite of the duty of 40 cents a ton.

For shipping the product of these new mines a harbor with extensive dockage has been established at Michipicoten, 12 miles from the Helen mine, and about 130 miles from Sault Ste. Marie.

The Helen iron mine is situated on Boyer Lake. The ore deposit has been exposed to the extent of 28,000,000 tons, and the limit has not yet been found in two directions. The Josephine mine, more recently opened, is in the same belt, but on Park Lake. This mine is also very promising. Then there are the Frances and Brotherton mines on the same range. The output of the new Canadian mines is about 5,000 tons daily, but this will be greatly increased next season. The mining facilities are of the best.

Mr. E. V. Clergue, a brother of Francis H. Clergue, the promoter of all the giant industries in Algoma, is in charge of the ore mining. He found, early in the mining operation, that the bulk of the ore taken from the Helen mine contained an average of about 61 per cent. metallic iron and 0.08 phosphorus; also that at the point where the ore body comes to the lake a Bessemer ore is found running as low as .02 to .03 per cent. in phosphorus and in sulphur from a trace to .05 per cent. The ore has a high grade in the market, also, on account of its low percentage of water.

The following from a report of Dr. Bell, of the Canadian Geological Survey, concerning the Helen mine, is comprehensive: "The ore is a hard, but somewhat porous or spongy, red hematite, with a specific gravity of about 5. The ore body, from which a layer of muck or peaty moss has been removed, forms a point dividing the head of the lake into two small bays. It has a lumpy surface, with a dark bluish-grey color. Small quantities of brown hematite (limonite) and yellow ochre appear in joints and cavities, but they do not form any appreciable portion of the mass.

"The horizontal dimensions of the exposed ore are about 500 feet in every direction, and its greatest height above the lake is 100 feet. The ground rises steeply all around the head of the lake, so that the ore lies at the bottom of an amphitheatre, open on the west or lake side. A drift has been run at the level of the general surface of the ore, southward into the hill, and this penetrates similar hematite for 250 feet, thus giving a known breadth of about 750 feet from north to south. During the winter of 1899-1900, by taking advantage of the ice on the lake, a number of holes were bored in the bottom along a north and south line, which passed the extremity of the point of ore at a distance of 250 feet to the westward. On this line and abreast of the point the lake had a depth of 100 feet, including 10 feet of soft mud, and at 150 feet below the bottom, where the boring ceased, the drill was still in hematite, like that on the dry land. A bore-hole from the surface of the exposed ore was sunk to a depth of 188 feet below the level of the lake without reaching the bottom of the hematite. The ore-mass has thus been proven to have a continuous depth of 300 feet, and as this follows the plane of the bedding, which is vertical, the probability is that the depth is very much greater. The general strike is parallel to the axis of the pond, which is about east and west. The railway approaches the mine from the west along the foot of the hill on the south side of the lake."

It has been figured by experts that at a shipment of 3,000,000 tons a year it would require a decade to exhaust the ore above ground at the Helen mine. Mining men from Minnesota are taking a great interest in the new territory. They are of the opinion that the deposits there are equal to those of Minnesota.

At Michipicoten harbor, vessels are loaded with ore at the rate of 1,000 tons per hour. Each ore pocket has a capacity of 50 tons. In all there are 500 feet of chutes, and more building.—Scientific American.

COAL AND COKE AT FERNIE, B C.

It is only a short time ago since Thos. R. Stockett was appointed manager of the coal mines at Fernie, B.C., but under his supervision their output has been increasing almost daily during the last three months. The estimated output for the whole of the year 1901 amounts to over 400,000 tons of coal and 130,000 tons of coke. Their 424 coke ovens at Fernie, and 212 at Michel, have altogether a capacity of 1,200 tons of coke every day in the year. At Fernie, about 1,800 tons of coal are daily mined, while at Michel, the output is not so great, being 500 tons every 24 hours. At the Coal Creek (Fernie) Mine, nearly 1,100 men are kept at work in connection with the mine and the ovens, while 250 are employed at the mines at Michel and 200 more at Morressey. These workmen altogether receive about $100,000 in wages every month.

THE UNITED STATES STOVE COMBINATION.

The American Stove Co., which is a consolidation of a number of important manufacturers of gasoline and oil and gas stoves, and which has an authorized capital stock of $5,000,000, has elected the following officers: President, C. A. Stockstrom; First Vice-President, Geo. M. Clark; Second Vice-President, D. A. Dangler; Third Vice-President, F. L. Alcott; Secretary, H. J. Trenkamp; Treasurer, Geo. F. Fiske. The executive committee consists of C. A. Stockstrom, F. L. Alcott, George M. Clark, H. J. Trenkamp, D. A. Dangler, E. H. Stockstrom and George F. Fiske.

Following is a list of the new companies taken over by the combine: Ringen Stove Co., St. Louis; Quick Meal Stove Co., St. Louis; George M. Clark & Co., Chicago; Schneider & Trenkamp Co., Cleveland; Standard Lighting Co., Cleveland; Dangler Stove and Manufacturing Co., Cleveland; National Vapor Stove and Manufacturing Co., Lorain, O.; Monarch Stove and Manufacturing Co., Mansfield, O., and The Twin Burner Vapor Stove Co., St. Louis.

THE LINSEED OIL QUESTION

Editor "Hardware and Metal."—I notice by an issue of "Hardware and Metal" that a correspondent of yours in Montreal takes you to task for having said that some oils imported to this country were not of the best quality. In confirmation of this statement which you have made, we might ask your correspondent if he is not aware that there are quotations made in England for oil produced from seed imported from British India, and that other quotations are made for oil at less rate, from £5 to £10 per ton less?

As these facts are known to the trade, some have been investigating to learn the causes for this difference in price, and the explanation received is that oil produced from seed from the Argentine Republic is not always equal to the oil produced from seed imported from British India and other British possessions.

The British blue books show the import of seed to Great Britain in the year 1900. Flaxseed was imported into England from foreign countries amounting to 891,422 quarters—a quarter being 416 pounds. The total amount imported from British possessions for the same year was 774,609 quarters, the largest bulk of seed coming to England from what is called foreign quarters comes from the Argentine Republic, and is known as La Plata seed.

Some British crushers, who have been interviewed in regard to the product they send to Canada, which receives the British preferential clause of the tariff, have said in reply that when crushing seed they are compelled to mix from 60 to 70 per cent. of Indian seed with La Plata seed to make the cake or oil of the quality they desire. Indeed, they say that in England they have great trouble in disposing of the La Plata oil pure and simple. As the oil imported to Canada from Great Britain comes very largely in the months of May, June and July, and as La Plata seed arrives in England in January, February and March, it is claimed that a very large portion of the oil coming to this country is pressed from La Plata seed. The oil made in England from La Plata seed must be sold somewhere, and as English manufacturers and dealers do not care for it, Canada gets the large share of it.

With this evidence before you, I am not surprised that you have drawn the conclusion that some of the oil imported into this country from England is certainly inferior to oil produced in Canada, and think you were quite justified in calling the attention of the trade to this matter.

DEALER IN CANADIAN OIL.

NEW YORK METAL MARKET.

TIN.—There was a further advance in prices on spot tin to-day, notwithstanding the recent large arrivals and lack of important business. The consuming demand is light at present and speculative interest is almost wholly lacking. In London there was more business than on any day for several weeks past, chiefly in futures, and the closing prices there showed a further advance of £2 on spot and £1 12s. 6d. on futures. The rise in the New York market has not been in proportion to the advance on the other side for the reason, it is said, that in spite of the efforts of the bull operators, who are credited with manipulating both markets for their own purposes, the large supplies on dock, coupled with dull trade, act as a drag on the upward movement here. The closing quotations in this market were 24c. bid and 24.50c. asked for spot and January, 23.50 @ 24c. for February and 23 @ 24c. for March. The Singapore quotation, as cabled to-day, showed a further advance of £1, being £103 10s. c.i.f. London. It was reported that to-day's purchases of futures in London were made by the principal operators here with a view to protecting this market.

COPPER.—The Lake companies are reported to be making large sales at 11c., but the orders coming in are not large, as the principal buyers are said to be still well supplied and can afford to hold off for further developments. Electrolytic is quoted at 10⅞ @ 11c. and casting at 10¾c. The London market eased off a little this morning, but stiffened up later, regaining the loss on spot before the close, which was at last night's figures. Futures were 2s. 6d. lower than last night, but 2s. 6d. better than this morning. The recent advance in London and to-day's firm close there have been without influence on this side.

PIG LEAD.—The London market continues to advance, closing 2s. 6d. above yesterday and 7s. 6d. higher than a week ago. In this market business is slow and prices more or less nominal on the basis of 4c. for lots of 50 tons or over. In St. Louis the market was steady but quiet at 3.90c.

SPELTER.—The market is flat with 4.35c. quoted nominally on spot and January, and 4.30c. on February. St. Louis was dull and easier at 4.12½ @ 4.15c. London was unchanged.

IRON AND STEEL.—Developments in the iron and steel trades are not of importance and are along the lines followed for some time past. While the continued scarcity of pig iron on the spot makes it practical for those who have any to demand and get their own prices for it, there is said to be little probability that a further general advance in prices will result from the present condition of supply and demand. Concerning this phase of the situation the Philadelphia correspondent of The Metal Exchange says there is a considerable divergence of opinion, but that the majority consider that further advances would be unwise. He says that such advances would tend not only to a large increase in production, but also do something to encourage imports. "Of course," he adds, "the market could take a great deal of iron during the next six or eight weeks, but with a return to normal conditions as regards coke and transportation, it is highly improbable that the present stringency will continue."

TINPLATE.—The market has a quiet and tame appearance, though it is understood that the larger consumers are contracting for about the usual quantities taken by them during the first six months of the year.—N. Y. Journal of Commerce, January 22.

BRITISH STEEL CONSOLIDATION.

THE London Statist devotes considerable space to the recently rumored consolidation of British iron and steel companies. It is reported that Guest, Keen & Co., Limited, at Birmingham, South Wales; Bolckow, Vaughan & Co., Limited, of Middlesbrough, On-Tees, and The Consett Iron Co., Limited, in Durham, are to be amalgamated.

These three English concerns named are important ones. The capitalization of Guest, Keen & Co. is £3,000,000, or $15,000,000, divided equally into 4 per cent. debenture stock, preferred stock and common stock. Of the preferred stock £120,000 and of the common £350,000 has not been issued. The company was itself a consolidation, taking over The Dowlais Iron Co. and Guest & Co. and The Patent Nut and Bolt Co. The properties taken over included collieries with an output of 1,500,000 tons annually, large iron and steel works and large interests in mining properties in Spain. The purchase price in cash for The Dowlais and Guest & Co. was £1,530,000 and for The Patent Nut and Bolt Co. £1,000,000, payable £200,000 in cash and £800,000 in debenture stock. The Consett Iron Co. was formed in 1864 with a capital of £400,000, which has since been increased to £1,500,000, of which £500,000 preferred and £750,000 common have been actually issued.

The earnings of Guest, Keen & Co. for the year ended June 30 last amounted to £387,065 after payment of all expenses incidental to the formation of the company. This sum, after payments of 4 per cent. for the debenture stock, 5 per cent. on the preferred stock and 10 per cent. on the common stock left a surplus of £260,843, of which £150,000 was carried to reserve account, leaving £110,843 to be carried forward. The earnings of The Consett Iron Co. for a series of years, with the dividends paid, were as follows:

	Profits.	Dividends on common.	Dividends on prefd.
		—Per Cent.—	
1901.....	£575,088	8	50
1900.....	672,585	8	50
1899.....	433,900	8	33 1-3
1898.....	772,884	8	20

Before paying these dividends the company wrote off for reconstruction of works £50,000 in 1901, a total of £225,000 for the three years. The surplus on June 30, 1901, showed undivided profits of £134,768 and a profit and loss balance of £180,088.

It will be now recalled that Mr. Arthur Keen, chairman of Guest, Keen & Co., with Windsor Richards, another director, visited the United States early in 1901 and inspected various plants of The United States Steel Corporation. It was suggested at the time that The United States Steel Corporation was expecting to acquire interests in some of the British companies. It was also reported that these gentlemen were given an insight into the workings of The United States Steel Corporation in order to facilitate the floating of a part of the stocks of the company in London.

WHERE FURS ABOUND.

AT the ancient trading post of The Hudson's Bay Company at Edmonton you are away from the modernity of the new town, and are conscious of a certain atmosphere of historical romance. From the front of the massive whitewashed buildings, which have more than once been attacked by hostile foes, you have a fine prospect of river, and woodland, and fertile plains, stretching away to the blue distance. The Saskatchewan runs in a deep gorge below you and on the farther bank there is a diversion of outline and foliage that is very delightful. But I don't suppose the Hudson's Bay people used to think much of the beauty of the scenery in the midst of which their trading post happened to be situated. Their eyes were set on the "main chance" rather too intently for that. When the Indian came for a sack of flour they stood his gun upright and made him pile skins up to its muzzle from the ground as the price of it. Well, of course, it had taken considerable trouble to get the flour there and there was no competition.

The fur trade is still pursued at Edmonton, and on the main streets one sees more than one sign on which is painted on legible letters: "Furs bought here for cash." Bears are to be seen occasionally within a few miles of the town, and it was not long ago that a Galician farmer of the neighborhood, seeing a cub roaming near his shack, fetched his gun and fired at it. Thereupon its mother appeared and ran at him viciously, open-mouthed, and wishful to tear his vitals. The man, having powder, but no more slugs, felt that a Galician's house is his castle, and retiring therein, barricaded himself as well as he could. Till the day broke the she bear clawed all over the place in the endeavor to get at him. But the daylight enabled the farmer to find a couple more slugs, with which he despatched his assailant, afterwards coming up to Edmonton triumphantly with her skin and that of the cub for sale. Only the other day a bear was seen by a townsman prowling around his back yard, though it decamped with rapidity, warned, apparently, by the increasing daylight and by the noise the Edmontonian made in opening his back door, that the environment was unsuitable for an animal of its type. If you go 40 or 50 miles north or northwest you may "load for b'ar" with reasonable hope of bagging a specimen. Other fur-bearing animals are correspondingly numerous, and many a Mooswa and his companion roam in the vast wilderness.—Calgary Correspondence Mail and Empire.

GLASS-BENDING PLANT FOR CANADA.

THE art of glass-bending is one which, of past years, has been rather behind the times, so far as Canada is concerned, the imported article being largely required to fill the demand. The Toronto Plate Glass Importing Co. have lately changed the aspect of affairs, however, by installing a large and most efficient bending plant sufficient to supply all the bent glass required in Canada for some time to come, and at greatly reduced prices. The plant, which cost several thousand dollars, is established in connection with their business and is the only continuous oven, as far as we are aware, in Canada. Heretofore, any glass-bending that has been done has had to be attended to in box ovens, which require to be shut up during the operation and until the heat is out of the oven. The continuous oven of The Toronto Plate Glass Co. permits not only of the glass being removed as rapidly as it is bent, thus giving place to more, but also by much more satisfactory work being done, as the process can be watched in all its stages and the glass kept perfectly straight and true, doing away with the possibility of much of it being destroyed, as in the box-oven process.

The Toronto Plate Glass Co. are prepared to supply bent glass for shop fronts, houses, furniture, showcases and all other purposes where it is required. An advertisement of the company on page 17 of this issue gives an interesting illustration of several difficult bends of glass, together with wholesale prices of bent and all kinds of glass for the hardware trade.

Don't waste your energy

in pushing "cheap" paint. It means hard, up-hill work, without bringing lasting returns.

The same amount of energy put into pushing

THE SHERWIN-WILLIAMS PAINT

will bring in more money and build up a lasting trade.

It's harder work to sell poor paint than good paint—because you have to keep after new customers all the time. The man who buys poor paint once won't buy it again—you can't fool him twice.

We want you to know all we have to tell you about *S-W. P.* and our methods of selling it, and how it is a better investment than a stock of poor paint.

Send for the "B-13 Booklet." We tell most of our story in that.

FAVOR TARIFF REVISION.

AT a meeting of the Brantford, Ont., Board of Trade on January 14 there was considered the question of tariff revision, which resulted in there being submitted and carried unanimously the following resolution :

That in view of the present conditions of trade and the expansion of Canadian industries, it is highly desirable that the Government revise the present tariff, with a view to the preservation of our markets against unfair competition, thus assisting to maintain and increase our present industries and to establish new ones.

This was moved by C. H. Waterous, who pointed out that the aim of all Canadians was, or should be, the preservation of Canadian markets for Canadians, and seconded by F. Leeming, who maintained that our Canadian tariff should be framed in the same spirit as our neighbors to the south framed theirs.

H. Cockshutt supported this, as did also Lloyd Harris, who stated that Canada last year sent to the United States $80,000,000 less of goods than she received from them.

Several others also took part in the discussion, and a clause was added to the effect that copies should be sent to the Premier, Minister of Finance, Minister of Customs and Mr. C. B. Heyd, M.P.

INDUSTRIAL GOSSIP.

Those having any items of news suitable for this column will confer a favor by forwarding them to this office addressed to the Editor.

THE management of the Grand Trunk Railway have decided to have a double track all the way from Chicago to Montreal. Of the 335 miles between Chicago and Port Huron, 161 are already double tracked, as is also a large portion of the Canadian system. On 78 miles between Durand and Battle Creek work is now being prosecuted, in the completion of which is necessitated the construction of 12 new bridges. From Port Huron to Montreal the greater portion is already double tracked. In the western end, 81 miles between Port Huron and Durand and 51 miles between Chicago and Sedley, Ind., of double tracks are now in operation, while work is being pushed rapidly on 30 miles between Stillwell and Grangers, Ind. The equipment will also be added to, and already eight huge new freight engines have been put on the routes.

At Grand Forks, B.C., the company working the Granby mines have just installed a set of converters which are working very smoothly, the product being blister copper, in which the gold and silver value has been retained. The precious metals are extracted by further treatment in an eastern refinery. The Granby company, from the matte from its own furnaces and that from the Hall mines and Greenwood smelters, will produce 12,000 tons of blistered copper monthly, or 24,000,000 lb. per year, exclusive of the gold and silver value the product may contain.

EXPERTS IN CONSTRUCTION WORK.

An advertisement of the Stanyon Engineering Co., Pittsburgh, Pa., on page 2 of this issue will be found of interest. This firm, which has already secured several important contracts in Canada, including the equipment of the Cramp Steel Co.'s big new works at Collingwood, Ont., has opened an office in Toronto for the purpose of looking after their Canadian business. They are prepared to furnish estimates for all kinds of engineering and construction work, the equipment of rolling mills, wire mills, etc., and the building of all classes of machinery.

BOARD OF TRADE MATTERS IN OTTAWA.

THE annual meeting of the Ottawa Board of Trade was held on January 14 when the president's report was read, stating that there was a total membership of 235, and that the average attendance at the eight meetings of the board held throughout the year was 34.5.

The report of the cheese committee showed that the quality and quantity of cheese made last year was fairly satisfactory, although the latest number of factories listed might be better.

The tourist committee are doing good work, especially in the obtaining of more space in the advertising literature of the C.P.R. and Grand Trunk.

A resolution was submitted on behalf of the Trade Congress committee by Thos. McFarlane favorably commenting on the coming trade conference at London between Australian and Canadian representatives, and stating that the Ottawa board is in favor of a Customs union between the various colonies of the Empire, that a uniform duty over their ordinary tariffs might be levied on all importations from countries outside the union, the proceeds to be devoted to some common object, such as Imperial defence.

The following are the officers elected for 1902 :

President—John Coates, acclamation.

First vice-president—John R. Reid, acclamation.

Second vice-president—Geo. S. May.

Treasurer—C. A. Douglas.

Council—C. J. Booth, F. H. Chrysler, Geo. F. Henderson, A. W. Fleck, G. B. Greene, D. Murphy, John McKinley, G. L. Orme, R. W. Shannon, P. Whelan, J. W. Woods and George Burn.

Board of Arbitration — Thos. Askwith, N. A. Belcourt, J. R. Booth, W. Borthwick, Fred Cook, H. K. Egan, D. M. Finnie, J. M. Garland, R. M. McMorran, G. H. Perley, P. D. Ross, C. C. Ray.

BOUGHT A STEAMER.

A first-class side-wheel steamer has been purchased by the Algoma Central Steamship Line, which will be placed with the opening of navigation on the route between Toledo and Sault Ste. Marie, via the Canadian shore and the north Manitoulin Channel, giving a service of two trips per week. The steamer has a cabin capacity of 500 passengers, will carry 500 tons of freight, and has a speed of 16½ miles an hour.

The merchants of Elgin, Man., have agreed to close their respective places of business at 7 o'clock every evening of the week, excepting Saturday, until further notice.

BOARD OF TRADE NOMINATIONS.

THE meeting of the Board of Trade of the city of Toronto to nominate officers to be elected at their annual meeting was distinguished by an event of unusual occurrence, the official farewell given to Edgar A. Wills, who for upwards of 20 years has been secretary of that institution, but is now leaving to fill a more lucrative and more important post at Windsor.

As soon as the regular business was over, Mr. A. E. Ames, the president and also president-elect, in a very fitting speech presented Mr. Wills with a beautifully illuminated address expressing their regret at his severing his connection with the board. Accompanying this was a purse containing a good round sum of money.

Speeches complimentary and expressing regret were made by a number of others which were fittingly replied to by Mr. Wills. The proceedings were closed by three ringing cheers and the singing of "For He's a Jolly Good Fellow."

The nomination of officers was then proceeded with as follows: Elected by acclamation—President, A. E. Ames; first vice-president, J. F. Ellis; second vice-president, J. D. Allan; treasurer, E. R. Wood.

Nominations for Council:—Messrs. J. W. Woods, H. N. Baird, T. G. Brough, R. J. Christie, Noel Marshall, Edward Gurney, W. A. Warren, Miles Vokes, W. J. Gage, A. E. Kemp, M.P., W. F. Cockshutt (Brantford), Peleg Howland, C. J. Marlatt (Oakville), J. L. Spink, C. W. I. Woodland, P. R. Miller.

Nominations for Board of Arbitration:—Messrs. Hugh Blain, Alex. Cavanagh, Col. Davidson, D. O. Ellis, M. C. Ellis, Thomas Flynn, James Goodall, J. C. McKeggie, W. D. Matthews, W. K. McNaught, D. M. Spink, W. Stark, S. R. Hart, W. E. Milner (Brampton), and George H. Baird.

Nominations for Representatives on the Exhibition Board—Messrs. Thos. H. Lee, R. W. Elliot, Thos. Harris, S. E. Briggs, W. P. Gundy, G. H. Gooderham, Geo. Edwards, R. Y. Ellis and John Carrick.

Nominations for Representatives on the Harbor Commission—Messrs. J. T. Mathews, Barlow Cumberland and Geo. A. Chapman.

Ald. McMurrich, C. B. Watts and Geo. Love are the scrutineers who will count the ballots at the annual meeting.

THE CHANGE IN TURPENTINE.

This week advances of considerable proportions have taken place in turpentine, so now it is 7c. higher than last week and 9c. more that it was the week before. Prices are now being quoted for the cities of Toronto, Hamilton and London at 67c. per gal. of 8 4-10 lb. for one bbl., or 66c. per gal. for 2 to 4 bbls. Quantities of 5 bbls. are left open. To outside western points the price is 1c. per gal. more, the freight being allowed. The terms are net 30 days.

For less quantities than 1 bbl. 5c. per gal. extra will be charged to all points, and 50c. each for 5-gal. and 70c. each for 10-gal. cans extra will be charged. The terms in this case are four months, and f.o.b. at place of shipment.

A NEW STOVE FIRM.

The Batty Stove & Hardware Co., 279 Queen street west, Toronto, have succeeded to the wholesale business in stoves and ranges formerly conducted there by a branch of The Copp Bros. Co., Limited, Hamilton.

Wm. Batty, who has been with the old firm for the past eight years, has accepted the position of manager of the new company. Under his direction they are extending their wholesale trade which has been previously confined to Toronto and other centres.

The chief line which this firm is carrying is the "Home Range," which they have in three grades, and also the "Garland."

They make a specialty of stove repairs to the jobbing trade and are carrying a full line of hot-air registers for furnaces. They also extensively handle mantels, grates, tiles, etc.

TURPENTINE AND ROSIN.

AN increase of almost 192 per cent. in the capital invested in the turpentine and rosin industry and of 152 per cent. in the value of the products therefrom is shown in the census report on the manufacture of those products in the United States. The report shows a total capital of $11,847,495 invested in the 1,503 establishments reporting for the country. This sum represents the value of land, buildings, machinery, tools and implements, and the live capital utilized, but does not include the capital stock of any of the manufacturing corporations engaged in this industry.

The value of the products is returned at $20,344.888, to produce which involved an outlay of $778,694 for salaries of officials, clerks, etc., $8,393,483 for wages, $476,171 for miscellaneous expenses, including rent, taxes, etc., and $6,184,492 for materials used, mill supplies, freight and fuel. The total product of the spirits of turpentine in the United States during the year 1900 was 754,470 bbls., of which 461,227 were received at the principal ports for distribution, leaving 293,443 bbls. as the amount shipped direct from the distilleries to internal points of consumption.

The total value of turpentine and rosin products consists of $14,960,236, the value 754,670 bbls. of spirits of turpentine; $5,129,268, the value of 2,563,087 bbls. of rosin, and $255,385, the value of miscellaneous products, such as tar, pitch, rosin oil, charcoal, refined tar, etc. From the distilation of the 4,033,161 bbls. of crude turpentine by the 1,503 establishments reporting, there resulted 24 per cent. of turpentine, 55 per cent. of rosin and 21 per cent. of other products.

The consumption of spirits of turpentine in the United States is 20,397,588 gallons, or 53 per cent. of the quantity manufactured, and of rosin 193,969 bbls., or 7.6 per cent. The amount of crude turpentine (barrels) gathered and total value by States follows:

	Barrels.	Value.
Alabama	373,005	$2,033,705
Florida	1,212,935	6,469,605
Georgia	1,515,569	8,110,468
Louisiana	20,299	115,324
Mississippi	359,529	1,772,435
North Carolina	361,729	1,055,659
South Carolina	190,095	787,678

THE SHIPPING TRADE OF TORONTO.

ACCORDING to the annual report of Colin W. Postlethwaite, the Toronto harbormaster, recently issued, the total number of vessels entering Toronto Harbor last year was 3,490, and 3,469 for 1900, an increase of 21, and the tonnage for this year being 1,203,593, and the year before 1,109,784 tons, a difference in last year's favor of 98,809 tons.

The cash receipts, including a balance of $10,446.11 carried forward from 1900, were $21,982.77. The expenditures were $15,-863.26, leaving a cash balance of $6,119.51. This is a falling-off from the year before, which was mainly owing to the reduction in the tolls.

During the season, 155,009 tons of anthracite and 28,822 tons of bituminous coal were received, in all being 183,831 tons, which is an increase of 19,025 tons over 1900. According to the Government returns, there were 421,488 tons of anthracite and 364,580 tons of bituminous coal, or a total of 786,058 tons, imported into Toronto last year, as compared with 761,-610 tons for 1900, an increase of 24 458 tons.

This was a poor fruit season, for in 1901 there were only 402,448 packages imported, as compared with 519,540 in 1900, a decline of 117,092 packages.

The following is a comparative statement of the goods brought in for the years 1900 and 1901 :

	1900.	1901.
General merchandise, tons	20,294	24,949
Coal, tons	164,806	183,831
Wood, cords	1,283	.....
Lake stone, toise	2,490	2,595
Fruit, in packages, barrels	5,285	1,795
" " crates	4,709	7,122
" " baskets	508,729	392,267
" " bags	725	821
Firebricks	473,700	46,600
Sheep, hogs and calves	155	.....
Horses, cattle and vehicles	122	93
Oil in bulk, barrels	25,000	23,783
Ice, tons	2,518	6,777

DAMAGED HER BOILERS.

Sandbach, Parker & Co., agents of the Canadian Mail Steamers, were advised by telegram on Monday, that the C. M. S. Orinoco, damage to whose boilers necessitated a delay at Barbados, sailed from Trinidad on Sunday, via the usual islands, for Halifax. The C. M. S. Oruro, which will be here this morning, brings the Orinoco's cargo for this port. — The Argosy, Georgetown, Demerara, January 1.

A CRACK-SHOT SALESMAN.

Among the callers on the wholesale hardware trade in Montreal this week was Mr. Parker, the representative of the Peters Cartridge Co., of Cincinnati, Ohio. Mr. Parker is a crack-shot, and among his methods of working up a reputation for his firm's firearms is by shooting with them at various matches. He has won many prizes.

CATALOGUES, BOOKLETS, ETC.

A SEED CATALOGUE.

THE annual seed catalogue of William Rennie, Toronto, has been issued. This house, which has been established in Toronto for a number of years, carries a full stock of vegetable, flour and grain seeds, and also full lines of dairy supplies, agricultural implements, fertilizers, etc. The catalogue and price list, which is freely illustrated with handsome wood cuts and has a beautifully colored cover, will be sent to any address on application, if you mention HARDWARE AND METAL.

A PAINT FIRM'S CATALOGUE.

A few moments spent in going over the latest 1902 catalogue of A. Ramsay & Son, paint makers, Montreal, is sufficient to reveal the full lines of white leads, colors ground in oil, dry colors, glass, artists' materials, glaziers' diamonds, etc., carried by this firm, who were first established in 1842. They also have always on hand a full stock of brushes and cutlery used in the painter's and glazier's business. Mention HARDWARE AND METAL when you write and you will be mailed a copy of this catalogue.

ROOFING AND CORNICE MANUAL.

"The Roofing, Cornice and Skylight Manual" is a book designed to be of service as a guide and reference, and a shop companion as well, to those following the business of tinsmiths, cornice makers and to young mechanics who are following any or all branches of trade comprehended in this volume. Three articles on as many subjects, "Tin Roofing," "Cornice Work" and "Skylight Construction," are included in it.

The first article, which includes the laying of flat and standing screw roofing, was especially prepared for the book by a first-rate mechanic. The second section forms an extensive treatise on cornice making and equipment adapted for country cornice shops. In the third section are given two articles on skylight design and construction, being the first and second-prize essays, respectively, of a series of competitive articles on the subject.

The book, which is freely illustrated by diagrams and plates, with 172 pages of reading matter, costs only $1.50, and will be sent by the publishers, The David Williams Co., 232–238 William street, New York, N. Y., on receipt of the above amount.

CONDENSED OR "WANT" ADVERTISEMENTS.

Advertisements under this heading, 2c. a word each insertion; cash in advance. Letters, figures, and abbreviations each count as one word in estimating cost.

SUNDAY WORK AT SYDNEY.

A petition is being signed at Sydney, C.B., and will be forwarded in a few days to the dieectors of The Dominion Iron and Steel Co., praying them to put a stop to all unnecessary Sunday work. This document alleges that at present the employes of the company are obliged to do a large amount of unnecessary work on Sundays, which is contrary to the laws of the Province.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, January 21, 1902.

HARDWARE.

BUSINESS, on the whole, is quite active. The spring trade has started in with a rush, and travellers, who are now on the road, are receiving many good orders for spring. These are principally on wire, building paper, cordage, harvest tools, bar iron, glass, paris green and fish lines. Both the English and German quotations show that the markets there are rather stiff. Milk-can trimmings are now quoted at 25 per cent. off, and milk cans, 40 per cent. off the list price. The minimum charge for packages upon milk-can trimmings has been fixed at 1½ per cent. of the net value of the milk-can trimmings on invoice.

BARB WIRE.—The market has considerably improved and there is now a good demand for spring delivery. We quote $3 per 100 lb. f.o.b. Montreal.

GALVANIZED WIRE.—Trade is only fair. Our quotations are as follows: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—There is a fairly good trade doing. Bright iron and annealed, Nos. 0 to 9, sell for $2.60 per 100 lb. f.o.b. Montreal, Toronto, Hamilton, London, St. John and Halifax. We quote extras as follows: No. 10, 6c.; No. 11, 12c.; No. 12, 20c.; No. 13, 30c.; No. 14, 40c.; No. 15, 55c.; No. 16, 70c.

FINE WIRE.—A moderate trade is doing. The discount is 22½ per cent.

SPRING WIRE.—A small demand exists. Spring wire is $1.25 extra.

COPPERED AND TINNED WIRE.—There is not much doing. We quote: Coppered, extra, is 60c.; tinned, $2 per 100 lb.

BRASS AND COPPER WIRE.—A slight improvement is noted, but trade is still quiet. The discount on both wires is 60 per cent.

FENCE STAPLES.—There is very little doing this week. We quote per 100-lb. keg, bright, $2.90; galvanized, $3.25.

WIRE NAILS.—Business in wire nails is somewhat more satisfactory, but the demand has not reached any proportions yet. Our quotations are as follows: $2.55 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—There has been a steady improvement this week. We quote: $2.35 per keg for small lots and $2.27½ for carlots. The discount on both flour-barrel nails and coopers' nails is 40 per cent.

HORSE NAILS.—Trade in this line is quiet. We quote: "C" brand at 50 and 7½ per cent. off and "M" brand at 60 per cent. off on oval and new city heads and 66 2-3 per cent. off for new countersunk heads.

HORSESHOES.—Trade is still very quiet. We quote as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—There is only a fair trade doing. Following are the discounts: Flat head bright, 87½ and 10 per cent. off list; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.

BOLTS.—The demand for bolts has been better this week, but still no great activity exists. We quote: Norway carriage bolts, 60 and 5 per cent.; common, 55 and 5 per cent.; full square carriage bolts, 60 and 5 per cent.;

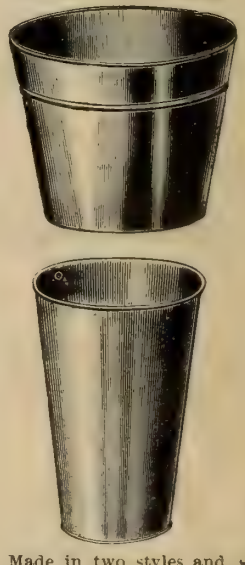
SAP PAILS AND SPILES WILL SOON BE NEEDED

And we are still selling our well-known lines improved and better than ever.

"EUREKA" Cast Iron Sap Spiles

In their different styles—and we carry **only** the **best**—are undoubtedly the best on the market.

Catch and conduct every drop of sap into pail.



Easily inserted and removed, without injury to tree or spile.

Will last indefinitely.

They are the quickest sellers—therefore the best money-makers for the Trade to handle.

We Ship Promptly.

GENERAL COMMERCIAL SOLICITORS.

machine bolts, 55 and 5 per cent.; coach screws, 70 per cent.; sleigh shoe bolts, 70 per cent.; blank bolts, 60 per cent.; bolt ends, 60 per cent.; plough bolts, 55 and 5 per cent.; tire bolts, 67½ per cent.; stove bolts, 67½ per cent. To any retailer an extra discount of 5 per cent. is allowed. Nuts, square, 3¾c. per lb. off list; hexagon nuts, 4c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—There is a good trade doing this week. We quote: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 55c. per roll; tarred fibre, 65c. per roll; O.K. and I.X.L., 70c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE.—Business in cordage has much improved and a good demand is experienced this week. There are no changes in prices. Our quotations are as follows: Manila, 16c.; British Manila at 13½c.; sisal, 12c. and lathyarn at 10½c. Manitoba prices are: Manila, 16c.; British manila, 14½c.; sisal, 13c. and lathyarn, 12c.

RIVETS AND BURRS.—Only a moderate trade is doing. Discounts are: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, 35 and 5 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—This is beginning to sell well and a number of orders are being booked for spring. The price is $1.25 per 100 square feet.

POULTRY NETTING.—A fair demand continues. Canadian or English is quoted at a discount of 60 per cent. off 2 x 2 mesh, 19 wire, and 55 per cent. off 2 x 2 mesh heavier, Canadian list.

HARVEST TOOLS.—An improvement is noted in the trade this week. A good demand now exists. The discount is 70 per cent.

FIREBRICKS.—This is about the same. There is a fair demand at the following prices: Scotch, $19 to $23.50, and English, $18.50 to $22.50 per 1,000.

CEMENT.—There is practically nothing doing. We quote: German cement, $2.30 to $2.40; English, $2.25 to $2.35; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American $2.20 to $2.30 ex-cars.

METALS.

Though trade on the whole is still quiet there is a better movement than a week ago. There is a better demand for bar iron and chain, and in the former prices are inclined to be stiffer.

PIG IRON.—There has been little improvement. We quote as follows: Summerlee, $21 to $21.50; Canadian, $18.50 to $19.

BAR IRON.—The demand is much improved and prices are becoming firmer. We quote: Merchants' bar, in carlots, $1.87½, and in small lots, $1.95. Horseshoe iron is worth $2.15 to $2.20.

BLACK SHEETS.—Trade remains quiet. We quote as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—In this there is but little doing. Our quotations are: No. 28, Queen's Head, $4.40; Apollo, 10¾

THE FRANCIS-FROST CO. Limited
TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

oz., $4.40 ; Comet, $4.25 with 10c. extra in less than case lots.

INGOT COPPER.—There is nothing new to report. Trade is fair. The price is 14½c.

INGOT TIN.—A moderate business is being done. Straits sell for 27c.

PIG LEAD.—A good trade is doing. We quote $3.15 to $3.20.

LEAD PIPE.—In this the demand does not amount to much. We quote 7½c. for composition waste, and 7c. for ordinary. The discount is 35 per cent.

IRON PIPE.—There is a good business doing in iron pipe, and prices are firm. We have revised our prices this week and now quote as follows : Black pipe, ¼, $2.75 per 100 feet ; ⅜, $2.75 ; ½, $3.15 ; ¾, $3.70 ; 1-inch, $5.25 ; 1¼, $7.10 ; 1½, $8.90 ; 2-inch, $12.25. Galvanized, ⅜, $3.55 ; ½, $4.15 ; ¾, $5.05 ; 1-inch, $7.25 ; 1¼, $10.10 ; 1½, $12.15 ; 2-inch, $16.55.

TINPLATES.—There is not much doing. We quote : Cokes at $3.75 to $4; charcoal, $4.25 to $4.50.

CANADA PLATE.—Trade remains quiet and prices unchanged. We quote as follows : 52's, $2.65 to $2.70 ; 60's, $2.75 to $2.80 ; 75's, $2.80 to $2.85 ; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL.—A moderate trade is doing. Jobbers are now obtaining $3 for machinery steel, in large quantities, an advance of 15c. Our quotations are as follows : Sleigh shoe, $2.05 ; tire, $2.15 ; bar, $2 ; spring, $2.85 ; machinery, $3.00, and toecalk, $2.60.

SHEET STEEL.—The market has not improved. Our quotations are : Nos. 10 to 20, $2.50 ; 3-16, $2.50 ; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—The demand for this is improving, but a small movement continues. We quote : Black Diamond at 8c.; Jessop's, 13c.

TERNE PLATES.—The trade is quiet. Prices are $7.75 to $8.

COIL CHAIN.—Business this week is good and prices have not changed. Our quotations are as follows : No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7¼c. per lb.; 5-16, $4.80 ; 5-16 exact, $5.25 ; ⅜, $4.25 ; 7-16, $4.05 ; ½, $3.85 ; 9-16, $3.75 ; ⅝, $3.55 ; ¾, $3.50 ; ⅞, $3.45 ; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—There is but little doing. We still quote $5.75 to $6.25.

ANTIMONY.—There is only a light movement. The price is 10c.

ZINC SPELTER.—The business in this line does not amount to much at present. We quote 5c.

SOLDER.—A fair trade is doing at steady prices. Bar solder is worth 18c. and wire solder, 20c.

PAINTS AND OILS.

The feature of this market is the advance in turpentine, there being a total gain of 7c. following the strong feeling in the primary markets. Prices are very firm, and turpentine is now so scarce that until the new crop comes in the market is altogether likely to continue strong. Further advances are looked for by some dealers. It is rumored, although it is early to take serious notice of it, that the new crop will be considerably lighter than last year. Linseed oil remains firm at unchanged prices. Paris green shows some activity and good orders are being booked this week. General goods are now beginning to move freely, and manufacturers are all busy. There are bright prospects for an early spring trade. We quote as follows :

WHITE LEAD.—Best brands, Government standard, $5.87½; No. 1, $5.50 ; No. 2 $5.12½ ; No. 3, $4.75 ; No. 4, $4.37½ all f.o.b. Montreal. Terms, 3 per cent. cash or four months.

DRY WHITE LEAD—$5.25 in casks ; kegs, $5.50.

DRY WHITE ZINC — Pure dry, 6¼c. ; No. 1, 5¼c. ; in oil, pure, 7¼c. ; No. 1, 6¼c. ; No. 2, 5¼c.

PUTTY — We quote : Bulk, in bbls., $1.90 per 100 lb. ; bulk, in less quantity, $2.05 ; bladders, in bbls., $2.25 ; bladders, in 100 or 200 lb. kegs or boxes, $2.40 ; in tins, $2.55 to $2.65 ; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL—Casks, 7c. ; 100 lb. kegs, 7¼c. ; smaller quantities, 8¼c.

RED LEAD — Genuine red lead in casks, $4.50 ; in 100-lb. kegs, $4.75 ; less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE—Ground, casks, 5c. ; less, 5½c. ; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL—Raw, 75c.; boiled, 78c. in 5 to 9 bbls., 1c. less, 10 to 20 bbl. lots open, net cash, plus 2c. for four months. Delivered anywhere in Ontario between Montreal and Oshawa at 2c. per gal. advance and freight allowed.

TURPENTINE.—Single bbls., 67c. ; 2 to 4 bbls., 66c. ; 5 bbls. and over, open terms.

SHELLAC VARNISH — Pure white, $2.35 to $2.45 ; orange, $2.25 to $2.35.

MIXED PAINTS—$1.20 to $1.45 per gal.

CASTOR OIL—8¾ to 9¼c. in wholesale lots, and ¼c. additional for small lots.

SEAL OIL—47½ to 49c.

COD OIL—32½ to 35c.

PARIS GREEN — Petroleum barrels, 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17¼c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

GLASS.

Glass is among the lines which has taken a turn for the better for spring delivery. A fairly good business is now doing at firm figures. We quote: First break, 50 feet, $2.10; second, $2.20 for 50 feet; first break, 100 feet, $4; second break, $4.20; third break, $4.70, and fourth break, $4.95.

SCRAP METALS.

Business is quiet, though the demand is a steady one. There are no changes in our quotations. We quote: Heavy copper and wire, 13½ to 14c. per lb.; light copper, 12 to 12½c.; heavy brass, 12 to 12½c.; heavy yellow, 9½c.; light brass, 6½c.; lead, 2⅝ to 2⅝c. per lb.; zinc, 2 to 2¼c.; iron, No. 1, wrought, $10 light brass, 6½c.; lead, 2½ to 2⅝c. per lb.; zinc, 2 to 2¼c.; iron, No. 1, wrought, $10 to $15 per gross ton f.o.b. Montreal; stove plate, $8 to $9; machinery scrap, $14; light iron, No. 2, $5 a ton; malleable and steel, $4; rags, country, 60 to 70c. per 100 lb.; old rubbers, 7 to 7¼c. per lb.

HIDES.

The market is quiet. We quote: No. 1 hides, 7½c.; No. 2, 6½c.; No. 3, 5½c. Sheepskins, 60c.

MARKET NOTES.

Turpentine has advanced to 67c. for single barrels and 66c. for 2 to 4 barrels.

Milk-can trimmings are now quoted at 25 per cent. off list, and milk cans at 40 per cent. off.

Machinery steel is 15c. higher, for large quantities, the price now being $3.

ONTARIO MARKETS.

Toronto, January 24, 1902.

HARDWARE.

BUSINESS in most lines of hardware is enjoying its usual January quietude. If anything, there is not as much doing as there was a week ago, and the shipping rooms are lacking in the evidences of activity. The quietness, however, is giving those who are engaged in stock-taking an opportunity of pushing their work to completion. Most of the business being done is still on spring-shipment account, and the outlook in this particular is rather satisfactory. Some orders are being received for cross-cut saws, screen doors and windows, harvest tools, spades and shovels, and green wire cloth. A good business is being done in dairy supplies, and on Wednesday and Thursday there was a big demand for snow shovels as a result of the heavy snow fall. Payments are, on the whole, fair.

BARB WIRE.—There is little or nothing doing. We quote as follows: F. o. b. Cleveland, $2.77½ for less than carlots, and $2.65 for carlots. From stock Toronto, $3.

GALVANIZED WIRE.—Dull and without change. We quote as follows: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—Practically nothing doing. Base price, $2.60 per 100 lb. Oiling, 10c.; coppering, 60c., and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

WIRE NAILS.—A little sorting-up business is being done and an occasional order for future delivery is being received, but trade, on the whole, is dull. We quote $2.55 for less than carlots, and $2.50 for carlots. Delivery points, Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—Business is still limited. We quote base price $2.35 per keg with 7½c. allowance on carlots.

HORSE NAILS.—Business is quiet. The discounts are as follows: "C" brand, oval head, 50 and 7½ per cent., and on "M" and other brands, 50, 10 and 5 per cent. Countersunk head 60 per cent. All the manufacturers are now understood to be selling off the same list.

HORSESHOES.—Not a great deal is being done. We quote f.o.b. Toronto as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

SCREWS.—Business is moderate. The discounts are as follows: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.

RIVETS AND BURRS.—Business is keeping up fairly well. We quote: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets and burrs, 25 and 5 per cent.

BOLTS AND NUTS.—The demand continues active. We quote as follows: Carriage bolts, common ($1 list), 55 and 5 per cent.; carriage bolts, full square ($2.40 list), 60 and 5 per cent.; carriage bolts, Norway iron ($3 list), 60 and 5 per cent.; machine bolts, all sizes, 55 and 5 per cent.; coach screws, 70 per cent.

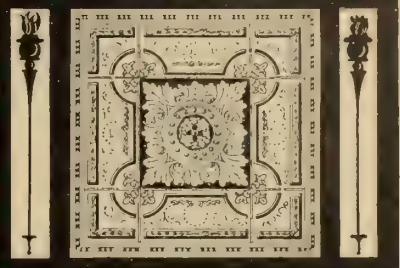
ROPE.—Business is seasonably quiet. We quote as follows: Pure manila, 16c.; British manila, 13½c.; sisal, 12c.

CUTLERY.—Certain makes of English cutlery are scarce, the manufacturers being unable to keep up with their orders. The demand on retail account is light.

SPORTING GOODS.—An occasional rifle and gun is wanted and there is some demand for ammunition and shot. A limited quantity of skates and hockey sticks have gone out during the week.

DAIRY SUPPLIES.—The demand continues good for milk-can trimmings, and the discount is unchanged at 25 per cent.

SCREEN DOORS AND WINDOWS.—Some business is still being done on future account. Common doors, 2 or 3 panel, are quoted as follows: Walnut, stained, 3-inch style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-inch style, 20c. extra per dozen f.o.b. factory point; f.o.b. Montreal and Ottawa prices are 30c. per dozen advance on above figures.



HARVEST TOOLS.—A few orders have been received during the past week, but the country is now pretty well supplied. Discount is 70 per cent.

SPADES AND SHOVELS.—There is a small but steady demand from stock and some business on future account is still being done. Discount 40 and 5 per cent.

CEMENT.—A very promising number of inquiries have been made for cement and it looks as if trade from now on will continue to improve. We are quoting: Canadian Portland, Rathbun's "Star," $2.25 to $2.65; "Beaver," $2.10 to $2.50; "Ensign," $1.90 to $2.30; German, $3.15; English, $3; Belgian, $2.50 to $2.75; Canadian hydraulic, $1.25 to $1.50 per bbl.

OUR METALLIC CEILINGS AND WALLS

Are both artistic and serviceable. Popularly used by practical people everywhere.

Easily applied—most moderate in cost—fire-proof, sanitary and wonderfully durable—with countless designs to select from.

Write us for booklet telling all about them.

METALLIC ROOFING CO., Limited

Wholesale Mfrs. TORONTO, CANADA.

METALS.

Iron and steel continue steady in price. Tin and copper are weak and lower in price. Business in metals generally is fairly good.

PIG IRON—There is nothing particularly new in the situation. There is not a large business being done, but prices rule steady. We quote: Canadian pig iron at $17.50 to $18 on track Toronto for No. 2 foundry.

BAR IRON—Demand keeps brisk and prices firm. Base price $1.95 to $2.05. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

STEEL—There is a good demand for machinery steel, and prices rule firm. We

quote as follows: Merchantable cast steel, 9 to 15c. per lb.; drill steel, 8 to 10c. per lb.; "BC" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe-calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2.25; reeled machinery steel, $3, hoop steel, $3.10.

BLACK SHEETS—The demand is good and there is a fair supply. We quote: Common, $3.15 for 28 gauge; and dead flat, $2.50 for 26 gauge.

CANADA PLATES—A few small sorting-up orders have been received during the week, but the demand is not active. We quote: All dull, $3 00; half polished, $3.10; all bright, $3.75.

GALVANIZED SHEETS — For this time of the year the demand is good. We quote as follows: "Queen's Head" brand at $4.50 in case lots, and $4 65 in less quantities.

TIN—The market is weak and irregular. In London on January 22 prices dropped £2 5s. and closed weak, and in New York there was a decline of 50 points on the same day. Locally there has been quite a little trading in small lots, and quotations are 1c. lower, being $28 to $29 per 100 lb.

TINPLATES—There is a good demand for this time of the year, and it is thought that prices have about reached the bottom. Our quotations on coke plates are 25c. lower, I C, usual sizes, now being $4 per box.

TINNED SHEETS — Trade is fair. We quote as follows: 72 x 30, up to 24 gauge, 7½c.; ditto, up to 26 gauge, 8c.

TERNE PLATES—Quiet. We still quote: I C, 20 x 28 gauge, at $8 50.

COPPER — Local quotations show a decline in both ingot and sheet copper. Ingot is now down to $14 per 100 lb., and plain sheets are quoted at $22 to $23. The idea for tinned copper sheets is $24 per 100 lb. In London on Wednesday prices closed 10s. lower on both spot and futures and was attributed to free selling, particularly of futures. New York was quiet and steady at 11c.

BRASS—The demand shows some improvement, and a fair business is being done. The discount has been increased, now being 15 per cent.

SOLDER—Business is brisk. We quote: Half-and-half, guaranteed, 19c.; do. commercial, 18½c.; refined, 18c.; wiping, 17½c.

LEAD—The demand is good. We quote: $3.50 to $3 75 for pig lead and $5 for bar.

IRON PIPE — Business is fairly good. We quote: Black pipe, $5.40 for 1-inch.; galvanized, $7.95 for 1-inch.

ZINC SPELTER—Trade is quiet at $5.50 to $6 per 100 lb.

ZINC SHEET—There is a fair movement in small lots. We quote $6 to $6.25 in casks and part casks.

ANTIMONY—The demand is good at 10c. per lb.

PAINTS AND OILS.

There has sprung up quite an active inquiry for raw and boiled linseed oil, while white leads continue quite active. Sealed can paints have hardly yet commenced to move, although some orders are being booked for later delivery. Dry colors are quiet, while shellacs remain very firm. The travellers are all out but are storm staid this week. The most noticeable feature is the advance in turpentine, which has gone up 7c. per gal. this last week. The other prices are unchanged. We quote:

WHITE LEAD—Ex Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2. $5.12½; No. 3. $4.75; No. 4, $4.37½ in pkgs. of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb. $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.

BENZINE—In barrel lots, 16½c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING — 65c. per 100 lb.; Gilders' whiting, 80c.

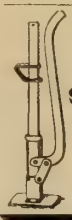
GUM SHELLAC — In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2 25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY —Bladders, in bbls., $2.25; bladders, in 100 lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE — Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots, and 8c. in bbls.



LIQUID PAINTS—Pure, $1.20 to $1.30 per gal.

CASTOR OIL — English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 4 barrels, 77c.; boiled, 80c.; 5 to 9 barrels, raw, 76c.; boiled, 79c., delivered. To Toronto, Hamilton and London, 2c. less.

TURPENTINE—Single barrels, 68c.; 2 to 4 barrels, 67c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra

PULLMAN SASH BALANCE CO.,
ROCHESTER, N.Y., U.S.A.

will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

There is a greatly improved demand for glass, both locally and for outside points. Prices are unchanged. We quote as follows: Under 26 in., $4.25; 26 to 40 in., $4.65; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5.75; 71 to 80, $6.25; 81 to 85, $7; 86 to 90, $7.75; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days.

OLD MATERIAL.

The market is still very unsettled. Prices on coppers have not apparently yet reached their bottom figures, for there has been a decline of 1c. in heavy copper, 2c. in new light scrap copper, ½c. in bottoms, 2c. in coil wire, 1c. in light brass, ½c. in heavy yellow brass and 1½c. in heavy red brass, all owing to the further slump in the copper markets in the United States. We now are quoting: Agricultural, 60c. per cwt.; machinery cast, 60c.; heavy copper, 10c. per lb.; stove cast, 40c.; No. 1 wrought, 50c. per 100 lb.; new light scrap copper, 7c. per lb.; bottoms, 7½c.; coil wire, 10c.; light brass, 5c.; heavy yellow brass, 7½c.; heavy red brass, 8c.; scrap lead, 2¼c.; zinc, 2c.; scrap rubber, 6c.; good country mixed rags, 50 to 60c.; clean dry bones, 40 to 45c. per 100 lb.

HIDES, SKINS AND WOOL.

Trade is steady with nominal prices. We quote what is paid by buyers on arrival:

HIDES—We quote: No. 1, green, 7½c.; No. 2 green, 6½c.; No. 1 green, steers, 8c.; No. 2 green, steers, 7c.; cured, 7¾ to 8¼c.

SKINS—We quote: No. 1 calfskins, 9c.; and No. 2, 7c.; deacons (dairies) 55 to 60c. each; sheepskins, 65 to 75c.; deerskins, 12½ to 14c. per lb.

WOOL—We quote: Fleece, 13c., and unwashed, 7 to 8c. per lb.

SEEDS.

The foreign demand still drags, but the offerings have been very light owing to the unfavorable weather. Prices are somewhat weaker, red clover and alsike being 25c. cheaper. We quote prices paid at outside points: Red clover, $4.75 to $5.15; alsike, $6.25 to $8 25, and timothy, $2.50 to $3.25 per bush.

PETROLEUM.

Trade is active in this line and prices are steady. We quote: Pratt's Astral, 16½ to 17c. in bulk (barrels, extra); American water white, 17 to 17½c. in barrels; Photogene, 16½ to 17c.; Sarnia water white, 16 to 16½c. in barrels; Sarnia prime white, 14½ to 15c. in barrels.

THE JOHN MORROW MACHINE SCREW COMPANY, Limited

Manufacturers of

Set and Cap Screws, Special Milled Work, Engine Studs, Etc. Cold Punched Nuts of every variety of finish.

INGERSOLL, ONT.

COAL.

There is an active demand for coal and coke, but a limited supply, cars enough still being lacking. Prices are firm. We quote at international bridges: Grate, $4.75 per gross ton; egg, stove and nut, $5 per gross ton; soft coal, $2.50 to $3.25 in bond, according to grade.

MARKET NOTES.

Coke plates are 25c. lower.

Tin is quoted lower at $28 to $29.

Quotations are lower on both ingot and sheet copper.

The discount on brass has been increased to 15 per cent.

Turpentine has advanced 7c. per gallon since last week.

In old material, there has been a number of changes, the unsettled condition of the United States copper market pulling down the price of heavy copper 1c.; new light scrap copper, 2c.; bottoms, ½c.; coil wire, 2c.; light brass, 1c.; heavy yellow brass, ½c., and heavy red brass, 1½c. per lb.

The merchants of Amherst are closing their places of business every week night except Saturday, during January and February, at 6 o'clock.

TRADE CHAT.

ON the eve of his departure for the West, W. O. Lott, ex-secretary-treasurer of the Mowat Hardware Co., Limited, Trenton, Ont., addressed a letter through The Trenton Advocate thanking his numerous friends for their past favors and patronage.

Singleton Bros., tinsmiths, of Carleton Place, Ont., have dissolved partnership, W. R. Singleton continuing.

The tender of $17,500 made by The Canadian General Electric Co. for the assets of The Diamond Machine and Screw Co., Limited, Toronto, which is in liquidation, has been accepted by the Master-in-Ordinary.

F. F. Quinn, of the firm of Geo. Stephens, Quinn & Douglas, hardware merchants, Chatham, Ont., has retired from the business, which will be continued by Stephens & Douglas.

On the ground that it is insolvent within the meaning of the Dominion Winding-Up Act, it was moved before Chief Justice Meredith, on January 20, that an order be granted winding up the Niagara Metallic Furniture Co. If the parties cannot agree on an interim liquidator, Chief Justice Meredith will name one.

NOVA SCOTIA MARKETS.

Halifax, January 20, 1902.

BUSINESS is fairly good in the hardware line, and dealers are looking forward to a good year's trade. For this reason the wholesalers are giving heavy orders in anticipation. Another inducement to order early is that spring delivery may be prompt, as all the manufacturers are now very busy and hard pressed to get out the orders already booked.

* * *

On the whole, the market conditions are firm, and, prices being generally at as low a record as expected, jobbers and retailers have no hesitation in making their stocks as complete as possible. The firmness of the iron and steel market in general gives the idea that there will be little, if any, reduction in prices.

* * *

Travellers are sending in numerous orders, which, if small, swell the general aggregate. This is especially so of the Cape Breton districts, where the activity in the Sydneys, resulting from the iron and steel plants, has been a great factor in increasing Halifax trade. The railroad building, which has been going on there for the last year, and will continue more extensively next summer, will make Port Hood, Port Hastings, Broad Cove, St. Peters and other points from there to Louisburg a great field for builders' supplies. Many Halifax firms have already large connections in this district, and their hustling travellers will see that their trade is held and increased.

* * *

A meeting of the Maritime Provinces hardwaremen took place at Truro on January 16. but they are very reticent as to the business transacted. In fact, the delegates are as close as oysters. Those present were: Ed. A. Everett, T. McAvity, T. C. Lee, H. A. Coates, B. J. Morris and R. B. Emerson, of St. John; G. S. Troops, P. Simmonds, W. B. Arthur, R. F. Stevens, A. M. Bell and G. H. Richards, of Halifax.

* * *

The first of the year announced a change in the well-known hardware firm of H. H. Fuller & Co., in the admission of George H. Richards and W. H. Sterns as members of the firm, both of whom have been long connected with the business. The former entered the business as a boy some 20 years ago; the latter had been bookkeeper for the firm for some 10 years. Both are cases of strict integrity combined with business ability receiving the reward which they merit.

* * *

The travelers in Cape Breton and along the South Shore are always bringing in some new story off the road. The latest going the rounds is to the effect that one morning the landlord asked his latest guest, a traveller, how he had slept during the night, and if his bed was comfortable? The drummer replied that the bed was comfortable, but that he had not slept, as he was troubled with insomnia. The landlord was mad; he called the drummer a pupil of Ananias; he wanted to put him out, and finally offered to give the drummer $5 for every one of "them bugs" he could find in the bed. These drummers are queer chaps. They either meet with some strange experiences, or else they have fertile imaginations.

R. C. H.

SUPPORTING THE I. B. & O. R. EXTENSION.

THE Lindsay Board of Trade, at a well-attended meeting on January 16, discussed a communication from L B. Howland, general manager of the Irondale, Bancroft and Ottawa Railway.

This communication informed the board that the above mentioned railway company have finally succeeded in securing financial backing from a prominent trust company in New York, and now were ready to complete their line, which had already been built from Kinmount on the G. T. R. to a point near Bancroft, Ont., by extending it from the latter point to a place at or near Coldwell Station on the Canadian Atlantic Railway, a distance of 60 miles from the end of the completed line. To insure this extension a 60-mile grant is required from the Dominion and a 45-mile grant from the Ontario Government, the latter having already subsidized 15 miles. As some difficulty was expected in the attainment of this, the support by strong and influential resolutions of the Lindsay Board of Trade was asked.

Mr. Howland also appeared before that board and pointed out, by the aid of maps, that the new line would tap the famous corundum mining region, would lead to the development of the fine water-power on the Madawaska river, and extend through Lindsay. Trade, consequently, would be greatly attracted in that direction, and the assistance of the board would very much help in the attainment of that object.

After considerable discussion, a committee, consisting of President J. D. Flavelle, R. J. McLaughlin, C. D. Barr, Wm. Steers and Secretary Sootheran, was appointed to draft memorials to be presented to the Dominion and Ontario Governments asking that subsidies be granted for the proposed extension.

"GLORIA" BULB LIGHTS

ALL GOOD THINGS ARE IMITATED

The "Gloria" Light, owing to its remarkable brilliancy and durability, has established itself among the retail hardware merchants as the cheapest and best value that can be offered to their customers to-day.

The increasing demand for the "Gloria" Triple Weave Mantle and its improved features over the Single Weave Mantles convinces merchants that without it they are losing trade.

The "Gloria" Triple Weave Mantle is of our own manufacture. We also carry full line of Incandescent Gas Supplies, and would be pleased to send you Price List.

MANITOBA MARKETS.

WINNIPEG, January 20, 1902.

EVERYTHING now points to a brisk spring trade, that will probably open earlier than usual. There have been quite a number of changes made in the price lists for the week. Steel churns have been advanced, the discount being now 50 per cent. instead of 55. T and strap hinges are lower by 25c. Cut nails are lower by 15c. and wire nails 30c. On the other hand, manila rope has been advanced 50c. per cwt. Paints and oils are very quiet, as is usual at this season, and the only change to note is a drop of 2c. per gal. on linseed oils.

Price list for the week is as follows :

NOTES.

Geo. W. Erb, Western manager for The Waterous Engine Works Co., has left for an extended eastern trip, combining business with pleasure.

A recent number of The Manitoba Gazette contains notice of the issue of letters patent to The Winnipeg Machinery Co. The capital is $40,000.

R. S. Cochrane, Western representative of The J. B. Armstrong Manufacturing Co., leaves to day for an extended trip to Western and Coast points, and will be absent about six weeks.

This season 175,000 tons of ore have been shipped from Wabana, N.S., to Rotterdam, Holland, by The Nova Scotia Steel and Coal Co.

THE PAINTERS PERFECT WHITE LEAD

is beautifully soft and fine in the grain. It mixes well with Linseed Oil, forming a creamy smooth paint of great covering power and undoubted durability. Every atom is paint — perfect paint — and there is no loss or residue of any kind. The Painters Perfect White Lead has become very popular everywhere. Book early to ensure early shipment.

THE CANADA PAINT COMPANY LIMITED

Montreal and Toronto.

HEATING AND PLUMBING

BUILDING PERMITS IN TORONTO.

OF course, building operations cannot be expected to be so brisk in mid-winter as in other times of the year, still a considerable number of buildings are being erected in Toronto. Since last Thursday the following permits have been taken out from the Toronto City Commissioner's office: Wm. Clark, for a pair of brick semi-detached two-storey and attic dwellings on Shaw street, to cost $2,300; W. J. McRea, for a pair of semi-detached two storey and attic brick residences on Withrow avenue, to cost $6,000; The Fairles Milling Co., for the erection of a one-storey brick store on Dundas street, to cost $2,000; Joseph Henderson, for a pair of semi detached two storey and attic brick dwellings on the corner of Maple avenue and Glen Road, to cost $8,500; Buckenden Bros., for six attached, two-storey brick-fronted dwellings with roughcast sides and rear on Logan avenue, to cost $4,800; The Standard Chemical Co., for a one-storey wooden shed, covered with galvanized non-corrosive iron, on Spadina avenue, to cost $100; S. McCord, for a two-storey brick stable in rear of 696 Queen street east, to cost $450; the Dominion Government, for brick and stone alterations to the armouries, on University avenue, to cost $2,000; John C. Green, for inside alterations of wood and glass to his store at 56 Bay street, to cost $400; Joseph P. Cameron, for a one-storey brick addition to his factory in rear of 486 Yonge street, to cost $300; Miss Hannah Thomas, for a pair of semi-detached two-storey and attic brick dwellings on Lindsay avenue, to cost $3,500, and Andrew Nelson, for two pair of two-storey and attic brick dwellings at 27-33 Lansdowne avenue, to cost $10,000.

A HANDSOME NEW BUILDING FOR MONTREAL.

During the coming year a handsome new building of Indiana limestone, four storeys in height, is to be erected by R. J. Indes, on St. Catherine street west, Montreal. The plans call for a structure of the style known as French renaissance, the front to be relieved by elaborate stone carvings, and the whole enriched by a medallion cornice of the same material as the main body of the building. To the main part of the structure will be a fine entrance, with a tile floor and marble base, in the rear of which will be the main staircase and a passage elevator with an iron enclosure. There will be two large stores on the ground floor, the chief of which will be finished throughout in quarter oak, with tapestry fabric on the wall, and a heavy oak ceiling. A leading feature will be an oak mantel-piece, richly carved and set out with solid bronze panels and marble. The upper floors of the new block will be laid out in business offices, and the top will serve as a clubroom or a studio.

PLUMBING AND HEATING CONTRACTS.

The John Ritchie Plumbing and Heating Co., Limited, Toronto, have secured the contract for the remodelling of the plumbing and heating appliances of a residence on 15 St. Patrick street, Toronto, for F. W. Varey.

SOME BUILDING NOTES.

M. Packenham will build a new factory and store at Dresden, Ont.

It is reported that W. Renfound will also erect a new brick block at Dresden.

Several warehouses for storing wheat and grain have been erected at Qu'Appelle, N.W.T.

John Fost will immediately commence work on the erection of a new brick residence at Dresden, Ont.

Tenders for the residence of S. G. Shaw, Chatham, Ont., have been opened, and the contracts will soon be awarded.

At Crofton, B.C., contracts have just been let for the erection of a new frame two storey hotel having accommodation for 75 guests.

Henderson & Dorner are preparing material for the construction of their new hotel at Maple Creek, near Medicine Hat, N.W.T.

At Rapid City, Man., it is proposed to submit a by-law to the ratepayers authorizing the borrowing of $8,000 for the construction of a new four-roomed brick schoolhouse.

TENDERS FOR EXHIBITION BUILDINGS.

In connection with the proposed new Exhibition buildings at Toronto it is announced that Gouinlock & Taylor have been invited to tender for the Main Building for $106,000; Beaumont Jarvis for the Art Gallery for $10,000 and Grey & Gregg for the Dairy Building to cost $14,000. These tenders are now before the Parks and Exhibition Committee of the Toronto City Council.

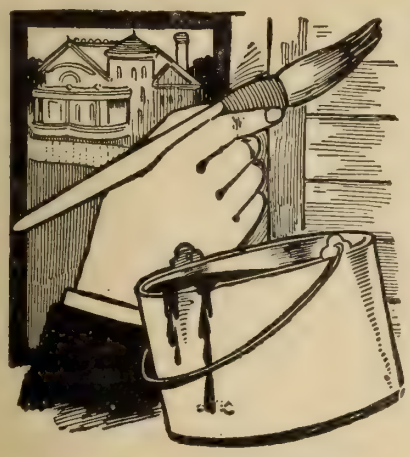
SEWAGE EXPERIMENTAL STATION.

ON January 22, a deputation consisting of representatives from many important towns and cities of Ontario waited on the Provincial Government with a request that an experimental station might be established to ascertain how sewage might be disposed of to the best advantage.

The deputation, which was introduced by L. J. Breithaupt, M.P.P., consisted of Mayor Eden, Ald. Krauz, Ald. Honsberger and Mr. George Laing, Berlin; Mayor Wood and Ald. Leitch, Brantford; Mayor Stamp and Ald. Savage, Stratford; Mayor Mearnes and Dr. Rice, Woodstock; Mayor Kennedy and Ald. Barber, Guelph; Mayor Watson, Listowel; Mayor Ingle and Ald. Burrows, Lindsay; Mayor Hawk and Ald. Jaffray, Galt.

It was pointed out that many towns had found this problem very difficult to deal with, as many places found difficulty in disposing of the sewage so as to prevent disease and the creation of nuisances in their vicinity. Mayor Stamp explained the method they have in use at Stratford, known as the septic tank system, which had given them general satisfaction. The representatives from other towns quoted cases where their municipalities had gotten into trouble through the pollution of streams and other means. Tanneries and pork factories have always found it very difficult to dispose of their sewage.

The deputation approved of a suggestion made by Ald. Jaffray, of Galt, which was for the Government to appoint an engineer to consult on such matters with local engineers.

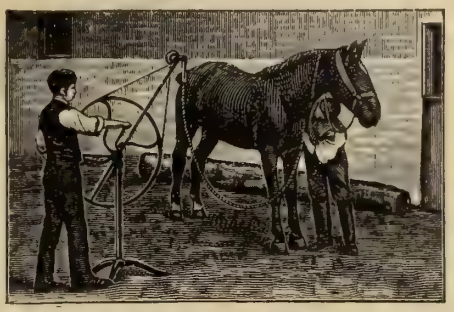


The Premier said that this was a very important subject, and a solution of this problem might be found by seeking abroad or experimenting at home. The subject was of such importance as to warrant discussion with his colleagues, and he thought that they might find their way clear to assist Berlin or some other town in making experiments. The septic system was cheap and they all seemed to have confidence in it. He will make an announcement of his course in a week or so.

GARBAGE DESTRUCTOR RECOMMENDED.

In his first fortnightly report for 1902, Engineer Rust recommended to the Toronto City Council the construction of a small destructor at the Island, the cost of which will be about $2,000. This would do away with the present unsatisfactory and unsanitary methods now in vogue, concerning which many complaints have been made. He thinks it advisable that an interim appropriation should be made at once, so that the building will be ready by May 1.

PREPARING FOR PAINT BUSINESS?



We are—so should you! It's going to be a big one in '02 and there's going to be money in it, too. There will be money in it if you get the paint that coaxes money out. **RAMSAYS PAINT** will enable you to get your slice of that 1902 rush for paint, because it is a paint to coax the money out—well advertised—nicely put—neat selling cards—pretty colors—everybody knows it—known it for years. **RAMSAYS PAINT** goes on to stay on, to establish a reputation for you, for us, for everybody using it. We can send you a booklet telling all about it if you wish, or our travellers will run to talk with you if you say so. **RAMSAYS PAINT** is for business, reputation and money.

BUSINESS FOR MARCONI.

The man in the moon
Will want to know soon
Where he can buy **ALABASTINE,**
Marconi will say
It is made in Paris, Canada,
And is the wall-coating everlasting.

That dealers on earth
Know its great worth
And stock it from Maine to Alaska,
There is no nonsense, they tell,
The only wall-coating that will sell
Is the beautiful and durable **ALABASTINE.**

The point that we wish to impress on the trade is, that Marconi is a great man, and that **ALABASTINE** is great goods—both just now are being extensively advertised.

ALABASTINE is going to sell, and we hope for Marconi—Well?
That his experiments will succeed,
And he be a benefactor indeed,
As was the man, who, in the wall-decorating line,
Invented, developed and manufactured
CHURCH'S COLD WATER ALABASTINE.

The trade supplied by Wholesale Hardware and Paint Dealers. Also by
THE ALABASTINE CO. LIMITED, PARIS, ONT.

THE YEAR OF 1901 IN THE KLONDYKE.

By James Harold Thompson.

IT is the history of a "Placer Mining Camp" that its life is short and eventful, while it lasts, and that it springs rocket-like into prominence and sinks gradually after having reached its years of plenty into a thing of the past.

The Klondyke has reached the crucial year of its existence. "For hope's sake" many have continued their confidence in the future of Dawson; the hub of which has been the richest placer-mining camp of this and possibly any other decade. The hope of those interested in commercial enterprises along the Canadian Yukon is the discovery of quartz in paying quantities.

As to the future of the mining district which in 1897 so startled the world and which since then has been such an abundant gold producer, known as the Klondyke mining district of the Northwest Territory of Canada, its future depends upon the discovery of well-placed quartz. It is acknowledged by the conservative knowing ones that the days of big profits in mining and commercial enterprises are past and are only present now in reminiscence. Overland and water navigation from the coast, with its difficulties, are now subject to modern systems of railroad and steamboat transportation, and when the Arctic winter has put its seal upon this northern country, the telegraph daily voices the events of the world in Dawson.

Heretofore merchants and tradesmen reaped big harvests, 100 per cent. being not an uncommon profit. Yet, it was seldom that capital profited its owner more than once a year because of navigation and railroad facilities. The short season beginning in June and ending in October, coupled with the lack of telegraphic communication, allowed time for but one shipment during the year. As a consequence the necessities of life were ofttimes cornered and prices in some instances reached prodigious heights. As competition became a factor many of the larger commercial enterprises drew together and amalgamated their interests. Two companies now control the market. In every department of mercantilism competition is keen, excepting in one which is a very essential one here. That one is the oil trade. The Standard Oil Company has complete control, and it retails a case of kerosene at $12.50 per case. The same case of oil sells for from $2 to $3 in the States. Merchandise is delivered in Dawson for from $70 to $90 per ton, just about half of what it was in 1899. And yet this price is deemed abnormal by the importers and a strenuous effort is being made to have it reduced to $50 per ton. The cost of mining has been cheapened by the use of steam and machinery, enlarging the yearly output of gold much over what it would have been under the crude methods of the "sour dough."

Government regulations have somewhat hampered the prospector, but withal he has been quite vigilant and has as yet discovered nothing since 1898 to perpetuate the reputation the Klondyke has had as a gold producer. Claims upon the banner creeks whose reputations as gold mines have equaled the wildest hopes of the pioneer-prospector are gradually being deserted and to-day half, I might say two-thirds, of Eldorado Creek has been worked out. The same is true of the other rich spots of a few years past. The life of the camp, from what is in sight, can be estimated at this date.

Prospecting for quartz is occupying the attention of many hard-rock miners along the Yukon and its tributaries. Upon the successful solution of the quartz question depends the present prominence of Dawson as a mining camp, and it is the one thing talked of and hoped for by the present inhabitants of this district. As yet nothing of any permanent value has been discovered, although many of the numberless claims staked and recorded are being worked quite thoroughly. Companies have been formed and their stock is on the market. Their hope is that the present prospects will lead to the substantial vein, or the "Mother Lode," as it is called. To facilitate the sorting, handling and assaying of these prospects two fine stamp mills have been erected in Dawson and are now crushing quartz rock.

Prior to the discovery of the Klondyke district it was found practical to thaw the frozen earth to almost any depth by the use of wood fires. Hence as the gold lies in or above the bed rock ground, when the bed rock was 100 feet below the surface it could be worked as well as that of 25 feet. The winter season being the longest and dryest season it became the busy season for the miner. But steam and machinery have reversed this order of things, and as in the days of the oldest "sour-dough" miner, summer, although the season is but six months long, has become the time of activity. The majority of heavy operators discontinue altogether the operation of their properties and spend the winter months at their ancestral homes, wherever they may be. As a consequence, the work accomplished this winter will not compare at all favorably with that done during the preceding winters. It also means a busy summer season for 1902. Considering those changes, the consenus of opinion of those conversant with this district is that the output of gold will decrease from this year.

Gold mining will continue here for some time. This is the history of similar camps. Capital will gradually withdraw, and individuals who will be content with wages for their labor will work the old workings. These are known as "snipers" in the vernacular of the miner.

The development of the unknown resources of the vast land known as Alaska and the Northwest Territory should be of constant interest to the farmer, merchant and manufacturer of the United States and Canada. Directly and indirectly it is of vital importance to these mother countries. The actual necessities of the man living next door, too, and within the Arctic circle will support a larger portion of labor than the similar necessities of any individual living in any other portion of the globe. Good, pure food; plenty of it; abundance of well-made clothing are absolute necessities for the health and preservation of life in this cold climate. If peopled as it should be, were the resources of this vast territory opened up in a limited degree, the commercial world of the North-American continent would have a market open to their products which would be the surest in times of depression, the most profitable and congenial for the absorption of the congested material.

Experiments have proved that the hardier cereals and vegetables can be successfully raised within the Arctic circle, but the season is so short that competition in this line will not become a factor for many years, The advent in the manufacturing line, factories, etc., is not to be considered. Beef has thus far come from the Western States and British Columbia, and the winters are found too severe for stock-raising.

Legislation can greatly facilitate the work of those who are destined to develop and pioneer the many industries which will some day flourish here.—Scientific American.

WAREHOUSES AT WINNIPEG AND VANCOUVER.

The Francis-Frost Co., Limited, Toronto, has made wonderful strides in placing its "Ark" Brand Paint. Last fall they established a warehouse in Vancouver, and thus relieved the Toronto house of the Coast trade. Later, they were compelled to seek larger premises at headquarters, in order to cope with the Ontario trade, and now they have found it necessary to place a warehouse in Winnipeg to meet the steadily-increasing demand in Manitoba and the Territories.

As Hardware and Metal noted a couple of weeks ago, The Francis-Frost Co., Limited, Toronto, has recently issued a handsome catalogue.

WE have the nicest set of Hose samples ever shown to the Canadian trade. Don't fail to see them.

HOSE

GARDEN STEAM SUCTION ETC.

Send for samples and quotations.

WE make Hose of all kinds for all purposes. Our equipment is the most modern and our goods are perfection.

DECLINE IN U.S. PIG IRON OUTPUT.

THE last week's issue of The Iron Age, in discussing the number of blast furnaces in operation, says: "The furnace capacity working on January 1 reflects to some extent the troubles which have beset the managers during the last two months of the year. Quite a number of stacks have been blown out, and others have been banked again and again during December. Stocks of anthracite and coke iron show little change so far as the total is concerned. This is due to the fact that some of the makers have been unable to ship their current make, and, in some cases, notably in the South, have accumulated some iron. It is probable that if figures were available for consumers' stocks a considerable absorption of iron would be shown.

"The weekly capacity of the furnaces in blast on January 1 compares as follows with that of the preceding periods:

	Furnaces in Blast	Capacity Per Week. Gross Tons.
January 1, 1902	264	298,460
December 1, 1901	266	324,761
November 1	259	320,824
October 1	246	307,982
September 1	235	299,861
August 1	257	333,847
July 1	249	310,950
June 1	252	3.4,505
May 1	256	301,115
April 1	250	295,676
March 1	248	292,899
February 1	245	278 258
January 1	233	250,351
December 1, 1900	211	248,846

"The position of furnace stocks, sold and unsold, as reported to us, was as below on January 1, as compared with the five preceding months, the same furnaces being represented as in former months. This does not include the holdings of the steel works producing their own iron.

Stocks.	Aug. 1.	Sept 1.	Oct. 1.
Anthracite and coke	328,787	318,069	299,824
Charcoal	58,542	62,005	61,769

Charcoal	50,162	42,441	36,144
Totals	273,251	223,462	216.137

GOING TO CHINA.

W. P. Millar, manager of the stove and furnace department of The James Smart Manufacturing Co., Brockville, since August 1895, has resigned to accept the position of superintedent of agencies for the China Mutual Insurance Co., of Shanghai, China. Mr. Millar expects to leave Brockville about February 15, but his family will remain there for a time at least. The Brockville Recorder says: "Mr. Millar's departure from Brockville will be regretted by a large circle of friends formed during the time of his residence here, but who will join The Recorder in congratulating him on his appointment to such an important and lucrative position, and wishing him all success in his new sphere."

THE FIRST IRON VESSEL IN GREAT BRITAIN.

By Ansley Irvine.

IT is interesting to note that it was as early as the year 1809 that Robert Dickenson, the eminent inventor, first suggested to the Admiralty a scheme by which the old wooden ships of the Royal Navy were to be gradually replaced by vessels built of iron, and thus make the English fleet incomparably stronger than any combination that could be brought together by foreign nations.

The proposed innovation was promised due consideration, and, in 1830, 21 years afterwards, the conclusion arrived at by the Admiralty was that iron vessels would be practically useless in the line of action and totally unmanageable in a storm! Absurd as the assertion now appears, it was, nevertheless, ardently supported by Dr. Lardner, a scientific authority, who said the idea was perfectly chimerical, and that there was about as much chance of an iron boat reaching New York as there was of its voyage to the moon.

A fierce storm of invective and derision was waged against all who had the temerity to hold an opinion contrary to the Admiralty and their "scientific" supporters. But Thomas Wilson, a young Scotch boat-builder, ignored the bigoted opposition, and, in 1816, commenced to build a boat of iron at Fasken, Scotland. She was named the Vulcan. Her dimensions were 60 ft. in length, 12 ft. in breadth and 5 ft. in depth. All the plates, rivets and angle-irons were made over the anvil by Wilson and his blacksmith. The plates were fixed perpendicularly, or boiler-fashion, not horizontally, as in modern iron ships. The boat was specially constructed for the passenger service on the Monkland Canal, and plied between Port Dundas and Lock No. 16.—Scientific American.

FREDERICTON BOARD OF TRADE.

THE Fredericton, N.B., Board of Trade recently held its annual meeting with President Edgcombe in the chair.

The president, in his address, noted the success of the Provincial Exhibition, which was mainly owing to the support of the local board of trade, the movement to establish a steamship line between Fredericton and Woodstock and the dredging of their harbor-front last summer. He urged the construction of a union depot for the different railways centreing in Frederickton.

In the Tourists' Association report, next presented, mention was made of the Sportsman's Shows in New York, Chicago and Philadelphia since the last annual meeting of the board, at which were distributed large numbers of the Fredericton booklet. It was stated that a new edition of their tourist booklet, comprising 10,000 copies, was issued in July last, and the visit of the Upper Province Press Association was noted. They (the tourist committee) had also addressed a letter to the Chief Commissioner of Public Works of New Brunswick suggesting that a book in which visitors could write their names and addresses be placed in the Parliament Buildings, which was acted upon.

The treasurer reported receipts of $971.02 and an expenditure of $608.35, leaving a balance of $272 67.

Apollo galvanized iron commands more money and shorter credit—at wholesale—than any other—but saves the worker money.

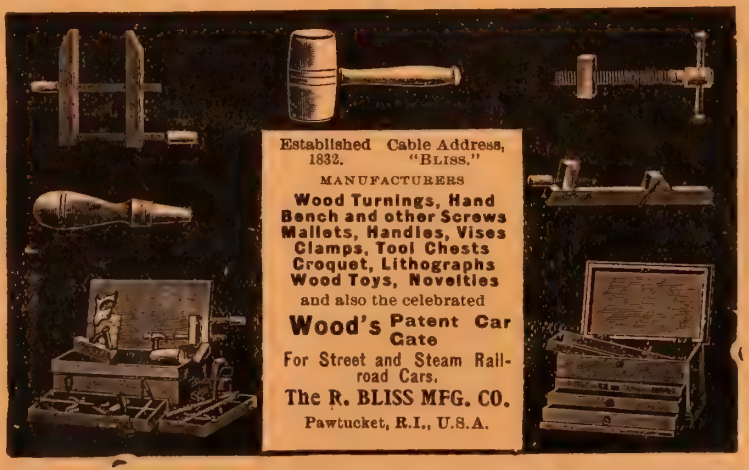
BRADSTREET'S

Capital and Surplus, $1,500,000. Offices Throughout the Civilized World.

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.



THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

1902 # GARDEN HOSE. 1902

We manufacture the most popular and best selling lines of Garden Hose in Canada. Our "Maltese Cross" brand we confidently recommend as the finest Garden Hose on the market.

We have other grades not quite so expensive, but good reliable brands, viz.: "Lion" (the popular medium-priced hose), "King" "Sun" and "Leader."

Our "Kinkproof" (wire wound) hose is wired by a special process controlled solely by ourselves, and is so constructed that it may be cut at any wind of the wire without loosening or uncoiling, the wire being self-gripping throughout each length.

Why It Succeeded!

Without any strenuous aid from us, the "Safford" has worked itself into the highest attainable place on the world's market to-day.

Because it is the simplest and most compact radiator in existence.

Because its joints are made with a screwed connection—no bolts, or packing.

Because the contractor finds it the easiest to handle.

Because the public find it the most satisfactory of all radiators to use—can't leak; once installed all bother is over.

If you have not our catalogue write for it.

THE TRADE "M&M" MARK LIGHT

FOR THE STORE

What "M & M" Lamps Do.

They give a stronger, whiter, steadier light than the electric arc. Operate easily, safely, satisfactorily. Save money—actual 600 candle-power light at a cost of one-half cent an hour. Think of it! Write for circulars, etc. GOOD AGENTS WANTED- Exclusive territory allowed.

ACORN BRASS WORKS,
Dept. 8, 15-23 Jefferson Street CHICAGO, ILL.

What "M & M" Lamps Save.

Barrett Hardware Co, Joliet, Ill., write: "Gasoline and supplies for six "M & M" Lamps cost us $45.46 last year, an average of 60c. a month per lamp. We believe we had as good a light as though we had six electric arc lights at a cost of $369." No wonder that over 30,000 "M & M" Lamps are in use all over the United States and Canada. THEY KILL BIG GAS AND ELECTRIC LIGHT BILLS. It will pay you to investigate. Write for circulars. AGENTS WANTED. Dept. 8, 15-23 Jefferson St., Chicago.

THE PROPRIETOR'S STORY.

ALABASTINE we have been selling nigh on to twenty years, and know it to be reliable.

We dealers also know that Alabastine is what is in demand, and that to sell anything else for coating walls, we would have to do so on the recommendation that it was the same thing, or just as good as **ALABASTINE.** Would not offer a substitute when Alabastine is called for; no necessity to do that, as it is easier to sell Alabastine, and in handling it we do not incur any risk on account of infringement of patents.

Alabastine is ready for use by the addition of Cold Water, made so by the inventor, Mr. M. B. Church, who was the first to produce a cold water preparation that is thoroughly practical, that has superseded all hot water mixtures, and forced other manufacturers to **UNDERTAKE** the use of the cold water process. Then, again, Alabastine is made in Canada, by Canadian labor and from Canadian materials. It satisfies my customers.

The trade supplied by Wholesale Hardware and Paint Dealers. Also by

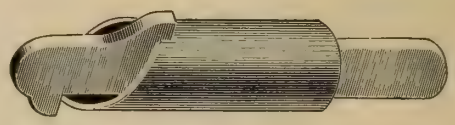
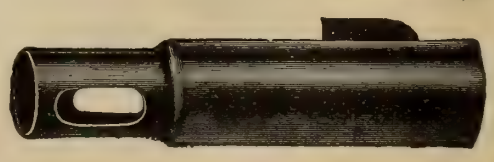
Supplies for the Maple Syrup Season



Sap Buckets.

Extra deep and straight. Three sizes. They possess many advantages over the ordinary flaring Buckets; being small in diameter they do not catch the rain or snow, and, as they are very deep, they hang perpendicularly and consequently will not overflow until full. Covers supplied if required. They nest close for shipping or storing.

We can also supply the ordinary Flaring or Western Sap Pails.



E. T. Sap Spouts.

Made of Retinned Steel. Strong and durable. Only require a ⅜-in. hole in tree. It does not cover the inside surface of the hole, therefore a larger amount of sap is obtained. Packed in cardboard boxes.

Maple Leaf Sap Spouts.

Made in Bronzed Steel. Require a ½-in. hole. Has a shoulder which prevents it being driven in too far. The hole in the tree is not exposed to wind and snow, consequently sap will flow longer. Packed in cardboard boxes.

Syrup Cans. Round or Square.

Plain or Decorated. Made in ¼, ½ and 1-gallon sizes—either Wine or Imperial measure.

A FULL STOCK CARRIED IN ALL LINES. ORDERS SHIPPED PROMPTLY.

WHEN WRITING ADVERTISERS PLEASE MENTION THAT YOU SAW THEIR ADVERTISEMENT IN THIS PAPER

THE CHIEF CAUSE OF FAILURES.

NOTHING is more necessary when beginning business than capital. It is the very foundation of business. And its lack is the cause of more commercial failures than all other causes together.

In Canada and Newfoundland, last year, there were 1,379 failures. And, according to Bradstreet's commercial agency, 974 of these were due to lack of capital alone. In other words, it was the cause of over 70 per cent. of the total failures. And this is about the average of several years past. This is a much larger proportion than in the United States, where the percentage last year was only a little over 30.

These figures are certainly startling. An ambition to go into business on his own account is commendable in any young man. But it is well that ambition of this kind should on all occasions be tempered with common sense.

Capital as a necessity in business is gradually becoming more and more important. The amount that even 10 years ago would have been considered substantial capital would to-day be deemed insufficient to warrant one launching into business for himself.

With the keenness of competition and the smallness of profits that are such marked features of business conditions to day, it is only commercial enterprises that are strongly fortified with capital that can hope to succeed. It is this more than anything else that induces seperate business enterprises to amalgamate, and that brings into existence the large department stores.

It is better that one should forever be an employe than that, becoming an employer with inadequate capital, failure should follow and the savings of years of hard work lost.

FIRM LINSEED OIL MARKET.

Linseed oil appears to be in a rather favorable position just now. At this time of year there are usually exports of seed from the United States to Great Britain and Europe; but instead of exporting the United States is at present importing, being a purchaser of Argentine seed. Flaxseed is showing increased firmness in Chicago, and quotations of oil in London, Eng., are at the moment above the parity of prices in Toronto for 10-barrel lots.

SENTIMENT IN BUSINESS.

SENTIMENT does not count for much in trade, either in individuals or in nations. Price, commensurate with quality, is the ruling influence. Sentiment may incline buyers in the direction of certain sellers, but it is easily switched in another direction if more favorable economic conditions prevail elsewhere.

Canadians would rather import from Great Britain than from any other country, and the British people, we have reason to believe, would rather buy Canadian than goods that are the product of countries outside the British Empire. But all things, particularly in regard to cost and quality, must be equal. Business is business the world over.

It is obvious, therefore, that the chief aim should be to manufacture an article whose quality is good and whose price will not be above that of those who are his competitors in the same market.

We do not wish to ignore sentiment in business. On the contrary, we would urge its cultivation, for it has its use. And that is to throw the balance in the desired direction when competitors are equal as to quality and price. But it is childish and unbusinesslike to expect that sentiment shall be the determining factor in mercantile life under all conditions. If it were possible to make it so, what would be the result? Simply that those who relied upon it would become effete and unprogressive, and would ultimately cease to exist.

The commerce of the world has not been developed on sentiment. Competition and enterprise have been the most potent forces.

THE C.P.R.'S NEW STOCK ISSUE.

THE announcement that the Canadian Pacific Railway Co. has been granted permission by the Government to issue new stock to the extent of $20,000,000 has naturally excited a great deal of interest in financial and commercial circles.

It is stipulated by the conditions under which the power has been granted by the Government that the stock must not be sold below par. The money obtained from the disposal of the stock is to be applied in the following manner: New rolling stock and locomotives, $9,000,000; double tracking west of Lake Superior, $6,000,000; new plants for construction of rolling stock, chiefly at Montreal, $1,500,000; new elevators, improvement of terminals, etc., $3,000,000; miscellaneous improvements, $500,000.

This is an age when people are more disposed than ever before to criticize closely new powers or privileges which may be granted to railway corporations. This is, of course, due to the fact that the looseness in this respect in the past on the part of both the people and their representatives in Parliament allowed the railway corporations to so fortify themselves behind agreements and legislative enactments as to make them and not the Government masters of the situation. To-day it is an unwritten law that no further privileges or powers shall be granted the big railway corporations, and particularly the C.P.R., unless the applicant for the powers agrees to make some concessions on privileges obtained under previous agreements. This, it will be remembered, was one of the features of the agreement with the C. P. R. when it was given the authority to construct its Crow's Nest Pass branch, a certain reduction in the freight rates being the concession obtained.

Under the agreement just made between the C.P.R. and the Goverument, whereby the former is permitted to issue the $20,000,000 of stock, certain concessions have also been obtained from the railway company. What their value is it is scarcely possible at the present to determine.

In the Act of 1881 incorporating the C.P.R. it was stipulated in the clause regulating the freight rates that "such reduction may be to such an extent that such tolls when reduced shall not produce less than 10 per cent. per annum on the capital actually expended in the construction of the railway." In other words, until the capital expended in the construction of the road earns more than 10 per cent. the Government cannot have a voice in determining the freight rates. What this clause really means has never been authoritatively defined, legal opinion being divided in regard thereto, although to the lay mind it would seem to clearly indicate that the purpose of the Act was to give the Government control of the rates as soon as the earnings were in excess of 10 per cent. of the capital actually expended in the first cost of the road. However, it is in regard to this clause that the concessions made by the railway in the present instance are concerned.

In the first place, the C.P.R. agrees that the $20,000,000 obtained from the issue of new stock and expended on construction work shall not be reckoned as a part of the cost of the railway. It is further agreed to submit the regulating clause in the Act of 1881 to the Supreme Court of Canada or to the Judicial Committee of the Privy Council, if necessary, for interpretation.

If the court of final appeal should give the clause the wide interpretation, namely, that the cost of construction means the amount spent on the road, not only in the first instance, but for all time, then the agreement of the C.P.R. not to count as a part of the cost of the construction the $20,000,000 which it now proposes to expend is perhaps of some value, although but slight, for, if the Act is so interpreted, it will practically mean that the dividend-earning power of the company will always be kept below the point where Government interference in the rates would be possible. Should the courts, on the other hand, interpret the clause as meaning the cost in the original construction of the road, then it would obviously be of no importance whether the railway company agreed or not to include the $20,000,000 out of the reckoning.

However, there is one thing that should be a source of satisfaction to all, and that is that the development of the West has necessitated the C.P.C. expending such a large amount of money in putting its rolling stock and track in a position to cope with it.

A BUSINESS MAN FOR GOVERNOR.

IT is announced by the daily papers that Senator Snowball is to be appointed Lieutenant-Governor of New Brunswick.

The gubernatorial office is not one in which the occupant is supposed to exercise much influence in the business of the State. We believe, however, that a Provincial Governor can, if he has the ability, do a great deal in directing the minds and actions of the members of his Cabinet along the same practical business lines as a business man would the heads of his various departments.

Mr. Snowball has had several years' experience in both the House of Commons and the Senate, but, what is more important still, he has had many years of practical experience as a business man.

In Chatham, N.B., his large sawmill is the most important of its kind on the Miramichi river, turning out, as it does, large quantities of lumber annually for the British and Continental markets. Besides this, there are other industries in that part of the country which have his advice and financial assistance.

At the annual meeting of the Maritime Board of Trade, held in Chatham in August last, he was most assiduous in his attention to the business of the convention, and assisted materially in making it the success it was, from both a business and a social standpoint.

The business men of New Brunswick are to be congratulated in having as their next Lieutenant-Governor a practical and a successful business man.

A DECLINE IN COPPER RIVETS.

A change has been made in the price of copper rivets and burrs, and also in the manner of quoting the same.

When copper rivets with the usual proportion of burrs are wanted the discount is 45 to 10 per cent., instead of 35 and 5 per cent. This is a reduction of 20 per cent. If copper burrs only are wanted the discount is 30 and 10 per cent., which makes the price slightly higher than before.

Competition is the chief cause of the decline, although the weakness in the copper market is doubtless a factor as well.

THE LATE H. S. HOWLAND.

BY the death of the late H. S. Howland Toronto loses a venerable and greatly respected citizen. He was not a presumptuous man. He was the very contrary. Quiet and unassuming, he went about his business without any blare of trumpets. But he was a man of more than usual ability in the commercial sense, and, by force of this, he won a place in the commercial and financial world such as is attained by few. Besides being head of the wholesale hardware firm of H. S. Howland, Sons & Co., Toronto, and of his extensive flour milling properties at Kleinburg, Ont., be was president of the Imperial Bank, and, in spite of the 78 years that rested upon him, was, up to within three or four days of his death, apparently hale and hearty. It was while returning from a visit to the mills at Kleinburg that he was stricken with paralysis. This was on Saturday, January 25, his death taking place the following Tuesday night.

Deceased came to Canada about 62 years ago from Paulings, N.Y., and at Lambton Mills engaged in the milling industry with his brother, the present Sir W. P. Howland, From that time until within a few days of his death he was an active participant in the commercial life of Ontario. He was, during his life, the president of three railways, namely, the Toronto and Nipissing, the Toronto, Grey and Bruce, and the Toronto and Ottawa.

In bank organization he also played an important part, being one of the moving spirits in the creation of both the Bank of Commerce and the Imperial Bank, the former of which he was vice-president at its inception, and the latter of which he was president at the time of his death.

Never a man who courted public life, he, however, at one time took some share in municipal politics and served a term as warden of York County.

He was a type of a business man who said little and did much.

In manner, he was quiet, even tempered and genial. To converse with him was a privilege, for he was liberal in his views, was well informed on public affairs and current topics, and was full of interesting reminiscences of the commercial life of Canada during the 60 years in which he was such an active participant.

He is gone, and his going reminds us of the two last verses of one of the great Samuel Johnson's poems :

The busy day—the peaceful night,
Unfelt, uncounted, glided by ;
His frame was firm—his powers were bright,
Though now his eightieth year was nigh.

Then with no fiery throbbing pain,
No cold gradations of decay,
Death broke at once the vital chain,
And freed his soul the nearest way.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

A DEMAND of assignment has been made on Joseph Cousineau, coal and wood merchant, Montreal, Que.

Pouilot & Gervais, painters, Quebec, have compromised at 50c. on the dollar.

A consent of assignment of Gregoire Leveille, plasterer, Montreal, has been filed.

S. O. Donoghue, builder, Antigonish, N.S., is offering to compromise at 50c. on the dollar.

The creditors of Joseph Laporte, wood and coal merchant, Montreal, held a meeting on January 30.

PARTNERSHIPS FORMED AND DISSOLVED.

Laird & Ford, builders, Deloraine, Man., have dissolved.

C. D. Alluisi & Cie, plaster ornaments, Montreal, have dissolved.

The Montreal Size Co., glue manufacturers, Cote St. Paul, Que., have dissolved.

SALES MADE AND PENDING.

The assets of A. O'Borne, wood and coal merchant, Montreal, have been sold.

O'Borne Bros., lumber and implement merchants, Ponoka, N.W.T., have sold out.

The assets of J. A. Duval, hardware merchant, Montreal, are to be sold on February 3.

The assets of The Diamond Lighting Co., Montreal, are advertised for sale by tender.

The assets of The Brampton Gas Co., Limited, Brampton, Ont., are advertised to be sold by tender.

CHANGES.

The Canadian Automachine Co. has registered at Montreal.

Rousse & Rousse, wood and coal merchants, Montreal, have registered.

The Columbus Building Association, Quebec, has applied for a charter.

The St. Anne Co., lumber merchants, Quebec, have applied for a charter.

James Gard, blacksmith, Alberton, P.E.I., is succeeded by Arthur Hardy.

John Galey & Co., sawmill owners, St. John, N.B., are going out of business.

Catherine Fraser has registered at Montreal for Wm. F. Copland & Co., carpenters.

James Curran has registered for Moore & Co., wood and coal merchants, Montreal.

D. Holmes & Co., stoves, etc., Yarmouth, N.S., have sold out to A. J. Lincoln.

W. A. MacKay, electrical supplies, Halifax, N.S., has removed to North Sydney.

The Broadbent Wood Turning Co., Limited, Broadbent, Ont., has obtained a charter.

Ashdowns', hardware merchants, Yorktown, N.W.T., have been succeeded by S. G. McKee & Co.

James McCann, agricultural implement merchant, Killarney, Man., has sold out to Robert Lawson.

Mrs. T. Dansereau has registered for T. Dansereau & Cie, wood and coal merchants, Montreal.

Charles F. Moore has registered for T. F. Moore & Co., wood and coal merchants, Montreal.

The Heaslip-Lawton Co., Limited, agricultural implements, Alameda, N. W. T., is applying for incorporation.

The Montreal Lumber Co., Limited, is applying for supplementary letters to increase its capital to $100,000.

The Bennett-Foster Co., contractors, River Desert, Que., have obtained a charter.

Arthur Doig, hardware and implement merchant, Birtle, Man., has sold out to Taylor & Mitchell, who take possession March 1.

FIRES.

E. A. Pearson, tinware merchant, Rat Portage, Ont., was burned out.

Peter Loubret, painter, Quebec, has been burned out. His stock was insured.

T. Laframbroise, carriagemaker, St. Phillipe D'Argenteuil, Que., has been burned out.

The building at Sydney, N.S., belonging to Rhodes, Curry & Co., Limited, contractors, Amherst, N.S., has been burned. It was insured.

W. S. Duggan, general merchant, Oil Springs, Ont., has suffered loss by fire. His property was insured.

DEATHS.

Alfred Mills, lumber and coal merchant, is dead.

John Taylor, coal merchant, Dunnville, Ont., is dead.

Henry S. Howland, of The Graham Nail Works, and H. S. Howland, Sons & Co., wholesale hardware merchants, Toronto, is dead.

ANNUAL MEETINGS OF BOARDS OF TRADE.

THE BERLIN BOARD.

QUITE a number of prominent members were present at the annual meeting of the Berlin, Ont., Board of Trade on January 23, when the president's report was presented and the officers elected for the year 1902.

The retiring president, S. J. Williams, in his address, mentioned the securing of the factory for the town of Berlin, the progress that had been made in the problems of technical education, the lighting plant, additional railway facilities and the matter of the Shurley & Dietrich industry.

He also noted the increase of 59 in the membership during the year, the total number now enrolled being 224. The board had held 15 regular and 10 special meetings during the year. He concluded by urging the new members to take a live interest in the work.

A vote of thanks was heartily given to the retiring president, Mr. Williams, for his services during the past two years. Mr. Williams would not stand for reelection.

The following are the officers for the year 1902 :

President—Robert Smyth.
Vice-President—J. P. Bell,
Secreary—H. J. Sims.
Treasurer—Edward Smyth.
Council—S. J. Williams, H. L. Janzen, C. K. Hagedorn, J. U. Clemens, D. B. Detwiler, C. A. Ahrens (jr.), G. Shirk and C. H. Mills.

THE TORONTO BOARD.

The annual meeting of the Toronto Board of Trade was held on Monday afternoon. The president, vice-presidents and treasurer having been elected by acclamation a week before, interest in the meeting was naturally not as keen as it might otherwise have been. The officers for the ensuing year are as follows :

President—Mr. A. E. Ames.
First Vice-President—Mr. J. F. Ellis.
Second Vice-President—Mr. J. D. Allan.
Treasurer—Mr. E. R. Wood.
Members of the Council—Hugh N. Baird, T. G. Brough, R. J. Christie, W. F. Cockshutt (Brantford), W. J. Gage, Edward Gurney, Peleg Howland, A. E. Kemp (M.P.), C.G.Marlatt (Oakville), Noel Marshall, P. R. Miller, J. L. Spink, Miles Vokes, W. A. Warren, J. W. Woods.
Board of Arbitration—Geo. H. Baird, Hugh Blain, Lieut.-Col. J. I. Davidson, D. O. Ellis, M. C. Ellis, Thos. Flynn, S. R. Hart, W. D. Matthews, J. C. McKeggie. W. K. McNaught, D. M. Spink, W. M. Stark.
Industrial Exhibition Board—S. E. Briggs, John Carrick, Geo. Edwards, R. Y. Ellis, R. W. Elliott, Geo. H. Gooderham, W. P. Gundy, Thos. H. Lee.
Representatives on Harbor Commission—Barlow Cumberland, J. T. Matthews.

The annual address of President Ames was comprehensive and interesting. The attitude of the board in regard to technical education had, he said, always been that the country should adopt a vigorous policy of scientific education. He added: "The importance of better instruction to artisans, and to those who have to master the still higher branches of mechanical effort, is being recognized by the Provincial and Dominion Governments to a large extent, but it is very much to be desired in the interests of the country, that still greater earnestness be directed to evolution along these lines upon thoroughly scientific and practical bases."

The subject of the Bell Telephone Co. Mr. Ames prefaced with the disclaimer o any idea of hostility to that institution. The naturally monopolistic nature of the business of the company, however, rendered it necessary that patrons should be protected. The increased charge for long-distance apparatus, the increase of stock in 1892 from $2,000,000 to $5,000,000, the attempt to increase rates in 1897, which was resisted by the board, Toronto City Council and other bodies, and the Bill of last session to increase the capital stock were all touched upon.

He said he desired to impress upon all citizens their responsibility in developing Canada, and by broad intelligence and business integrity Canadian goods of every kind should be of the highest character possible, so that they could compete with any in the world.

Now that the tariff, or the means of securing commercial prosperity, was considered too big a question to be played with for party advantage, Mr. Ames urged that public attention should be concentrated not upon party, but upon the best means of enhancing the development of Canada, and to this end he would like to see a greater feeling of independence in the rank and file in regard to party lines. While the tariff was sleeping, Mr. Ames thus urged the systematic study of Canadian industries: "As has been said, the tariff is out of politics, but that is only a passive state. It seems to me that what we need during the next five years, starting now, is the energetic consideration by our Governments of all the conditions under which the citizens of this country do business. It will be a great day for Canada when the strife between the two parties is wholly as to which can best discover and supply the country's needs, and when the electorate distributes the rewards of office for success in this direction and without prejudice as to the name the party bears."

The president's report was adopted amid applause upon the motion of Mr. Hugh Blain, who congratulated the president upon its interesting and valuable character.

Mr. J. D. Allan also spoke in reference to the report, and also in regard to the resolution of condolence with the family of the late Walter S. Lee, a valued member of the board since 1864, which resolution was passed in the usual form.

Mr. J. W. Woods, in the absence of Mr. J. L. Spink through illness, moved the resolution making retiring Secretary Wills an honorary life member, to which Mr. Wills replied briefly.

Mr. D. Rose suggested that Dr. Montague be asked to lecture before the board on Australian trade matters. The question was left over for further consideration.

The resolution in regard to urging Britain to adopt a preferential tariff on wheat was held over to be discussed on Wednesday, February 5, and on motion of Mr. Hugh Blain members will be supplied with printed copies.

A NEW BOARD AT ALMONTE.

A board of trade has been formed at Almonte, Ont. On January 22 about 40 of the leading citizens and business men attended an open meeting presided over by Bennett Rosamond, M.P., at which a committee was appointed to take the steps necessary before applying to the Secretary of State for incorporation. An application for a charter was signed by those present, and, it is hoped within a short time the board will be fully organized.

The meeting was addressed by the chairman, Bennett Rosamond, M.P., who said the town, if they had had a board of trade two years ago, would not have had a worthless lighting plant, and been compelled to pay twice as much for water-power as they should.

K. Eardley-Wilmot has had a good deal fo do with interesting the business men in this matter. He said that, coming

WIRE NAILS
TACKS
WIRE
Prompt Shipments
The ONTARIO TACK CO.
Limited
HAMILTON, ONT.

as a stranger, there seemed to be a lot of mismanagement in that town, and that a board of trade would guard the interests of the town.

A number of others, including J. Robertson, Squire Smith, Wm. Thoburn, M. Grey, also thought it a good move to establish a board of trade.

The committee appointed consists of B. Rosamond, M.P., K. Eardley-Wilmot, W. H. Stafford, J. Robertson and Mayor Simpson. These will take the steps necessary to obtain a charter.

K. Eardley-Wilmot has been elected secretary pro tem.

A POETICAL SECRETARY.

Secretary George E. Calkin, of the Kentville, N.S., Board of Trade, is of a somewhat poetical turn of mind. And, in calling the recent annual meeting of the board, he dropped into verse in order to emphasize upon the members the necessity of taking a lively interest in that organization. There were nearly 70 lines in his effusion, the concluding verse of which ran :

Then stir up the laggard
And push out the drone,
Let us all strive together
To better our town,
For we are not merely
The power behind,
We are People and Throne.

Some may be disposed to criticize the poetry, but no fault can be found with the sentiment.

SUMMERSIDE BOARD OF TRADE.

There was a good attendance at the annual meeting of the Summerside, P.E.I., Board of Trade, on January 22, when Hon. R. C. McLeod, the president of the board, gave a resume of the year's work. In his speech he dwelt particularly with an experiment now being tried on the Summerside Tormentine route.

A resolution was passed complimenting Hon. Jas. Sutherland on his appointment as Minister of Marine and Fisheries.

The meeting was also addressed by J. A. Brace, Neil McQuarrie, Wm. Stewart, and Richard Hunt. Several remarks were made by other members of the board on the year's work of the council. The following are the officers elected :

President—Hon. R. C. McLeod (reelected).
Vice-President—Neil McQuarrie (reelected).
Secretary—D. K Currie (reelected).
Auditors—John Grady, J. S. Hinton.
Council of Board of Trade—J. A. Brace, W. A. Brennan, Ronald Campbell, George Godkin, R. T. Holman, Richard Hunt, Joseph Read, David Rogers, John A. Sharp, Neil Sinclair.

SOLD HIS STOCK.

W. J. Leed, of London, has disposed of the hardware stock of W. S. Rodgers & Son, Glencoe, Ont., which he had recently purchased, to T. Poole, of the same place.

The Four Factors

that bring success to *S.-W.P.* Agents are

S.-W.P. Methods,
S.-W.P. System,
S.-W.P. Advertising,
S.-W.P. Quality.

With quality alone *S.-W.P.* can place any paint dealer at the head of the business in his locality, but we don't depend on quality alone. We back the quality up with methods, system, and advertising that insures success from the start. The combination can't be beat, and will win out against any competition, anywhere paint is sold.

If you want to learn in detail about these four factors, send a postal card to-day for the "B-13 Booklet." It is full of valuable information.

CATALOGUES, BOOKLETS, ETC.

CANADA WOOD SPECIALTY CO.

In a tastefully gotten up and neatly printed circular the Canadian Wood Specialty Co., Limited, of Orillia, are announcing to their friends and patrons that the businesses carried on by the Canada Wood Specialty Co. and N. Janes & Son have been amalgamated under the name and style of The Canada Wood Specialty Company, Limited. They state that they will continue the manufacture of birch and maple flooring, turned goods, and a full line of veneer work. They will by the new building kilns and up-to-date machinery be able to turn out first-class work on very short notice.

A FREEZER CATALOGUE.

North Bros. Manufacturing Co., Philadelphia, Pa., are the makers of a large variety of ice cream freezers embodying all that is best and of intrinsic merit in an ice cream freezer. These are distinguished from all others by such practical features as automatic twin scrapers and drawn-steel bottom cans that will not break. The pails are of cedar with electric welded wire hoops that are guaranteed not to break. All sizes from the 1 quart "Lightning" to the 40-quart "machine" freezer are carried in stock by this firm, who are also prepared to furnish to the wholesale jobbing trade ice crushers, packing tubs and cans for ice cream makers, and ice chippers and shavers for home use.

This firm are also the makers of the "Yankee" tools, simple in construction, strong, durable, smooth workers and handsomely finished, and they will not get out of order. These consist of screwdrivers of various patterns and also a number of different varieties of drill points for carpenters, cabinetmakers, etc., for boring wood for such various purposes as the setting of screws, nails and brads.

Both their ice cream freezers and "Yankee" tools have received the highest awards for machines and tools of their kind at the Philadelphia Export Exposition of 1899 and the Paris Exposition of 1900.

Their handsome little catalogue and price list for 1902 will be mailed to our readers on application. Mention HARDWARE AND METAL when you write.

A SPORTING GOODS CATALOGUE.

It is only the ordinary thing for big firms to get out catalogues of their goods every year, but it is decidedly out of the ordinary when one comes across a catalogue like that of John Millen & Sons, Montreal and Toronto, which has recently been issued for 1902. Bicycles and bicycle parts are a specialty in this house, so the first part of

the catalogue is devoted to these. Everything imaginable that is used in connection with bicycles may be found here, all illustrated in either half-tone, line or zinc engravings. The cuts show up well, and, in addition, a perfect idea of the goods can be obtained from the descriptive text which accompanies each. Other sporting goods, guns, fishing rods and tackle, baseball, tennis, hockey, golf and lacrosse necessaries, besides a great many other things in the hardware line, are advertised in this catalogue.

But the chief interest centres in the last portion of the book. It is a key catalogue, and contains 30 pages, fully illustrative of the great variety of keys carried by this house. They are of every shape, size and price. If only to have this assortment of keys alone the catalogue is valuable, but, as a means of to all sorts of light hardware and sporting goods, there is nothing like it. The catalogues are being sent out, and dealers who do not receive one will miss much if they neglect to drop a card to the firm asking for a copy.

PAINTS FOR RETAILERS.

An article of merit, well advertised, and attractive. Dealers handling "Zanzibar" paints have these three things to aid them: These paints are of unquestionable high merit and always uniform; advertising matter in the most attractive form is furnished; and the lithographed labels used on all cans are among the most handsome used in the Dominion. The Zanzibar Paint Co., Limited, are sole manufacturers.

HAMILTON BRANCH ORGANIZING.

A large number of Hamilton retail merchants gathered in the Board of Trade Rooms, Hamilton, on January 22 to listen to President Rogers, of The Toronto branch of The Retail Merchants' Association, and Secretary Trowern address them on the advisability of forming a branch in Hamilton. A number of Hamilton merchants gave their views, after which they decided to organize a branch of The Retail Merchants' Association of Canada in Hamilton.

A committee consisting of T. O. Carpenter, H. Hiland, Albert Case, J. T. Clarke, Wm. Bews, James Dunlop, Burwell Griffin, F. R. Newberry, G. S. Klein, and Wm. Fraser were appointed to make the necessary arrangements.

Hyacinthe Sylvestre, of Sylvestre, Hyacinthe & Son, hardware merchants, Montreal, is dead.

The foundry of The T. H. MacLean Manufacturing Co., Limited, was recently burned down. The loss is covered by insurance.

IVER JOHNSON BICYCLES

NEWEST AND LATEST TRUSS FRAME

The Truss frame satisfies that longing for something new and good in a bicycle—it possesses the advantage of racing weight and roadster strength—a rigid crank hanger—greater speed—no buckling of frame—

Made of one-inch Tubing.

Agents wanted in unoccupied territory; send for new catalog just issued.

THE ADVERTISING ARENA.

A LESSON IN ADVERTISING

A WHOLESALER, according to Hardware Trade, in New York had one of the brightest and most impressive lectures on advertising read to him by a country merchant, that he has ever heard in his life. The country merchant is one of the ordinary merchants. He is a character in his way, a Hibernian, and with his full share of the proverbial wit. He was on a buying trip, and passing a wholesale house he observed paper napkins in the window. He went in to look at them, for he had sale for such things in his store.

"An' do ye have paper napkins to sell?" he asked of the wholesaler. He did have them, he said. "An' how the devil do I be knowin' that ye have paper napkins to sell, if I don't come down here and happen to see them in the windy? Why don't ye tell a man ye have paper napkins? Why don't ye advertise? Thin we'd know what ye had to sell." The merchant told him that he did advertise, which was true.

"Ah, yis," said the merchant, "an' how do ye advertise? Ye put a cut of yer buildin' in the paper. Now what the devil do I be wantin' to see the cut of your buildin' for? I don't care for yer old buildin'. It's what's in yer buildin' that interests me. If ye have paper napkins, say ye have paper napkins, and don't be showin' us a picture of your big sthore. That's the way I'm a-goin to sell these paper napkins I'm buyin' of ye. I put an advertisement in me paper at home to till the people of me town that I have paper napkins to sell and the price they have to pay for thim, an' be the powers they come an' buy thim."

This wholesaler told me that he had more good advertising sense rubbed into him in 10 minutes by this merchant than he had found in books in the past 10 years.

JOHN KNOWS IT.

A newspaper whose columns overflow with advertisements of business men has more influence in attracting attention to building up a town than any other agency that can be employed. People go where there is business. Capital and labor go where there is an enterprising community. No power on earth is so strong to build up a town as well as a paper well patronized, and its power should be appreciated. The man who overlooks his town paper injures himself by injuring his town and townsmen. —John Wanamaker.

SOME SAMPLE ADS.

To Clean Out Our Stock of Skates

We have made a reduction all along the line in all styles and qualities. Besides our regular stock we have a large number of shopworn skates—the accumulation of several years past, which we will sell at bargains. We will show you skates, and good ones, too, from 35c. up.

After Inventory Sale

We finished up the taking of inventory this week and we found quite a number of seasonable suits that will be of more benefit to you than to us—therefore we have made a substantial reduction in price—a reduction that ought to clean every one out in quick order.

We maintain that no ready-made clothing can surpass the kind we sell—it is made to wear and made to fit—and you'll agree with us, if you come in, that the price isn't a matter you can object to.

Your credit is good.

—Printers' Ink.

Jeweled Rings and Diamond Hearts

HOW MUCH MONEY TO SPEND?

Truly an interesting question. It all depends upon the goods and the competition. Another good question to ask is, Who else is in the field and how well are they occupying it?

Take baking powder. It will be conceded that this article has been well advertised. There was a time when a manufacturer might have started a baking powder business with small capital, and by judicious effort had a good chance to win out. That time has passed. There is no use talking about trusts and their good or bad features. Let politicians do that. The fact remains that a firm that has gone in and possessed the land, is making a good article and has a strong and sensible advertising policy, is in a position to continue. Before the business can be diverted to any great extent it will be necessary to get a better article or spend more money pushing it. Another thing. The new article must be a good deal better, and the big concern generally sees to it that theirs is about as good as can be made.

I knew a firm that did not believe this. They were going to sell to jobbers at better discounts, give retail men more profit and sell an article just as good. The jobber and retail man would be glad to push it along, you know, because they would get larger profits.

They forgot about the public.

I asked them, "How much money have you got?" They seemed to think it was none of my business. Then I asked them how much money they would put up and be able to lose without seriously imperilling their capital. This seemed easier, and at last I learned that they would put up $2,000. This was to include their advertising expenses and my service. Two thousand dollars against the combined result of possibly a million. Their great point was that they would reinvest their profits. Reinvesting profits looks easy, but it is the rock upon which many a concern has gone up against to disaster. The trouble is there are no profits to reinvest. One dash, one chance in a hundred, and nothing behind it to give them another chance for their money.

I thanked them for the offer, but refused the service, and explained my reason. Other heads were bowed beside the remains of foolish advertising experiments. They probably think advertising doesn't pay.

How much to spend? It must be enough to justify a reasonable hope of success. No one knows absolutely in advance what will be the result of advertising effort. Those with most experience and ability can make the closest guess, and they try the best plan first, but are sure to keep enough money in reserve to be able to change the policy if necessary.

Some lines can be tried with little money. They are most inviting. Other lines require enough money to make a positive disturbance before results can be expected. They must make noise enough to be heard by all the people before trade can be expected to move in their direction.

The foolish man thinks only of his own business. The wonderful goodness of his

product, and the money he can make by reinvesting his profits. The wise man studies the situation from the buyer's standpoint. He makes up his mind in advance as to how much publicity he must have before he can expect success, and then sits down and counts his money.

The exception? Oh, yes, there are exceptions to this rule. Nobody knows what the percentage is, but experienced advertising men can think of but few. Some have spent money and won in violation of all rules of business sense. Chance, luck, gamble. The exception is so small that it cuts no figure. The real advertising work has been done, as it should be, by someone who knows the facts and has the sagacity to understand how much money to spend.—Seth Brown, in Printers' Ink.

ADVERTISING JOB LOTS.

The "job lot," "closing out slaughter" and other well-known reasons for sales have been so overworked in advertising that most people are aware of their sham. Probably there will be a change in the tenor of such publicity ere long, though it is difficult to say what form it will take. The store which advertises good wares at a decent profit, dwelling upon quality and reliability, probably succeeds as well as the establishment which is continually in the throes of its mistakes in buying and efforts to help the manufacturer unload. In the case of the department stores the special sale is likely to last a long while yet, but some of the better-known New York advertisers never use the price reduction sale as an argument in their ads., or use it so rarely that it is always effective by way of contrast.—Printers' Ink.

CHOOSE CAREFULLY.

It is a good plan for those just starting in the mail-order business to use their own judgment and observation as to what line they shall handle and not put too much confidence in the various cheap guides and catalogues which profess to give the beginner a list of the things he should carry in stock. What will sell in one locality may not be at all in demand in another. Before starting look around and see what are the articles most likely to be in demand among the class of people most easily reached by you.—White's Sayings.

THE GOOD AD.

A good ad., remarks The Brookline Chronicle, is an announcement in brief terms, straight from the shoulder, concise and to the point, telling something in a clear and intelligent manner and stating a few prices as an indicator of the way you sell goods or do work.

Is this Ad. big enough to be seen?

It is another of a series that will appear in all the leading magazines and ladies' papers this Spring and Summer. All of your women customers take one or more of these publications. Don't you want to have your store identified with the very best advertising?

Order Peerless Iceland Freezers and Peerless Ice Chippers from your jobber early so that he can put you in touch with our advertising department. If yours doesn't handle them, see one who does, or write us and we will see that you are supplied.

New York: 10 Warren St. **DANA & CO., Cincinnati.** San Francisco: 105 Front St.

ANOTHER LETTER RE LINSEED OIL.

Editor HARDWARE AND METAL,—In your issue of January 25 there appeared a letter from a reputed dealer in Canadian linseed oil in reply to my letter in a previous issue regarding the quality of English linseed oil offered in this market. It is quite evident your correspondent knows very little of the linseed oil trade when he speaks of price variations of from £5 to £10 per ton between oil produced from British India seed and that made from seed of other countries. If there were such a difference in price I am afraid very little Calcutta linseed oil would be imported to Canada. While Argentine seed may be sold at a slightly lower price than Calcutta seed, I do not believe that were Argentine seed used exclusively the difference in production would exceed £1 per ton, besides which, in the latter event, the oil would not be allowed into Canada under the preferential tariff, so that the actual cost of Argentine seed oil in Canada would be more than Calcutta seed oil.

Your correspondent produces figures to show that about 18 per cent. of the flaxseed imported into England is from foreign countries. Assuming this to be correct, we must take into consideration the fact that the United States and Russia are foreign countries, and, deducting their proportion, we could no doubt reduce the percentage of Argentine seed to 10 per cent. of the total imports.

If, as your correspondent states, the English crushers are compelled to use from 30 to 40 per cent. of Argentine seed to get the quality of oil they desire, perhaps he can explain how they manage to get hold of the remaining 20 to 30 per cent. of Argentine seed to supply their wants. Then, again, as it is not customary for anyone to desire an inferior article when they can get the best article for the same money, one must naturally conclude from your correspondent's remarks that English crushers are obliged to use a proportion of Argentine seed to improve the oil.

Your correspondent claims that the bulk of English linseed oil imported into Canada comes in May, June and July. As the greatest consumption of oil takes place during these months, I would like to know how he could expect it to come at any other time.

Will your correspondent explain how it is that Canadian crushers buy foreign seed from which to make their oil if it is so inferior to any seed grown in British possessions? I know that American seed enters largely into the manufacture of linseed oil in Canada, and I should not be surprised if even Argentine seed is crushed in Canada. Under these circumstances how does he explain the superiority of Canadian oil? Does the fact of crushing the seed in Canada make it any better or must we attribute it to superior workmanship or improved plant? If so, Canadian crushers must have made phenomenal strides in the few years they have been engaged in the oil industry. They have certainly not been at it very many years.

If seed grown on this continent is so very much superior to foreign seed why do the Americans export their own seed and import Argentine seed?

If so-called Canadian oil is so very superior to English oil why do some of our leading paint manufacturers give the preference to English oil? I know of more than one instance where I have given a buyer the option of taking his contract out in English or Canadian oil, and he has chosen the English oil.

My inquiries regarding English linseed oil have elicited entirely different information to that volunteered by your correspondent, and I am informed that 99 per cent. of English oil coming to Canada is crushed from Calcutta seed, besides which, a sworn declaration to this effect accompanies every shipment that comes to our firm. We have no reason to doubt this statement which comes from the combined largest seed crushing interests in the world.

With all due respect to your correspondent, I trust I may be permitted to suggest that he bases his arguments mainly on hearsay evidence, and I should not be surprised to learn that his writing has been prompted by one or more of the western merchants who have combined the last few years in an effort to maintain high prices, and whose pecuniary interests have possibly suffered through the competition of English linseed oil.

J. WATTERSON.

Montreal, January 28.

A FUEL SAVER.

Editor HARDWARE AND METAL,—As you are always interested in new enterprises, I write to inform you of a movement on foot in this enterprising and go-a-head town to form a company for the manufacture of the West fuel-saving device. At our invitation, Mr. Porter, of Buffalo, came here and has allowed us to investigate the device, the patents of which he is the owner. We have tried it under different conditions on all kinds of stoves for coal, and the verdict in all cases has been with those who have tried it that they can effect a saving of from 33⅓ to 50 per cent. The device is simple in operation, requires no care and is a vigilant guard as to the economy in fuel saving.

The front drafts of the stove or range are completely closed, and it takes in the air from a very small hole at the back of the stove. The air is heated to the same temperature as the fire in the stove, causing the carbonic acid gas to completely reduce to fine ashes the carbon or coal. It is an old principle newly applied, and is a marvel of perfection. There are no clinkers, the gas is all consumed before reaching the stovepipes, and there is no danger of anyone suffering from escaping gas.

THE PAULIN CO.,
Per T. G. WATSON.

Simcoe, Ont., January 28, 1902.

SHERWIN-WILLIAMS WON.

The sporting members of the staff of The Sherwin-Williams Co. and The Canada Paint Co. met on the Crystal Rink, Montreal, on Thursday night (January 23) and played a friendly game of hockey that all the onlookers considered pretty fast. Judging by the noise made by the supporters of either side, it was the most brilliant game ever played.

The Sherwin-Williams people left the rink blowing tin horns and doing other things that ought to be done when the enemy has been beaten by 4 to 1, for such was the score. Two of the Sherwin-Williams Company's Cleveland officials, Mr. Martin, manager of the trade sales department, and Mr. Ford, the advertising manager, who were enjoying their first sight of Canada's national winter sport, felt so proud of their team that they entertained them to an oyster supper afterwards. A return match is likely to be played shortly.

Milk Cans AND Milk Can Trimmings

Patented January, 1901.

IN addition to our regular lines of Milk Cans, we have this year introduced a new feature that is sure to be appreciated by every farmer—by sinking the handles into the body of Can, making them flush with body (as shown in cut) thereby doing away with the complaint of the handle of one Can knocking holes into and bruising the other Cans.

Handles sunk in this way will carry much heavier weight, as well as stiffen body of the Cans. To distinguish this Can from our other lines, it is called the ***"Eureka."*** All our Broad Hoop Milk Cans are made with our Patent Roll Bottoms.

THE THOS. DAVIDSON MFG. CO., Limited, MONTREAL, P.Q.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, January 31, 1902.

HARDWARE.

THERE is a good business doing on orders for Spring delivery, as well as increased trade for smaller lots for present requirements. On the whole this week has been the best of the year, so far, and in addition to the sales effected, collections are reported fair. There is no special feature in the market. Prices on all lines seem to be pretty steady.

BARB WIRE.—Business for spring is fairly active. The price is $3 per 100 lb. f.o.b. Montreal.

GALVANIZED WIRE.—In this there is not as much doing. We quote as follows: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—A good demand continues. Bright iron and annealed, Nos. 0 to 9, sell for $2.60 per 100 lb. f.o.b. Montreal, Toronto, Hamilton, London, St. John and Halifax. We quote extras as follows: No. 10, 6c.; No. 11, 12c.; No. 12, 20c.; No. 13, 30c.; No. 14, 40c.; No. 15, 55c.; No. 16, 70c.

FINE WIRE.—A moderate trade is doing. The discount is 22½ per cent.

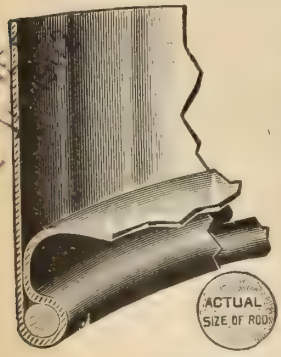
SPRING WIRE.—This is about the same. There is a small movement. We quote $1.25 extra.

COPPERED AND TINNED WIRE.—Trade is rather dull. Coppered, extra, 60c.; tinned, $2 per 100 lb.

BRASS AND COPPER WIRE.—There is only a moderate demand. The discount on both wires is 60 per cent.

FENCE STAPLES.—There is not much doing. The discount on poultry net staples has been changed from 25 per cent. to 30 per cent. Blind staples are now 40 per cent. Fence staples, we quote, per 100-lb. keg, bright, $2.90; galvanized, $3.25.

WIRE NAILS.—There is a growing demand in wire nails. Trade is, however, quiet. Our quotations are as follows: $2.55 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.



CUT NAILS.—A fair trade continues. We quote: $2.35 per keg for small lots and $2.27½ for carlots. The discount on flour barrel and coopers' nails is 40 per cent.

HORSE NAILS.—There is but little doing. We quote: "C" brand at 50 and 7½ per cent. off and "M" brand at 60 per cent. off on oval and new city heads and 66 2-3 per cent. off for new countersunk heads.

HORSESHOES.—The demand for horseshoes is very light. We quote: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—A moderate demand is felt this week. It is a slight improvement over last week's business. Discounts are: Flat head bright, 87½ and 10 per cent. off list; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.

BOLTS.—Several good orders for spring were booked this week. The demand, on the whole, is light. We quote: Norway carriage bolts, 60 and 5 per cent.; common, 55 and 5 per cent.; full square carriage bolts, 60 and 5 per cent.; machine bolts, 55 and 5 per cent.; coach screws, 70 per cent.; sleigh shoe bolts, 70 per cent.; blank bolts, 60 per cent.; bolt ends, 60 per cent.; plough bolts, 55 and 5 per cent.; tire bolts, 67½ per cent.;

"SAMSON" MILK CANS AND BOTTOMS

THE ONLY PERFECT TRIMMING ON THE MARKET.

Has many imitations, but being protected by patents its Sanitary, One-piece, and other leading features **cannot** be copied.

All other styles of bottoms **are** pieced.

The "Samson" is much stronger than pieced bottoms can possibly be made.

Has no place for dirt or sour milk to lodge.

Insist on getting "Samson" Milk Can Trimmings, and do not buy any other "just as good."

Always in Stock } "Samson" Delivery Cans and Pail Bottoms. Tinned Sheet Iron in all gauges and sizes.

BRAND "DESERONTO."
Especially adapted for Car Wheels, Malleable Castings, Boiler Tubes, Engine Cylinders, Hydraulic and other Machinery where great strength is required; Strong, High Silicon Iron, for Foundry Purposes.

The Robin Hood Powder Company
If you want the best Trap or Game load in the world, buy "Robin Hood Smokeless," in "Robin Hood" Shells. It is quick, safe, and reliable. Try it for pattern and penetration from forty to seventy yards against any powder on the market. We make the powder, we make the shells, and we load them. Write for our booklet, "Powder Facts."
The Robin Hood Powder Company
SWANTON, VT.

stove bolts, 67½ per cent. To any retailer an extra discount of 5 per cent. is allowed. Nuts, square, 3¾c. per lb. off list; hexagon nuts, 4c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—A fairly good trade is being done and business is improving. We quote as follows: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 55c. per roll; tarred fibre, 65c. per roll; O.K. and I.X.L., 70c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE.—There is a fairly active market in cordage this week. Prices are steady. Binder twine is commencing to be inquired after, though the demand is only a very light one. It is quoted at 9½c., sisal, and 11c. for manila. We quote as follows: Manila, 16c.; British Manila at 13½c.; sisal, 12c. and lathyarn at 10½c. Manitoba prices are: Manila, 16c.; British manila, 14½c.; sisal, 13c. and lathyarn, 12c.

RIVETS AND BURRS.—There is no improvement. The discounts are: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, 35 and 5 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—A fair business is doing at $1.25 per 100 square feet.

POULTRY NETTING.—This is being inquired after more freely. Canadian or English is quoted at a discount of 60 per cent. off 2 x 2 mesh, 19 wire, and 55 per cent. off 2 x 2 mesh heavier, Canadian list.

HARVEST TOOLS.—There is an active market. The discount is 70 per cent.

FIREBRICKS.—Only a moderate business is doing. We quote: Scotch, $19 to $23.50 and English, $18.50 to $22.50 per 1,000.

CEMENT.—Trade is dull. We quote: German cement, $2.30 to $2.40; English, $2.25 to $2.35; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.20 to $2.30 ex-cars.

METALS.

There is a fair trade passing for the time of year, and prices in general are firm. Recent advices from the English markets show that prices on Canada plate and black sheets are very firm, which is likely to affect import orders for spring to a considerable extent. Copper on the United States markets has exhibited a firmer tone, and two advances of ½c. have occurred during the week. This is thought to be due to the heavy buying being done. The foreign markets also show advances in ingot copper and tinplates.

PIG IRON.—A moderate trade is doing this week. A slight improvement is noticed. We quote: Summerlee, $21 to $21.50; Canadian, $18.50 to $19.

BAR IRON.—There is a fair trade doing. Prices are quite firm. We quote as follows: Merchants' bar, in carlots, $1.87½, and in small lots, $1.95. Horseshoe iron is worth $2.15 to $2.20.

BLACK SHEETS.—There is not much business being done in this line. Our

Canadian Distributing Agents for Grippin's Crack Filler.

quotations are as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—The demand is still small. We quote as follows: No. 28, Queen's Head, $4.40; Apollo, 10½ oz., $4.40; Comet, $4.25 with 10c. extra in less than case lots.

INGOT COPPER.—The movement is not large. The price is 14½c.

INGOT TIN.—The demand is only fair. Straits are worth 27c.

PIG LEAD.—Business in pig lead is active. Prices are firm, but steady. We quote: $3.15 to $3.20.

LEAD PIPE.—There is not much doing. Quotations are 7½c. for composition waste, and 7c. for ordinary. The discount is 35 per cent.

IRON PIPE.—In black pipe there is a very good demand and prices all around show a firmer tendency. Our quotations are as follows: Black pipe, ¼, $2.75 per 100 feet; ⅜, $2.75; ½, $3.15; ¾, $3.70; 1-inch, $5.25; 1¼, $7.40; 1½, $8.90; 2-inch, $12.25. Galvanized, ⅜, $3.55; ½, $4.15; ¾, $5.05; 1-inch, $7.25; 1¼, $10.10; 1½, $12.15; 2-inch, $16.55.

TINPLATES.—There is a very small movement. We quote: Charcoal, $4.25 to $4.50; cokes, $3.75 to $4.

CANADA PLATE.—There is a fair trade doing this week. We quote as follows: 52's, $2.65 to $2.70; 60's, $2.75 to $2.80; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL.—There is a moderate business doing. Nothing new in prices. We quote: Sleigh shoe, $2.05; tire, $2.15; bar, $2; spring, $2.85; machinery, $3.00, and toe-calk, $2.60.

SHEET STEEL.—Trade is fair. We quote: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—A better inquiry is experienced this week. We quote: Black Diamond, 8c.; Jessop's, 13c.

TERNE PLATES.—The market is still quiet. We quote: $7.75 to $8.

COIL CHAIN.—A good business is being done on all lines. Prices are steady. We quote as follows: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7¼c. per lb.; 5-16, $4.80; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.85; 9-16, $3.75; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—There is but little doing. We still quote $5.75 to $6.25.

ANTIMONY.—A slight improvement, but still quiet. The price is 10c.

ZINC SPELTER.—There is very little demand. The price is 5c.

SOLDER.—A steady demand keeps up and prices are well maintained. We quote: Bar solder, 18c.; wire solder, 20c.

PAINTS AND OILS.

Turpentine on the primary markets is as strong as ever, but there is nothing new to report. Linseed oil has also assumed a stronger position, both for present and future deliveries. Local prices on both turpentine and linseed oil remain unchanged. Paris green continues to be booked in good quantities at current prices, for delivery during the season. Business in mixed paints, white lead and painters' materials, generally, is very good for this time of the year, and it is noticeable that the deliveries called for are heavier than is usual. We quote as follows:

WHITE LEAD.—Best brands, Government standard, $5.87½; No. 1, $5.50; No. 2 $5.12½; No. 3, $4.75; No. 4, $4.37½ all f.o.b. Montreal. Terms, 3 per cent. cash or four months.

DRY WHITE LEAD—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC — Pure dry, 6¼c.; No. 1, 5¼c.; in oil, pure, 7¼c.; No. 1, 6¼c.; No. 2, 5¼c.

PUTTY — We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200 lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL—Casks, 7c.; 100 lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD — Genuine red lead in casks, $4.50; in 100-lb. kegs, $4.75; less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE—Ground, casks, 5c.; less, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL—Raw, 75c.; boiled, 78c. in 5 to 9 bbls., 1c. less, 10 to 20 bbl. lots open, net cash, plus 2c. for four months. Delivered anywhere in Ontario between Montreal and Oshawa at 2c. per gal. advance and freight allowed.

TURPENTINE.—Single bbls., 67c.; 2 to 4 bbls., 66c.; 5 bbls. and over, open terms.

SHELLAC VARNISH — Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS—$1.20 to $1.45 per gal.

CASTOR OIL—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.
SEAL OIL—47½ to 49c.
COD OIL—32½ to 35c.
PARIS GREEN — Petroleum barrels, 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

There is a fairly good demand this week, and prices on several lines are becoming firm. Iron, both wrought and machinery scrap is very scarce, especially the latter, and dealers are expecting an advance in the near future. We quote: Heavy copper and wire, 10 to 10½c. per lb.; light copper, 9c.; heavy red brass, 9c.; heavy yellow, 9c.; light brass, 4c.; lead, 2⅜ to 2⅝c.; zinc, 2 to 2¼c.; iron, No. 1 wrought, $14; machinery scrap, $14; stove plate, $8 to $9; light iron, No. 2, $5 per ton; malleable and steel, $4; rags, country, 60 to 70c. per 100 lb.; old rubbers, 6 to 6½c. per lb.

GLASS.

There is nothing new to report in glass. Orders for import are coming in well, and prices remain firm. Our quotations are as follows: First break, 50 feet, $2.10; second, $2.20 for 50 feet; first break, 100 feet, $4; second break, $4.20; third break, $4.70, and fourth break, $4.95.

HIDES.

There is very little doing. We quote: No. 1 hides, 7½c.; No. 2, 6½c.; No. 3, 5½c. Sheepskins, 65c.

ONTARIO MARKETS.

Toronto, January 31, 1902.

HARDWARE.

WHILE for in the way of immediate shipment the wholesale hardware trade is at present not active, a good many orders are being booked for future delivery, and the outlook for spring trade is assuring. Milk can trimmings are going forward quite briskly. Sap buckets are now beginning to be shipped, for which about the usual complement of orders have been booked. Business in tinware and enamelled ware shows some signs of improvement as far as the demand is concerned. There have not been many changes in prices. The only one worthy of note is in copper rivets and burrs, in which a sharp decline has taken place.

BARB WIRE—A number of orders have been booked during the week for future shipment, but from stock very little is being done. We quote as follows: F.o.b. Cleveland, $2.77½ for less than carlots, and $2.65 for carlots. From stock Toronto, $3.

GALVANIZED WIRE — The conditions are much the same as in regard to barb wire, the demand from stock being light and for future shipment good. We quote: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE—A few orders for future delivery are being booked in oiled and annealed wire. Nothing is being done in hay-baling wire. Base price, $2.60 per 100 lb. Oiling 10c.; coppering, 60c., and tinning, $2 per 100 lb. extra. Delivery points, Toronto, Hamilton, London and Montreal, with freights equalized on those points.

WIRE NAILS—Some orders are being booked for future account, but very little is being done from stock, which is, of course, to be expected after the heavy buying there was before the recent adjustment of prices. Both here and in the United States prices are firm. The nail manufacturers in the latter country hold a meeting on February 1 for the purpose of perfecting the agreement entered into at a meeting held in Pittsburg some time ago. We quote $2.55 for less than carlots, and $2.50 for carlots. Delivery points, Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS—A few small nails are going out, but trade is, on the whole, limited. We quote base price $2.35 per keg, with 7½c. allowance on carlots.

HORSE NAILS — Not much doing. Discounts are as follows: "C" brand, oval head, 50 and 7½ per cent., and on "M" and other brands, 50, 10 and 5 per cent. Countersunk head 60 per cent. All the manufacturers are now understood to be selling off the same list.

HORSESHOES—Business is of an average character for this time of the year. We quote f.o.b. Toronto as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

SCREWS—A fairly good business is being done. Discounts are as follows: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.

RIVETS AND BURRS—The price of copper rivets, with the usual proportion of copper burrs, are quoted at 45 and 10 per cent., a reduction of 20 per cent. Copper rivets alone are 30 and 10 per cent. Trade is good in iron rivets and burrs. Small cold punched rivets are in active request and very strong in price. We quote: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 and 10 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS — A good demand is still reported. We quote as follows: Carriage bolts, common ($1 list), 55 and 5 per cent.; carriage bolts, full square ($2.40 list), 60 and 5 per cent.; carriage bolts, Norway iron ($3 list), 60 and 5 per cent.; machine bolts, all sizes, 55 and 5 per cent.; coach screws, 70 per cent.

ROPE—Trade is quiet, owing to the high prices ruling. Most of the retailers appear to have placed their orders for future delivery when prices were about 3c. per lb. lower than they are at present. We quote: Pure manila, 16c.; British manila, 13½c.; sisal, 12c.

CUTLERY—Business in cutlery is occupying but little attention.

SPORTING GOODS—Some orders are being booked for spring delivery, but very little is being done outside that.

DAIRY SUPPLIES—The demand for milk can trimmings continues good, and shipments are going forward freely. Discount 25 per cent.

TINWARE—Business shows some improvement and an improvement from this out is looked for. Discount 40 per cent.

SAP BUCKETS—About the usual number of orders have been placed and shipments

are beginning to go forward pretty freely. Discount 40 and 10 per cent.

ENAMELLED WARE—Business is recovering somewhat from its recent quietude.

SCREEN DOORS AND WINDOWS—Trade on future account is brisk. Common doors, 2 or 3 panel, are quoted f.o.b. factory points as follows: Walnut, stained, 3-in. style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-in. style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1 70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

HARVEST TOOLS — A few orders are still being booked for future delivery. Discount 70 per cent.

SPADES AND SHOVELS—Some orders are being booked for spring delivery, but not a great deal is being done. Discount 40 and 5 per cent.

GREEN WIRE CLOTH—A fair business is being done for summer delivery. We quote $1.25 per 100 square feet.

CEMENT—Trade in cement is recovering from the depression usually felt in January, and a number of orders are now confidently ecpected. We quote: Canadian Portland, Rathbun's "Star," $2.25 to $2.65; "Beaver," $2.10 to $2.50; "Ensign," $1.90 to $2.30; German, $3.15; English, $3; Belgian, $2.50 to $2.75; Canadian hydraulic, $1.25 to $1.50 per bbl.

METALS.

In steel and iron the market continues firm, and quite a strong feeling has developed in regard to tinplates and Canada plates. Tin is weak, but copper is excited and firmer.

PIG IRON—The market rules firm. This is particularly true of the market in the United States, where, according to The Iron Trade Review of January 30, consumers are already covering requirements for the third quarter of the year. The idea as to price on track Toronto is still $17.50 to $18 for No. 2 foundry.

BAR IRON—The tone of the market is gathering strength, although no change has taken place in quotations. In the United States last week, however, the price was advanced $2 per ton. Base price $1.95 to $2.05. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

STEEL—The market is decidedly firm for practically all kinds of steel, and importers report that they cannot get prompt delivery from the manufacturers either in the United States or in Great Britain. We quote as follows: Merchantable cast steel, 9 to 15c. per lb.; drill steel, 8 to 10c. per lb.; "B C" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2.25; reeled machinery steel, $3, hoop steel, $3.10.

BLACK SHEETS — The demand is fair for this time of the year. We quote: Common, $3.15 for 28 gauge; and dead flat, $2.50 for 26 gauge.

CANADA PLATES—Business is quiet from stock, but orders are being booked freely for forward shipment. We quote as follows: All dull, $3 00; half polished, $3.10; all bright, $3.75.

GALVANIZED SHEETS — The demand is good both for shipment from stock and on future account. We quote: "Queen's Head" brand at $4.50 in case lots, and $4 65 in less quantities.

TIN—The market is again easier. In London on Wednesday the market closed 12s. 6d. lower on spot and 5s. lower on futures, and New York has declined of sympathy, although an improvement in the latter market is looked for. Locally there is a fair business doing in small lots, for which $28 to $29 per 100 lb. is the ruling price.

TINPLATES—Prices are stiffening in the British markets. This has stimulated the demand here, although no change has been made in quotations. We quote I C, usual sizes, at $4 per box.

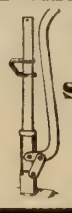
TINNED SHEETS — The demand has improved materially, and there is a good business being done. We quote as follows: 72 x 30, up to 24 gauge, 7½c.; ditto, up to 26 gauge, 8c.

TERNE PLATES—Quiet. We still quote: I C, 20 x 28 gauge, at $8 50.

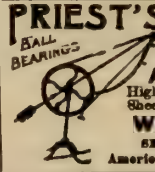
COPPER—A reaction has set in and the outside markets are excited and rapidly advancing. On Wednesday, in London, spot copper closed £1 7s. 6d. higher and futures £1 10s. higher. Locally there has been a heavy demand during the past week and quotations are $1 higher for ingot, now being $15 per 100 lb.

BRASS—Business is quiet and discount on rod and sheet is 15 per cent.

SOLDER—A fair trade is being done. We quote: Half-and-half, guaranteed, 19c.; do. commercial, 18½c.; refined, 18c.; wiping, 17½c.



LEAD—There is a light demand for small lots. The outside markets are steady to strong. We quote: $3.50 to $3.75 for pig lead and $5 for bar.



IRON PIPE—Trade keeps fair, with the tone of the market in regard to prices firm. We quote: Black pipe, $5.40 for 1-inch.; galvanized, $7.95 for 1-inch.

ZINC SPELTER—This is moving in small quantities at $5.50 to $6 per 100 lb.

ZINC SHEET—The demand is fairly good.

We quote $6 to $6.25 in casks and $6 25 to $6.50 in part casks.

ANTIMONY—The demand has been active during the past week at 10c. per lb.

PAINTS AND OILS.

The paris green market is somewhat weaker this week, some green of United States manufacture being quoted at lower figures than the Canadian product. Lead for future delivery continues active. Raw and boiled linseed oil are also active, and the price is firm. Turpentine is quiet, but the previous advance has been sustained. Dry colors are quiet. Prices rule about the same. We quote :

WHITE LEAD—Ex Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2. $5.12½; No. 3, $4.75; No. 4, $4.37½ in pkgs. of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs. ; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb. $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4 ; ditto, kegs of 100 lb., $4.50.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.

BENZINE—In barrel lots, 16½c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING — 65c. per 100 lb. ; Gilders' whiting, 80c.

GUM SHELLAC — In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2 25 to $2.35 ; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2.25; bladders, in 100 lb. kegs, $2.40; bulk in bbls., $1.90 ; bulk, less than bbls. and up to 100 lb., $2.05 ; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE — Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity ; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1.20 to $1.30 per gal.

CASTOR OIL — English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 4 barrels, 77c.; boiled, 80c.; 5 to 9 barrels, raw, 76c.; boiled, 79c., delivered. To Toronto, Hamilton and London, 2c. less.

TURPENTINE—Single barrels, 68c.; 2 to 4 barrels, 67c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

The retail trade is steady, while jobbers are booking a number of stock orders for delivery later on in the year. We quote as follows : Under 26 in., $4.25 ; 26 to 40 in., $4.65; 41 to 50 in., $5.10 ; 51 to 60 in., $5.35 ; 61 to 70 in., $5.75; 71 to 80, $6.25 ; 81 to 85, $7 ; 86 to 90, $7.75 ; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days.

OLD MATERIAL.

The copper market is firmer in the United States and it has a corresponding effect in the steadying of the prices for old material. We note no further changes this week. We quote as follows : Agricultural, 60c. per cwt. ; machinery cast, 60c. ; heavy copper, 10c. per lb. ; stove cast, 40c. ; No. 1 wrought, 50c. per 100 lb. ; new light scrap copper, 7c. per lb.; bottoms, 7½c.; coil wire, 10c.; light brass, 5c.; heavy yellow brass, 7½c. ; heavy red brass, 8c. ; scrap lead, 2¼c. ; zinc, 2c. ; scrap rubber, 6c. ; good country mixed rags, 50 to 60c.; clean dry bones, 40 to 45c. per 100 lb.

PETROLEUM.

Prices are steady, with a good movement from stock. We quote: Pratt's Astral, 16½ to 17c. in bulk (barrels, extra) ; American water white, 17 to 17½c. in barrels ; Photogene, 16½ to 17c. ; Sarnia water white, 16 to 16½c. in barrels; Sarnia prime white, 14½ to 15c. in barrels.

COAL.

The stock of bituminous coal on hand is very light, as is also the stock of nut coal. Prices for the latter have locally advanced 25c. per ton, but the prices remain firm and unchanged for importation. We quote at international bridges : Grate, $4.75 per gross ton; egg, stove and nut, $5 per gross ton ; soft coal, $2.50 to $3.25 in bond, according to grade.

MARKET NOTES.

Ingot copper is quoted $1 per 100 lb. higher.

Copper rivets and burrs are 20 per cent. lower.

PERSONAL MENTION.

Mr. W. S. Leslie, of A. C. Leslie & Co., Montreal, was in Toronto on Thursday in the interests of his firm.

BANQUET AT HAMILTON.

Australian Trade Discussed.

ABOUT 100 guests attended the monthly banquet of The Canadian Manufacturers' Association at the Hotel Royal, Hamilton, on January 24, the first banquet this association ever held out of Toronto. At the head of the table was E. A. Brice, the first vice-president of the association; at his right hand being the Hon. Dr. Montague, one of the principal guests of the evening. W. K. George, vice-president for Ontario; J. P. Murray, chairman of the reception committee; W. P. Bull, Fredric Nicholls, Geo. H. Hees, and P. W. Ellis, all of Toronto; H. S. Brennen and Mayor Hendrie, of Hamilton; John Bertram, of Dundas; John Baillie, of Montreal; E. F. Tillson, W. A. Dowler, and W. D. Robinson, Tilsonburg; J. W. Taylor, Johannesburg, South Africa; E. T. Lower, Stamford, Conn.; Harry Sites, Woodstock; J. B. Henderson, Paris, and C. R. H. Warnock, Galt.

After the dinner was disposed of, Mayor Hendrie, in a neat speech, welcomed the visiting manufacturers to Hamilton. He then gave place to the Hon. Dr. Montague, the principal speaker of the evening, who took for his theme "The opportunities for Canadian Trade in Australia." Dr. Montague said he saw no reason why there could not be made in this Dominion the $40,000,000 worth of goods we now annually import from the United States, and give employment to many heads of families who now had to go elsewhere in quest of a living. He claimed that the Dominion should have a proper share of the Empire's trade. He dwelt on the reception accorded him in Australia, and declared, that without a doubt, Canada and the Canadians held a warm place in the hearts of the Australasians. The growth of Australia had been marvellous, its shipping tonnage now being 21,000,000, and the total value of its imports and exports equalling $383,000,000. Canada, he declared, might share in that trade if it was gone about in the right way. He recommended the establishment of a better steamship service between this country and that colony; the establishment of warehouses for Dominion productions in Australia, the sending of eight or ten business men to work up trade, and the publication of a journal describing Canada's varied industries.

No. 893.—The Watson, Foster Co., Limited.

The most successful number of its character in the 1902 line. The stripe—shaded off the ground—gives a depth to the design. Especially on rich colored grounds it is handsome in the extreme.

No. 1182.—The Watson, Foster Co., Limited.

A fleur-de-lis pattern of striking effect, on rich grounds of French maroon, green or blue, with gilt figure. It is a correct and effective decoration for halls, churches, lodge rooms, etc. Dealers should note this design and sample it at once.

THE PAINTERS PERFECT WHITE LEAD

is beautifully soft and fine in the grain. It mixes well with Linseed Oil, forming a creamy smooth paint of great covering power and undoubted durability. Every atom is paint — perfect paint — and there is no loss or residue of any kind. The Painters Perfect White Lead has become very popular everywhere. Book early to ensure early shipment.

HEATING AND PLUMBING

BANQUET OF THE HAMILTON PLUMBERS.

THE first annual banquet of the Hamilton Master Plumbers' Association was held at the Waldorf, on the evening of January 27, and proved to be a thoroughly enjoyable affair. It was presided over by the president, A. Rogers, and the 40 guests and members present did ample justice to the good things provided for their consumption.

Not the least interesting feature of the euening's proceedings was the presentation of a handsome ring, suitably engraved, to W. D. Smith, by W. J. Walsh, the retiring president, on behalf of his fellow-members as a mark of their appreciation for Mr. Smith's valuable services on behalf of the Association.

The toast of the "Hamilton City Corporation" was responded to in an appropriate way by Alds. Hugh S. Wallace and Wm. H. Findlay.

Besides the pleasing music provided by an efficient orchestra, a number of songs were given by such popular men as Andrew Mann, Chas. E. Marks, Ald. Findlay, Ald. Wallace, H. W. Anthes and W. L. Helliwell.

Amongst the guests present we notice the following from Toronto: W. H. Meredith, Wm. Mansell, F. W. Armstrong, Samuel Topping, Robert S. Sumerville, Charles E. Marks, A. W. Mann, J. H. Patterson, H. W. Anthes and W. L. Helliwell.

NEW CHURCH SCHOOLHOUSE.

On a site immediately south of the main church, a new Sunday-school will be erected by the members of Grace Church, Ottawa. The hall is to have a frontage of 30 feet on Elgin street and will extend back 60 feet, the whole to be built of brick at a cost of $3,000. It will conform with the design of the church in point of architecture. Tenders will be called for without delay so that work can be commenced on the building early in the spring.

BUILDING PERMITS IN TORONTO.

This week fewer building permits than usual were issued in Toronto. The cold weather is probably accountable for this. As it is the building operations are far behind the requirements of the rapidly-growing city of Toronto. The following permits have been granted from the city commissioner's office: Rev. W. E. Hassard, for the erection of a small addition to the schoolroom of the Crawford street Methodist church, to cost about $240; Thos. Oliver, for alterations of brick and plaster to his dwelling on 424 Wilton avenue, to cost $600; S. F. Aberdeen, for the erection of a two-storey and attic brick dwelling on 330 Gladstone avenue, to cost $1,600; J. Jeffrey, for the erection of a two storey dwelling with a brick front and roughcast sides and back on Albany avenue, to cost $1,000; J. MacDonald, for alterations and new fronts and partitions to stores on 1184–1188 Queen street west, to cost $900; Gough Bros., for alterations of wood and iron to their store on 6 and 8 Queen street west, to cost $1,500; Jos. Wilby, for the erection of a pair of two-storey brick and roughcast semi-detached dwellings at 65 and 67 Woodbine avenue, to cost $2,000, and John McKenzie, for a two-storey brick stable at 389 Berkeley street, to cost $200.

SOME BUILDING NOTES.

A new church is being built at Clanbrassil, Ont.

J. B. Jackson's cold-storage warehouse at Simcoe, Ont., is about completed.

Silverton & Wilson are erecting a commodious store and dwelling at Inwood, Ont.

Tenders are being received at Lebanon, Ont., for the erection of a new brick schoolhouse.

Plans are being prepared for the erection of a large hotel at North Sydney, C.B., next summer.

Mayor Matthews has awarded the contract for his new residence at Fort William, Ont.

It is rumoured that the Dominion Coal Co. is going to erect a plant at Quebec, costing $75,000.

A new stove foundry, 50 x 120 feet, is being erected at St. John, N.B., by Ex-Ald. John E. Wilson.

A new cheese factory is to be built in the spring, near Fordwich, Ont., and already most of the brick has been hauled to the spot.

Amherst, N.S., has passed by-laws enabling the town council to borrow $10,000 to erect and equip suitable buildings for the Maritime winter fair.

A new two-storey brick separate school of eight rooms is to be commenced early in the spring at Port Arthur, Ont. The structure will cost about $10,000.

PLUMBING AND HEATING CONTRACTS.

Purdy, Mansell & Co., plumbers and steamfitters, Toronto, have secured the contract for the plumbing and hot-water heating of a house on Glen Road, Toronto, for C. A. Dinnick; also the plumbing and heating of two houses on Madison avenue for the same party, and the automatic fire-protection contract for the Massey Harris Co., Limited, Toronto.

PLUMBING AND HEATING NOTES.

A. Hall & Son, plumbers, Coaticook, Que., have registered.

A PRAISEWORTHY IDEA.

With that thoughtfulness for the comfort of their men, for which The Sherwin-Williams Co. are famous, they have gone to some trouble to provide a lunch-room in the Montreal factory where the men can enjoy their mid-day meal away from the smell of the paint. Heretofore, they have been eating a cold lunch in their workrooms, and everyone who has been in a paint factory knows the discomfort which must attend in that case.

The new room is bright and clean; tables and dishes are provided, and the men are given coffee or tea and milk without charge. A library, containing books, illustrated papers, etc., is connected with it; cards, checkers and other games are also provided, so that the men can pass the noon-hour very pleasantly.

This is not a new thing with the company. In their Cleveland factory large rooms are provided for this purpose and a good lunch given to the employes. It is a laudable idea, and The Sherwin-Williams Co. are deserving of much credit.

CANADA RADIATORS

Their use means economy in both cost of plant and fuel.

POINTS OF MERIT

which the radiators possess over all others :

FIRST—They are the only cast iron radiators made with perfect circulation. The steam and water must travel through each loop after entering before discharging at the return end of the radiator.

SECOND—They are the only steam radiators in which there is any effective provision made for drawing off the air from the inner loops, and, therefore, no air pocketing and corresponding cold ends.

THIRD—They are the only radiators that are adapted for use in either steam or hot water, and, therefore, where a change is made in the heating system the same radiator will answer.

The Fairbanks Company

747 - 749 Craig Street, MONTREAL.

MANITOBA MARKETS.

WINNIPEG, January 27, 1902.

THE week presents no changes of any kind. Business is steady, and preparations are being made for spring delivery. The new prices given last week are generally in force. Paints, oils and glass are all dull, and there will not be much move now until spring opens. Linseed oil is held at the decline of last week. Reports are to hand that glass is lower in price in Belgium, but no changes are to be noted here. The implement dealers' convention, to be held here on February 12 and 13, promises to be a very interesting one, and a large attendance of dealers from all over the Province is expected.

Price list for the week is as follows:

Prepared paints, pure liquid colors, according to shade and color, per gal.	$1.30 to $1.90

NOTES.

Application has been made to the Legislature of Manitoba for the incorporation of the Winnipeg Hedge and Wire Fence Co. with a capital of $75,000.

A new hardware store is being opened in the town of Elgin by W. J. McGuire, and another in Margaret by Mr. Reekie.

Among the visitors to the city during the past week has been Mr. John H. Tilden, Hamilton, president of the Gurney Stove and Range Co., Winnipeg. This is Mr. Tilden's annual trip and he expresses satisfaction at the growth and prosperity of the West. Mr. H. J. Clare, of Clare Bros., is succeeding Mr. Horace Wilson as manager of the company's branch at this point. It is expected that the business of the concern will be much extended during the coming season.

WILL REPRESENT THE McCLARY CO.

Mr. Douglas Macpherson, of Toronto, has accepted a position with the McClary Manufacturing Co., of London, and will represent that firm in Southern Ontario.

For many years Mr. Macpherson has been connected with the Kemp Manufacturing Co., and since his return, 15 months ago, from service in South Africa has been employed as assistant manager of the Macdonald Manufacturing Co. The southern trade will no doubt be pleased to meet this bright young business man.

CURRENT MARKET QUOTATIONS.

January 31, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

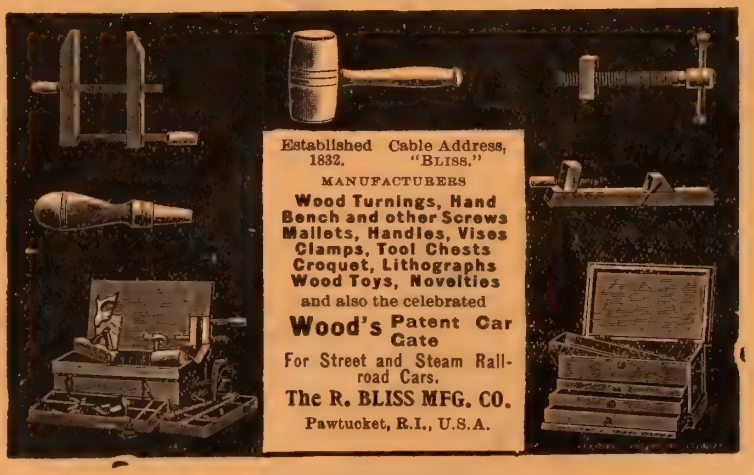
BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.



THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

1902 GARDEN HOSE. 1902

We manufacture the most popular and best selling lines of Garden Hose in Canada. Our "Maltese Cross" brand we confidently recommend as the finest Garden Hose on the market.

We have other grades not quite so expensive, but good reliable brands, viz.: "Lion" (the popular medium-priced hose), "King" "Sun" and "Leader."

Our "Kinkproof" (wire wound) hose is wired by a special process controlled solely by ourselves, and is so constructed that it may be cut at any wind of the wire without loosening or uncoiling, the wire being self-gripping throughout each length.

THE PROPRIETOR'S STORY.

ALABASTINE we have been selling nigh on to twenty years, and know it to be reliable.

We dealers also know that Alabastine is what is in demand, and that to sell anything else for coating walls, we would have to do so on the recommendation that it was the same thing, or just as good as **ALABASTINE.** Would not offer a substitute when Alabastine is called for; no necessity to do that, as it is easier to sell Alabastine, and in handling it we do not incur any risk on account of infringement of patents.

Alabastine is ready for use by the addition of Cold Water, made so by the inventor, Mr. M. B. Church, who was the first to produce a cold water preparation that is thoroughly practical, that has superseded all hot water mixtures, and forced other manufacturers to **UNDERTAKE** the use of the cold water process. Then, again, Alabastine is made in Canada, by Canadian labor and from Canadian materials. It satisfies my customers.

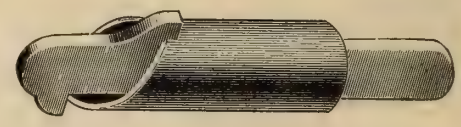
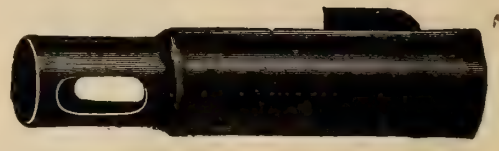
Supplies for the Maple Syrup Season



Sap Buckets.

Extra deep and straight. Three sizes. They possess many advantages over the ordinary flaring Buckets; being small in diameter they do not catch the rain or snow, and, as they are very deep, they hang perpendicularly and consequently will not overflow until full. Covers supplied if required. They nest close for shipping or storing.



We can also supply the ordinary Flaring or Western Sap Pails.

E. T. Sap Spouts.

Made of Retinned Steel. Strong and durable. Only require a ⅜-in. hole in tree. It does not cover the inside surface of the hole, therefore a larger amount of sap is obtained. Packed in cardboard boxes.

Maple Leaf Sap Spouts.

Made in Bronzed Steel. Require a ½-in. hole. Has a shoulder which prevents it being driven in too far. The hole in the tree is not exposed to wind and snow, consequently sap will flow longer. Packed in cardboard boxes.

Syrup Cans. Round or Square.

Plain or Decorated. Made in ¼, ½ and 1-gallon sizes—either Wine or Imperial measure.

A FULL STOCK CARRIED IN ALL LINES. ORDERS SHIPPED PROMPTLY.

WHEN WRITING ADVERTISERS PLEASE MENTION THAT YOU SAW THEIR ADVERTISEMENT IN THIS PAPER

LOWER PRICES ON PARIS GREEN.

THE price of paris green as quoted by the different wholesale houses in Toronto shows an unusually wide range at present. While some houses claim to be still quoting the old figures, there are others whose figures are 2c. per lb. below them. At the reduced figures 1-lb. packages are being quoted at 16½c. instead of 18½c. as formerly, petroleum casks at 14¾c. and arsenic kegs at 15c.

As far as we can learn the reduction is due to the importation of paris green of both British and United States manufacture.

The bulk of the orders for paris green for the coming season appear to have been placed, but as buyers were guaranteed prices they will, of course, lose nothing by the decline.

Although the price of paris green is weak on the Canadian market, in the United States the conditions are the opposite. Iron Age, in its issue of January 30, says: "The demand for paris green has begun exceptionally early this season, and for the past two weeks has been quite large. For the last two years buyers have been reluctant to come into the market early, so that their readiness to buy at this time is the more marked. The quantity of green already ordered is accounted for by the small amount carried over from last season; also by the large planting of potatoes which is anticipated as a result of the high price of last year's crop. There is no price agreement among manufacturers, which results in a variety of quotations, ranging from a base price of 10¾ to 12c. per lb. Some makers charge ½c. advance over ton prices for smaller lots. The view is expressed that prices will go higher."

The import duty on paris green is a moderate one, being only 10 per cent.; but the standard of quality demanded by the Government is high, and it would be well for dealers to assure themselves that with the price they are getting quality.

All the paris green imported comes from the United States and Great Britain, and the quantity brought into the country during the last three years was as follows:

	1899.	1900.	1901.
Great Britain, lb....	231,963	211,051	270,226
United States, lb....	924	93,082	64,947

A GOOD SCHEME.

A COMMUNICATION has been sent to the Canadian Manufacturers' Association by Mr. H. C. MacLean, of Toronto, suggesting the consideration of a scheme for advertising Toronto in the Southern States as a summer resort.

"If the Manufacturers' Association were to go into it intelligently," says Mr. MacLean, "and devise some scheme properly systematized and managed, they could raise $25,000 for the purpose without difficulty."

The idea is a good one, and should receive the consideration it deserves. The tourist question is large enough and important enough to warrant the Association applying its energies to advertising not only Toronto, but other cities as well, in which it has branches. In furtherance of the scheme, the cooperation of the railways and steamboat companies could also be sought, and, no doubt, it would be obtained.

The attractions of Canada as a summer resort for residents of the South are not unknown. Yearly they are becoming better known, but there is still a great deal of room for improvement. This can only be done by liberal and legitimate advertising schemes, and there is no organization that is better qualified than the Canadian Manufacturers' Association to take the initiative in the matter.

It is an evidence that they are renewing their youth when old firms inaugurate a vigorous and judicious policy in regard to advertising.

THE LEAVEN OF BUSINESS.

Advertising is the little leaven which raises the business to a place of prominence and a condition of prosperity.

THE WARLIKE MR. FOSTER.

HON. GEORGE E. FOSTER declared the other night during a speech which he made at the National Club, Toronto, on the occasion of the banquet to Mr. Edgar Wills, that he would like to see the people of the British Empire roll up their sleeves and give the commercially hostile nations a taste of commercial war.

Mr. Foster was for several years Finance Minister of the Dominion. On the whole, he was an able Minister. We do not know that we have had any better. But after all his experience in that capacity, the irresponsibility of the professional politician seems to occasionally exhibit itself. A business man with a stake in the country would not have talked in the militant spirit that Mr. Foster did. Commercial warfare is no more a plaything than physical warfare. Like it, destruction accompanies it and serious losses are entailed on both sides. It is unworthy of Mr. Foster to talk of liking to see the British Empire wage a commercial warfare.

The instrument by which he would wage a commercial warfare is, of course, the tariff. Now, there is no one in Canada that knows more about tariffs than Mr. Foster. When framing the tariffs which obtained under his regime he, no doubt, had in mind the welfare of Canada, and did the very best he could as far as his light went. Hon. W. S. Fielding was, no doubt, actuated by the same spirit. The tariff that exists today, like the last that Mr. Foster brought down, could be improved upon, and, no doubt, will be in time, but surely Mr. Foster would not have us believe that the proper way to improve it is to turn it into an engine of commercial warfare.

Mr. A. E. Ames, the president of the Toronto Board of Trade, who followed Mr. Foster, entirely disapproved of the latter's sentiments. "We are big enough, or should be big enough, to stand on our own basis," declared Mr. Ames. In other words, Mr. Ames would have us work out our own commercial salvation without bothering ourselves as to the methods obtaining in other lands. Mr. Foster, on the other hand, would declare a commercial warfare against foreign countries whose fiscal policy met with his disapproval.

Mr. Foster is not the only one in Canada who is demanding commercial warfare. Before those militant spirits go any farther we would advise them to first sit down, and, like the king in Holy Writ, consider the costs and the possibilities. And as a preliminary, take the tariff in one hand and the Trade and Navigation Returns in the other.

FEATURES OF CANADIAN WINTERS.

THERE is scarcely anything in regard to Canada that is more misunderstood in Europe than its climate. To a great many, Canada is a land of snow. It is true that in certain parts of the country the winters are cold and snow is present for three or four months. On January 3, for example, the thermometer at Dawson, in the Yukon, registered a maximum temperature of 28 deg. below zero, and at Winnipeg it was the same. But even in these places the climate is so dry and the conditions for withstanding the cold so ample that inconvenience is seldom experienced.

The climatic conditions at those points are not, however, representative by any means of the climatic conditions ruling in Canada during the winter months. In Halifax, on the Atlantic coast, the thermometer, on January 3, was only 4 deg. below freeezing point, while at Victoria, on the Pacific coast, the temperature did not come within 4 deg. of freezing point, while in Toronto, where not one man in a dozen wears a fur cap during the winter months, there were 10 to 20 degrees of frost.

Snow on the Pacific Coast of Canada is a rare thing. On January 23rd last there was a snowstorm in that part of the country, the first for a year, and such an unusual thing was it that the newspapers came out the next day with flaring headlines, one of which read: "A Rare Snow Visitant." At Christmas time flowers are blooming in the gardens of Victoria, British Columbia, and a copy of The Victoria Colonist of January 24 announces that one of the local grocery firms has received two pounds of strawberries grown in the open air at Saanich, a short distance north of the Provincial capital. Coming east of the Rockies, it is a well-known fact that on the ranches in the Calgary district cattle are able to remain out on the prairie all winter.

Taking either the winter or the summer seasons, Canada has one of the most glorious and bracing climates in the world.

THE COLLINGWOOD STEEL PLANT.

AS soon as the weather is favorable the buildings under construction for The Cramp Steel Co. at Collingwood, Ont., are to be completed and a steel plant installed having a daily capacity of 600 tons. The company will manufacture girders, beams and rails in addition to merchant bar and billets. Considerable work will be provided for this steel plant by the acquisition of the Canada Atlantic and other Canadian roads by Dr. Stewart Webb and his associates. Dr. Webb is one of the directors of this steel company.

The buildings that are under construction for the steel plant are to be entirely of stone and steel. The plant will consist of a Bessemer converting plant equipped with two 7-ton converters, three cupolas for melting pig iron, mixers, blowing engines, hydraulic pumps and cranes complete. The total output of the converting plant will be 600 tons of acid steel daily, and the two open-hearth steel furnaces will have a minimum capacity of 100 tons of basic steel daily. The latter will be equipped with gas-producers and cranes of most modern design.

The open-hearth and the Bessemer plants are each in separate steel buildings, each 100 x 100 feet. They will be supplied with all accessories, such as bottom ovens, grinders, and an electric plant installed in an adjoining building. The pit-house will be built of stone, 70 x 70 by 30 feet high, and is an extension of the blooming building. The ingots will be rolled into 4 x 4 billets by a blooming train after they are taken from the soaking pits. These billets will be cut into suitable lengths by a massive hydraulic shear at the end of the blooming main tables. The plant will be one of the most modern and up to date on the American continent.

Twelve tubular boilers in a separate building, will supply the motive power.

The ore will be obtained from the mines of the company to a great extent. One of these at Sundridge is very promising. The ore is of Bessemer grade and a diamond drill will be put on in the spring. Ores from Lake Superior will probably supplement the ore from this mine.

ANNUAL MEETINGS OF BOARDS OF TRADE.

THE MONTREAL BOARD.

THERE was a large attendance of members at the annual meeting of the Montreal Board of Trade which was held on January 28 to elect officers for the coming year and to receive the report of Mr. Henry Miles, the retiring president.

In his address Mr. Miles touched on the position created by the disastrous fire and the difficulties and responsibilities created by it. He then touched on the transportation problem, which he said was the most important question of our day. The Parliament and Government is in sympathy with the progress they desire, which is none other than the acknowledgment of Montreal as the national port of the Dominion. He referred to the Hon. J. I. Tarte's letter on the subject, which he believed had fully grasped the situation. The difficulty at present exists, not with the railways, but with our waterways, harbors and inland tonnage. Our transportation facilities are unequal to the requirements of to-day. Our lethargy is serving to build up the Atlantic ports of the United States. To accomplish anything our business men should be united. In this way they would strengthen the hands of the public men who are willing to deal with this great question. The position also in regard to the equipment of the harbor was unsatisfactory. Difficulties and contentions should be put aside and the work pushed forward. The possible consolidation of the ocean liners with the land carriers in the United States was a menace to the St. Lawrence trade. The present conditions of the route required the greatest energy towards securing every improvement possible. He was pleased that they had strong prospects of having the next meeting of the Chambers of Commerce of the Empire at Montreal. The extension of the telegraph system to Belle Isle has been accomplished. The Marconi system is now being made use of in a limited way, and he hoped that it might be more extended. Its establishment would be an additional safeguard to navigation. The fire-insurance situation is unchanged. About a year ago the rates had been enormously advanced. This position, in the opinion of experts, can only be rectified by the expenditure of $300,000 in improving the fire protection of the city. And until the city has money to meet the expenses, and the city council reorganizes the fire brigade, the high rates will continue. The want of a new Customs examining warehouse was also noted. The business of the port warrants the request for a new building. He was pleased to announce the completion of the contract for the construction of a new fireproof home for the board. They had made an excellent bargain with the contractors. The cost of the new building will be $435,000. The estimated amount of the salvage was $60,000, and the amount of the contract was $375,000, which made up that figure. He concluded by offering testimony to the valuable services of the secretary, Mr. George Hadrill, whom he said had ever the Board's interest at heart.

The scrutineers, on the following day, reported at the adjourned meeting that these officers were elected :

President—Mr. Alex. McFee, representing the grain trade.

First vice-president—Mr. Arthur J. Hodgson, dairy produce.

Second vice-president—Mr. Geo. E. Drummond, iron.

Treasurer—Mr. Robert Munro, paints and oils, by acclamation.

Members of council—Messrs. James Thom, shipping; T. F. How, banking; W. W. Watson, sugar; James Davidson, stamped and enamelled ware; G. B. Fraser, dry goods; J. C. Holden, boots and shoes; P. W. McLagan, dairy produce; H. D. Metcalfe, grain; Hugh Watson, wallpaper; John J. McGill, rubber manufactures; Cornelius Coughlin, live stock, and R. McD. Paterson, fire insurance.

Board of arbitration—Messrs. E. B. Greenshields, Charles F. Smith, Robt. Reford, John McKergow, Robert Archer, James Crathern, Robert Bickerdike, James P. Cleghorn, Hon. Robert Mackay, John Macfarlane, Henry Miles and R. W. Macdougall.

After the newly-elected president took the chair, a hearty vote of thanks was accorded Mr. Miles, who gratefully acknowledged the same.

Mr. Alex. McPhee was pleased with the honor conferred on him by his election to the presidential chair. He promised that he, together with the council, would continue the work carried on last year—the deepening of the river to a uniform depth of 30 feet, and the improvement of the aids of navigation from that port to the sea. During the past season no fewer than nine steamers were lost on the Newfoundland Coast. Six of these belonged to the St. Lawrence trade. The council would do everything possible to remove the difficulties under which the St. Lawrence route labored. The council would also, as far as possible, further the extension of trade on the canals.

THE KENTVILLE, N S., BOARD

At least 75 members were present at the annual meeting of the Kentville, N. S., Board of Trade, when Presihent Sealy presented his report of the past year's proceedings of that body.

The committee on the fruit fair, which is to be held next fall, stated that they had secured the guarantee of the county council that in the event of there being a deficit the council would make one-half of it good.

A committee consisting of B. H. Dodge, M.P.P., H. H. Wickwire, M.P.P. and R. S. Eaton were appointed to present the matter to the Provincial Government. In reference to the Government report a letter from Acting-Premier Longley was received.

The Maritime winter fair, also was discussed as were also better connections and larger circuit on the telephone lines, and a speedway near the town. In regard to the speedway it was pointed out that the leading market for horses had become centred in King's county, from which place the majority of the horses purchased for Africa had come.

The election of officers for 1902 resulted as follows :

President—A. E. Calkin.
Vice-President—George E. Calkin.
Secretary—F. C. Rand.

BANQUET OF GUELPH BOARD OF TRADE.

The Guelph Board of Trade held its third yearly banquet at the Wellington Hotel last Friday evening, January 31. Over 100 were present, including a number of the business men of that city. A. F. H. Jones, the president of the board, performed the duties of chairman. On his right was the Hon. Geo. E. Foster, and on his left, A. E. Ames, President of the Toronto Board of Trade. E. R. Bollert occupied the vice-chair. When the menu had been disposed of and the toast of "The King" honored, the chairman followed in a short address. He recommended the formation of a Provincial board of trade composed of one or more members of the various boards of trade throughout the Province. They could meet once a year in Toronto, about the same time as the Legislature was in session, and discuss matters of trade. The great prosperity of the country during the past few years, was also noted.

"The House of Commons and the Legislature" was propsed by E. R. Bollert.

A. Guthrie, M.P., replied on behalf of the Commons. He was enthusiastically cheered. He had heard regret on all sides expressed that Mr. Foster was no longer a member. His ability made him of great service to his country. The press of both parties were apt to traduce anyone who were trying to do his duty. He was pleased at the healthy state of trade in Canada. We should have freer trade and fairer trade. He believed that the Mother Country in the east should be more looked to than the country to the south.

Lieut.-Col. Mutrie, M.P.P., was a stout opponent of the bonusing system. He believed only in helping old-established manufactories, which might have suffered from fire.

The toast of "Canada" was received

by the singing of "The Maple Leaf." As it was coupled with the name of the Hon. Geo. E. Foster, he rose amidst cheers to respond. We should have confidence in our country; we also should have confidence in ourselves, he declared. On us rests the responsibility of making Canada one of the greatest nations in the world. We have laid the foundations successfully and now had to follow a straight road.

A. E. Ames, President of the Toronto Board of Trade followed with a very practical speech. He believed in the country. The young men should advance in the footsteps of their fathers, and go beyond them.

The toast "Sister Boards of Trade" was also responded to by a number of others, as was also that of "The Agricultural Interests," to which Professor Reynolds responded. The other toasts were the "Manufacturing and Commercial Interests" and "The City and Country Interests." The last-named was responded to by the Mayor of Guelph.

STOVE PRICES HIGHER IN THE STATES.

THE Western stove manufacturers have advanced the price of steel ranges 10 per cent., and of cast ranges 5 per cent. As far as known the advance on heaters has not been definitely settled, and the new price on these goods may not be fixed until nearer the time when orders will begin to be placed for next season's trade. It is not expected that much will be done in the sale of heaters the remainder of this winter, as the trade is undoubtedly pretty well supplied. Such sales as occur are of a scattering character, and usually represent the wants of some belated buyer confronted by an emergency which compels him to purchase a stove.

The advance made in cooking goods is stated to have been received by the dealers without much objection. They recognize the fact that costs have advanced, as they are familiar with the high prices now ruling on the materials from which ranges are made. The demand is not heavy at present, but both in Chicago and in the rural districts tributary to the city a fair amount of business is doing, which is fully up to the usual movement at this time of the year. Some of the stove houses are reporting a better trade than they enjoyed at the corresponding time last year. All branches of business are in such good condition that wage-earners are well employed and families are consequently seeking houses for which they must have furniture.—Metal Worker.

Scott & Welsh, general merchants, Moorfield, Ont., have sold their stock to A. S. Scott & Co.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

L. A. Frechette, general merchant, Thetford Mines, Que., has assigned.

Kent & Turcotte are the curators of J. C. Giroux, general merchant, Berthier, Que.

Binns & Thompson, general merchants, Ucluelet, B.C., have assigned to James E. Sutton.

Anthime Jolicoeur is curator of the estate of Pierre A. Pigeon, builder, Delorimer, Que.

Thomas Clement, blacksmith, Dobbington, Ont., has assigned to James Douglas, Chesley.

P. J. Kyte, general merchant, St. Peter's, N.S., is offering to compromise at 50c. on the dollar.

H. A. Lalonde, general merchant, Riviere Beaudette, Que., is offering 25c. on the dollar.

L. M. A. Lemieux & Co., general merchants, Marbleton, Que., have assigned to J. R. Roger.

A petition for the winding up of The Diamond Lighting Co., Limited, Montreal, has been presented.

The creditors of Black & Ross, general merchants, Thetford Mines, Que., held a meeting on February 4.

J. A. Milligan, general merchant, Midland, Ont., has assigned to Duncan Storey. Creditors will meet to-day.

A meeting of the creditors of James B. Hay, florist and seed merchant, Brantford, Ont., has been called for February 8.

Syndicate de Ste. Marie, general merchants, St. Marie, Beauce county, Que., has assigned to Alfred Leimeux.

The Electric Cab Co., Limited, Toronto, has assigned to J. P. Langley. A meeting of creditors will be held on February 10.

A. Desmarteau is curator of Joseph Cousineau, coal and wood merchant, Montreal. His creditors had a meeting on February 6.

Lacourse & Le Francois, general merchants, Shawenegan Falls, Que., have consented to assign. A meeting of creditors has been called for February 8.

M. S. Houle, general merchant, St. Boniface and Letellier, Man., has assigned to C. H. Newton, Winnipeg. A meeting of creditors has been called for February 11.

PARTNERSHIPS FORMED AND DISSOLVED.

Dufresne & Pratt, hardware merchants, Montreal, have dissolved.

Mistele & Schmidt, hardware merchants, Rodney, Ont., have dissolved. D. Mistele continues.

Frothingham & Workman, wholesale hardware merchants, Montreal, have dissolved, and a new partnership has been registered.

The Spencer Island Co., lumber merchants, Spencer Island, N.S., have dissolved.

Ironsides & Knight, carriagemakers, Ilderton, Ont., have dissolved; J. H. Knight continues.

Carrier & Sabbe, carriagemakers, St. Francois Xavier De Brompton, Que., have dissolved.

Halstead & Quick, sawmill owners, Hanover, Ont., have dissolved. T. R. Quick continues.

Fetterly, Fulton & Allison, general merchants, Chesterville, Ont., are advertising as dissolving.

W. R. Calder & Son, lumber merchants, Tupperville, N.S., have dissolved. Hugh A. Calder continues.

Wm. and David Mitchell and J. Patrick have registered as partners in The Maritime Coal Co., Maccan, N.S.

SALES MADE AND PENDING.

The Hodgson Iron and Tube Co., Montreal, has obtained a charter.

The assets of J. A. Duval, hardware merchant, Montreal, have been sold.

The Peterboro' Peat Co, Limited, Peterboro', Ont., have obtained a charter.

The Lake Superior Timber Co., Limited, Windsor, Ont., has obtained a charter.

The assets of B. Simon, general merchant, Greenfield, Ont., are to be sold on February 10.

N. T. Carey, general merchant, Otterburne, Man., is advertising his business for sale.

The assets of M. Ormstein & Co., general merchants, St. Polycarpe, Que., are to be sold.

The assets of B. Simon & Co., general merchants, Vankleek Hill, Ont., are to be sold on February 10.

The Sault Gray Copper Co., Limited, Sault Ste. Marie, Ont., have obtained a charter.

The Beauharnois Light, Heat and Power Co., Beauharnois, Que., has applied for a charter.

The estate of Malcolm R. Gillespie, general merchant, Balmoral, Ont., was

Limited
HAMILTON, ONT.

advertised for sale by auction on February 6.

P. E. Ruel & Cie, painters, etc., Montreal, have registered.

Lewis Jones, general merchant, Exeter, Ont., has sold to L. Lanning.

The Walker Oil Co., Limited, Winnipeg, is applying for incorporation.

R. W. Williams is successor to Lincoln & Williams, tinsmiths, Yarmouth, N.S.

Nathan Brenner, dealer in scrap iron, etc., Toronto, has sold out to Katie Brenner.

The R. E. T. Pringle Co., Limited, electric supplies, Montreal, has obtained a charter.

Annie E. Smith, general merchant, Port Rowan, Ont., is succeeded by Darby & Yokum.

R. H. Benson & Co., general merchants, Indian Head, N.W.T., are giving up business there.

Mrs. Ruben Rafalovitch has registered for B. Simon & Co., stove merchants, Montreal.

W. J. T. Trudel has registered for Trudel & Moore, wood and coal merchants, Montreal.

W. B. Martin, agricultural implements, Shoal Lake, Man., has sold out to Eakins & Griffin.

Labbe & Lemay, lumber merchants, St. Francois Xavier De Brompton, Que., have registered.

Maxwell & Bowes, agricultural implement agents, Pilot Mound, Man., have sold out to G. Elliott.

The Heaslip & Lawton Co., Limited, agricultural implements, Alameda, N.W.T., have been incorporated.

A. R. Williams & Co., machinery manufacturers, Montreal, have changed their style to Williams & Wilson.

E. J. Brooks & Co., general merchants, Indian Head, N.W.T., have sold their Kenlis branch to A. O. Brooks & Co.

Supplementary letters have been issued increasing the capital of The Dominion Wire Manfg. Co., Limited, Montreal, to $1,000,000.

Joseph Wheatley, blacksmith and general merchant, Harlock, Ont., has sold out to Frederick Argent, who takes possession during March, 1902.

Supplementary letters have been issued increasing the capital of The St. Lawrence and Chicago Steam Navigation Co., Limited, Montreal, to $500,000.

FIRES.

C. S. Botsford, general merchant, Uxbridge, Ont., has been burned out.

E. T. Thompson, agricultural implement merchant, Uxbridge, Ont., has suffered some loss by fire.

George Gale & Sons, manufacturers of iron beds, etc., Walkerville, Ont., were burned out. Their stock was insured.

DEATHS.

M. B. Lovell, of Lovell, Henry & Sons, lumber merchants, Coaticook, Que., is dead.

The Four Factors

that bring success to *S.-W.P.* Agents are

S.-W.P. Methods,
S.-W.P. System,
S.-W.P. Advertising,
S.-W.P. Quality.

With quality alone *S.-W.P.* can place any paint dealer at the head of the business in his locality, but we don't depend on quality alone. We back the quality up with methods, system, and advertising that insures success from the start. The combination can't be beat, and will win out against any competition, anywhere paint is sold.

If you want to learn in detail about these four factors, send a postal card to-day for the "B-13 Booklet." It is full of valuable information.

THE SHERWIN-WILLIAMS CO.
PAINT AND VARNISH MAKERS.
CLEVELAND.
CHICAGO, NEW YORK, NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY.

A NEW REPRESENTATIVE.

Mr. Fred S. Murdoch, who has represented The Jas. Robertson Co., Limited, for the past eight years, succeeds the late Mr. Gabriel Crawford in travelling for The Canada Paint Co. in the Maritime Provinces. Mr. Murdoch is to be congratulated in representing this progressive company, who are the largest manufacturers in the Dominion of Canada of paints, colors and varnishes. With four factories, The Canada Paint Co. is able to keep abreast of the times and to continually add new and taking features to their list of specialties. The company is no less fornunate in securing the services of Mr. Murdoch, who has been for several years one of the most successful and popular members of the travelling fraternity.

PERSONAL MENTION.

Mr. H. Roper, representing Alexander Gibb, manufacturers' agent and metal broker, Montreal, was in Toronto on Thursday en route home from a business trip west. His trip was a successful one.

HARDWAREMEN ELECT OFFICERS.

The hardware section of the Toronto Junction Branch of the Retail Merchants' Association held their annual meeting on Thursday evening, January 30, when the following officers were elected for 1902 :

President—James Bond.
1st Vice-President—E. Rogers.
2nd Vice-President—J. E. C. Willard.
Secretary—Thomas Padget.
Treasurer—H. D. Snell.
Delegates to Retail Merchants' Association—N. Raybould and A. Chisholm.

The secretary's report showed a substantial balance in the treasury. The increased membership was also a cause of satisfaction to those present.

The installation of officers will take place at their next meeting.

CHANGE IN A HARDWARE FIRM.

W. S. Rogers & Son, hardware, tinware and stove merchants, Glencoe, Ont., write to say that they have disposed of their business to Mr. T. E. Pool. They state : "In writing to you we cannot let the opportunity pass of stating how much benefit we received through the columns of your well-edited journal. We always found plenty to interest us, not only as to the current changes in prices of goods, but in the general reading matter. We wish you continued success in your efforts."

WIRELESS TELEGRAPHY.

SOME years ago, when I was assistant to the local electrician of the British Government, I ventured to lecture at Hope Hall, Liverpool, upon electricity. At the close of the lecture the audience was invited to ask any questions they might see fit. After a short, but apparently interesting discussion, one man created a flutter by asking if I was aware that it was possible to telegraph without wires. As this was my "first appearance," as the newspapers put it, "on any stage," I was, I must admit, disconcerted for a moment. The listeners thought the question ridiculous and commenced to "guy" the anxious inquirer most unmercifully. When calm was restored, I confessed my ignorance, but reminded the audience that the spark from the Leyden jar was wireless telegraphy, as also was induction or induced currents, the transfer of an electric or magnetic state from an electrified body to a non-electrified by proximity without contact. Again I mentioned that telegraphy had been possible using a river or body of water as a conductor.

Shortly after this, experiments were carried on, if I remember rightly, between the north coast of Devon and Lundy Island in the Bristol channel. Since then, as is widely known, the distance in which successful and intelligible signals have been transmitted without wires is ever widening, and I simply write this to endeavor to show that the system is not the dream of a day, but the outcome of careful, prolonged and scientific experiments, and we should bear in mind that it took 20 years to bring that marvel of electrical adaptation, the Bell telephone, to its present stage of perfection, and all honor is due to Marconi for his last great achievement of signalling across the Atlantic.

One must remember an extraordinary development that is taking place in matters electrical and the mode of employing and distributing that which we know, as Lord Kelvin puts it, "nothing about," may be completely revolutionized within a very short time.—William H. Evans, of The Canada Paint Company, in The Montreal Gazette.

A NEW IMPLEMENT FIRM.

The Heaslip-Lawton Co., Limited, is a new firm that has been incorporated at Alameda, N.W.T., as dealers in all kinds of farm implements, threshing machines, pianos, organs, and sewing machines. J. J. Heaslip is the head of the firm. He has been in that district for over 13 years in the implement business, besides conducting a hardware and undertakin establishment for several years. W. E. Lawton, also connected with this firm, has been in the same business for upwards of nine years, first with The Massey-Harris Co., Limited, Toronto, travelling for them in Ontario. Later, he has sold for The Cockshutt Plow Co., of Brantford, Ont., in the west. The third partner, George Heaslip, has been connected with a harness shop and woodworking shop at Alameda, for some time.

NOVA SCOTIA MARKETS.

Halifax, February 3, 1902.

BRADSTREET'S weekly review of Canadian trade, on Saturday, said of Halifax: "Cold weather stimulated certain lines at Halifax, and travellers on the road are sending in good orders." The latter may fairly refer to the hardware trade, which has shown a good average with other years. The report adds: "Collections drag somewhat, and money is rather light, but prospects are good for an average winter's trade."

* * *

The bank clearings generally are an index of trade, and the same for Nova Scotia for the week ending January 30 are given at $1,586,663.54 as compared with $1,405,634.25 for the same period of last year, or a gain of 13.04 per cent. This statement is given by a reputed Halifax stock broker and may be considered as correct. Customs receipts for January fell from $100,000 in 1901 to $95,000 this year.

* * *

Imports of hardware are as yet not extensive, but in this list for the week may be mentioned 173,500 firebrick imported by the Livonian from Glasgow, over half of which quantity is for dealers in the city. This is the largest single shipment ever made to Halifax. A chemical engine, with hose and equipment, by steamer Silvia from New York, to Austin Bros. This engine is for the town of Sydney, which, since the late fire there, has seen the advisability of being fully equipped for any emergency. The Livonian also landed here 10,000 steel billets.

* * *

Last Thursday marked another important step in the rise of Sydney to the position of the "Pittsburg of Canada." On December 30, 1901, the first steel ingots were cast at the steel works at that place, and, on January 30, the first steel billets were rolled on the opening of the blooming mill. Saturday's despatches state that the general results and the working of the steel furnaces and blooming mill have far exceeded the most sanguine expectations of the officials.

* * *

The following is the reported statement of Superintendent Baker: "We made a perfect billet of steel without a single flaw at the first roll, and every roll since has been equally as good. In fact, the mill is working as steadily as if it had been operated for years, and I have never seen finer steel blooms in all my experience in the best plants in the United States." This announcement means much for Canada.

* * *

There was quite a slump last week in stoves and stovepipe. In fitting up the concentration camp for the 2nd C.M.R., some half-dozen expensive ranges had to be purchased, some 40 base-burners, and considerably over a carload of stovepipe. At auction, on Saturday, the stovepipe was sold for the small sum of $6; $20 base-burners brought $5 to $6 by the dozen; $30 ranges sold for $10 to $12. Some of the dealers, however, were on hand, and everything was sold in large lots. R.C.H.

SESSENWEIN BROS., - Montreal

HINTS ON SOLDERING.

THE following is from Ironmonger, London, England: "We have previously devoted some space to a description of solders and of soldering fluxes. We now propose to complete the series by some hints on the actual process of soldering. The former notices dealt with material. We now treat of work. To begin with soft soldering, which may be done in two ways. In one the soldering-iron is used and in the other the blowpipe. The latter is preferable wherever practicable. It does better work, it gives a considerable saving in time, and less experienced and therefore less costly labor can be put upon it. Against these advantages we must place the cost of the gas. A usual form of blowpipe is a soldering-lamp, to which is provided a blast of air from a fan-bellows or pump. The flame may be either gas or petroleum. The latter possesses efficiency for soft-soldering but not for hard soldering. The mouth blowpipe is another form, but, although marvellous results can be got from it when used by an expert, some skill and practice in its use are required, and it is only occasionally found in a workshop devoted to ordinary work. The blowpipe is impossible for use in soldering tinplate, lead, zinc, Britannia-metal, and lacquered work, as it either fuses the metals or destroys the surfaces. The security of a soldered joint depends upon the amount of surface-contact of the metals being joined, and an imperfectly-made joint of large surface may be more efficient than a perfect joint when the contact of the surfaces is small in area. Hence, as much surface contact as possible should be allowed. The work should fit closely and accurately, or the solder will fall through and bad work result.

"The work should be clean. Dirt and oxide should be removed by nitric acid, commonly called 'aqua fortis,' or by the mechanical process of filing, turning, or bufiing. The soldering-flux may be applied with a brush to the parts where the solder is expected to flow, but it should not be allowed to spread beyond this area. Apply the flame of the blowpipe to the work, and with a strip of soft solder, previously dipped into soldering-flux, touch the hot surfaces. Whenever a sufficiently high temperature has been raised the solder will flow all over the surfaces smeared with the flux. If it seems to be slow in flowing more flux may be added. This serves to replace the evaporated flux, and also reduces the temperature should the work have been overheated.

"When using the soldering-iron the copper bit should be filed clean and heated sufficiently to melt the solder. Then the point should be dipped into the flux, and rubbed against the solder until it is tinned up about an inch from the point. If the bit is overheated the operation must be gone over again. Apply the flux to the surfaces of the metal with the brush, and press the solder against the bolt, when the solder will flow upon the fluxed surface and the joint is made.

"Hard soldering or brazing is a more difficult process. The borax should be in fine powder and the spelter clean. The latter may be washed with water and mixed with borax and clean water. A long-handled spoon is required to apply the solder to the work when hot. A flattened wire will do. Before applying the blowpipe care should be taken in tying the pieces of work together, unless their shapes are such that they dovetail or fit into each other naturally. This is frequently the most difficult part of the work. In making one or more butt joints in a straight line it is often necessary to adopt a device such as a strong piece of wire or 'backbone,' against which the pieces of metal may be tied. If possible the work should be tied in more than one place, and it must be remembered that two fine wires hold the work more firmly than one wire of thicker gauge. When the work is ready apply the spelter and borax to the surfaces. For certain classes of work, such as cycle-frame building, specially prepared brazing-rings, made of solder and borax, may be used. To apply the flame the blowpipe should be held sufficiently near the work so that the middle of the flame, not the tip, plays upon the metals, otherwise the borax may be oxidized before the melting point has been reached, and the solder will fail in its duty. When the two pieces of metal being brazed differ materially in thickness heat the thicker first. Should a heavy casting and a light stamping be under treatment the casting should be heated to bright red and the stamping only warmed a few seconds when the fusing-heat has been almost reached. The blowpipe must be moved about to allow the flame to heat the whole surface uniformly. Otherwise one part may have reached fusing-heat while another is still below it, the result being an imperfect union. When the proper heat has been reached apply with the spoon or iron more mixture of spelter and borax, and maintain the heat until it is seen that they have flowed between the surfaces as desired. When a metal of the precise nature of which the operator is ignorant is being soldered care should be taken to avoid overheating, as it may be found to fuse at a lower temperature than that expected. However instructive hints upon a subject like this may be, it is only by experience and observation, and possibly by a few failures, that the workman can produce work of a uniformly high quality."

E. A. WILLS BANQUETTED.

MR. E. A. WILLS, the retiring Secretary of the Toronto Board of Trade, was banqueted by his numerous friends of the National Club and the Board of Trade on Thursday evening, January 30. Mr. Edward Gurney presided. Others present, besides the guest of the evening were: J. F. Ellis, President National Club; Mr. A. E. Ames, President Board of Trade; Hon. Geo. E. Foster, Lieut.-Col. Denison, W. K. McNaught, D. E. Thomson, A. E. Kemp, M.P.; Frank Arnoldi, K.C., W. J. Gage and Geo. A. Wills, son of Mr. Wills.

Mr. Gurney, in proposing the toast, "Our Guest," paid a tribute to Mr. Wills for his modesty, his democracy, his sincerity, and his keen business faculties.

Deeply affected, Mr. Wills responded by expressing his gratitude for the many times he had been the recipient of acts of kindness during his sojurn in Toronto. He was visibly affected when he touched on his long connection with the Board of Trade and the National Club.

A resolution, making Mr. Wills an honorary life member of the club, was presented to him by President J. F. Ellis. This gift was very cordially accepted. In proposing the toast, "Trade and Commerce," Mr. Gurney said that we have at present to depend on the conditions of trade prevailing in the United States. We were not commercial but political in the making of our tariff.

Hon. Geo. E. Foster paid a fitting tribute to Mr. Wills. He said that to keep our trade something more than the flag was needed. He would like to see the whole British Empire roll up their sleeves and give the commercially hostile nations a taste of commercial war.

Mr. A. E. Ames eulogized Mr. Wills. He said we should rather take up measures to build up our own industries. We did not need to waste any time in enmity with the United States. We should be big enough to stand on our own basis.

Lieut.-Col. Denison had also something in the way of praise to be added for Mr. Wills. He strongly urged the importance of the Canadian representatives to the colonial conference in London this year being prepared with some plan of action that would be definite.

Epstein & Ein, general merchants, Louisburg, N.S., who were burned out in the Louisburg fire, have secured a new building there, where they are opening out with a full line of goods.

Welsh & Nightingale, general merchants, Vancouver, B.C., have sold their branch store on Mount Pleasant, to A. Des Brisay, and in future will confine their attention to their store on Grenville street.

Milk Cans AND Milk Can Trimmings

IN addition to our regular lines of Milk Cans, we have this year introduced a new feature that is sure to be appreciated by every farmer—by sinking the handles into the body of Can, making them flush with body (as shown in cut) thereby doing away with the complaint of the handle of one Can knocking holes into and bruising the other Cans.

Handles sunk in this way will carry much heavier weight, as well as stiffen body of the Cans. To distinguish this Can from our other lines, it is called the ***"Eureka."*** All our Broad Hoop Milk Cans are made with our Patent Roll Bottoms.

THE THOS. DAVIDSON MFG. CO., Limited, MONTREAL, P.Q.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, February 7, 1902.

HARDWARE.

BUSINESS in general hardware has been good this week, on the whole, though the severe snowstorm of Monday caused a day's delay in delivering goods throughout the city and still greater delay in shipping to outside points. Orders in the city were given by telephone, while merchants in the country could not get here at all. Needless to say, business throughout the country suffered much more than in Montreal, Quebec, and other large centres. In the cities business in snowshovels was the best of any line in the trade.

No changes are to be reported in the prices of general hardware this week, though the demand on most lines for spring is more satisfactory, and gives many indications of a heavy spring business. Rolling mills and factories also report an active business this week.

BARB WIRE.—The demand keeps up. The price, per 100 lb., f.o.b. Montreal, is $3.00.

GALVANIZED WIRE.—Business in galvanized wire remains quiet. We quote: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

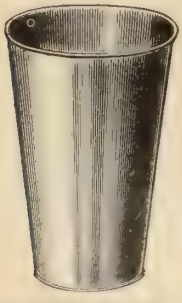
SMOOTH STEEL WIRE.—Trade is quite active. We quote bright iron and annealed on a base of $2.60 per 100 lb., f.o.b. Montreal, Toronto, Hamilton, London, St. John and Halifax. Net extras, per 100 lb. are: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—There is not much doing. The discount is 22½ per cent.

BRASS AND COPPER WIRE.—A small business is being done. Both wires are discounted at 60 per cent.

FENCE STAPLES.—The trade in fence staples is much better this week. We quote per 100-lb. keg: Bright, $2.90; galvanized, $3.25.

WIRE NAILS.—There is no change to report in wire nails. Trade is still quiet. Our quotations are as follows: $2.55 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.



CUT NAILS.—There is a moderate inquiry. We quote: $2.35 per keg for small lots and $2.27½ in carlots. Flour barrel and coopers' nails are discounted at 40 per cent.

HORSE NAILS.—Trade is quiet. We quote as follows: "C" brand at 50 and 7½ per cent. off and "M" brand at 60 per cent. off on oval and new city heads and 66 2-3 per cent. off for new countersunk heads.

HORSESHOES.—Business has not improved to any extent. We quote: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—Trade in screws has been good this week. The discounts are: Flat head bright, 87½ and 10 per cent. off list; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.

BOLTS.—Bolts and nuts have been advanced in the United States, and at the next meeting of manufacturers here prices will be made to correspond. Spring orders continue to arrive freely. Our quotations are as follows: Norway carriage bolts, 60 and 5 per cent.; common, 55 and 5 per cent.; full square carriage bolts, 60 and 5 per cent.;

STRAIGHT PATTERN.

FLARING PATTERN.

Sap Pails and Spiles.

Your customers will soon need these goods and may be asking for them any time now.

If you have not yet placed your order and require either spiles or pails we can ship you any quantity the same day the order reaches us.

Sap Pails.

Try it for pattern and penetration from forty to seventy yards against any powder on the market. We make the powder, we make the shells, and we load them. Write for our booklet, "Powder Facts."
The Robin Hood Powder Company
SWANTON, VT.

machine bolts, 55 and 5 per cent.; coach screws, 70 per cent.; sleigh shoe bolts, 70 per cent.; blank bolts, 60 per cent.; bolt ends, 60 per cent.; plough bolts, 55 and 5 per cent.; tire bolts, 67½ per cent.; stove bolts, 67½ per cent. To any retailer an extra discount of 5 per cent. is allowed. Nuts, square, 3½c. per lb. off list; hexagon nuts, 4c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—The market is fairly active and prices are steady. Our quotations are as follows: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 35c. per roll; tar sheathing, 45c. per roll; dry fibre, 55c. per roll; tarred fibre, 65c. per roll; O.K. and I.X.L., 70c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE.—The demand is active and improved over last week. Our quotations are as follows: Manila, 16c.; British Manila at 13½c.; sisal, 12c. and lathyarn at 10½c. Manitoba prices are: Manila, 16c.; British manila, 14½c.; sisal, 13c. and lathyarn, 12c.

RIVETS AND BURRS.—Business is still quiet. Discounts are as follows: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, 35 and 5 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—There is a moderate demand. The price is $1.25 per 100 square feet.

POULTRY NETTING.—The market is quiet. Canadian or English is quoted at a discount of 60 per cent. off 2 x 2 mesh, 19 wire, and 55 per cent. off 2 x 2 mesh heavier, Canadian list.

HARVEST TOOLS.—Several orders for spring delivery have been received this week and business is picking up. The discount is 70 per cent.

FIREBRICKS.—The market is very quiet. We quote: Scotch, $19 to $23.50; English, $18.50 to $22.50 per 1,000.

CEMENT.—There is very little inquiry after cement. We quote as follows: German cement, $2.30 to $2.40; English, $2.25 to $2.35; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.20 to $2.30 ex-cars.

METALS.

The metal market is fairly active at present. Pig lead has advanced 5c. Reports from the English market show an advance on Canada plate, which is expected to affect import orders here to the extent of about 20c. per box. Stocks, however, are good, owing to the late arrivals last year, and it is likely to be a few weeks before any change in prices occurs here. We quote:

PIG IRON.—Trade is fair. Summerlee is worth $21 to $21.50, and Canadian $18.50 to $19.

BAR IRON.—A moderate demand exists. Jobbers are having difficulty in obtaining the smaller sizes. Some of the small sizes in bar iron are almost impossible to get. We quote: Merchants' bar, in small lots, $1.95; horseshoe iron, $2.15 to $2.20.

BLACK SHEETS.—Though there is only a fair inquiry, prices are very stiff. Our

"BEST PAINT EVER SOLD"

Read what our Simcoe customer says about

"Ark Brand" Paint

"Simcoe, Ont., Jan. 12th, 1901.

"MESSRS. FRANCIS-FROST CO., Toronto.

"DEAR SIRS:

"We have much pleasure in testifying to the good qualities of 'Ark Brand' paint. It gives better satisfaction than any ready-mixed paint we have ever sold, and we now handle it exclusively.

"Yours truly,

"J. AUSTIN & CO."

It will be your experience also, if you stock this celebrated brand.

THE FRANCIS-FROST CO. Limited

TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

quotations are as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—There is not much doing. We quote as follows: No. 28, Queen's Head, $4.40; Apollo, 10 oz., $4.40; Comet, $4.25 with 10c. extra in less than case lots.

INGOT COPPER.—Reports from England show a firmer tendency. The local price is 14c.

INGOT TIN.—There is a moderate trade doing. The market is slightly firmer. Straits sell for 27c.

PIG LEAD.—There is a good demand for pig lead. An advance of 5c. is noted, and prices are firm. We quote $3.20.

LEAD PIPE.—The market is quiet. We quote: Composition waste, 7½c.; ordinary, 7c. The discount is 35 per cent.

IRON PIPE.—Business is active. A new list on wrought merchant pipe, issued on February 1, is here given. For standard pipe, screwed and coupled, in lengths under 19 feet, it quotes per 100 feet, as follows: Black pipe, ⅛, $3; ¼, $2.50; ⅜, $2.75; ½, $3.15; ¾, $3.70; 1-inch, $5.25; 1¼, $7.40; 1½, $8.90; 2-inch, $12.25. Galvanized, ⅜, $3.55; ½, $4.15; ¾, $5.05; 1-inch, $7.25; 1¼, $10.10; 1½, $12.15; 2-inch, $16.55. Extra heavy pipe, plain ends, are quoted, per 100 feet, as follows: Black, ½, $4.50; ¾, $5.30; 1-inch, $7.60; 1¼, $10.60; 1½, $12.70; 2-inch, $17.30. Galvanized, ½, $5.50; ¾, $6.70; 1-inch, $9.60; 1¼, $13.30; 1½, $15.95; 2-inch, $21.60. For threads and couplings, 5 per cent. is added.

TINPLATES.—There is still only a light demand. We quote: Cokes, $4.50 per box; charcoal, $4.75 to $5.25.

CANADA PLATE.—There is a moderate business doing. Prices are firmer. Our quotations are now as follows: 52's, $2.65 to $2.70; 60's, $2.75 to $2.80; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL.—Some sizes of spring steel are hard to get. Prices are the same. We quote: Sleighshoe, $2.05; tire, $2.15; bar, $2; spring, $2.85; machinery, $3, and toecalk, $2.60.

SHEET STEEL.—There is no change. Trade is fair. We quote as follows: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16, and ⅜, $2.40.

TOOL STEEL.—Business is slow. Diamond sells for 8c., and Jessop's for 13c.

TERNE PLATES.—There is very little doing. Prices remain at $7.75 to $8.

COIL CHAIN.—An active market prevails. A great deal of chain has been shipped to Sorel, on account of the accidents in the ice jam there. We quote: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7½c. per lb.; 5-16, $4.80; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.85; 9-16, $3.75; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—Trade is dull. The price is $5.75 to $6.25.

ANTIMONY.—There is only a small inquiry. We quote 10c.

ZINC SPELTER.—A very small movement. The price is 5c.

SOLDER.—The market is steady and a good demand is experienced. Bar solder is worth 18c. and wire solder 20c.

PAINTS AND OILS.

Linseed oil and turpentine are both steady on the market at present. There is an excellent demand for both of these staples, and they are being freely shipped from all the leading points. The severe storm somewhat checked the output of paints and painting materials in general, but the majority of the factories seem to be running as hard as they possibly can, having in view the expected heavy spring turnover. Shellac still keeps high. The demand for paris green has been greatly augmented of late, which fact warrants the belief that stocks in the country are very bare. If the present inquiry for paris green is maintained, it will not be long before the shortage experienced last year is repeated. Meantime, prices are firm all around. We quote:

WHITE LEAD.—Best brands, Government standard, $5.87½; No. 1, $5.50; No. 2 $5.12½; No. 3, $4.75; No. 4, $4.37½ all f.o.b. Montreal. Terms, 3 per cent. cash or four months.

DRY WHITE LEAD—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC — Pure dry, 6¼c.; No. 1, 5¼c.; in oil, pure, 7¼c.; No. 1, 6¼c.; No. 2, 5¼c.

PUTTY — We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200 lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL—Casks, 7c.; 100 lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD — Genuine red lead in casks, $4.50 ; in 100-lb. kegs, $4.75 ; less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE—Ground, casks, 5c. ; less, 5½c. ; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL—Raw, 75c.; boiled, 78c. in 5 to 9 bbls., 1c. less, 10 to 20 bbl. lots open, net cash, plus 2c. for four months. Delivered anywhere in Ontario between Montreal and Oshawa at 2c. per gal. advance and freight allowed.

TURPENTINE.—Single bbls., 67c. ; 2 to 4 bbls., 66c. ; 5 bbls. and over, open terms.

SHELLAC VARNISH — Pure white, $2.35 to $2.45 ; orange, $2.25 to $2.35.

MIXED PAINTS—$1.20 to $1.45 per gal.

CASTOR OIL—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL—47½ to 49c.

COD OIL—32½ to 35c.

PARIS GREEN — Petroleum barrels, 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c. ; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms : 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

Business is quite active this week on most lines. All kinds of iron continue to be very scarce, and prices are firm. Red brass is also very firm though the demand is light. There are no changes in quotations. We quote as follows : Heavy copper and wire, 10 to 10½c. per lb.; light copper, 9c.; heavy red brass, 9c.; heavy yellow, 9c.; light brass, 4c.; lead, 2⅜ to 2⅝c.; zinc, 2 to 2¼c.; iron, No. 1 wrought, $14 ; machinery scrap, $14 ; stove plate, $8 to $9 ; light iron, No. 2, $5 per ton ; malleable and steel, $4 ; rags, country, 60 to 70c. per 100 lb.; old rubbers, 6 to 6½c. per lb.

GLASS.

There is a good demand for glass, mostly for spring delivery. We quote : First break, 50 feet, $2.10 ; second, $2.20 for 50 feet ; first break, 100 feet, $4.00 ; second break, $4.20 ; third break, $4.70 ; fourth break, $4.95.

HIDES.

There is a decline of ½c. all around on hides. Trade is quiet. We quote : No. 1 hides, 7c.; No. 2, 6c.; No. 3, 5c. Lambskins are worth 65c.

MONTREAL NOTES.

Pig lead is 5c. higher.

Hides have declined ½c.

Canada plate has advanced on the English market, and when stocks on hand are exhausted, about 20c. per box is likely to be the advance here.

ONTARIO MARKETS.

Toronto, February 7, 1902.

HARDWARE.

BUSINESS is rather quiet, although it is by no means any more so than is usual at this time of the year. Most of the orders for spring delivery appear to have been booked. A number are still, however, coming to hand. Some business on autumn account is now being done. There have been a few changes in prices during the week, but not many. Paris green is 2c. lower, and a reduction of 5c. per roll has been made in certain descriptions of building paper. The movement in dairy supplies and sap buckets is active and dealers in the country are pressing for shipments.

BARB WIRE.—A few orders for spring shipment are still coming to hand, but the bulk of the business has been done. Prices were advanced $1 per ton in the United States last week. We quote f.o.b. Cleveland, $2.77½ for less than carlots, and $2.65 for carlots. From stock Toronto, $3.

GALVANIZED WIRE.—Business on spring delivery account has been pretty well satisfied. There was an advance of $1 per ton in the United States last week. We quote as follows : Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity ; No. 9, $2.85 to $3.15 ; No. 10, $3.60 to $3.95 ; No. 11, $3.70 to $4.10 ; No. 12, $3 to $3.30 ; No. 13, $3.10 to $3.40 ; No. 14, $4.10 to $4.50 ; No. 15, $4.60 to $5.50 ; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—An occasional order is still being received for oiled and annealed wire on future account. The base price is as follows : $2.60 per 100 lb. Oiling, 10c.; coppering, 60c., and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

WIRE NAILS.—The demand does not show any improvement, still being light. The manufacturers in the United States, at a meeting held last week in Chicago, advanced prices 5c. per keg. Prices in Canada are unchanged. We quote as follows : $2.55 for less than carlots and $2.50 for carlots. Delivery points, Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—A small business is still the feature of trade in this line. We quote base price $2.35 per keg, with 7½c. allowance on carlots.

HORSE NAILS.—Very little is being done. Discounts are as follows : "C" brand, oval head, 50 and 7½ per cent., and on "M" and other brands, 50, 10 and 5 per cent. Countersunk head 60 per cent.

HORSESHOES.—Trade continues quiet. We quote f.o.b. Toronto as follows : Iron shoes, No. 2 and larger, light, medium and heavy, $3.60 ; snow shoes, $3.85 ; light steel shoes, $3.70 ; featherweight (all sizes), $4.95 ; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85 ; snow shoes, $4 ; light steel shoes, $3.95 ; featherweight (all sizes), $4.95.

SCREWS.—Business is being fairly well maintained. Discounts are : Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.

RIVETS AND BURRS.—Trade keeps fair. We quote : Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 and 10 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—Business is still brisk. An advance of 7½ per cent. has taken place in the United States, but no change has taken place here. We quote as follows : Carriage bolts, common ($1 list), 55 and 5 per cent.; carriage bolts, full square ($2.40 list), 60 and 5 per cent.; carriage bolts, Norway iron ($3 list), 60 and 5 per cent.; machine bolts, all sizes, 55 and 5 per cent.; coach screws, 70 per cent.

ROPE.—Trade is quiet with quotations as before. We quote : Pure manila, 16c.; British manila, 13½c.; sisal, 12c. Cables from London report the market very firm on manila hemp with business good.

CUTLERY.—Very little is being done.

SPORTING GOODS.—In all lines business is quiet.

DAIRY SUPPLIES.—The demand for milk-can trimmings is still brisk. Dealers are asking to have their orders rushed forward, and the manufacturers and wholesalers are, in consequence, very busy. The discount is 25 per cent.

TINWARE.—Business continues to improve, and during the week has been good. The discount is 40 per cent.

ENAMELLED WARE.—Business is now fairly good.

SAP BUCKETS.—Shipments are going forward freely. The discount is 40 and 10 per cent.

SCREEN DOORS.—Business on future account is keeping up well. Common doors, 2 or 3 panel, are quoted f.o.b. factory points as follows : Walnut, stained, 3-in. style, $6.80 per dozen ; stained, yellow, $7 ; natural color, oil finish, $8.15 ; 4-in. style, 20c. extra per dozen. Windows : No. 0, $1.60 ; No. 1, $1.70 ; No. 2, $1.95 ; No. 3, $2.10 ; No. 4, $2.50 per dozen.

HARVEST TOOLS.—There are still a few orders for spring delivery being booked. The discount is 70 per cent.

SPADES AND SHOVELS.—An occasional order on spring account is being received. The discount is 10 and 5 per cent.

GREEN WIRE CLOTH.—Jobbers are getting their stocks in and will soon begin to ship to their customers. Quite a few orders have been booked, although, not, perhaps, on the whole, as many as last year. We quote $1.25 per 100 square feet.

POULTRY NETTING.—Orders booked last fall are being shipped. We quote: 2-in. mesh, 19 w.g., discount, 60 per cent.; 2-in. mesh, 18 w.g. and heavier, 50 and 10 per cent.

BUILDING PAPER.—A reduction of 5c. per roll on dry sheathing, tar sheathing, dry fibre, tarred fibre, O K and I X L. Quotations on these are now as follows: Dry sheathing, grey or straw, 30c. per roll; tar sheathing, grey or straw, 40c. per roll; dry firbre, 50c. per roll; tarred fibre, 60c. per roll.

CEMENT.—The movement continues quiet, but there are bright prospects for an early spring trade, which will likely excel the trade of previous years on account of the magnitude of the building operations under way. We are quoting: Canadian Portland, Rathbun's "Star," $2.25 to $2.65; "Beaver," $2.10 to $2.50; "Ensign," $1.90 to $2.30; German, $3.15; English, $3; Belgian, $2.50 to $2.75; Canadian hydraulic, $1.25 to $1.50 per bbl.

METALS.

The metal market is still, as a rule, in a healthy and active condition. Iron and steel keep firm, and the same is to be said of such sheet metals as Canada plates, tinplates and galvanized sheets.

PIG IRON — The market is firm and the demand fair. We quote: No. 2 foundry on track Toronto at $17.50 to $18.

STEEL—The market has not lost any of its strength. On the contrary, it is advancing. The Iron Trade Review of February 6 says: "The Hamilton Iron and Steel Co., of Hamilton, Ont., is offering small lots of open-hearth billets in this district at about the price quoted by domestic manufacturers, and we note the sale of 3,000 tons during the past week at a price equivalent to $28.50, Pittsburg." Quotations by Toronto wholesalers are still as follows: Merchantable cast steel, 9 to 15c. per lb.; drill steel, 8 to 10c. per lb.; "B C" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe-calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2.25; reeled machinery steel, $3, hoop steel, $3.10.

BAR IRON—The demand keeps fairly good, with prices steady. Base price $1.95 to $2 05. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS — Trade has been good during the past week. We quote as follows: Common, $3.15 for 28 gauge; and dead flat, $2.50 for 26 gauge.

CANADA PLATES—Prices are advancing in Great Britain, and orders are being booked freely here for importation. We quote as follows: All dull, $3 00; half polished, $3.10; all bright, $3.75.

GALVANIZED SHEETS—Advices from the primary markets report a stiffening in prices. Locally, quotations are as before. The demand is good. We quote: "Queen's Head" brand at $4.50 in case lots, and $4.65 in less quantities.

TIN — In London on Wednesday the market was more active and prices firm, closing at an advance of 15s. on spot and 10s. on futures. New York was quiet but firmer in price in sympathy with London. On the Toronto market, trade has been good during the past week and some fairly large quantities have changed hands. The ru'ing price is $28 per 100 lb.

TINPLATES—The market is decidedly strong in Great Britain and quotations are up 3d. to 6d. a box, as those who have tried to repeat orders placed a week ago have learned. Locally, the market is brisk with prices quotably unchanged. We quote IC, usual sizes, at $4 per box.

TINNED SHEETS—A good trade has been done during the past week in tinned sheets. We quote as follows: 72 x 30, up to 24 gauge, 7½c.; ditto, up to 26 gauge, 8c.

TERNE PLATES — Continue quiet. We quote: I C, 20 x 28 gauge, at $8 50.

COPPER—The copper market has taken a weak turn again during the last few days. On Wednesday, London opened weak, and closed 7s. 6d. below the previous day on spot, and 10s. on futures. New York was dull and weak. Locally, a good business has been done in ingot copper during the past week in small lots. In sheet copper, there have been a large number of inquiries and a good business has been done. We quote ingot at $15 per 100 lb.

BRASS—A fair business is being done in rod and sheet. The discount is 15 per cent.

SOLDER—Business is good this week. We quote: Half-and-half, guaranteed, 19c.; do. commercial, 18½c.; refined, 18c.; wiping, 17½c.

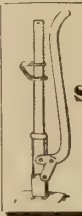
LEAD—Trade is rather quiet with the markets steady as to price. We quote: $3.50 to $3.75 for pig lead and $5 for bar.

IRON PIPE — Business is moderate. We quote: Black pipe, $5.40 for 1-inch.; galvanized, $7.95 for 1-inch.

ZINC SPELTER—Business is fairly active this week at $5.50 to $6 per 100 lb.

ZINC SHEET—An active trade is being done this week. We quote $6 to $6.25 in casks and $6 25 to $6.50 in part casks.

ANTIMONY—The demand has fallen off during the week. We quote 10c. per lb.



PAINTS AND OILS.

Although some wholesale houses and manufacturers of paris green are holding that product at former figures, others are quoting it at 2c. lower than before. In white leads, linseed oils, and seal can paints, there are a number of orders being booked for future delivery in March, April and May. Turpentine is active and quite firm. Gum shellac is stagnant, but the prices for it are firm and high. Prices are unchanged. We quote:

WHITE LEAD—Ex Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2. $5.12½; No. 3, $4.75; No. 4, $4.37½ in pkgs. of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb. $5.12½; ditto, in kegs of 100 lb., $5.50; No.

BENZINE—In barrel lots, 16½c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING — 65c. per 100 lb. ; Gilders' whiting, 80c.

GUM SHELLAC — In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2.25 to $2.35 ; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2.25; bladders, in 100 lb. kegs, $2.40; bulk in bbls., $1.90 ; bulk, less than bbls. and up to 100 lb., $2.05 ; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE — Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity ; lump, 10c. in small lots, and 8c. in bbls.

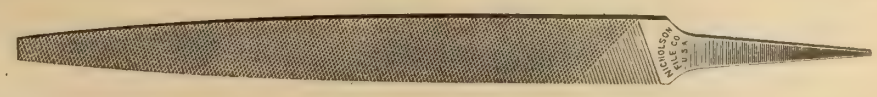
LIQUID PAINTS—Pure, $1.20 to $1.30 per gal.

CASTOR OIL — English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 4 barrels, 77c.; boiled, 80c.; 5 to 9 barrels, raw, 76c.; boiled, 79c., delivered. To Toronto, Hamilton and London, 2c. less.

TURPENTINE—Single barrels, 68c.; 2 to 4 barrels, 67c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.



The wholesale trade in glass is quiet, but there are a few orders being received for importation. Local retail orders are good. We quote : Under 26 in., $4 25 ; 26 to 40 in., $4.65; 41 to 50 in., $5.10 ; 51 to 60 in., $5.35 ; 61 to 70 in., $5.75; 71 to 80, $6.25 ; 81 to 85, $7 ; 86 to 90, $7.75 ; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

OLD MATERIAL.

There is not much business being done in old material, owing to the unfavorable weather. However, prices are firmer, and heavy copper, new light scrap copper and bottoms have gone up ½c. each. This is owing to the advanced prices in the United States copper market. We quote : Agricultural, 60c. per cwt. ; machinery cast, 60c. ; heavy copper, 10c½. per lb.; stove cast, 40c. ; No. 1 wrought, 50c. per 100 lb. ; new light scrap copper, 7½c. per lb.; bottoms, 8c.; coil wire, 10c.; light brass, 5c.; heavy yellow brass, 7½c. ; heavy red brass, 8c. ; scrap lead, 2¼c. ; zinc, 2c. ; scrap rubber, 6c. ; good country mixed rags, 50 to 60c.; clean dry bones, 40 to 45c. per 100 lb.

COAL.

There is a famine in cars for soft coal carriage, which has considerably reduced the receipts. Some companies have prohibited their cars being sent into Canada for an indefinite time. Soft coal for locomotive use on the railways is becoming scarcer, and some companies have indiscriminately confiscated shipments for merchants. We quote at international bridges : Grate, $4.75 per gross ton; egg, stove and nut, $5 per gross ton ; soft coal, $2.50 to $3.25 in bond, according to grade.

MARKET NOTES.

Paris green is 2c. lower.

In old material there has been an advance of ½c. in bottoms, new light scrap and heavy copper.

There is a decline of 5c. per roll in dry sheathing building paper, tar sheathing, dry fibre, tarred fibre, O K and I X L.

INDUSTRIAL GOSSIP.

PORT ARTHUR'S NEW ELEVATOR.

The Canadian Northern Elevator, just finished at Port Arthur, Ont., is one of the largest in the Dominion, having a capacity of over 1,250,000 bushels of grain. This is contained in 108 bins, each capable of holding 9,500 bushels. Ten lofters or legs, each having a capacity of 10,000 bushels per hour, supply grain to the bins, while it can be conveyed away from them by as many shipping spouts, having an equal, if not greater, capacity. The 85,000-pound scales are of the most modern type. They can weigh the largest car on the road.

The main building itself is 239 feet long and 98 feet high. It rests on over 4,000 piles and 144 concrete piers. The piles are of tamarac, the main frame of red pine, and the cribbing of hemlock. Altogether over 2,349,000 feet of lumber was used in the structure.

Engines of 750 horse-power supply light and motive power. The cylinder is 24 x 48, the fly-wheel 18 feet in diameter, and the shaft 12 feet 8 inches long. Fire protection is afforded by the latest and most perfect apparatus obtainable.

A NEW COPPER MINING CO.

The Sault Gray Copper Mining Co., Limited, has been incorporated with a share capital of $400,000. The head office is at Sault Ste. Marie, Ont. The following are the directors: J. J. Kehoe, J. A. McPhail, R. J. Gibson, J. H. Tease, J. Morin, all of Sault Ste. Marie, and W. H. Laird, of New York City.

A NEW CEMENT COMPANY.

The directors of The Colonial Cement Co., Limited, Wiarton, Ont., which has lately been incorporated, are as follows: J. T. Wright, J S. Wright, and W. H. Wright, Wiarton; D. A. Wright, E. S. Birell and E. L. Buell, Detroit. This company is capitalized at $800,000, and will establish cement works on the bay shore at some point between Wiarton and Oxenden. They will commence building their plant early next fall or the following spring. The plans for this plant are now in course of preparation, and other necessary preliminaries are being arranged.

The capital of $800,000 is divided into $300,000 preference stock and $500,000 common stock. The preference stock will bear 7 per cent. accumulative dividend, with a possible addition of 1 per cent. after payment of 7 per cent. on the common stock. There is $50,000 worth of stock being now placed on sale.

INQUIRIES ABOUT CANADIAN GOODS.

The following inquiries were recently received by the Canadian section of the Imperial Institute:

1. A company manufacturing pumps and pumping machinery is prepared to appoint a reliable Canadian firm as its resident agent.

2. A manufacturing company in a position to take considerable supplies of veneer impervious to moisture, would like to hear from Canadian houses which can furnish the material.

3. A West of England firm seeks responsible Canadian agent to take up sale of stationery novelties, gums, glues, glass, etc.

The names of the firms making the above inquiries can be obtained on application to the Editor of HARDWARE AND METAL.

CATALOGUES AND BOOKLETS.

CANADA PAINT CO.'S CATALOGUE.

The new catalogue and price list just issued by The Canada Paint Co. is probably one of the most comprehensive and useful things of the kind ever published. It is printed in large clear type, and bound in a flexible leather cover, stamped in gold. Copies are now being mailed to customers, but should any reader of HARDWARE AND METAL fail to receive one, The Canada Paint Co. will send a copy without delay, upon application.

A HANDSOME SPECIAL NUMBER.

The special edition of The Plumbers' Trade Journal, of New York, is an excellent one. Valuable contributions to the various kinds of literature on the plumbing, steamfiitting, and other allied trades, are given. Its 70 pages are full of bright and clever articles handsomely illustrated. Especially good are their series of cartoons, giving their artist's ideas on the 10 original master plumbers, from the first plumber down.

BINDER TWINE MEN MEET.

At the annual meeting of The Walkerton Binder Twine Co., Walkerton, Ont., the following were elected directors for 1902: J. W. Bundy, Walkerton; W. E. Shantz, Berlin; P. H. McKenzie, Lucknow; W. Ovens, Normanby; W. T. Whale, Goldstone; R. E. Truax, Walkerton; and Geo. E. Barrie, Galt.

The financial statement showed that there was a balance of $10,081.63 on hand, consisting of book debts, etc. There are also $15,560.85 worth of New Zealand, and $17,352 worth of manila hemp in stock. There are also 103⅞ tons of new twine, valued at $21,813.75, and 80 tons of old, at $16,000, as assets. Since last November the factory has manufactured 4,718 bales of Saugeen, 670 bales of Bruce, 311 bales of Canadian sheaf, and 241 bales of Standard Bruce, making a total of 160 tons.

Mr. James B. Campbell, of the Acme Can Works, Montreal, passed through Toronto on Saturday, en route for home.

AGENTS WANTED.

WANTED—A MANUFACTURERS' SELLING Agent for Toronto, for paper mill. Must have experience in brown, manila and print wrappings Address, with references, to Box 16, HARDWARE AND METAL, Montreal. (6)

SEPARATE SEALED TENDERS, addressed to the undersigned, will be received at this office until Tuesday, February 25, inclusively, for the construction of Armouries at the following places:

1st Revelstoke, B.C., 3rd Kaslo, B.C.
2nd Kamloops, B.C., 4th Nelson, B.C.

Plans and specifications can be seen and forms of tender obtained for Revelstoke, and Kaslo, on application to the Postmasters at those places; for Nelson, at the office of Mr. J. A. Macdonald, Architect, Nelson; for Kamloops, at the office of Mr. A. Thompson, clerk of works, Kamloops; and for all the works at the Department of Public Works, Ottawa.

Envelopes containing tenders must be endorsed "Tender for Armoury, Revelstoke"; "Tender for Armoury, Kamloops"; "Tender for Armoury, Kaslo,"; and "Tender for Armoury, Nelson" respectively.

Persons tendering are notified that tenders will not be considered unless made on the form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the party decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order
FRED. GELINAS,
Secretary.

Department of Public Works,
Ottawa, January 25th, 1902.

Newspapers inserting this advertisement without authority from the Department, will not be paid for it.

HEATING AND PLUMBING

BUILDING PERMITS IN TORONTO.

THE building operations in Toronto still continue. Indications are for a year surpassing all previous seasons. This week, from the Toronto City Commissioner's office permits were issued to Hugh Munroe, for a two-storey and attic brick dwelling on South Drive, Rosedale, for $4,500; to The R. McCausland Co., Limited, for alterations of wood and glass to their factory at 86 King street west, for $1,500; to S. McAllister, for alterations to dwelling at 213 Huron street, for $1,400; S. Hales, for a frame and rough-cast one-storey cottage on Boustead avenue, for $500; to J. W. T. Fairweather, for alterations of iron and glass to his store on Yonge street, for $1,750; to Alex. Young, for the erection of a two-storey detached brick dwelling at 60 Sully street, for $1,000; to Wm. Dunkley, for a two-storey brick residence on Lansdowne avenue, for $1,800; and Henry George, for a two-storey and attic rough-cast dwelling at 84 West Lodge avenue, for $1,000.

WANT PLUMBERS LICENSED.

There is an agitation on foot at St. Thomas, Ont., to make it compulsory for all plumbers to have a license. The supporters of this movement claim that it would greatly benefit the public health, and also aid the waterworks department, as at present there are numbers of sinks being put in without traps. There is also a good deal of unsatisfactory work being done. By licensing plumbers, all would have to pass an examination as to their capability.

In support of this movement a deputation consisting of Messrs. Hamilton, Scott and Bell, waited on No. 4 Committee of the St. Thomas City Council on January 30. As a result, a committee, consisting of Ald. Meek, Dr. Luton, and the city engineer, were appointed to meet with the water commissioners and the St. Thomas plumbers, to consider this deputation's request.

SOME BUILDING NOTES.

James Pearson intends erecting a large brick store at Wiarton, Ont.

Rev. John McGuire is erecting a new brick dwelling at Beaver Mills, Ont.

B. W. Shaver will build a new residence at Port Arthur, Ont., next spring.

At Truro, N.S., tenders are being received for the building of a new academy, to cost $30,000.

M. G. Graham will build a two-storey brick house on his farm, near Holland, Man., next summer.

McCready & Stringer are putting up a cheese factory on C. O'Connor's farm, near Long Point, Ont.

G. O. P. Claret will build a two-storey solid brick block, on Cumberland street, Port Arthur, Ont., next summer.

At Truro, N.S., John Sandfield, E. Phillips, D. B. Cummings and Dr. M. K. Langille are all going to erect new dwellings during the coming season.

During the coming summer T. Liddle, hardware merchant, of Killarney, Man., is going to erect a first-class hardware store, of solid brick, which will have all the most modern improvements.

One of the largest department stores in the Lower Provinces is to be built at Sydney, C.B., this year, for Vooght Bros. The architect is David G. Brown.

Edward Webb has purchased a partly-burned house on Yonge street, Orillia, Ont., which he will thoroughly brick and repair, converting it into a substantial residence.

BUILDING IN 1901 IN OTTAWA.

The number of building permits issued in Ottawa for the year 1901, totalled 397, as compared with 476 in 1900, 305 in 1899, and 330 in 1898. The value of the

Ald. Lamarche.

buildings erected during 1901 amounted to $1,010,100 as compared with $853,350, for 1900, an increase of $156,750 for the past year. The following is a list of the number of permits issued, the number of stone, brick, brick-veneered, and wooden buildings erected in Ottawa in 1901, and their total value:

Ward.	No. of Permits.	Total Value.
Victoria	38	$157,650
Dalhousie	79	152,500
Wellington	80	150,425
Central	110	326,150
St. George's	57	185,400
By	14	27,150
Ottawa	14	8,875
Rideau	5	1,950
Total	397	$1,010,100

PLUMBING AND HEATING NOTES.

Smith Bros. & Co., plumbers, etc., London, have dissolved. Wm. Smith is retiring.

Two building permits are all that have recently been issued at Ottawa. These were given to Mrs. F. C. Sharp, for a frame dwelling on Flora street, to cost $800, and to Wm. Lintell, for an iron-clad workshop, on Cambridge street, to cost $500.

ALD. LAMARCHE REELECTED.

Ald. Lamarche has again been reelected for the East Ward, Montreal. Mr. Lamarche is an enthusiastic member of the National Association of Master Plumbers, and he has, since he became a member of the City Council of Montreal, been an energetic advocate of efficient sanitary laws. His reelection will no doubt be gratifying to master plumbers throughout Canada.

MASTER PLUMBERS OF ST. CATHARINES.

Some of the most influential plumbers of St. Catharines, Ont., are contemplating the formation of a Master Plumbers' Association in that city. In pursuance of this they held a meeting and appointed Theo. Parnell their secretary, whom they have instructed to procure as much information as possible regarding the ways and means of organizing and the framing of a constitution.

PLUMBERS PLAY EUCHRE.

On Friday evening, January 31, the employes of W. Mashinter & Co., steamfitters, Toronto, to the number of about 35, formed a sleighing party and drove out to the Bedford House, about seven miles from Toronto on Yonge street, where they enjoyed themselves playing progressive euchre till the small hours of the morning, when prizes were distributed to the two leaders, the first, a handsome pipe, to Edward Pollit, and the second, a nice pipe also, to J. Elwood. They then feasted on the repast provided by their host, and returned home.

The John Ritchie Plumbing and Heating Co., Limited, Adelaide street east, Toronto, have secured the contract for the plumbing and hot-water heating of a new residence on South Drive, Rosedale, for Hugh Munroe, and the contract for the plumbing and gasfitting of two new residences on Withrow avenue for Frank Hillock.

W. Mashinter & Co., steamfitters, Adelaide street west, Toronto, have secured the contract for the plumbing and heating of a new building for The Pure Gold Manufacturing Co., on King street west, and the plumbing of a house on Maple avenue for W. K. Allan.

RAMSAY PAINTS FOR PAINT BUSINESS

Do you want to know why **RAMSAYS PAINT** secures a paint business? Because it brings you handsome show cards, signs and easels for counter and store use; fence signs for outside advertising—all you want—bearing your own name. Color cards for your customers, booklets as well; general newspaper advertising, and cuts to assist in your own advertising, and other features continually being adopted until your customer is bound to inquire. Then you offer him a neat, attractive and handy package, nicely labelled, showing color, number, and name on the tin, and at a price that he expects to pay for the best that goes in paint making. When it gets on the side of his house it stands up against the weather as no other paint does—making things look as a house should look and keeps on looking—that satisfies him, and brings business for you as it has for others, and that reputation for **RAMSAYS PAINT** which it has had for years.

Do you want to see one of our travellers about this business for 1902?

DEPRECIATION, MAINTENANCE AND INTEREST.*

By Reginald Pelham Bolton.

THE comparison of certain different apparatus, the relative economy of competing devices and the value of improvements, are affected directly by the empirical amounts chargeable against them as interest, maintenance and depreciation.

A common and very crude method appears to be to fix each item in such computations at a rate of 5 per cent. In the course of discussions with representatives of power and heat supply companies desirous of applying their systems to certain buildings, I have been confronted with an assertion that depreciation alone should be charged on independent power and heating plants at the rate of 8 per cent., and that interest should be charged upon the whole cost of the installation at the rate of 5 per cent., additional to maintenance at 5 per cent. I have, as a result of these varying and apparently hap-hazard figures, being led to make some inquiry into this question, and venture to think some conclusions gained from New York circumstances will be of interest to members of a society especially connected with the design and installation of operating machinery and appliances necessary to life and comfort.

INTEREST

In the City of New York the rates of interest on borrowed money vary, of course, with the nature of the security. In the case of buildings and factories the form of security is commonly a mortgage. First mortgages are usually obtainable up to 60 per cent. of the value of the property, and in Manhattan Island at present a rate of interest of 4 per cent. can be obtained, or in certain centrally situated properties one-half of 1 per cent. lower.

The value of some land is so great that a 60-per-cent. mortgage upon its value will suffice to erect and equip a very considerable building upon it, but where this is not the case, an owner borrowing six-tenths of the cost of his building on first mortgage may borrow the balance, if he be in good credit, at as low as 5 per cent., of banks, on note, bond or second mortgage.

In a close computation, therefore, it should be ascertained what rate of interest the money represented by a plant involves, but where the information is not obtainable it may be assumed that the rate of interest does not exceed 4 per cent. on six-tenths and 5 per cent. on four-tenths, or a mean of 4 4-10 per cent.

MAINTENANCE.

This is compounded of several elements. Cost of upkeep, replacement and precautionary measures. A reasonable amount of care must be assumed in keeping the apparatus in operating condition. Replacement provides for renewal of working parts, and painting of perishable or exposed material. Renewal of inherently renewable materials, such as packing, comes under this heading. By precautionary measures I understand all such steps as require to be taken in good time to obviate in advance the effects of age or decay.

Naturally such items vary very considerably with all kinds of apparatus, and must be taken into separate consideration.

The cost of maintenance, therefore, varies too widely to be stated as a fixed element, but must be estimated for different apparatus by the results of experience and careful foresight. In a very general way 1½ per cent. on the prime cost of a heating and ventilating plant should suffice to cover the above items and on operating machinery 2 to 4 per cent., according to conditions.

Repairs, assuming the term to deal only with accidental damage or breakage or discovery of defects, can be properly covered by insurance or by civil suit; and, if not, are to be assumed as an unknown risk. They are not a part of maintenance.

DEPRECIATION.

This is a charge which is calculated to represent the gradual deterioration of a plant, resulting in its eventual wearing out. In certain cases it has been assumed also to represent the superannuation of a plant, or, in other words, its loss of competitive power by reason of the advent of improved appliances.

In a general way I consider both these elements are overestimated. It is common to have a sweeping limit of 10 or 15 years assigned as the life of a plant, on one or other of the above grounds. While the policy of clinging to antiquated and unproductive machinery is not in consonance with modern ideas of profitable operation and is not here recommended, it must be pointed out that it is not an argument against assigning a reasonably long life to any apparatus, that its use may be found sooner or later to be less economical than improved apparatus. Such improved appliances will, if sufficiently economical, justify in their results the entire renewal of the existing plant, at an earlier date than assigned to it, and the cost of such extinguishment or partial discontinuance is to be borne by or become chargeable against the results attainable with the improved plant.

New methods may come into existence at any time and cannot be reckoned with as a fixed element in computing the useful life of any apparatus.

Again, the possibilities of remodeling are, in the case of such apparatus as the members of this society are concerned in, very often capable of renewing the life of the perishable portions of installations.

Experience in the remodeling of old plants goes to show that even in such machinery as was built a quarter of a century ago the life of rotating machinery is greater than 20 years, while in

boilers of the water-tube type, piping chimneys and much of similar apparatus it may be taken at 25 years. Pumping and hoisting machinery of similar age is quite common, in all cases assuming reasonable care and reasonable renewals, for which, as before asserted, separate charges are, of course, to be made.

From the above considerations it may be gathered that in the case of a moderate private commercial power of heating plant an assumed life of from 15 to 25 years, varying with the nature of the appliances, is proper, and for the purpose of ready calculation a mean of 21 years can safely be taken.

It is not to be supposed that an owner will regularly lay by annually a sum equal to the amount charged as depreciation, or take the trouble to arrange for its investment and the investment of its interest. It would not, in fact, pay him to do so, because the money is worth more to him in his own business than he could obtain at current rates in the market or savings banks. In practice it is therefore retained in his business or investments, and is earning the rate of interest obtainable therein. In a majority of instances where the business in which the machinery is employed is an actively constructive or manufacturing one, the assumed amount of depreciation is really earning very high rates of interest, often more than 25 per cent. per annum. Under not uncommon commercial circumstances, therefore, the assumed depreciation fund may very moderately be credited with an earning capacity of 10 per cent. compound interest. With a life of 21 years and a rate of compound interest of 10 per cent. the charge of depreciation becomes only 1½ per cent. upon the capital outlay.

It will be evident how important is the consideration of these standing charges in deciding the relative economy of machinery, but it is seldom that they are properly applied. We often learn of the adoption of apparatus designed to effect a certain economy, the cost of which, if debited with its proper charges, would outweigh the ascertained economy, and which is therefore being operated at a loss. This is particularly the case in the numerous devices for coal saving in boilers, and guarantees of a certain result are apt to be considerably counterbalanced if the proper charges are applied.

A high-duty pumping plant was offered for a large elevator service with a guaranteed saving of 15 lb. of steam per horse-power of water pumped per hour. Careful estimates showed a probable saving in fuel of $1,500 per annum by this apparatus, the additional cost of which amounted, however, to $19,000.

In case the life of the two pumps involved is taken at 20 years, and the rates of interest are as herein stated, the extra capital outlay is to be charged with

Interest, 4 4 10 per cent.	$834
Depreciation, 1½ per cent.	285
Maintenance, 3 per cent.	570
Additional oil	70
Total	$1,761

showing that the pumps will be run at a loss of $261 per annum, which capitalized at 4 4-10 per cent. represents a sum of nearly $6,000. By applying the charges to the saving guaranteed it will be seen that the saving justifies only a capital outlay of $16,780. Therefore to show any gain the cost of the improvement must be less than that figure.

CANADIAN BUSINESS MEN AND THE WEST INDIES.

A REPRESENTATIVE of HARDWARE AND METAL at Halifax had the pleasure of a short chat with Mr. W. A. Black, of Pickford & Black, one day last week regarding winter travel to the West Indies. Mr. Black said that the Oruro, which sails on February 10, had then over 20 passengers booked, and, by the time of her departure, would probably have quite a few more. He said that the Dahome, sailing on February 24, has also booked a number, and that they hope to see a large party on the passenger list before the ship sails. The Dahome is the boat secured by Pickford & Black to take the place of the Orinoco, which had an accident happen to her boilers when on her last trip to Demerara, and is now laid up for repairs.

The Dahome is one of the steamers of the Furness Line, and is fitted and furnished with all the modern conveniences throughout. Starting from Halifax on February 24, she will, three days later, reach the little island of Bermuda, the land of the lily and the rose, and, after about 24 hours stay at Hamilton, the capital of the Island, will proceed on a voyage to St. Kitts, a four days' sail, and one that passengers will find all too short, so beautiful are the days and so lovely are the nights.

At St. Kitts the steamer remains almost a day, and there one first sees the social and physical wonders of the tropics. Next morning Antigua is reached, and after eight or ten hours' stay, move on to Dominica; then to Montserrat and St. Lucia, the headquarters of the British garrison in the West Indies. From St. Lucia to Barbados is one night's sail, so that the steamer usually arrives at Bridgetown about daylight. Two days in Barbados and then off for Grenada, St. Vincent, and Trinidad, at the latter of which about two days more are usually spent. Then to Demerara and remain three days, long enough to get some exercise and be ready to start for home again.

Pickford & Black are especially anxious to see Canadian business men make a trip to the various islands, as they believe it will give a needed impetus to our export trade. The cost of the entire passage is only about $3 a day, from Halifax to Demerara and return to St. John, and the accommodation and attention on board the Dahome will be found to compare favorably with the best Atlantic line.

CHANGE IN FREIGHT RATES.

Commencing with February 1, a new schedule of rates went into effect on the Canadian Northern Railway lines in Manitoba. A reduction of 2c. per 100 lb. is provided for on grain, flour, oatmeal and mill stuffs. This represents a change of 11 1 9 to 13½ per cent., the chief gainers by this being points on the main line east of Winnipeg, and Portage la Prairie, Emerson, Carman, Winnipegosis, and as far as Miami on the Morris-Brandon branch. From these sections to Port Arthur the old and new rates are as follows:

	Old. c.	New. c.
On main line, all points between:		
Winnipeg and east	15	13
Portage and Winnipeg	15	13
Youill and McCreary	16	14
Laurier and Makinak	17	15
Ochre River and Cowan	18	16
Fishers and Swan River	19	17
On Morris-Brandon branch, all points between:		
Winnipeg and Miami	15	13
Altament and Brandon	16	14
On Hartney branch, all points between:		
Ninette and Fairfax	16	14
Elgin and Underhill	17	15
Argue and Hartney	18	16
All points on:		
Gilbert Plains branch	18	16
Emerson branch	15	13
Carman branch	15	13
Winnipegosis branch	18	16

THE WORLD'S COAL PRODUCTION.

AS far as can be ascertained, says Iron and Coal Trades Review, the output of coal throughout the world in the year 1900 was about 757,000,000 tons. Of this quantity, the three principal producing countries—the United States, the United Kingdom and Germany—produced 616,000,000 tons; the next four most important countries—Austria-Hungary, France, Belgium and Russia—produced 111,000,000 tons; the next five principal countries—Canada, Japan, India, New South Wales and Spain—produced 22,750,000 tons—and the balance was made up of a variety of minor countries, none of which, with the exception of South Africa, produced more than 1,000,000 tons a year. The following is a statement of the details:

THE WORLD'S PRODUCTION OF COAL.

Country.	Tons.
United States, 1900, long tons	240,965,917
Great Britain, 1900, "	225,181,300
Germany, 1900, metric tons	149,551,000
Austria-Hungary, 1899, metric tons	38,780,000
France, 1900, metric tons	33,270,000
Belgium, 1900, "	23,352,000
Russia, 1900, "	15,890,000
Canada, 1900, short tons	4,760,197
Japan, 1898, metric tons	6,761,301
India, 1899, long tons	4,937,160
New South Wales, 1900, long tons	5,506,064
Spain, 1900, metric tons	2,772,000
New Zaaland, 1899, long tons	975,234
Sweden, 1899, metric tons	239,344
Italy, 1899, "	388,534
South Africa, long tons	1,907,271
Queensland, 1899, "	494,009
Victoria, 1899, "	262,380
Natal, 1900, "	241,062
Cape Colony, 1899, long tons	186,299
Tasmania, 1899, "	44,277
Other countries	2,000,300

It is not at all improbable that the output of coal in 1901 has been materially in excess of 1900. In Germany and several other countries the output has fallen off, but against that there has been a large increase in the United States and some of the newer countries.

1902

A PHENOMENAL SUCCESS

We are now booking the largest business in Ready Mixed Paints since the Company was inaugurated. The reason is not far to seek—The Canada Paint Company are first hands in Canada for painting material of every description. FOR THE STREET

THE TRADE "M&M" MARK LIGHT

FOR THE STORE

What "M & M" Lamps Do.

They give a stronger, whiter, steadier light than the electric arc. Operate easily, safely, satisfactorily. Save money—actual 600 candle-power light at a cost of one-half cent an hour. Think of it! Write for circulars, etc. GOOD AGENTS WANTED- Exclusive territory allowed.

ACORN BRASS WORKS,

Dept. 8, 15-23 Jefferson Street CHICAGO, ILL.

What "M & M" Lamps Save.

Barrett Hardware Co., Joliet Ill, write: "Gasoline and supplies for six "M & M" Lamps cost us $45.46 last year, an average of 60c. a month per lamp. We believe we had as good a light as though we had six electric arc lights at a cost of $360." No wonder that over 30,000 "M & M" Lamps are in use all over the United States and Canada. THEY KILL BIG GAS AND ELECTRIC LIGHT BILLS. It will pay you to investigate. Write for circulars. AGENTS WANTED. Dept. 8, 15-23 Jefferson St., Chicago.

BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

1902 GARDEN HOSE. 1902

We manufacture the most popular and best selling lines of Garden Hose in Canada. Our "Maltese Cross" brand we confidently recommend as the finest Garden Hose on the market.

We have other grades not quite so expensive, but good reliable brands, viz.: "Lion" (the popular medium-priced hose), "King" "Sun" and "Leader."

Our "Kinkproof" (wire wound) hose is wired by a special process controlled solely by ourselves, and is so constructed that it may be cut at any wind of the wire without loosening or uncoiling, the wire being self-gripping throughout each length.

CHURCH'S COLD WATER

ALABASTINE

The demand for **ALABASTINE** comes with the opening of Spring, and continues all Summer.

Is your assortment complete, in all tints and white? Remember, "It is the early bird that catches the worm." The claim that "It is the early worm that gets caught," will not apply when stocking **ALABASTINE.** The dealer who gets **"CAUGHT"** is the one who, on the pretence that he is to have exclusive sale, or for any other reason, buys goods that are not in demand, and that have neither record of value nor proof of origin.

ALABASTINE is the only permanent wall coating ready for use by the addition of Cold Water, made so by the inventor, Mr. M. B. Church, who was the first to produce a cold water preparation that is thoroughly practical, that has superseded all hot water mixtures, and forced other manufacturers to **UNDERTAKE** the use of the cold water process.

ALABASTINE is made in Canada, by Canadian labor, and from Canadian materials. Twenty beautiful tints and white. Never sold in bulk.

The trade supplied by Wholesale Hardware and Paint Dealers. Also by

Brush Manufacturers.

Montreal, February 15th, 1902.

Re BRUSHES FOR SPRING TRADE.

Dear Sir,—You are no doubt considering now the purchase of your Spring Stock of BRUSHES, and we would like to present a few facts, which we are sure will be of interest to you.

The Bristle Market has of late been very unsettled, with a downward tendency in prices, consequently we have put off the issuing of our prices for 1902 until the last possible moment, in order to give our customers the full benefit of any decline in price of raw material.

Our new catalogue will be ready in a few days, and our Travellers will call upon you in plenty of time to get your goods into stock for Spring Trade.

Our range of samples is much larger than in former years, and the prices we are now issuing cannot be beaten.

Do not be in a rush to buy from the first Brush Traveller that calls upon you. We invite comparison with other houses in our line, as we know we cannot be undersold, and you will confer a favor on us and save money to yourselves by holding your orders until you have seen our Samples and compared prices.

Wishing you a prosperous year,

We remain, dear sir,

Yours faithfully,

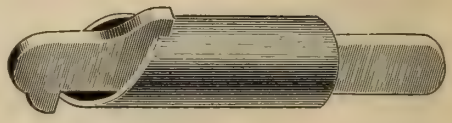
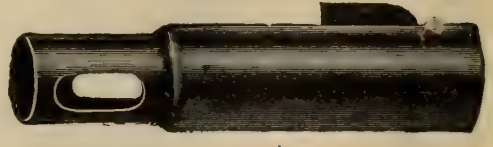
Supplies for the Maple Syrup Season



Sap Buckets.

Extra deep and straight. Three sizes. They possess many advantages over the ordinary flaring Buckets; being small in diameter they do not catch the rain or snow, and, as they are very deep, they hang perpendicularly and consequently will not overflow until full. Covers supplied if required. They nest close for shipping or storing.

We can also supply the ordinary Flaring or Western Sap Pails.



E. T. Sap Spouts.

Made of Retinned Steel. Strong and durable. Only require a ⅜-in. hole in tree. It does not cover the inside surface of the hole, therefore a larger amount of sap is obtained. Packed in cardboard boxes.

Maple Leaf Sap Spouts.

Made in Bronzed Steel. Require a ½-in. hole. Has a shoulder which prevents it being driven in too far. The hole in the tree is not exposed to wind and snow, consequently sap will flow longer. Packed in cardboard boxes.

Syrup Cans. Round or Square.

Plain or Decorated. Made in ¼, ½ and 1-gallon sizes—either Wine or Imperial measure.

A FULL STOCK CARRIED IN ALL LINES. ORDERS SHIPPED PROMPTLY.

WHEN WRITING ADVERTISERS PLEASE MENTION THAT YOU SAW THEIR ADVERTISEMENT IN THIS PAPER

A FAILURE AND ITS LESSON.

ONE of the peculiar things in commercial affairs which astonishes most people is the ease with which business men are sometimes enabled to secure credit far out of proportion to the assets they command. In spite of warnings, and in spite even of experience, business men are again and again caught in the same trap. We have an evidence of this in a statement that is before us, the estate of T. P. Heffernan, a merchant of Guelph, Ont.

This estate has recently been wound up, and, after the assignee's fees and charges and the preferred claims have been paid, there is not money enough left to pay the creditors 6½c. on the dollar. The largest creditor is for the sum of $2,085.31 and all he gets to satisfy this is $135.52! The following is a summary of the financial statement in regard to the receipts and disbursements:

RECEIPTS.

Received from sale of stock	$392.21	
Proceeds of book accounts	140.30	
		$532.51

DISBURSEMENTS.

Assignee's fees and incidental disbursements	$ 54.65	
Rent	160.00	
Wages	9.50	
		224.15
Amount available for creditors		$308.36

The amount of the liabilities which this sum of $308 was to liquidate was $4,744, thus giving the creditors, as we have already pointed out, the magnificent sum of scarcely 6½ per cent.

We have no knowledge whatever of Mr. Heffernan's method of doing business, but we know that the laxity with which credit is sometimes given by wholesalers and manufacturers, enables men to go into business who otherwise would not, thus increasing oftentimes a competition that is already excessive. And that is not the worst result of it: Men who go into business with inadequate capital are compelled, as a rule, to make undue reductions in prices in order to meet accounts falling due, thereby disturbing trade, and without doing themselves any permanent good.

While a Dominion insolvency law would not altogether prevent a repetition of such failures as that cited, it would, we believe, tend to minimize them, for, with the existence of such a law, people would not rush so recklessly into business as they do now, and they would certainly be less disposed to employ reckless business methods. Some retailers we know are opposed to a Dominion insolvency law, fearing it would be a restriction upon themselves. The only business men who need fear an insolvency law are those who are not solvent. Merchants who are solvent have no more need to fear an insolvency law than have honest persons the laws against dishonesty. Business men have more reason to support than to oppose the movement for a Dominion insolvency law.

FOUR GENEROUS BUSINESS MEN.

ALMOST pleasing incident is recorded by the press of Smith's Falls, Ont. Through the efforts of a local newspaperman, Andrew Carnegie offered to give $10,000 for the erection of a new public library building for the town, provided Smith's Falls spent yearly $1,000 in maintenance of the library.

At this stage, Messrs. C. B. Frost and F. T. Frost, president and vice-president, respectively, of the Frost & Wood Co., came foward with an offer to supplement Mr. Carnegie's gift with another $10,000, payable in 20 annual instalments of $500 each. But the spirit of beneficence did not end there. Mr. W. H. Frost, of the Malleable Iron Works, and Mr. H. S. McNeil, a local wholesale merchant, became imbued with it, the former contributing $2,000 in 20 annual payments of $100 each and the latter $50.

There is scarcely any other way by which successful business men can give more lasting and greater benefits to the people in their respective localities than by emulating the Messrs. Frost and McNeil.

It is by association with the best books and acquaintanceship with their contents that knowledge is extended and breadth of view cultivated, the concomitant of which is better business men, better clerks, better workmen and better citizens.

It is to be hoped the generosity of the Messrs. Frost and McNeil will not be without its influence upon business men in other places besides Smith's Falls.

THE PRICES WERE UNDULY ENHANCED.

THE action of the Dominion Government in reducing the duty on news printing paper from 25 per cent. to 15 per cent. has naturally created a great deal of interest. And the interest is not confined to those who are directly concerned in the reduction of the tariff.

It will be remembered that about seven or eight months ago the Government, at the instigation of the Canadian Press Association, instructed Judge Taschereau to make an inquiry, under the provisions of clause 18 in the Customs Act, as to whether the association, through which the papermakers regulated business, unduly enhanced prices. This particular clause reads as follows :

Whenever the Governor-in-Council has reason to believe that, with regard to any article of commerce, there exists any trust, combination, association or agreement of any kind among manufacturers of such article, or dealers therein, to unduly enhance the price of such article, or in any other way to unduly promote the advantage of the manufacturers or dealers at the expense of the consumers, then the Governor may direct a commission to issue to report to the Government whether such combination, trust, association or agreement exists.

If the judge reports that such trust, combination, association or agreement exists, and if it appears to the Governor-in-Council that such disadvantage to the consumers is facilitated by the duties of Customs imposed on a like article when imported, then the Governor-in-Council shall place such article on the free list, or so reduce the duty on it as to give to the public the benefit of reasonable competition in such article.

Judge Taschereau, in his report to the Government, declares that the case was proven, and, acting upon his finding, on Tuesday last the Cabinet passed an Order-in-Council as follows :

The Customs duty on news printing paper, in sheets and rolls, including all printing paper valued at not more than 2¼c. per lb. shall be reduced from 25 per cent. to 15 per cent. ad valorem.

What gives the action of the Government such wide interest is the fact that the clause in the Customs tariff has for the first time since it was embodied in the statutes, five years ago, been called into active operation. While it was practically a dead letter no one was concerned in the anti-combination clause in the tariff. Now that it has been given life wide-spread interest has been created, and particularly among business men. The question with a good many people naturally is, where will it end ?

The importance of clause 18, now that it has been proved to have some force, is that there is an instrument in existence for the protection of those who are likely to suffer from the action of combinations or associations that have it in their power to unduly enhance prices or impose unjust restrictions.

We live in an age when associations among manufacturers and merchants are necessary. Against associations themselves the clause quoted above takes no cognizance. It is only when they unduly enhance prices that it comes into play. It is obvious, therefore, wherein lies the duty of all organizations which have been formed with a view to correcting evils in their several lines of trade.

The experience of the Press Association will certainly encourage those who may be suffering from the arbitrary action of combinations or associations to seek relief through the same medium. Those only need feel uncomfortable whose conduct comes within the provisions of Clause 18 of the Customs Tariff Act.

THE PRICE OF BROOMS.

The United States manufacturers of brooms have decided to advance their price about 25c. per doz. This has been necessitated by the small supply of broom corn on hand that they feared would not last until the new crop comes in, which will not be for a considerable time. The Canadian manufacturers have not yet taken any action, but indications seem to point to a similar advance in the Dominion at some future date.

PARIS GREEN IN TORONTO.

IN the article which appeared in last week's issue regarding paris green it was stated that the reduction which had taken place in the price in Toronto was due to the lower prices on English and United States green. We have since learned that as far as paris green of English manufacture was concerned, the statement was not in accordance with the facts. The reduction was altogether due to the competition of the United States article.

Telegraphic advices from the United States on February 13 announced an advance of ½c. per lb. in that market, but no change has so far been made on this side. The price of paris green in Toronto is still unsettled, and while quotations are no lower than they were a week ago, or seem likely to go any lower, there is a difference of 1 to 2c. in the figures given by the different houses. Most houses, however, give the figures we quoted last week. We have for the present, however, withdrawn the figures from our prices current.

MR. JAMES FERRIER IS DEAD.

We regret to learn as we go to press of the death of Mr. James Ferrier, president of The Canada Horse Nail Co., Montreal, which took place on Thursday night.

THE ONTARIO PROHIBITION BILL.

AT Wednesday's session of the Ontario Legislature, Premier Ross introduced his promised Bill respecting the sale of intoxicating liquors, or, as it is commonly called, the Prohibition Bill. In its provisions it follows the Liquor Act passed by the Manitoba Legislature and which was declared valid some months ago by the Judicial Committee of the Privy Council.

The Bill does not prohibit the manufacture of liquor within the Province. Neither does it prohibit its importation. What it designs is the prohibition of its sale, either retail or wholesale, within the Province. Liquor for medicinal purposes will be obtainable, however, from druggists on presentation of a doctor's prescription. The following clauses are from the Manitoba Act upon which the Ontario Bill is based :

No person shall, within the Province, by himself, his clerk, servant or agent, expose or keep for sale, directly or indirectly, or upon pretence or upon any device, sell or barter, or, in consideration of the purchase or transfer of any property or thing, give to any other person any liquor, without having first obtained a druggist's wholesale license or a druggist's retail license, under this Act, authorizing him so to do, and then only as authorized by such license, and as p escribed by this Act.

No person within the Province, by himself, his clerk, servant or agent, shall have or keep or give liquor in any place wheresoever, other than in the private dwelling house in whieh he resides, without first having obtained a druggist's wholesale license or a druggist's retail license, under this Act, authorizing him so to do, and then only as authorized by such license.

After passing the House the Bill is, on October 14, to be submitted to a vote of the people. If the referendum affirms the Act then it will go into force on May 1, 1904, but the vote cast must be more than one-half of the total number polled at the general election preceding.

TRADE IN COUNTRIES OTHER THAN OUR OWN.

TINPLATES IN ENGLAND.

MARKET is very steady, and orders are obtainable at prices which show an improvement upon the figures ruling a fortnight ago.

Odd sizes have been in fair request at 12s. 9d. basis, and 12s. 6d. paid for C 14 x 20. There have also been large inquiries for oil sizes, but makers seem well booked and are trying for better prices. Rightly or wrongly, there is an optimistic feeling prevalent at present.—Iron and Steel Trades Journal, February 1.

PARIS GREEN IN THE STATES.

The market continues strong, with an advancing tendency. Orders are coming in quite freely ; much more so than for the last two years at this season. There is considerable unevenness in the market, caused by the various manufacturers quoting different prices. These range from 11 to 13c. per lb. in arsenic kegs of 200 to 300 lb.—Iron Age, February 13.

THE SCARCITY OF STEEL.

The steel scarcity is becoming more acute, and buyers are turning more and more to foreign sources for relief. While inquiries have been numerous and partly urgent, and on the whole thus far quite a tonnage has been placed, still recently sales have been confined to small lots of 500 to 2,000 tons each. One of the Canadian steel works has withdrawn from the market. —Iron Age, February 13.

WIRE NAILS FIRM IN THE STATES.

The demand for wire nails has not been unfavorably affected by the recent advance of 5c. per keg. There is, on the other hand, a large and active demand. Difficulty is experienced at some mills in securing a sufficient number of cars to make prompt shipment. The market is strong, and is represented by the quotation on carload lots of $2.05 to $2.10, f.o.b. Pittsburg, plus actual freight to distination—Iron Age, February 13.

PIG IRON IN GREAT BRITAIN.

Pig iron is in rather slower demand, and most districts remain depressed. Prices, however, have been maintained remarkably well, considering all the circumstances, during the worst season of the year, and, with what is generally a much busier time coming on, makers look forward to the future with some degree of confidence. Inquiries to hand from the Continent are more numerous, and the shipments from Middlesbrough are improving. At the same time, business generally is still restricted, and it must not be forgotten that Lincolnshire makers found it necessary to put down their prices 1s. all around last week. The following is a statement of the stocks of pig iron in public stores :

Public stores stocks, in tons :	Wednesday.
Connal's at Glasgow	56,700
Connal's at Middlesbrough	140,000
Connal's at Middlesbrough, hematite	300
West Coast hematite	16,400
N.E.R. Stores, Middlesbrough	1,460

The increase of stocks in Middlesbrough during the week ending January 28 was 1,145 tons, and in Barrow 2,000 tons, while in Glasgow there was a decrease of 480 tons.—Iron and Coal Trades Review, January 31.

MANUFACTURED IRON AND STEEL IN ENGLAND.

In the manufactured branches of the iron and steel trades market conditions vary to some extent in the different centres ; but taking the position all through the outlook has hardly assumed a more favorable aspect. One factor calculated to encourage British manufacturers however, is that the worst of the foreign competition in this country seems over. In the United States the home demand is sufficiently strong to absorb the output, and there is a better tone in some of the Continental markets, so that our imports of foreign iron and steel are likely to dwindle away to vanishing point in the ensuing year. One of the chief events of the week in the finished iron and steel trade is, of course, the amalgamation of Guest, Keen & Company, Limited, with Nettlefolds, Limited, which, following as it does hard upon the heels of the Vickers-Beardmore fusion, has produced an impression that British manufacturers are about to meet the competiton of Americans in foreign markets with their own weapons. The bar trade is keeping up fairly well, but in Lancashire, although the basis rate of £6 10s. is unaltered, there is a good deal of underselling. The ascertained average price of finished iron in the North of England for November and December is returned at £6 8s. 8d., as against £6 10s. 3d. in September and October. In the Midlands it was £6 19s. 5d. as compared with £6 18s.; and in Scotland £6 5s. 11.43d.—Iron and Coal Trades' Review, January 31.

NEW YORK METAL MARKET.

COPPER—There was a semi holiday feeling in the metal market to-day and very little business was accomplished. Copper was dull. No speculative buyers appeared and as for some time past there was no demand from consumers. No further change in asking prices was noted, there being sellers of Lake at 12¾c., of electrolytic at 12⅝c., and of casting at 12½c. The London market was quieter, but closed slightly higher and firm. Early in the day futures sold at £53 15s., but rallied and advanced to £54 5s. and from that to £54 7s. 6d., or 5s. above last night's close. The closing quotation on spots, however, was but 2s. 6d. higher than that of yesterday. The public sales in London to day were the smallest recorded in that market for more than two weeks.

PIG TIN—The market was very quiet but somewhat firmer to-day. Spot sold at 24.60c., but closed at 24.75c. asked and 24.55c. bid. For February 24.40c. was bid, while the asking price was the same as that for spot tin. No interest was shown in futures. Arrivals to-day were large, amounting to 1,025 tons, and bringing the total imports for the month to date up to 1,355 tons. Included in to-day's receipts were 545 tons from the Straits on the direct steamer Kurdistan, and 380 tons from London by the Minneapolis. The London cables reported a quiet, steady market, with prices 5s. higher on spot and 5s. lower on futures. The Singapore market is closed on account of the holidays.

PIG LEAD—The market remains firm, but quiet, on the basis of 4.10 to 4.12½c. for lots of 50 tons or more, according to delivery. St. Louis was reported steady, with a sale of 100 tons soft Missouri at 4c. A further advance of 1s. 3d. was made by soft Spanish in London.

SPELTER—Although still quiet, the market was a shade firmer, in sympathy with Western advices, spot being quoted at 4.10 to 4.15c. and February-March delivery at 4 05 to 4.10c. The St. Louis market was reported to be steadier at 3.90c. London was unchanged.

REGULUS ANTIMONY—Prices are somewhat nominal in the absence of important demand at 10¼c. for Cookson's, 8c. for Hallett's and 7½c. for other brands.

OLD METALS—There was little doing, and the market was easy.

IRON AND STEEL—Business for distant forward delivery is going on at a very satisfactory rate, prices on such contracts being based on the figures quoted below, but it is almost impossible to give quotations on pig iron for prompt and early delivery, the prices depending wholly upon the views of the holders of such small quantities as are available. High premiums, therefore, are paid by those in need of supplies for immediate use. There is no let-up in the demand for finished materials and the scarcity of supplies available for early delivery is becoming as marked as in pig iron.

TINPLATE — There is nothing new in this department. The wants of consumption are being supplied through deliveries on existing contracts and we hear of little new business.—N.Y. Journal of Commerce.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

MOSES SIMON, general merchant, Alexandria, Ont., has assigned to George Hearnden. His creditors meet on February 19.

M. Ormstein & Co., general merchants, St. Polycarpe, Que., have compromised.

J. E. Gravel, general merchant, Roberval, Que., has assigned to V. E. Paradis.

Desire Ricard, general merchant, Batiscan, Que., has assigned to A. Desmarteau.

Black & Ross, general merchants, Thetford Mines, Que., are offering 50c. on the dollar.

Wilfrid Chausse, hardware merchant, Montreal, has assigned to Kent & Turcotte.

F. A. Thompson, general merchant, Buckingham, Que., is obtaining an extension.

L. Harvey, general merchant, St. Hilarion, Que., has compromised at 25c. on the dollar.

The creditors of J. C. Giroux, general merchant, Berthier, Que., held a meeting on February 7.

V. E. Paradis has been appointed curator of P. Martel, general merchant, Roberval, Que.

T. J. Metheral, general merchant, Singhampton, Ont., has assigned to Osler Wade, Toronto.

Marcotte & Marcotte are the curators of A. Champagne, carriagemaker, Chambly Station, Que.

E. Audet, general merchant, Black Lake, Que., is offering to compromise at 50c. on the dollar.

H. A. Lalonde, general merchant, Riviere Beaudette, Que., has assigned to Lamarche & Benoit.

A. Gagnon, general merchant, St. Rose de Degale, Que., is offering to compromise at 40c. on the dollar.

The creditors of L. A. Frechette, general merchant, Thetford Mines, Que., will hold a meeting on February 17.

P. J. Kyte, general merchant, St. Peter's, N.S., has assigned, and his creditors meet on February 18.

Charles Tremblay, general merchant, Shawenegan Falls, Que., is offering to compromise at 60c. on the dollar.

F. X. Roy, general merchant, St. Phillipe de Nery, Que., has assigned, and Lefaivre & Taschereau are the provisional guardians.

E. Audet, general merchant, Black Lake, Que., has assigned, and V. E. Paradis has been appointed provisional guardian.

A demand of assignment has been made on J. A. Allard, contractor, Outremont, Que., and a meeting of his creditors has been held.

Bellevance & Frere, general merchants, St. Fabien, Que., have assigned, and V. E. Paradis has been appointed provisional guardian.

C. P. Price (late) general merchant, Copper Cliff, Ont., has assigned to J. H. Clary, Sudbury, and the creditors hold a meeting on February 14.

PARTNERSHIPS FORMED AND DISSOLVED.

Renaud & Chamberland, painters, Montreal, have dissolved.

The Mountain City Cycle Co., Montreal, have dissolved.

J. & C. Hodgson, hardware merchants, etc., Montreal, have dissolved.

The Manitoba Pump Co., Brandon, Man., has dissolved; T. H. Williamson continues.

Pullan & Florence, wholesale scrap-iron merchants, Ottawa, have dissolved. O. E. Pullan continues.

Tusty & Sons, builders and lumber merchants, Rodney, Ont., have dissolved, and Tusty Bros. continue.

McLaren & McLaren, lumber merchants and sawmill proprietors, East Templeton, Que., have dissolved.

C. C. Cloggett & Co., railway supplies, Montreal, have dissolved; Mrs. Henri Jonas has registered as continuing.

Shaw & Lendon, hardware and paint merchants, Wallaceburg, Ont., have dissolved, and are succeeded by J. C. Shaw & Son.

Dimock, Aldred, Shand & Co., planing mill proprietors, Glace Bay, N.S., have applied for a declaration of dissolution of partnership.

SALES MADE AND PENDING.

T. A. Mills, general merchant, Wingham, Ont., has sold out.

R. Quance, Clarkson, Ont., is advertising his sawmill for sale.

The assets of Joseph Beauchamp, grocer, Montreal, have been sold.

The assets of Gregoire Leveille, plasterer, Montreal, are to be sold.

A. Ross, blacksmith, Melita, Man., is advertising his business for sale.

Arthur Herbert, blacksmith, St. Pierre, Man., has gone out of business.

The assets of J. C. Giroux, general merchant, Berthier, Que., are to be sold.

G. F. Arnold, general merchant, Hensall, Ont., is advertising his business for sale.

G. L. Webster, blacksmith, Cambridge, N.S., is advertising his business for sale.

The estate of J. & G. Heroux, contractors, Yamachiche, Que., is to be sold by tender.

Found Bros., stove and tinware merchants, Gorrie, Ont., are advertising their business for sale.

CHANGES.

Wingon Wah & Co., general merchants, Montreal, have registered.

H. N. McTaggart, general merchant, Chiselhurst, Ont., has sold out to Thos. F. Eyre.

T. M. Bryce, general merchant, Yellowgrass, Man., has sold out to Taylor & Metheral.

Desmarais & Pelletier, general merchants, Marieville, Que., have registered.

Hugh Gilchrist has registered at Montreal, for Gilchrist & Co., general dealers and agents.

Cornellier & Desmarais, general merchants, St. Eugene de Grantham, Que., have registered.

Mrs. J. A. Tranquil has registered for J. A. Tranquil & Cie., commission merchants, Montreal.

The Inland Smelter Co., Limited, Kamloops, B.C., has been incorporated with non-personal liability.

Reid Bros., general merchants, Haley's Station, Ont., have sold their branch store there to T. E. Richardson.

The Boulder Mining Co., Victoria, B.C., has been incorporated.

The Hodgson Iron and Tube Co., Montreal, has registered.

The Ampere Electric Manufacturing Co., Limited, Montreal, has registered.

Rousseau & Jacques, combination lockmakers, Montreal, have registered.

D. H. Campbell, contractor, Kamloops, B.C., is opening a sash and door factory.

The British Columbia Coal Co., Limited, Nelson, B.C., has been incorporated.

The Fretheway Train-Pipes-Coupling Co., Limited, Montreal, has applied for a charter.

The Consolidated Copper Co., Limited, of Parry Sound, Ont., has obtained a charter.

The Horsefly Trading and Transportation Co., Limited, Victoria, B.C., has been incorporated.

A. A. Lundy, agricultural implement merchant, Rapid City, Man., is succeeded by Lundy & Money.

A. Urquhart, agricultural implement merchant, Lacombe, N.W.T., is succeeded by H. R. Foulger & Co.

A. R. Hopper, agricultural implement dealer, Alameda, N.W.T., has sold out the Arcola branch of his business to Connell & Clement.

Alfred Hardman and James T. Bryson have registered as proprietors under the style of Hardman & Bryson, tinsmiths, New Westminster, B.C.

FIRES.

Laird Bros.' planing mill at Dresden, Ont., has been burned; it was covered by insurance.

M. Fickler & Co.'s departmental store, at Fredericton, N.B., has been burned; it was insured for $17,000.

J. G. Hayes, general merchant, Pilot Mound, Man., was recently burned out; his property was insured.

DEATHS.

James E. Stratford, general merchant, Indian River, N.S., is dead

D. D. Macdonald, coal and wood merchant, Cornwall, Ont., is dead.

John Harrison, President of John Harrison & Sons Co., Limited, lumber, sash and door manufacturers, Owen Sound, Ont., is dead.

"GREAT WESTERN" FILES.

Black Bros. & Co. are now the selling agents for the "Great Western" brand of files for Halifax and vicinity.

TREATMENT OF TIN ROOFS.

THE probable reason why many tin roofs are allowed to rust is because the paint on being applied holds better than if an attempt was made to paint the roof as soon as completed, says Carpentry and Building. A little time also allows the rosin used in soldering to crack off and permits the paint, when applied, to cover the tin in all places. In coating the plates with tin, palm oil has been largely used as a flux, and as long as this grease is on the surface the paint for the protection of the tin does not get down to the material, and is likely to peel off or readily scrape off. It is a simple matter to give the roof a wash with turpentine, which will remove all the greasy substance. If the bulk of the rosin with which the roof has been soldered is scraped off previously to this turpentine wash there will not be enough rosin left to interfere with the paint adhering directly to the metal.

Different experienced men make the following remarks about allowing a new tin roof to rust. One says: "To allow a new tin roof to become rusty before being painted is like closing up the bunghole of a barrel while the liquid is flowing off from the spigot. A rough surface secures the paint better, but gives the tin a start towards rusting, and the rust will sooner or later destroy it." Another says: "After an experience of 30 years, my advice in the matter of roof-painting is, to begin with, a new roof should not be allowed to accumulate any rust before painting." Another expert points out that if a layer of hydrate oxide (ordinary rust) be allowed to form, the successive coats of paint will peel off, their separation from the tin being merely a question of time, during which time the rust has been spreading under the paint. From this it may be readily inferred that an iron surface, even though coated with tin, should not be left exposed to the weather until rust has formed before painting, because, once started, its action is liable to continue even though paint be applied.

Regarding the time which should elapse after a tin roof is laid before it is painted, much depends on circumstances. If the tin is greasy from the palm oil flux so as to render the paint liable to peel off, the roof may be left exposed until the oil has been washed off, although some roofers recommend that as soon as the roof is finished the rosin should be removed and the surface should be washed with turpentine, benzine, or an alkali to remove all traces of the palm oil or other grease. Another method is to sprinkle sand over the roof and sweep it off with a broom. In localities near the seacoast, where coal is largely used for fuel, tinplate exposed to the weather is soon corroded, and when the cheaper grades of roofing plates are used the surface soon becomes covered with a rust.

An expert roofer points out that the value of a paint is in its oil, and economy consists in purchasing a good oil paint, the best and purest to be obtained. He says that the use of 15 to 20 per cent. of a pure fish oil, free from any adulteration with kerosene or coal oil, will not detract from the value of a pure linseed oil. The principal reason for the adulteration is that the more plastic the first coat is the more durable, but the greater the tendency to crack the second coat. The weather-coat should always be more flexible, containing more non-drying oil. But a man of good judgment will discriminate. The most flexible, in the true sense, of good oils is boiled oil, but, if too thick, it will stand mixing with raw oil or with turpentine. As a priming coat such oil mixed with a little red lead, if not put on too thick, will stick tight to the roof.

Out For Business.

If you're out for business, if you want to get all you can and hold it after you get it, don't waste your energy in pushing poor paint.

It's harder work to sell poor paint than good paint—because you have to keep after new customers all the time. No man who once gets fooled by poor paint wants it again.

THE SHERWIN-WILLIAMS PAINT

is good paint. It makes a constant customer out of every man who tries it. It does its own advertising. Every sale brings another. When you build up a good trade you are sure to keep it.

S.-W.P. is made right—to sell right, and wear right.

EXEMPTION BY-LAWS.

AT a meeting of the executive committee of the Toronto branch of the Canadian Manufacturers' Association on February 10, presided over by J. O. Thorn, it was decided to memorialize the Ontario Legislature respecting the tax exemption of machinery and plant. In this there will be pointed out the several disadvantages that the manufacturer would labor under on account of this taxation, and tax exemption will be urged as a protection to him. It is claimed that, should this exemption not be granted, industries that are at present in Ontario might be driven away and others hindered from locating in the Province. Every municipality in Ontario will receive a letter in regard to the matter. This was thought advisable, because many places outside of Toronto are opposed to tax exemption.

The law as it at present stands in regard to voting on exemption by-laws, whereby a two-thirds vote of the ratepayers is required, will be explained. It is claimed that in cities it is practically impossible to bring out so a large a percentage of the population as to secure the necessary majority. The municipalities will be asked to vest the power of exemption in a two-thirds vote of the municipal councils. The cooperation of the Toronto Board of Trade will be asked.

CHANCE FOR TRADE WITH AFRICA.

AT THIS time when our enterprising manufacturers are giving close attention to the possibilities of establishing an export trade with South Africa, it is of the greatest assistance to them to know that we have in Canada a distributing firm of the highest standing, Robert Crooks & Co., Montreal, who have already established four offices of their own in the Cape.

They invite correspondence and solicit consignments from large manufacturers on behalf of their Cape Town, Port Elizabeth, Durban, and Johannesburg offices, each of which they state is in charge of a competent manager and carefully selected staff, experienced in the handling of general merchandise.

There are great advantages to be obtained by our manufacturers who desire to secure a share of the trade in South Africa, in corresponding with the Montreal office of Robert Crooks & Co., as they are on the spot, and thus the trouble of conducting correspondence thousands of miles apart is saved to the Canadian exporter, Messrs. Crooks already having complete cabling facilities with their South-African offices, to say nothing of the protection to the Canadian manufacturer of dealing with only one responsible firm, while having the entire South-Aftrican territory fully covered.

It is well known that the policy of this old-established firm is "progress," as their own offices established in the greatest business centres of the world are proof of.

INQUIRIES ABOUT CANADIAN GOODS.

The following were among the recent inquiries relating to Canadian trade received at the Canadian Government office in London :

1. A firm of commission merchants and forwarding agents at Florence, Italy, wish to get into communication with some first-class Canadian export houses in any line save provisions.

2. Inquiry has been received from a firm of forwarding and commission agents, mercantile brokers and bonded warehousemen at East London, Cape Colony, who wish to make connection with a Canadian manufacturing and exporting house.

3. A Manchester firm of importers and general commission agents desire to obtain an agency for a good Canadian exporter. They would be open to represent either produce or textile houses.

4. Canadian firms interested in the shipment of honey for the British market, and who would like an opportunity of displaying samples in London, are invited to correspond with a gentleman who is prepared to offer facilities.

5. An importer of fruit and other produce for London market wishes to get into direct touch with Canadian shippers.

6. Inquiry is made for names and addresses of Canadian manufacturers of buggies and other similar vehicles, farm carts and wagons.

7. A correspondent at Grimsby asks for names of Canadian shippers of eggs, cheese, bacon, etc.

8. The patentees and manufacturers of hammerless guns, rifles and every description of small arms ask for suggestions as to placing their catalogues and price lists in Canada.

9. A general merchant in the north of England, having travellers calling upon a large number of business houses, is anxious to undertake buying or selling agencies for Canadian firms. He is especially interested in grain, flour, etc., silver, copper and other ores.

10. The manufacturers of chemicals for agricultural purposes, including fine riddled bone ash, desire to get into touch with actual importers of such goods in Canada.

Inquiries received by the Canadian section of the Imperial Institute :

1. A London house desires names of Canadian producers of split peas.

2. A Midlands manufacturer is open to purchase supplies of round wood of a tough character, ½, ⅝, ¾, ⅞ and 1 inch in diameter. Price by the ton c.i.f.

3. A firm representing several continental packers of preserved goods is open to undertake the agency of a first-class Canadian packer of canned goods.

[The names of the firms making the above inquiries can be obtained on application to the editor of HARDWARE AND METAL **]**

S. E. Bancroft & Co., general merchants, Round Hill, N.S., are advertising their business as sold, the new owners taking possession March 1.

THE IVER JOHNSON

TRUSS FRAME.

Has a mechanical and commercial value not possessed by other bicycles.

The trade appreciates and recognizes the fact.

It responds to a long-felt demand for something new in cycle construction ; it has the advantage of racing weight, with roadster strength ; a rigid crank hanger—greater speed; no buckling of frame.

Made of one-inch Tubing.

Agents wanted in unoccupied territory. Send for catalog just issued.

BOARDS OF TRADE MEETINGS.

FORT WILLIAM BOARD OF TRADE.

THE annual meeting of the Fort William, Ont., Board of Trade was well attended, and great interest was displayed throughout in the proceedings by the members present. President E. A. Norton occupied the chair and made his annual address. In this address he alluded to the splendid harbor and other natural advantages enjoyed by that important lake-port town and the immense crop of grain in the West, last season, which, it is computed, will yield, when marketed, one thousand dollars per head for every man, woman and child in Manitoba and the Territories.

The Canadian Pacific Railway state that they are going to expend $500,000 in the way of improvements during the coming summer. These will chiefly consist of a new cleaning elevator, new docks and a new storage elevator. He called their attention to the fact that the Canadian Northern Railway's line to Winnipeg had been completed, and that grain was now being hauled to Lake Superior.

The town had completed, he said, its electric light and waterworks plant at a cost of $109,000. The revenue from both systems was quite in excess of the expenditure, after the amount required for the sinking fund and interest had been put aside. During the months of September, October and November, over 13,000,000 bushels of grain had been handled by the elevators. This was an unusual amount. Nine hundred and sixty-four vessels, with a registered tonnage of 1,160,261 tons and crews of 22,390 men reported and cleared at the Customs house. Over 250,000 tons of coal were received at the port, and over 692,527 tons of freight handled during the year 1901.

During the year 1900 there was collected at the port the sum of $121,000, while the revenue for the last half of the year 1901 amounted to the sum of $131,000—$7,000 more in the last half of 1901 than in the whole of 1900.

He strongly urged upon the board the advisability of petitioning the Government to proceed with the erection of a new post office and Customs house, as soon as possible, as at present the buildings devoted to that purpose were totally inadequate to the needs of the town and port.

He touched on the present telephone service given by The Bell Telephone Co., and the excessive rates charged, and thought the present an opportune time for the town to acquire a telephone system of its own. He concluded by strongly advocating the establishment of a quarantine station at some point in the vicinity.

The annual election of officers was then proceeded with and resulted as follows:

President—J. J. Wells.
Vice-President—E. S. Rutledge.
Secretary-Treasurer—T. R. Wayland.
Council—C. W. Jarvis, E. A. Morton, J. Dyke, W. Stevenson, A. Snelgrove, James Murphy, W. F. Hogarth, S. C. Young, John King, J. H. Perry, D. McKellar, A. McDougall.

OTTAWA BOARD OF TRADE COUNCIL.

At the meeting of the council of the Ottawa Board of Trade, held on the evening of Thursday, February 6, considerable business was transacted. John Coates presided, while Cecil Bethune was secretary.

The president, Messrs. Henderson, Reid and Douglas, were appointed a committee to devise ways and means for the erection of a suitable building for the board.

STANDING COMMITTEES.

The following standing committees were appointed:

Representatives on Technical Education committee—Messrs. R. W. Shannon, G. B. Greene, James Ballantyne, A. W. Fleck and Alex. MacLean.

Cheese and Butter Committee—Messrs. John R. Reid, Joseph Kavanagh, James Ballantyne, Henj. Rothwell and W. H. Dwyer.

Congress Committee—Messrs. Thomas Macfarlane, A. Holland, A. W. Fleck, J. M. Garland and P. Larmonth.

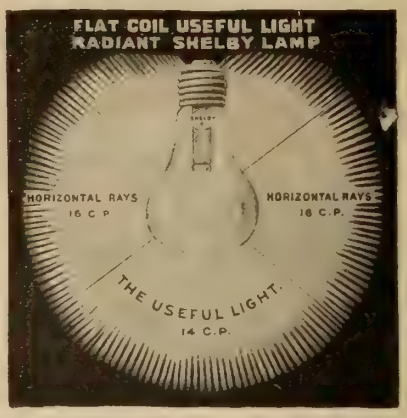
Industrial Committee—Messrs. Geo. F. Henderson, A. Holland, P. Whelan, D. Murphy and John McKinley.

A resolution of the Brantford Board of Trade, calling for a revision of the Canadian tariff by the Government, so that the Dominion markets might be kept clear of foreign competition, was brought up, and it was decided to refer it to the coming session of the Dominion Board of Trade, on March 4 next, in Ottawa.

It was decided to accede to the request of the Toronto Board of Trade, regarding the copyright question, which asked the Ottawa board to join with them in a memorial to the Government.

A communication from the London, Eng., Chamber of Commerce Organization Committee was read, referring to various subjects under consideration. The subjects will be taken up at some future time.

The Halifax Board of Trade request the Ottawa Board to join with them in handing over the management of the Intercolonial Railway to the C.P.R., while the Government ownership of the road would still be maintained.



The council did not care to endorse this principle, and nothing will be done.

President Coates, Messrs. John R. Reid, Andrew Holland, Thomas Macfarlane and R. W. Shannon were appointed delegates to the Dominion Board of Trade, which meets in Ottawa on March 4.

John R. Coates, the president of the board will deliver his inaugural address at the next meeting of the board, which will be held on February 18.

The Hon. F. R. Latchford and Messrs. Lumsden and Powell, M.P.P.'s, will be invited to address the meeting as to how Ottawa trade will be affected by the building of the Temiscamigne and Northern Ontario Railway.

C. P. R. NEW ISSUE.

A MEETING of the directors of the Canadian Pacific Railway was held in Montreal on Monday afternoon, February 10, Sir Thomas Shaughnessy presiding, and the following members of the board being present: Messrs. R. B. Angus, W. D. Matthews, C. R. Hosmer, E. B. Osler and Mr. Chas. Drinkwater, secretary.

A dividend for the half year ended December 31 was declared, the rate being the same as paid for the previous six months, 2 per cent. on the preferred and 2½ per cent. on the common stock.

After the meeting a circular was addressed to the shareholders by the president, which stated that the directors recommended that the ordinary share capital be increased by the amount of $19,500,000. This was rendered necessary by the extraordinary expansion of the company's business during the last six or seven years, and the certainty of its further expansion in volume. It is intended that the money thus raised shall be expended for the following purposes:

Locomotives, cars and other equipment, $10,000,000.

Enlargement of construction and repair shops at Montreal and other points on the system, $2,000,000.

Reduction of grades, improvement of alignment and second track where required, $6,500,000.

Additional grain elevators, terminals, business and passing sidings and other facilities, such as are being provided from month to month to meet the requirement of the company's business, $4,000,000.

As these estimates overrun the amount of the contemplated stock issue at par, it is proposed that an amount equivalent to about 15 per cent. of the issue, or $3,000,000, be appropriated from the surplus earnings fund to be further expended on these above-named improvements in addition to the proceeds of the sale of the capital stock.

The subscription price of the new stock will be payable at the Bank of Montreal, London, New York and Montreal, as follows: Twenty per cent., or $20 per share, on subscription and the same on June 27, August 27, October 27, and December 27, 1902.

MR. DAVIDSON ELECTED.

Mr. James Davidson, president of the firm of The Thos. Davidson Mfg. Co., Limited, was elected to the council of the Montreal Board of Trade on January 29. Mr. Davidson has been a member of the board of trade for several years, and the fact that on his first appearance as a candidate for the council he was easily elected speaks well for his standing in the estimation of that body. In other business associations, he has taken a prominent part, being on the executive committee of the Manufacturers' Association, and also a member of the French Chamber of Commerce, of Montreal. HARDWARE AND METAL can not only congratulate Mr. Davidson on his election, but can also congratulate the board of trade on having secured his services on the council, which are certain to be valuable.

MR. JAMES DAVIDSON,
President of the Thomas Davidson Manufacturing Co., Limited, and recently elected to the Council of the Montreal Board of Trade.

CATALOGUES, BOOKLETS, ETC.

A FREEZER CATALOGUE.

The catalogue of The White Mountain Freezer Co., Nashua N.H., for 1902 is an artistic production in which are shown the various lines of the freezers which this firm manufacture with so much success. These freezers are made of the best material that can be had, are perfect in construction—being of uniform strength throughout, simple in mechanism and have the triple-motion system. By writing and mentioning HARDWARE AND METAL, this firm will send any of our readers its handsome catalogue.

IMPERIAL OXFORD RANGE.

The Gurney Foundry Co., Limited, Toronto, are again issuing their handsome calendar, advertising their Imperial Oxford Range. This range is economical in fuel consumption, and has many desirable features. The advertisement of this company appears on another page of HARDWARE AND METAL.

AN ENVELOPE FOR EVERY DAY.

A novel and elegant system has been adopted by the J. Stevens Arms & Tool Co., Chicopee, Mass., manufacturers of fire arms, fine chemical tools and automobiles in their series of envelopes lithographed in various designs, a different one for every day in the week. These may be sent out in rotation and furnish an excellent advertisement for their goods, especially as the habit of fancy envelope collecting is becoming quite common.

PROPOSED NEW RAILWAY.

This year there is an application to be made to the Dominion Parliament for the incorporation of the Manitoba and Keewatin Railway, with the names of a number of the leading business men of Manitoba and Winnipeg as incorporators. This line will eventually connect Winnipeg with Fort Severn on Hudson Bay, covering a distance of about 325 miles, opening up over 135,000,000 acres, a space nearly three times as large as Manitoba, where at present there are no permanent settlers nor improvements outside the posts of the Hudson's Bay Co.

The incorporators will ask that a dormant Act of Parliament, passed away back in 1885, offering a land bonus of 12,400 acres per mile to a line of railway to be built in the territory be applied.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, February 14, 1902.

HARDWARE.

THE movement in general hardware this week has been very good; even better than that of last week. Orders for immediate shipment are coming in considerably better, and payments are good. Manufacturers in the city declare that they are crowded with work. This is particularly applicable to twine manufacturers, some of who have had to refuse orders on account of the rush of business. After the effects of the great snowstorm here, orders came in with a rush from country buyers, but now trade has settled down to a normal state, and a steady demand prevails. On the whole, the outlook for 1902 is very bright.

BARB WIRE.—There is a good inquiry. We quote, per 100 lb., f.o.b. Montreal, $3.00.

GALVANIZED WIRE.—There is still but a slight demand, and prices are steady. Our quotations are as follows: Nos. 6, 7 and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—There is a good movement. We quote bright iron and annealed on a base of $2.60 per 100 lb., f.o.b. Montreal, Toronto, Hamilton, London, St. John and Halifax. Net extras, per 100 lb. are: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—The market is still quiet. The discount is 22½ per cent.

BRASS AND COPPER WIRE.—There is a very light demand. The discount on both wires is 60 per cent.

FENCE STAPLES.—A good number of orders for spring are being booked this week. Prices per 100-lb. keg are: Bright, $2.90; galvanized, $3.25.

WIRE NAILS.—A very small improvement is noticed in the demand, but business is still quiet. We quote as follows: $2.55 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—Trade is only fair. We quote: $2.35 per keg for small lots and $2.27½ in carlots. Flour barrel and coopers' nails are discounted at 40 per cent.

HORSE NAILS.—These are moving out slowly. We quote: "C" brand at 50 and 7½ per cent. off and "M" brand at 60 per cent. off on oval and new city heads and 66 2-3 per cent. off for new countersunk heads.

HORSESHOES.—The demand is still light. We quote as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

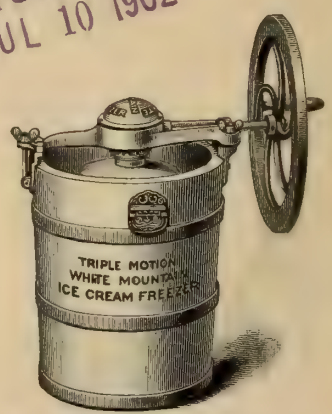
SCREWS.—There is a good inquiry for screws. There is nothing new in prices. The discounts are as follows: Flat head bright, 87½ and 10 per cent. off list; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.

BOLTS.—There has been no change in bolts or nuts this week. A moderate trade is being done. We quote: Norway carriage bolts, 60 and 5 per cent.; common, 55 and 5 per cent.; full square carriage bolts, 60 and 5 per cent.; machine bolts, 55 and 5 per cent.; coach screws, 70 per cent.; sleigh shoe bolts, 70 per cent.; blank bolts, 60 per cent.; bolt ends, 60 per cent.; plough bolts, 55 and 5 per cent.; tire bolts, 67½ per cent.;

Now is the Time to Place Your Orders.

The most perfect-working OIL STOVE made.

We are the Canadian Agents for the following goods:



The Leonard Cleanable Refrigerator,

The White Mountain Ice Cream Freezer, and

The Dangler Wickless Oil Stove.

In view of the success we have had with the above goods in the past, we have placed very large orders for them this year and are now in a position to supply customers promptly in all lines.

By placing your orders early you will have the goods on hand when the season opens and thus secure business which is very often lost through ordering late.

Freezes Ice Cream smoother than any other.

The White Mountain Freezers and Leonard Cleanable Refrigerators are extensively and well advertised in all the leading magazines, and consequently they are better known throughout Canada than any other makes.

The result is that every dealer will find it to his advantage to handle them.

We shall be pleased to furnish you with advertising matter, prices, and complete information on these goods.

SWANTON, VT.

stove bolts, 67½ per cent. To any retailer an extra discount of 5 per cent. is allowed. Nuts, square, 3¾c. per lb. off list; hexagon nuts, 4c. per lb. off list To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—A number of declines are quoted in building paper, due, as is the general opinion, to price-cutting on the part of some firms. Dry sheathing, tarred sheathing, dry fibre, tarred fibre, O K and I X L, are each 5c. per roll lower. We quote as follows: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb., dry sheathing, 30c. per roll; tar sheathing, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE. The situation remains about the same. There is a very heavy demand for twine, and prices are firm. We quote as follows: Manila, 16c.; British Manila at 13½c.; sisal, 12c. and lathyarn at 10½c. Manitoba prices are: Manila, 16c.; British manila, 14½c.; sisal, 13c. and lathyarn, 12c.

RIVETS AND BURRS.—The movement is still rather light. Discounts are: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, 35 and 5 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—Orders for spring delivery have been coming in better this week. The price is $1.25 per 100 square feet.

POULTRY NETTING.—There is a moderate demand at steady prices. Canadian or English is discounted at 60 per cent. off 2 x 2 mesh, 19 wire, and 55 per cent. off 2 x 2 mesh heavier, Canadian list.

HARVEST TOOLS. There is a much better movement this week, notwithstanding unfavorable weather conditions. The discount is 70 per cent.

FIREBRICKS.—The demand for firebricks has been very light. We quote as follows: Scotch, $19 to $23.50; English, $18.50 to $22.50 per 1,000.

CEMENT. A slight improvement in the demand is noticed this week. We quote: German cement, $2.30 to $2.40; English, $2.25 to $2.35; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.20 to $2.30 ex-cars.

METALS.

There is a good local movement in metals, and prices are firm all around. Prices are going up on the English market, and on some lines. English firms have refused to give quotations to distant buyers. Tinplates, galvanized iron and black sheets are gradually going up, and Canada plates are also rising. On the last-mentioned, a change to higher prices on this market is not unlikely. We quote as follows:

PIG IRON. Moderate demand. Summerlee, $21 to $21.50; Canadian, $18.50 to $19.

BAR IRON. There is a fair inquiry. We quote as follows: Merchants' bar, in small lots, $1.95; horseshoe iron, $2.15 to $2.20.

BLACKSHEETS.—Prices remain firm. There is a light movement. Our quo-

tations are as follows: 28 gauge, $2.65; 26 gauge, $2.60; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—Jobbers report a better demand this week. We quote: No. 28, Queen's Head, $4.40; Apollo, 10½ oz., $4.40; Comet, $4.25 with 10c. extra in less than case lots.

INGOT COPPER.—We quote 14c.

INGOT TIN.—Trade is quiet. The price for Straits is 27c.

PIG LEAD.—Business is active. Prices are unchanged. We quote $3.

LEAD PIPE.—There is a fair inquiry this week for lead pipe. We quote: Composition waste, 7½c.; ordinary, 7c. The discount is 35 per cent.

IRON PIPE.—There is a very good movement this week. We quote per 100 feet for standard pipe, screwed and coupled, in lengths under 19 feet, as follows: Black pipe, ⅛, $3; ¼, $2.50; ⅜, $2.75; ½, $3.15; ¾, $3.70; 1-inch, $5.25; 1¼, $7.40; 1½, $8.90; 2-inch, $12.25. Galvanized, ⅜, $3.55; ½, $4.15; ¾, $5.05; 1-inch, $7.25; 1¼, $10.10; 1½, $12.15; 2-inch, $16.55. Extra heavy pipe, plain ends, are quoted, per 100 feet, as follows: Black, ½, $4.50; ¾, $5.30; 1-inch, $7.60; 1¼, $10.60; 1½, $12.70; 2-inch, $17.30. Galvanized, ½, $5.50; ¾, $6.70; 1-inch, $9.60; 1¼, $13.30; 1½, $15.95; 2 inch, $21.60. For threads and couplings, 5 per cent. is added.

TINPLATES.—Business is as usual, and there is nothing new in prices. We quote: Cokes, $4.50 per box; charcoal, $4.75 to $5.25.

CANADA PLATE.—Prices are becoming stiffer and it is expected that an advance will have to be made in the near future. The demand is fair. We quote as follows: 52's, $2.65 to $2.70; 60's, $2.75 to $2.80; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL.—There is nothing new to report. We quote: Sleighshoe, $2.05; tire, $2.15; bar, $2; spring, $2.85; machinery, $3; toecalk, $2.60.

SHEET STEEL.—There is a fair inquiry. We quote as follows: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16, and ⅜, $2.40.

TOOL STEEL.—Some improvement in the tone is noticed. Diamond is worth 8c., and Jessop's, 13c.

TERNE PLATES.—The demand is still very light. The price is $7.75 to $8.

COIL CHAIN.—Chain is in good demand. We quote as follows: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7½c. per lb.; 5-16, $4.80; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.85; 9-16, $3.75; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—We quote $5.75 to $6.25.

ANTIMONY.—Nothing doing. Price is 10c.

ZINC SPELTER.—We quote 5c.

SOLDER.—A steady demand continues. Prices are the same. We quote: Bar solser, 18c.; wire solder, 20c.

PAINTS AND OILS.

At the points of production it is noticeable that both turpentine and linseed oil have developed considerable strength, and although there has been no quotable change on the local market, higher prices may be asked for almost any time. Importers are buying turpentine pretty freely now, which fact suggests that they expect a further advance in prices on the primary markets. Paris green prices are well maintained, and there is a good demand for forward shipment. American makers are not now so keen for Canadian business, as they find that their own market will require about all that they can produce. Shellac varnishes are expected to go higher in price, on account of the present strong position of the gum. White lead, at the current quotations, is moving freely, a considerable improvement over last week. Altogether, the business in general paints has been quite up to the mark during the past week. We quote:

WHITE LEAD.—Best brands, Government standard, $5.87½; No. 1, $5.50; No. 2 $5.12½; No. 3, $4.75; No. 4, $4.37½ all f.o.b. Montreal. Terms, 3 per cent. cash or four months.

DRY WHITE LEAD—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC — Pure dry, 6¼c.; No. 1, 5¼c.; in oil, pure, 7¼c.; No. 1, 6¼c.; No. 2, 5¼c.

PUTTY — We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200 lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL—Casks, 7c.; 100 lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD — Genuine red lead in casks, $4.50; in 100-lb. kegs, $4.75; less quantities, $5.75 per 100 lb. No. 1 red

lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE—Ground, casks, 5c.; less, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL—Raw, 75c.; boiled, 78c. In 5 to 9 bbls., 1c. less; 10 to 20 bbl. lots, open, net cash, plus 2c. for four months. Delivered anywhere in Ontario between Montreal and Oshawa at 2c. per gal. advance and freight allowed.

TURPENTINE.—Single bbls., 67c.; 2 to 4 bbls., 66c.; 5 bbls. and over, open terms.

SHELLAC VARNISH — Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS—$1.20 to $1.45 per gal.

CASTOR OIL—8¾ to 9¼c. in wholesale lots, and ¼c. additional for small lots.

SEAL OIL—47½ to 49c.

COD OIL—32½ to 35c.

PARIS GREEN — Petroleum barrels, 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

There is practically no change in the situation of scrap metals. Wrought iron and machinery scraps are still very scarce, and the prices quoted are firm. We quote: Heavy copper and wire, 10 to 10½c. per lb.; light copper, 9c.; heavy red brass, 9c.; heavy yellow, 9c.; light brass, 4c.; lead, 2⅞ to 2⅝c.; zinc, 2 to 2¼c.; iron, No. 1 wrought, $14; machinery scrap, $14; stove plate, $8 to $9; light iron, No. 2, $5 per ton; malleable and steel, $4; rags, country, 60 to 70c. per 100 lb.; old rubbers, 6 to 6½c. per lb.

GLASS.

Business is quite active and prices are unchanged. We quote as follows: First break, 50 feet, $2.10; second, $2.20 for 50 feet; first break, 100 feet, $4.00; second break, $4.20; third break, $4.70; fourth break, $4.95.

HIDES.

The market is quiet. We quote: No. 1 hides, 7c.; No. 2, 6c.; No. 3, 5c. Lambskins sell for 65c.

MONTREAL NOTES.

Recent changes in the prices of building paper include dry and tarred sheathing, dry and tarred fibre, and O K and I X L, each of which has declined 5c. per roll.

ONTARIO MARKETS.

Toronto, February 14.

HARDWARE.

SHIPMENTS are becoming quite brisk in tinware, enamelled ware, and dairy supplies which had been booked for future delivery. Delivery in some of these lines is being made earlier than usual owing to the pressing demands of country customers. Quite a few orders are still being booked for wire nails, barb wire, plain galvanized wire and oiled and annealed. Only an occasional order is now being booked for harvest tools, and practically all the orders appear to have been booked for spring doors and windows. The demand keeps good for bolts and rivets and business is fair in screws. Very little is now being done in building paper. Sisal rope shows another advance of ½c. per lb., the base price now being 12½c. per lb. Tarred lath yarn is also higher, being quoted at 11c. These are the only quotable changes this week.

BARB WIRE—There are still a few orders being booked on future account and prices are steady and unchanged. We quote as follows: F.o.b. Cleveland, $2.77½ for less than carlots, and $2.65 for carlots. From stock Toronto, $3

GALVANIZED WIRE—A few orders are being booked for future delivery. We quote: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3 30; No. 13, $3.10 to $3 40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE—Some business has been done during the week in oiled and annealed for spring delivery. The base price is as follows: $2.60 per 100 lb. Oiling 10c.; coppering, 60c., and tinning, $2 per 100 lb. extra. Delivery points, Toronto, Hamilton, London and Montreal, with freights equalized on those points.

WIRE NAILS—Prices are steady, and the principal business being done is still on future account. We quote $2.55 for less than carlots, and $2.50 for carlots. Delivery points, Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS—Trade continues uninteresting. We quote base price $2.35 per keg, with 7½c. allowance on carlots.

HORSE NAILS — The movement is light. Discounts are as follows: "C" brand, oval head, 50 and 7½ per cent., and on "M" and other brands, 50, 10 and 5 per cent. Countersunk head 60 per cent.

HORSESHOES—Business is only moderate. We quote f.o.b. Toronto: Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

SCREWS—A fairly-good trade is still being done. Discounts are as follows: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.

RIVETS AND BURRS—The machine shops and boiler makers are becoming increasingly busy, and there is a good demand for rivets, and especially for the smaller sizes. We quote as follows: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 and 10 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS — Trade is keeping up well. We quote as follows: Carriage bolts, common ($1 list), 55 and 5 per cent.; carriage bolts, full square ($2.40 list), 60 and 5 per cent.; carriage bolts, Norway iron ($3 list), 60 and 5 per cent.; machine bolts, all sizes, 55 and 5 per cent.; coach screws, 70 per cent.

ROPE—Sisal rope has advanced ½c. per lb., and is now quoted at 12½c. base. Tarred lathyarn is also higher, being quoted at 11c. Manila rope is unchanged. Pure manila, 16c.; British manila, 13½c. The hemp market rules firm on both sides of the Atlantic.

DAIRY SUPPLIES—Milk can trimmings are going forward freely. Discount 25 per cent.

TINWARE—Shipments show quite an improvement this week, and they are now quoted brisk. Discount 40 per cent.

ENAMELLED WARE—Customers are now looking forward to spring requirements and are pressing for delivery, and quite a few shipments have been made during the week.

SAP BUCKETS—These are still going forward freely. Discount 40 and 10 per cent.

SCREEN DOORS AND WINDOWS—Booking

for future delivery is now practically over for the season, only an occasional order coming to hand. Common doors, 2 or 3 panel, are quoted f.o.b. factory points as follows: Walnut, stained, 3-in. style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-in. style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2.50 per dozen.

EAVETROUGH—Orders are being booked for future delivery. The ruling price for 10-inch is $3.10 per 100 feet. This figure is the same as last year, and is lower than the cost of raw material warrants. An effort, however, is being made to effect an agreement among the different manufacturers whereby the cutting of prices will be discontinued.

SPADES AND SHOVELS—A few orders are still being booked. Discount 40 and 5 per cent.

HARVEST TOOLS — An occasional order for future delivery is still being received. Discount 70 per cent.

GREEN WIRE CLOTH—Only a small trade on future account is now being done. We quote $1.25 per 100 square feet.

ICE CREAM FREEZERS AND REFRIGERATORS—Orders in both these lines are now being booked for future delivery. Not a great many so far have been booked.

BUILDING PAPER — The demand has fallen off, and is now light. Quotations are as follows: Dry sheathing, grey or straw, 30c. per roll; tar sheathing, grey or straw, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

POULTRY NETTING—Some shipments are being made. We quote: 2-in. mesh, 19 w.g., discount 60 per cent.; 2-in. mesh, 18 w.g. and heavier, 50 and 10 per cent.

CEMENT—The severe weather is causing this material to be quiet, but the outlook for a good season's business is becoming brighter. The prices are steady and unchanged. We quote: Canadian Portland, Rathbun's "Star," $2.25 to $2.65; "Beaver," $2.10 to $2.50; "Ensign," $1.90 to $2.30; German, $3.15; English, $3; Belgian, $2.50 to $2.75; Canadian hydraulic, $1.25 to $1.50 per bbl.

METALS.

Iron and steel continue strong, and the same remarks apply to nearly all sheet metals.

PIG IRON — The pig iron market still rules decidedly strong, and in the United States premiums are being paid in some instances for prompt delivery. The idea for No. 2 foundry is $18 on track Toronto.

STEEL—The market is firm, with difficulty being experienced in getting supplies. Quotations by Toronto wholesalers are: Merchantable cast steel, 9 to 15c. per lb.; drill steel, 8 to 10c. per lb.; "BC" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe-calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2.25; reeled machinery steel, $3, hoop steel, $3.10.

BAR IRON — Prices are steady and unchanged. The demand is not brisk and some of the mills appear to be disappointed. The base price is $1.95 to $2.05. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS—The demand continues good with prices steady and unchanged. We quote as follows: Common, $3 15 for 28 gauge; and dead flat, $2.50 for 26 gauge.

CANADA PLATES—Shipments from stock are small, but orders are being booked freely for forward delivery. The stiffening of prices is making dealers anxious to protect themselves. We quote as follows: All dull, $3.00; half polished, $3.10; all bright, $3.75.

GALVANIZED SHEETS—The cold weather has checked the demand for prompt delivery, but quite a few import orders are being booked. The outside markets rule firm. We quote: "Queen's Head" brand at $4.50 in case lots, and $4.65 in less quantities.

TIN — The British and United States markets are a little unsettled. A fair business is being done locally. Ruling price is still $28.

TINPLATES—Inquiries are numerous and sales good. During the past week there have been several advances in the primary market, and prices are about 10½d. higher than 10 days ago. Locally, no quotable change has taken place, and we still quote IC, usual sizes, at $4 per box.

TINNED SHEETS—These are going out freely for cheese vat and cheese factory can purposes. We quote: 72 x 30, up to 24 gauge, 7½c.; ditto, up to 26 gauge, 8c.

TERNE PLATES—Very little doing. We quote: I C, 20 x 28 gauge, at $8.50.

COPPER—The demand is fair both for ingot and sheet copper. We quote ingot at $15 per 100 lb., and sheet, plain, at $22 to $23.

BRASS—A fair trade is being done. Discount 15 per cent.

SOLDER—The demand is good. We quote: Half-and-half, guaranteed, 19c.; do. commercial, 18½c.; refined, 18c.; wiping, 17½c.

LEAD—Trade is quiet. We quote: $3.50 to $3.75 for pig lead and $5 for bar.

IRON PIPE — Trade is good and some houses report business ahead of last year at this time. We quote: Black pipe, $5.40 for 1-inch.; galvanized, $7.95 for 1-inch.

ZINC SPELTER—Trade is quiet. We quote $5.50 to $6 per 100 lb.

ZINC SHEET—While quiet it is fair for this time of the year. We quote $6 to $6.25 in casks and $6 25 to $6.50 in part casks.

ANTIMONY—Trade is fair. We quote 10c. per lb.

PAINTS AND OILS.

The paris green market is in an unsettled condition locally, some houses quoting one price and some another, so that for the present we withdraw quotations. In the majority of cases, however, prices are the same as quoted last week. The cold weather has made the local retail trade in paints and oils rather quiet, but wholesalers report that there are unusually heavy stock orders being received for this time of year for future delivery in March, April and May. The prices of raw and boiled linseed

oil remain firm, and are likely to continue so, as the English and United States quotations are higher than ours. Turpentine is quiet, but prices are steady. Varnishes are active and firm. No changes whatever have occurred since last week. We quote :

WHITE LEAD—Ex Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2. $5.12½; No. 3, $4.75; No. 4, $4.37½ in pkgs. of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb. $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITE ZINC—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.

BENZINE—In barrel lots, 16½c. per gal.; less quantities, 25c. per gal.

PARIS WHITE—90c. to $1 per 100 lb.

WHITING — 65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC — In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2.25; bladders, in 100 lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE — Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1.20 to $1.30 per gal.

CASTOR OIL — English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 4 barrels, 77c.; boiled, 80c.; 5 to 9 barrels, raw, 76c.; boiled, 79c., delivered. To Toronto, Hamilton and London, 2c. less.

TURPENTINE—Single barrels, 68c.; 2 to 4 barrels, 67c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

There is a light retail trade being done locally, but import orders are as yet coming in slowly. The stock prices are unchanged. We quote : Under 26 in., $4.25; 26 to 40 in., $4.65; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5.75; 71 to 80, $6.25; 81 to 85, $7; 86 to 90, $7.75; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

OLD MATERIAL.

The market is becoming steady and stocks of metals on hand are light. The demand is improving. The prices this week are unchanged. We quote : Agricultural, 60c. per cwt.; machinery cast, 60c.; heavy copper, 10c½. per lb.; stove cast, 40c.; No. 1 wrought, 50c. per 100 lb.; new light scrap copper, 7½c. per lb.; bottoms, 8c.; coil wire, 10c.; light brass, 5c.; heavy yellow brass, 7½c.; heavy red brass, 8c.; scrap lead, 2¼c.; zinc, 2c.; scrap rubber, 6c.; good country mixed rags, 50 to 60c.; clean dry bones, 40 to 45c. per 100 lb.

HIDES, SKINS AND WOOL.

There is a good demand for hides and skins, but for wool the market is very poor. There has been no change in prices. We quote what buyers pay on arrival :

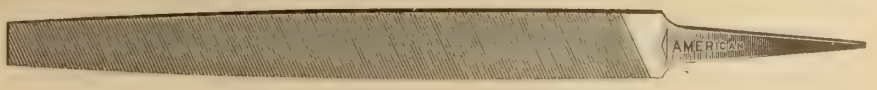
HIDES—We quote : No. 1, green, 7c.; No. 2 green, 6c.; No. 1 green, steers, 8c.; No. 2 green, steers, 7c.; cured, 7¾ to 8c.

SKINS—We quote : No. 1 calfskins, 9c.; and No. 2, 7c.; deacons (dairies) 55 to 60c. each; sheepskins, 65 to 80c.; deerskins, 12½ to 14c. per lb.

WOOL—We quote : Fleece, 13c., and unwashed, 7 to 8c. per lb.

COAL.

Stocks of coal on hand are so light that there is no wholesale trade being done, and no quotations are made. There is enough stove coal on hand only to fill local retail orders. The prices at the bridge are still given as the same, but coalmen report there is none to be had. We quote at international bridges as follows : Grate, $4.75 per gross ton; egg, stove and nut, $5 per gross ton; soft coal, $2.50 to $3.25 in bond, according to grade.



PETROLEUM.

Trade is nominal and prices are unchanged. We quote : Pratt's Astral, 16½ to 17c. in bulk (barrels, extra); American water white, 17 to 17½c. in barrels; Photogene, 16½ to 17c.; Sarnia water white, 16 to 16½c. in barrels; Sarnia prime white, 14½ to 15c. in barrels.

MARKET NOTES.

Sisal rope and tarred lathyarn are both higher, the former at 12½ and the latter at 11c.

A shipment of Samson's lumbermen's boot calks has been taken into stock by H. S. Howland, Sons & Co. This line of goods has been scarce lately.

THE MAIL-ORDER DEPARTMENT.

TO a man keenly alive to the possibilities of the mail-order trade, remarks Printers' Ink, the lack of interest shown by most retailers in this department of their business is discouraging.

Business men, accounted bright and brainy, pursue the beaten path of retailing and refuse to open their eyes to the splendid opportunities of the mail-order field in plain view before them.

Without a mail-order department a store's circle of trade is confined within the territory of easy distance. It is limited to the people who find it more convenient to trade there than elsewhere. Add a mail-order department and the scope of trade is limited only by the limits of the postal system.

The great stores of our large cities gather orders through their mail-order departments from all parts of the country. While it is true that the prestige of location carries some weight, the retailers of the smaller cities may develop a mail trade by the same means.

Selling goods by mail is accomplished by the same process that is involved in selling over the counter. The difference is in the application of the process. Correspondence must take the place of conversation, and a sample or picture of the article must be substituted for an actual view of it. The arguments of the salesman must go into the catalogue and other forms of printed matter. As catalogues, booklets, letters, circulars and other printed things sent out are salesmen for the house, they must be neat and presentable, just as the salesmen in well-ordered stores are required to be careful of their personal appearance.

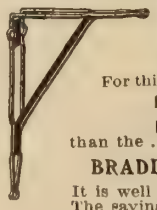
The difference between a successful salesman and one who is not will be found to exist in like manner between the successful and the unsuccessful mail-order literature. It is altogether a question of salemanship, for advertising is, manifestly, an effort to sell something. It follows, therefore, that the more closely the methods of a successful retail salesman are followed, in mail-order work, the better are the chances for success.

In the smaller cities and towns the merchants make strong efforts to get the country trade. The patronage of the farming community within a radius of 15 or 20 miles is usually an immense item and well worth cultivating. With the aid of the rural free-delivery system and a well-arranged mail-order department, the wide-awake merchant may place his whole store, virtually, at the elbow of the farmer and his family. They will buy more and buy oftener, because they can do so with little effort.

The greatest use of the mail-order department to merchants in small cities is in extending trade beyond the usual limits of easy distance. By intelligent, systematic, persistent work, he may build up a patronage, in the surrounding counties alone, worth thousands of dollars. There is no limit to the possible growth.

PERSONAL MENTION.

Mr. W. Stavert, the newly-appointed representative in Canada of Jenkins Bros., Boston, Mass., who was lately with Peck, Benny & Co., has been visiting the trade in Montreal this week for his new firm.



Mr. Ayer, representing The Walworth Manufacturing Co., Boston, is in Montreal this week.

Mr. A. B. Lee, president of Rice Lewis & Son, Limited, has been elected chairman of the Toronto Harbor Commission.

Mr. Marshall, of the firm of Congdon & Marshall, hardware merchants, Dunnville, Ont., was in Toronto this week on business. He reports prospects bright for a good year's trade.

Persons addressing advertisers will kindly mention having seen their advertisement in The Canadian Hardware and Metal Merchant.

J. N. Davidson is building a brick residence at Hikenside, Man.

A. W. Hubley is building a large hotel at Hubley Settlement, N.S.

It is stated that an electric light plant is to be established in Minnedosa, Man.

Harry Geary is collecting material for his new brick house at Springbank, Ont.

The starch works at Prescott, Ont., are about completed, aud the steamfitters are at work.

John Pedden is preparing for the erection of a brick and stone dwelling at Springbank, Ont.

Ernest White has let contracts for a white brick nine-roomed residence at St. Marys, Ont.

The Royal Bank of Canada is preparing plans for the erection of a $3,000 bank building at Hawkesbury, C.B.

L. Empey has taken out a permit at Ottawa for the erection of a brick-veneered dwelling on Percy street to cost $1,000.

St. James' Church, Orillia, Ont., is to have a new school building to cost $4,000 when completed, and tenders for its erection will be shortly asked for.

The Canadian Cordage Co., Peterboro', Ont., has recently had installed a new hot-blast heating apparatus made by The Sturtevant Co., of Boston, at a cost of $4,000. The principle of this system consists in a chest or chamber filled with stacks of pipe coils heated with steam from a boiler. From this chamber the heated air is distributed, by means of a large rotary fan, uniformly to all parts of the building, thus giving, it is claimed, a steady and evenly-distributed heat to the 700,000 cubic feet of space contained in the main buildings, which cover nearly an acre of superficial area.

BUILDING CONTINUES BRISK.

Since last week the building permits taken out from the Toronto City Commissioner's office are as follows: Fred H. Davis for two small one-storey brick stores on 977½ and 979 Bloor street west, to cost $500; W. J. Bolus & Co. for brick alterations to their store on 245 Yonge street, for $5,000; Mrs. M. Elliott for alterations consisting of a brick foundation and gravel roof to dwelling on 55 and 57 Mutual street, for $1,500; Geo. Webb for a stone cellar under his dwelling on 103 and 105 Fuller street, for $350; The Standard Chemical Co., Gooderham building, for the erection of a 1½-storey stable on the Esplanade west, for $500; A. Clarke for a two-storey and attic brick dwelling on 36 Howard avenue, for $2,700; J. Minto for a pair of two-storey brick and stone stores on 593 and 595 Dundas street, for $3,000; Bawn & Farnworth for the erection of three two-storey stores and dwellings of brick on 570 College street, for $2,500; F. Everest for a two-storey brick dwelling on Concord avenue, for $2,500; A. C. McKay for a two-storey addition to his roughcast dwelling on Prince Arthur avenue, for $200; Wm. Fogoe for a two-storey roughcast dwelling on Gladstone avenue, for $700; Herbert N. Death for a pair of semi-detached two-storey and attic brick dwellings on Dovercourt Road, for $4,000, and Geo. Marten for a two-storey and mansard, three sides brick, addition to dwelling in rear of 85 Shuter street, for $600.

HALIFAX PLUMBING BY-LAW.

A committee presided over by Alderman Geldert was recently appointed at Halifax to revise the plumbing by-law. In their report they amend the regulation by providing that any person or corporation carrying on a plumbing business in the city may be granted a license upon condition that only certificated plumbers be sent out to do the work. This by-law as amended came up before the Halifax Board of Health on February 4 and was given its first and second readings.

RETAIL MERCHANTS ELECT OFFICERS.

PRESIDENT W. B. ROGERS was chairman at the annual meeting of the Toronto branch of the Retail Merchants' Association of Canada on Tuesday evening, February 12, in the Temple Building.

The proceedings were opened with addresses by Messrs. J. A. Flett, Hamilton, vice-president of the Dominion Trade Congress, and James Wilson, ex-president of the Toronto Trades and Labor Council, who desire to organize the retail clerks in Toronto, with the consent of the merchants.

George J. St. Leger suggested that the retail merchants should have a representative on the Trades and Labor Council. James Wilson promised to lay the matter before that body.

President W. B. Rogers in his annual address stated that he was in favor of any scheme having for its object the beautifying of the city. It would meet with the approval of all retail merchants. He touched on the abolition of trading stamps and thought that the legislation of last session would be sustained. He concluded by mentioning that Montreal has the power to levy a special tax on departmental stores, and that a Bill modeled on the Montreal measure was being prepared by the Toronto executive to be brought before the Ontario Legislature at any early date.

John Hargreaves, for the drug, S. R. Hanna, for the boot and shoe, and J. Wilmott, for the butchers' section all had something to say on the abolition of trading stamps.

Reports were also made by F. E. Higgins, for the grocers', and P. N. Judah for the fruiterers' section, and S. Corrigan for the collecting department.

The financial report showed a balance of $11.60 on hand.

John Hargreaves moved a resolution instructing the Executive Committee of the Association to appoint a committee to investigate the manner in which the civic assessment department are dealing with the taxation of the city.

The following officers were elected:

President—W. B. Rogers.
First Vice-President—J. Wilmott.
Second Vice-President—G. J. St. Leger.
Treasurer—Wm. Dineen.
Secretary—E. M. Trowern.
Representatives to Exhibition Board—G. J. St. Leger and Thomas Bilton.

At the close of the proceedings the president was presented with a handsomely-framed address by the members.

ABOUT THIS PAINT QUESTION

When it comes to selling, you want a paint that will bring you money. That's all we're in business for. The question of price has something to do with it. The question of quality has a great deal more. People realize at last that ready-mixed paints are the paints for a house; the business is here to stay. Don't kill your trade in this progressive branch with cheap paints, don't kill it with dear paints. A cheap paint is one of the dear paints; any amount of advertising will not save your business with anything but first-class paint. **RAMSAYS PAINTS** have proved winners on account of quality, on account of price which is just right for a first-class paint—a high-grade paint—the best that is known to the paint maker.

Our travellers can tell you what we can do for 1902 and so can we if you will write.

DO YOU HANDLE

Standard Silverware?

If not, you should. Many hardware dealers are selling these goods with profit to themselves and **satisfaction** to their customers.

STANDARD Silverware means **HIGH STANDARD** Silverware.

Every article bearing our trade mark has an absolute guarantee of quality. **If you find any imperfect goods with our brand upon them, return them at once.**

CATALOGUE AND PRICE LIST UPON APPLICATION.

Standard Silver Co.,
Limited

31-43 Hayter Street, **TORONTO**

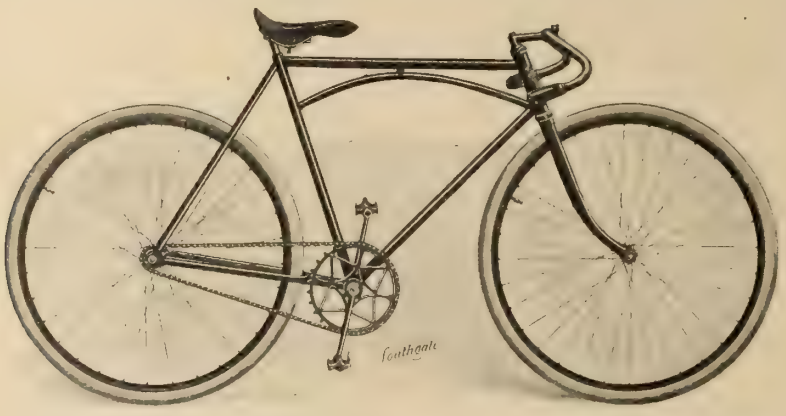
THE COURSE OF PRICES.

DUN'S index number of the course of prices, with due allowance for the relative importance of each commodity, was $99,576 on February 1. This indicates a decrease of slightly more than $2 from the level of January 1, which was the highest point of recent years. The fall of nearly 2 per cent. reflects the reaction in grain speculation which produced sympathetic declines in prices of meats. Price changes during January emphasize two gratifying points ; that the manipulated rise in corn was checked without involving greater disasters, and that the quotations of iron and steel were not excessively advanced, despite conditions most favorable for the establishment of an abnormal price level.

The index number of February 1 is given below, separated into seven classes showing where changes were most extensive, and earlier dates are also given for comparison :

	Feb. 1, 1902.	Jan. 1, 1902.	Feb. 1, 1901.
Breadstuffs	$19,565	$20,002	$15,062
Meats	9,494	9,670	8,592
Dairy and garden..	14,384	15,248	13,868
Other food	8,961	8 952	9,416
Clothing	15,460	15,547	16 271
Metals.....	15 494	15,375	15,845
Miscellaneous	16,278	16,743	15,956
Total.....	$99,576	$101,587	$95,010

Examination of the index number in detail discloses a fall of about 2½ per cent. in breadstuffs during the first month of the year. The loss was heaviest in oats, then corn, the next wheat. Other products in this class are much less prominent owing to the comparatively small per capita consumption. In meats, the decline was 1 8 per cent.; live hogs and beef both weakened somewhat, but sheep scored a slight advance. The sharpest losses in this division were made by lard, pork, hams and bacon, all of which moved to a lower level.



The most severe fall occurred in dairy and garden products, which lost 5.7 per cent. during the month. Many items contributed to this change, but the decline of 5c. per doz. in the price of eggs was by far the most important in affecting the index number. Hay, potatoes and some other vegetables were also cheaper, and a few minor products weakened. Butter, cheese and milk were all well sustained.

TRUSS-FRAME BICYCLE.

Herewith is shown a cut of the Iver Johnson truss-frame bicycle, a departure from the long-accepted diamond frame, which promises to be received with much favor by the trade.

The curved or arched tube adds much rigidity to the frame of the bicycle, thereby diminishing the possibility of buckling. It also strengthens the hanger construction, which is considered desirable, as the more rigid this point can be made the greater are the speed possibilties of the bicycle.

The truss also permits of the building of a very light machine for road use without incurring the risk of structural weakness.

With the readoption of 1-in. tubing, which promises to become quite universal in the near future, and of which this model is made, it is well not to lose sight of any point that is conducive to strength and rigidity, particularly on light models.

DEATH OF A BUSINESS MAN.

One of Owen Sound's first pioneers passed away on Friday, February 7, in the person of Mr. John Harrison, the founder of the extensive lumber and sash and door factories of The John Harrison & Sons Co., Limited.

Up to the time of his death, deceased was an active member of the Owen Sound Board of Trade, and was an ex-president of that body. The largest real estate holder in that district, he was ranked amongst the wealthiest men of the community.

He is survived by a large family, nearly all of whom are closely connected with the manufacturing interests founded by their father. His funeral was held last Monday, and was attended by the town council, the board of education and the board of trade.

The mill belonging to B. B. Barnhill, general merchant, Two Rivers, Que., was burned.

Extract from a letter just received by The Canada Paint Company, Limited, Montreal, from Mr. A. Strachan, Hardware and Paint Merchant, Kingston, Ontario:

"By referring to your ledgers
"you will be able to ascertain
"the number of years we have
"been selling your paints.

" From the experience
"of these years and from
"actual and practical tests,
"backed by numerous testi-
"monials from our customers,
"we can confidently state that
"your Mixed Paints are
"second to none in Canada,
"and, indeed, far superior to
"any we have met with."

LIMITED

SILVERSMITHS AND MANUFACTURERS OF ELECTRO-SILVER PLATE.

Please bear in mind that we are **Not in the Trust,** or **are we Members of any Silverware Association or Combine.**

Boiled down, this means that we are not **dictated** to as to whom we shall sell to or at what prices we shall sell at.

OUR travellers are now out with samples and photographs of new goods. It will pay you not to place your order elsewhere until you see what we have to offer.

If you have not received a copy of our new Catalogue, all you have to do, **being in the Trade,** is to ask for it.

Our latest Catalogue illustrates E. P. Hollow Ware and Sterling Silver Flat and Hollow Ware. Besides this, we issue a Flat Ware Catalogue and a Catalogue of some special brands of goods.

We make a Specialty of **Hotel, Club, Steamboat** and **Dining-Car Silverware,** in fact, to use a Hardware expression, we make everything in Silverware from a needle to an anchor.

Factories and Salesrooms, King St. West, Toronto, Can.

E. G. GOODERHAM, Managing Director.

LUMBER CUT IN OTTAWA VALLEY.

AN estimate of the lumber cut of the Ottawa and Ottawa Valley mills for the seasons of 1900 and 1901 shows an increase in favor of last year. The total for 1901 is placed at 611,000,000 feet, as against 588,000,000 for 1900, an increase of 23,000,000.

The cut of the different mills is as follows: Mr. J. R. Booth's mill, 125,000,000 feet; Gilmour & Co., Trenton, 25,000,000 feet; Hull Lumber Co., operating Mason's mill, 35,000,000 feet; McLachlan Bros., Arnprior, 70,000,000 feet; Hawkesbury Lumber Co., 45,000,000 feet, and W. C. Edwards & Co.'s Rockland and New Edinburgh mills, 85,000,000 feet. The St. Anthony Lumber Co. cut at the Whitney mills 50,000,000 feet, an increase of 8,000,000 feet; Gillies Bros., Braeside, cut 40,000,000 feet, increase 10,000,000; A. & P. White, Pembroke, cut 8,000,000 feet, increase 3,000,000; McLaren & McLaurin, East Templeton, cut in 1901 over 20,000,000 feet, an increase of 14,000,000.

The cut of the following firms was practically the same for both seasons: Pembroke Lumber Co., 14,000,000 feet; Ross Bros., Buckingham, 10,000,000 feet; McLaren Estate, Buckingham, 15,000,000 feet; J. R. & J. Gillies, Arnprior, 3,000,000 feet; A. Hagar & Co., Plantagenet, 6,000,000 feet; G. H. Perley & Co., Calumet, 25,000,000 feet; Bailey Bros.' mill, Aylmer, cut before the fire in 1900 over 4,000,000 feet. It was not operated last season. The Ottawa Lumber Co.'s mill at Calumet cut 8,000,000 feet in 1900, before it was secured by Mr. G. H. Perley. The prospects are favorable for a large cut in 1902, as the demand for high grade lumber is a heavy one.

QUESTIONABLE PRACTICE RE. PATENTS.

The following, addressed to the editor of The Montreal Star, recently appeared in the columns of that paper:

"Sir,—It is the practice of several parties throughout Canada to address circulars to owners of Canadian patents, stating that under section 37 of the Patent Act, the owner of a Canadian patent is obliged to manufacture his invention within two years from the date of his patent, otherwise all his rights and privileges shall cease and determine, and such parties accordingly warn the patentee that his patent may become void if he does not manufacture before a given date, and suggest that he remit them a few dollars to pay for securing an extension of the term during which working is to be commenced. While the letter of the law is as above expressed, yet for several years past it has been definitely established by the courts in interpreting the law, that unless there is a demand for a patented article a patentee is not obliged to manufacture, and his patent would not be voided through failure to do so. If, however, there is a demand for the patented invention, the patentee is obliged to supply same, or grant licenses for its manufacture or use. As patentees are not fully informed in the matter by the circulars issued, it is not unlikely that many act upon the incomplete information given and spend their money unnecessarily."

AN EXPLANATION.

Clare Bros. & Co. write from Winnipeg, stating that the item regarding their firm under the Winnipeg notes on page 32 of HARDWARE AND METAL of February 1 was incorrect. This statement, which read, "Mr. H. J. Clare, of Clare Bros., is succeeding Mr. Horace Wilson as manager of the company's branch of Winnipeg," should have been "H. J. Clare, of Clare Bros. & Co., Preston, Ont., and J. Breckest, formerly of The McClary Manufacturing Co., have succeeded Mr. H. Wilson in the management of Clare Bros. & Co.'s branch at Winnipeg."

MINERALS OF BRITISH COLUMBIA.

The estimated mineral output of British Columbia was dealt with editorially in last week's issue. Since then we have received through the Bureau of Mines a detailed statement of the estimate compared with the ascertained output of 1900. Subjoined is one of the principal tables in the estimate:

ESTIMATED MINERAL PRODUCTION OF BRITISH COLUMBIA.

	Customary Measure.	1900. Quantity.	1900. Value.	1901 (Estimated) Quantity.	1901 (Estimated) Value.
Gold, placer	Ounces.	63,936	$1,278,724	43,204	$ 892,500
" lode	"	167,153	3,453,381	227,696	4,704,200
Silver	"	3,958,175	2,309,200	4,685,718	2,624,002
Copper	Pounds.	9,997,080	1,615,289	30,736,798	4,951,698
Lead	"	63,358,621	2,691,887	50,529,260	1,970,641
Coal	Tons, 2,240 lb.	1,439,595	4,318,785	1,529,210	4,587,630
Coke	"	85,149	425,745	134,760	673,800
Other materials	.....	.....	251,740	.....	309,030
Totals	.....	.....	$16,344,751	.....	$20,713,501

N.B.—1900 given as ascertained.

CANADA'S TRADE INCREASING.

For the several months of the present fiscal year commencing with August 1 and ending with January 31 last, the trade of Canada aggregated $253,737,739, which is an increase of $18,716,000 for the same time the year previous. The imports were $114,719,901, compared with $104,890,074 for the same time last year. The exports last year were $130,130,760, and for this year $139,019,838, or a gain of $8,889,078. There also was an increase in the duty of $1,573,446, the exact figures being $18,134,353, and $16,560,907 for the same time in the previous year.

For the month of January alone the imports amounted to $15,055,052, as against $13,303,762 last year. The duty collected was $2,455,810, a gain of $350,000. The exports of domestic produce amounted to $13,268,734, as against $9 762,446.

CURRENT MARKET QUOTATIONS.

February 14, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

FOR THE STREET

THE TRADE "M&M" MARK LIGHT

FOR THE STORE

What "M & M" Lamps Do.

They give a stronger, whiter, steadier light than the electric arc. Operate easily, safely, satisfactorily. Save money—actual 600 candle-power light at a cost of one-half cent an hour. Think of it! Write for circulars, etc. GOOD AGENTS WANTED. Exclusive territory allowed.

ACORN BRASS WORKS,
Dept. 8, 15-23 Jefferson Street CHICAGO, ILL.

What "M & M" Lamps Save.

Barrett Hardware Co., Joliet, Ill., write: "Gasoline and supplies for six "M & M" Lamps cost us $45.46 last year, an average of 60c. a month per lamp. We believe we had as good a light as though we had six electric arc lights at a cost of $360." No wonder that over 30,000 "M & M" Lamps are in use all over the United States and Canada. THEY KILL BIG GAS AND ELECTRIC LIGHT BILLS. It will pay you to investigate. Write for circulars. AGENTS WANTED. Dept. 8, 15-23 Jefferson St., Chicago.

WROUGHT IRON WASHERS.

Canadian make, discount, 40 per cent.

SEPARATE SEALED TENDERS, addressed to the undersigned, will be received at this office until Tuesday, February 25, inclusively, for the construction of Armouries at the following places:

1st Revelstoke, B.C., 3rd Kaslo, B.C.
2nd Kamloops, B.C., 4th Nelson, B.C.

Plans and specifications can be seen and forms of tender obtained for Revelstoke, and Kaslo, on application to the Postmasters at those places; for Nelson, at the office of Mr. J. A. Macdonald, Architect, Nelson; for Kamloops, at the office of Mr. A. Thompson, clerk of works, Kamloops; and for all the works at the Department of Public Works, Ottawa.

Envelopes containing tenders must be endorsed "Tender for Armoury, Revelstoke"; "Tender for Armoury, Kamloops"; "Tender for Armoury, Kaslo,"; and "Tender for Armoury, Nelson" respectively.

Persons tendering are notified that tenders will not be considered unless made on the form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the party decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order
FRED. GELINAS,
Secretary.

Department of Public Works,
Ottawa, January 25th, 1902.

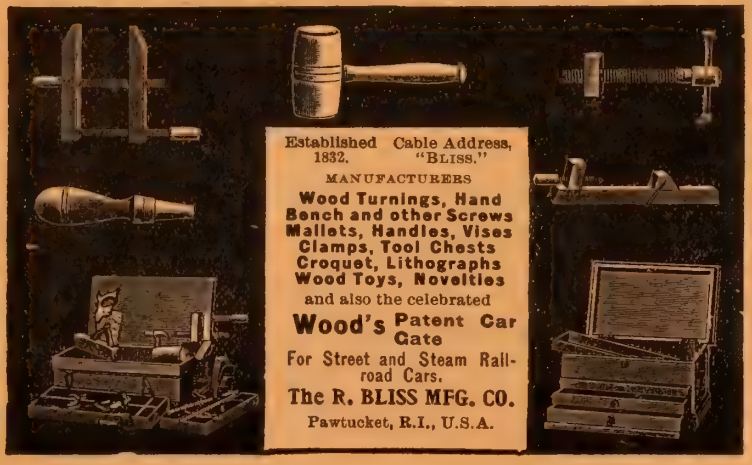
BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.



THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

1902 GARDEN HOSE. 1902

We manufacture the most popular and best selling lines of Garden Hose in Canada. Our "Maltese Cross" brand we confidently recommend as the finest Garden Hose on the market.

We have other grades not quite so expensive, but good reliable brands, viz.: "Lion" (the popular medium-priced hose), "King" "Sun" and "Leader."

Our "Kinkproof" (wire wound) hose is wired by a special process controlled solely by ourselves, and is so constructed that it may be cut at any wind of the wire without loosening or uncoiling, the wire being self-gripping throughout each length.

CHURCH'S COLD WATER

ALABASTINE

The demand for **ALABASTINE** comes with the opening of Spring, and continues all Summer.

Is your assortment complete, in all tints and white? Remember, "It is the early bird that catches the worm." The claim that "It is the early worm that gets caught," will not apply when stocking **ALABASTINE**. The dealer who gets **"CAUGHT"** is the one who, on the pretence that he is to have exclusive sale, or for any other reason, buys goods that are not in demand, and that have neither record of value nor proof of origin.

ALABASTINE is the only permanent wall coating ready for use by the addition of Cold Water, made so by the inventor, Mr. M. B. Church, who was the first to produce a cold water preparation that is thoroughly practical, that has superseded all hot water mixtures, and forced other manufacturers to **UNDERTAKE** the use of the cold water process.

ALABASTINE is made in Canada, by Canadian labor, and from Canadian materials. Twenty beautiful tints and white. Never sold in bulk.

The trade supplied by Wholesale Hardware and Paint Dealers. Also by

THE ALABASTINE CO., LIMITED, PARIS, ONT.

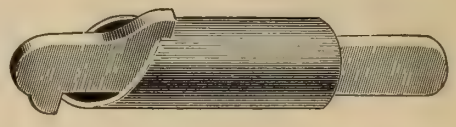
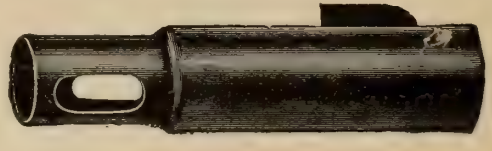
Supplies for the Maple Syrup Season



Sap Buckets.

Extra deep and straight. Three sizes. They possess many advantages over the ordinary flaring Buckets; being small in diameter they do not catch the rain or snow, and, as they are very deep, they hang perpendicularly and consequently will not overflow until full. Covers supplied if required. They nest close for shipping or storing.

We can also supply the ordinary Flaring or Western Sap Pails.



E. T. Sap Spouts.

Made of Retinned Steel. Strong and durable. Only require a ⅜-in. hole in tree. It does not cover the inside surface of the hole, therefore a larger amount of sap is obtained. Packed in cardboard boxes.

Maple Leaf Sap Spouts.

Made in Bronzed Steel. Require a ½-in. hole. Has a shoulder which prevents it being driven in too far. The hole in the tree is not exposed to wind and snow, consequently sap will flow longer. Packed in cardboard boxes.

Syrup Cans. Round or Square.

Plain or Decorated. Made in ¼, ½ and 1-gallon sizes—either Wine or Imperial measure.

A FULL STOCK CARRIED IN ALL LINES. ORDERS SHIPPED PROMPTLY.

UNION WITH NEWFOUNDLAND THE REMEDY.

NO scheme for improving the navigation of the St. Lawrence can be complete until Newfoundland is properly guarded by lights and buoys. It would be like fastening the windows of a jeweller's store and leaving the main entrance unlocked.

The Herald, St. John's, Newfoundland, tells us Newfoundland can do nothing on account of her moribund condition financially; and, being outside the Dominion, the Dominion Government cannot spend money on doing what Newfoundland should do, but which she is financially unable to do.

When Avaugour, the new French Governor of Canada, in 1663 wrote home to France, he declared: "The St. Lawrence is the entrance to what may be made the greatest State in the world." While there was, perhaps, some exaggeration in what he said, we to-day have really more solid foundation than he had upon which to build up hopes of a great future for this country. Of recent years, however, the St. Lawrence route has by no means increased in popularity. Not because its importance is any less recognized. The country is, perhaps, less dependent upon the St. Lawrence route than it was years ago, when the railway facilities to and from Atlantic seaboard ports were not what they are to-day; but it is still the main highway to Canada from Europe, and always will be. What prevents it from enjoying the popularity it should and of attracting the traffic its extent and importance warrants, is that there is not a sufficiency of lights and buoys to properly guard it.

The St. Lawrence is no more dangerous in its natural condition than other similar routes; but the trouble is that the same efforts have not been put forth to put it in as high a state of efficiency as have been made on some river routes in other parts of the world.

We do not for one moment mean to infer that the Canadian authorities have done but little. On the contrary, they have done a great deal; but the trouble is, a great deal more yet remains to be done. And, unfortunately, the difficulty of making the necessary improvements is made all the greater by the matter being in the hands of two countries, for such Canada and Newfoundland really are, instead of one.

This is one among other things that would be facilitated by Newfoundland and Canada becoming one.

LOWER PRICES ON WOODENWNRE.

A REDUCTION has been made in the prices of woodenware. Pails are down 10c. and tubs 50c. The new and the old prices in Toronto are as follows on the lines of most interest to the grocery trade:

Pails, No. 1, 2-hoop.....	$1 55	$1 65
Pails, No. 1, 3-hoop.....	1 70	1 80
Pails, half and covers	1 60	1 70
Pails, quarter, jam and covers	1 10	1 20
Pails, candy and covers	2 40	2 75
Tubs, No. 0.....	8 50	9 00
Tubs, No. 1.....	7 00	7 50
Tubs, No. 2.....	6 00	6 50
Tubs, No. 3.....	5 25	5 75

The cause of the reduction is understood to be the competition of woodenware from the United States.

The imports of tubs and pails into Canada are not large, for, taking all classes, including churns, washboards, pounders, rolling pins, as well as pails and tubs, the value was only $60,291 in 1901 and $43,738 in 1900.

The Customs duty on woodenware is 20 per cent.

LINSEED OIL 5c. HIGHER.

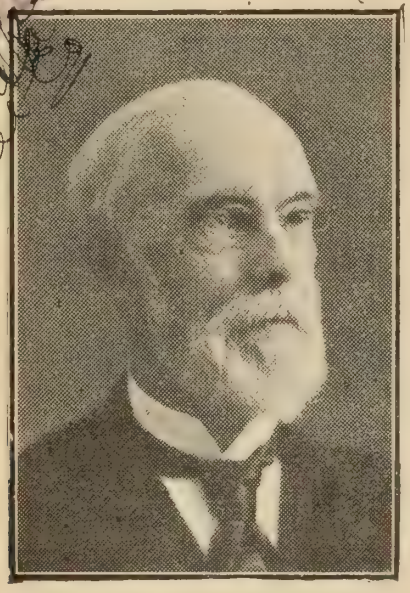
AN advance of 5c. per gal. took place simultaneously on Wednesday, February 10, in both Toronto and Montreal. This makes the price of raw in 1 to 4 barrel lots, in both places, 80c. At outside points, the price is the usual 2c. per gal. higher.

The advance is in sympathy with the outside markets.

Seed has become scarce in Great Britain, and the price of oil there has advanced to a figure that would mean 80c. delivered in Toronto in 100-bbl. lots.

The market is also strong in the United States, and a Canadian house that recently bought a round lot of seed in New York has been offered $500 by the broker who made the sale to forego the deal.

HARDWARE AND METAL has been informed that in Ontario all the oil that can be produced by the crushers during the next three months has already been sold.



DEATH OF TWO WELL-KNOWN HARDWAREMEN.

The Late Mr. James Ferrier.

WE briefly referred in our last issue to the death of the late Mr. James Ferrier, which information only reached us by wire as we were going to press.

We are now enabled to furnish our readers with some further particulars of his commercial life, and also an excellent photo of the deceased.,

Mr. Ferrier was born in Montreal September 1, 1823, and was, therefore, over 78 years of age at his death. He commenced business in partnership with the late Mr. Bryson as wholesale and retail hardware merchants, under the name of Bryson & Ferrier, on June 1, 1844. For many years this firm had a large and profitable business, and many well known names in the hard-

THE LATE JAMES FERRIER.

ware world received their business training under them. Mr. James Crathern entered their employ at this time, and remained with them until he commenced the business, now so well known throughout Canada, of Crathern & Caverhill.

These were the days when travelling was done for the most part with stage or sleigh, and, during the season of navigation, by boats. The customers came to town and personally purchased their supplies. There were no commercial travellers and railway facilities were exceedingly limited ; trade followed, for the most part, the natural water routes. The relations between merchant and customer were more personal in their nature than now, and lifelong friendships and attachments were built up between them.

The bulk of hardware, iron and steel were imported from Great Britain and the arrival of the spring fleet of sailing vessels was an important event in the commercial life of the day. The merchant who had the stock obtained his price ; no disturbing influence, such as now exist by reason of telegrams, cablegrams and telephone. It would represent a matter of weeks before a new arrival of goods could be had to replenish the stocks if depleted. It was quite the usual course, on navigation being closed, that the merchants would advance their prices on all staple lines, to a winter basis. They did not have a hardware association in those days, but they had something better. They had confidence in one another, and when a merchant agreed with his fellow merchants to advance or change the price, his word was considered "as good as his bond."

Fortunes were not large in those days nor easily made, but a good profit and trade insured for the merchant a comfortable competence, which served to assist in prolonging the lives of many of the "old guard," of whom Mr. Ferrier was one, to a ripe old age.

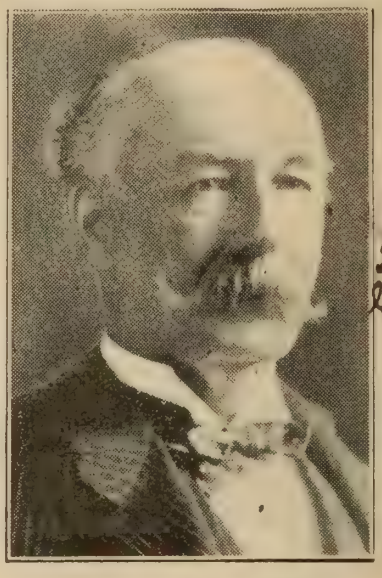
It was characteristic that whatever he undertook to do he threw his whole energy into it. He was punctilious to a degree, and an engagement was to him a debt of honor.

In his relations to his employes he was always courteous and considerate ; the innate instincts of the "old-time gentleman" were ever shown to those who deserved it, but to those who transgressed and brought upon themselves his reprimand, he did so in unmeasured terms.

Mr. Ferrier was associated with Mr. Mooney in partnership in the manufacture of horse nails, which business they established at Montreal in the year 1865, and so well known at the present day, and since incorporated under the name and style of The Canada Horse Nail Co. They also commenced the same business at Ausable Chasm, N.Y., in order to secure a portion of the United States trade in that article. He was also one of the original shareholders of the present Hamilton Powder Company and the New Rockland Slate Company.

In his early days Mr. Ferrier was an enthusiastic volunteeer, and as early as the Rebellion days of 1837 took part in that capacity in the events of the day. Later on in life he was connected with the Montreal Garrison Artillery, of which he became lieutenant-colonel.

He was connected all his life with the Methodist Church, of which both he and his father, the late Hon. Senator Ferrier, were trustees of St. James'. His collections of autograph letters and portraits of Wesleyan Conference Presidents were very complete and exceedingly rare.



Until recent years he occupied his leisure in microscopical work. His microscopes and collection slides were the best in Canada. Unlike many of our business men of to-day, he made time to devote to these pleasant studies and hobbies.

Mr. Ferrier had been in frail health during the past year, but usually came down to his office for a portion of each day however. He was down as usual on Tuesday, the 11th inst, but took a severe chill the same evening, which developed into pneumonia, from which he died on Thursday last, after only two days' illness, He leaves a widow, one son and two daughters. "Requiescat in pace."

The Late John A. Pillow.

Mr. John A. Pillow, president of The Pillow & Hersey Manufacturing Co., Limited, Montreal, died on Sunday afternoon, February 16. He had been in poor health for two weeks, and his death was the result of an aneurism.

Mr. Pillow was born in Montreal in 1840. Thirty years ago he succeeded to the old-established rolling mills business of T. D. Bigelow & Co., and formed a partnership

THE LATE JOHN A. PILLOW.

with Mr. Randolph Hersey under the style of Pillow & Hersey. The business was subsequently formed into a joint stock company under its present name, and Mr. Pillow was the president of this company when he died.

The deceased gentleman will be greatly missed, both in business and social circles. As a business man, he was known as one of the most conscientious and honorable. His sympathetic and generous disposition, and his willingness to extend a helping hand to a less fortunate person, made for him an unusual number of friends to regret his death.

Mr. Pillow was a member of the American Presbyterian Church, and of the Montreal Board of Trade, the Forest and Stream Club, the St. James' Club, and also of the Manhattan Club, New York. He leaves a widow and two sons, one of whom, Mr. Lawrence Pillow, is an officer in the Pillow & Hersey Manufacturing Company.

WESTERN RETAIL IMPLEMENT DEALERS.

THE second annual meeting of the Western Retail Dealers' Implement Association convened in the City Hall, Winnipeg, on Wednesday, February 12, and the attendance was considerably more than double that of the first meeting. H. F. Anderson, president, occupied the chair and his annual address gathered up and emphasized the work attempted and carried through in the past year. This address was followed by the secretary's report which showed a very large amount of missionary work done, he having visited 143 points in Manitoba and the Territories and interviewed 400 implement dealers. The present membership has already reached the goodly proportion of 380. The secretary also gave interesting accounts of visits to sister associations, particularly that of the Retail Implement Dealers, of Minnesota and North Dakota, convened at Crookston in January. The directors' report came next and was as follows :

REPORT OF DIRECTORS.

Gentlemen,—Your directors beg to report as follows :

Condition of the Implement Trade.—The stringent policy taken by one of the companies last year was of great importance to the association, and now practically the representatives of all the companies are on an even footing. Such a fortuitous circumstance will be the means of uniting the dealers together in a short period, and with the vigorous efforts of last year continued a material change of sentiment, and increased prosperity among the dealers will be assured. The ititial effort has been made to lessen the old time suspicion prevailing among the dealers; they have met together and discussed the association platform. Meetings were held at almost every point, and generally resulted in organization; although at some points not accomplished, a desire was shown to further the work, and this year all points should be successfully united.

The Territorial trip was taken after harvest. The same trade conditions exist in the West as in Manitoba, and in some particulars are more aggravated, particularly in the matter of shading prices. Although the work of the association was practically unknown in the Territories, yet much successful organization was done, and there is no doubt that completer organization can be affected when the movement is more generally understood. In this connection it is suggested, that in view of the heavy expense of missionary work in the West, that an effor. should be made to give to the Territories a separate organization in affiliation with Manitoba, believing that the objective point would be much sooner accomplished in this way, the members already secured forming the nucleus of the branch association. Meetings should be held at two or three of the most accessible points, calling the dealers in convention, saving time and expense of a canvass from town to town. The large influx of new settlers into the West will bring the dealers to face the second-hand implement problem very shortly, and the sooner united effort is made to meet this the better. Hitherto this has not been a vital question in the West.

The line of work undertaken during the past year was: (1) Stop taking in trade second-hand binders, mowers, rakes, seeders, drills; (2) selling no goods on next year's terms, and maintain prices; (3) conserving business to the legitimate implement dealer; (4) protect dealers from the dead beat and impoverished customer.

Membership—The large membership secured during the past year is attributable to the methods employed as authorized at the last annual meeting. The greatest measure of success was had at those points where the dealers were willing to forget past differences and unite in a settled policy of protecting their own interests. At the outset, while a general educative force was employed, an agreement was made only in reference to second-hand machinery—when it became evident that a more far-reaching policy was necessary and the fundamental principles, repairs on a cash basis; settlement on delivery of goods; not to interfere with or endeavor to cancel an order given, and maintaining prices, were embodied in agreement. It must be evident to you that the success of the association depends largely on harmonious cooperation of all retail men, certain disturbing factors militated somewhat and destroyed the effect of the work done and while the measures taken met the case to some extent yet they were not altogether satisfactory, but it is hoped that by a general desire to do business on substantial lines it will be unnecessary to revise the status of membership of the association. The retail dealers of Manitoba and the Northwest Territories have now dropped their individuality and become a body corporate, and while the truism "in unity there is strength," is patent to all, and the fact of the dealers getting together, has had a general moral effect on the wholesale and jobbing trade, there yet exist grievances that will be referred to under their proper head, it is our hope may be rectified, or at least some measure of relief be obtained. It must be borne in mind, however, that the equities of the case should be fully considered and the retail and wholesale interests harmonized as far as possible. At the present time, February 8, 276 certificates were paid and a number are payable at this convention that should increase the membership roll another 50. It has been suggested that the means of securing members for 1902 should be the same as last year, but that district meetings should also be held and is for your consideration. The first and primary necessity at this time is for every retail implement dealer to become a member of the association and give his individual assistance to bring success to the implement trade.

Abused Credit.—Your attention is called to the facility with which the farmer can obtain a line of credit at not only one but with every implement house in a town. The unfortunate jealousies in the past were in a large measure responsible for this order of things and while the movement to issue a red list was not successful last year, it should be brought out at this convention what steps should be taken to bring into effect a better state of affairs. Certainly some line could be agreed on if it was only in the way of listing men from whom machines had been repossessed, or who had never intended to pay for the goods obtained. Much good resulted to the dealers who exchanged confidences on this subject and their profits conserved from a raid proposed by this class of people. There is yet much to look forward to on this line.

Grievances—Binder Twine.—These two words are fraught with much import to you. That there is dissatisfaction with present state of affairs it is useless to deny, but to suggest a remedy is a hard problem to solve. Time and the determined effort with which you bring to bear on present methods will bring about improved conditions. Any one company is powerless to change their methods as long as any other insist that theirs is above question, and what commissions are earned by you in the sale of this line of goods are not a consideration for the effort made. There is one point at least that might be changed for this season, and that is in the matter of repairs to machines sold prior to 1902. It certainly should not be expected by any mannfacturer that the retail dealer should continue free services for repair to these machines and no customer should be led to expect such. This matter should be dealt with at once, as also that of interfering with or cancelling orders

Wholesaling Goods to Other Than Dealers.—Vehicles and farm machinery have been sold by travellers to persons not implement dealers nor connected in any way with the trade. Here it might be added that some firms might draw the line in the selection of a representative for their goods. Some combinations of business brought to notice are not conducive to the up-building or the standing of the implement trade, and by continued efforts on association lines a settled financial standing will eventually be obtained, that must obtain recognition so far that no goods will be sold to any person ineligible to membership in this association—a change much to be desired. Some concerns think that so long as their goods are not represented they are at liberty to sell at retail and ship to some local merchant in order to get jobbers' freight rates. It is to be regretted that this has prevailed to a considerable extent, especially in Assiniboia and Alberta. A resolution on this subject will, no doubt, be presented for your approval.

Contention of Wholesaler and Retailer.—Salaried agents of different companies frequently resort to cutting prices to make sales in the territory of other commission men. Salaried agents of the same company have cut prices to make sales in the territory of a commission man. Goods have been sold for cash as much as $30 lower than the price quoted on company's price list on single articles, and in some cases where two or three articles were quoted on a wonderful variety of figures was presented. Probably more discontent and acrimonious discussion has been produced by these methods than any other during the past season. Some dealers have been particularly open to question in this respect, and while representations were made and assurances given that it was a mistake, or inquiry would be made, investigation has proved that the guilt existed. The cutting of prices by salaried agents in the territory of commission men has to some extent been adjusted and may not occur again. In this connection might also be noted the fact that considerable ill feeling was created in some sections of Manitoba by the representatives of a company replacing the machinery of another company in the field, a condition of things that will hardly meet with your approval. If machinery is not giving satisfaction it is quite time enough and will bring about and maintain better relations by insisting that unsatisfactory goods be returned to dealer before other machinery is placed. Price-cutting among the dealers exists very largely in the Alberta district, the trade in wagons being practically ruined, while at Dauphin a similar state of affairs exists through the agency of a livery man. Discussion on this subject may bring out more than mentioned and may be dealt with by the Committee on Resolutions.

Contracts—Contracts have evidently been made too much on a sliding scale, due altogether to a desire to be represented at certain points. If goods could not be sold on usual terms or to regular dealer a commission contract has been made resulting in excessive competition and destroying local trade.

Conditions — Contracts should be carefully studied by every dealer, the time for settlement and basis of same particularly. In those districts where the season is late the settlement date should be fixed accordingly and it is in your hands to get a contract to meet your conditions. No words too strong can be said on the matter of understanding of contract. Made by one man and finished by another you settle on the wording of the contract and it is a rock that has broken many. The specious words with which you were enticed to make concessions to obtain trade and be the good fellow with the travelling man on whose lips you hung, have been rudely brushed aside to the stern reality of what you had on paper and should warn you to stand up to the requirement therein specified. Intelligent conception of your contract and keeping to it like meeting a note with your banker is the easiest way of having very pleasant relations with your wholesale dealer. As stated earlier in this connection the equities of the case have usually been met by the wholesale trade and full justice done in all cases on proper presentation.

Freights and Express—Mr. H. W. Hutchinson, secretary-treasurer of the Winnipeg Carriage and Implement Dealers' Association, will review what has been done on this subject. This association is not satisfied with what was accorded by the railway companies in meeting their representation on the question of freights, and that we strongly urge the freight committee to renew and continue the efforts in this direction, that we not only get better classification on goods but also on cars, and that a subcommittee be appointed to cooperate with the Winnipeg Carriage and Implement Dealers' Association in respect thereof. In the matter of express this has been referred to in report of secretary and will be acted on by the committee on resolutions.

Repairs—some reform in the matter of repairs is necessary. Retail dealers do not give this matter sufficient inquiry on demand for free repairs and frequently the wholesale dealer is called to make good free what should be paid for by the customer. It is also adding to the retail dealer work for which no remuneration is received for communicating by wire and sometimes the payment of the expressage. Free repairs should be given only after careful inquiry and the equities of the case fully gone into and then see that your end of the deal has its compensation.

The office of secretary has not been of that executive character that it should be on account of time occupied in necessary travel during 1901. It is intended that the dealers should be represented

at Winnipeg through the secretary and matters of adjustment, commission, or inquiry made through him. In this way many matters of considerable convenience to the dealers could be arranged.

The thanks of the association are due the Canadian Pacific and Canadian Northern Railways for according to our members a one fare rate to this convention which has been so largely availed of.

All of which is respectfully submitted. H. F. Anderson, president; R. McKenzie, Winnipeg; Alex. May, Carberry; I. P. Porter, Portage la Prairie, A. T. Smith, Morris; W. Williams, Gladstone; I. C. Nelson, Brandon.

EDGAR W. RUGG,
Secretary.

One of the addresses of great practical importance to the convention was that of W. R. Mulock, K.C., on legal points in connection with the trade. Some of the matters touched on were as follows: He spoke very strongly upon the subject of contracts and urged the delegates to be always on the alert regarding the form and terms of contracts, and to see that everything was plain before signing same. Perhaps no part of the implement trade gave the legal fraternity so much to do as this one of contracts and their interpretation. It is often the case that verbal alterations between the parties cause trouble when settlement day comes. He also strongly urged the country agent to remember that monies collected under contract are trust monies and should be treated as such. Notes and their legal position were next discussed. The speaker stated that even in legal circles there was a great deal of uncertainty as to how far a note can be hedged around with lien arrangements before it ceases to be a negotiable instrument. One thing he did strongly urge was that settlements should invariably be secured from the farmer before he takes the goods out of dealers' hands. At the conclusion of this address many of the delegates put questions to the speaker upon difficult legal points which he answered to the satisfaction of all. A very hearty vote of thanks was tendered to Mr. Mulock at the conclusion of his remarks for the many valuable hints given.

H. W. Hutchison, of the Winnipeg Carriage and Implement Association, gave a valuable address on freights and express and of what had been accomplished by the Association during the year in the way of improvement.

Another speaker listened to with great pleasure and enthusiasm was H. C. Staver, of Chicago, who spoke on "Association Work."

The evening session was more or less of a social character, as, in addition to the addresses, there was excellent music furnished by the Mandolin and Guitar Club. The second day was devoted largely to routine business and the election of officers, which resulted as follows:

ELECTION OF OFFICERS.

President — H. F. Anderson, Winnipeg, re-elected by acclamation.

Vice-President—Arthur Mack, Carberry.

Directors — Jas. Winram, Pilot Mound; F. Chapin, Hartney; W. J. Smith, Regina; Geo. Ashdown, Morden; A. R. Hopper, Alameda; I. Nelson, Brandon; W. J. Helliwell, Oak Lake; Jno. Menzies, Minnedosa.

Auditor—Wilbert Ross, Manitou.

The concluding feature of the convention was a five-minute address by Mr. Staver, in which he strongly urged the delegates not to forget the many good things they had heard during the two days' meeting, and to put into practice some of the many splendid suggestions as to ways of working which had been drawn out by the various discussions.

If a word of criticism of the proceedings might be offered it would be that there was too much time wasted in minor discussions and in the election of officers. Some more rapid and efficient way of despatching business should be arrived at.

The representative character of the meeting is shown in the list of those who attended:

LIST OF MEMBERS IN ATTENDANCE.

Anderson & Greenwood, Fleming, Assa.; Geo. Ashdown, Morden, Man.; Aime Charler, Emerson, Man.; G. Bruce, Napinka, Man.; J. J. Barber, Wolseley, Assa.; Chas. R. Boultbee, Broadview, Assa.; W. J. Britton, Carman, Man.; E. Bolton, Saltcoats, Assa.; P. Butchart, Treherne, Man.; Frank Williamson, Belmont, Man.; Burke & Shearar, Gainsboro, Assa.; F. Chapin, Hartney, Man.; S. Clarke, Shoal Lake, Man.; J. M. Chalmers, Pilot Mound, Man.; A. W. Dalgleish, Rouleau, Assa.; C. D. Hay, Belmont, Man.; H. D. Doell, Winkler, Man.; A. Nbrick, Winkler, Man.; Chas. R. Duxbury, Elkhorn, Man.; Geo. A. Dinwoody, Neepawa, Man.; D. H. Fleming, Broadview, Assa.; E. F. Fitzpatrick, Elgin, Man.; S. G. Greenwood, Fleming, Assa.; J. J. Heaslip, Alameda, Assa.; W. J. Helliwell, Oak Lake, Man.; W. J. Hyde, Balgonie, Assa.; A. R. Hopper, Alameda, Assa.; J. M. Hackney, Morris, Man.; J. J. Holiday, Elm Creek, Man.; D. W. Jones, Roland, Man.; F. F. Johnston, Antler, Ass.; Jos. Leybourne, Holland, Man.; Alex. Menzies, Shoal Lake, Man.; A. E. May, Carberry, Man.; I. Moore, Cypress River, Man.; Arthur Mack, Carberry, Man.; Wm. B. Martin, Shoal Lake, Man.; W. J. May, Portage la Prairie, Man., T. A. Metcalfe, Treherne, Man.; D. M. Rae, Arden, Man.; A. McNab, Alexander, Man.; R. McKenzie, Winnipeg, Man.; J. E. Menzies, Minnedosa, Man.; J. H. Macdonald, Emerson, Man.; A. B. McLeod, Brandon, Man.; T. J. Noble, Carman, Man.; I. C. Nelson, Brandon, Man.; E. J. Parker; W. Ross; P. A. Scott, Fleming, Assa.; A. S. Smith, Morris, Man.; R. Shore, Hartney, Man.; R. J. Stewart, Holland, Man.; R. H. Scott, Methven, Man.; H. A. Shoultz, MacGregor, Man.; John Taylor, Arden, Man.; B. Van Blaricom, Arden, Man.; W. Williams, Arden, Man.; Geo. Winram, Killarney, Man.; James Winram, Pilot Mound, Man.; Winteringham & Darrogh, Oxbow, Assa.; Fred Waller, Brandon, Man.; Chas. Wahn, Gretna, Man.

A DISASTROUS FIRE.

Between 6 and 7 o'clock on Thursday evening, February 20, the extensive premises of The Menzie Manufacturing Co., Limited, Pacific avenue, Toronto, together with the factory of The Merchants Dyeing and Finishing Co., acoss the street, were visited by a disastrous fire, entailing a loss of $100,000 on the former and $90,000 on the latter concern. On The Menzie Manufacturing Co.'s premises the insurance amounts to $105,000 and on the other $90,000. The former company have made arrangements to carry on business as usual.

ORDERS FOR SHELF-BOXES.

J. S. Bennett, 15 Marion street, Toronto, is the manufacturer of Bennett's patent shelf-box and nests of drawers and cabinets fitted with same. He also makes the Klondike sample-holder. These may be had in any size. He has recently received orders for his well-known shelf-boxes from the following: Two from Nelson Mitchell & Co., Granby, Que.; one from W. S. Piper & Son, Fort William, Ont.; two from The Laurentide Pulp Co., Grand Mere, Que.; one from W. Emery, Toronto; one from W. Gurd & Co., London; one from J. & T. N. Piper, Fort William; one from Bryson, Graham & Co., Ottawa; one from G. Sylvester, Elkhorn, Man.; one from G. W. Wallace, Toronto, Ont.; one from J. W. Peacock, Toronto, Ont.; one from N. A. Grandbois, St. Casimir, Que., and one from A. Fisher, Lindsay, Ont.

Thibault & Fils, general merchants, Walker's Cutting, Que., have registered.

Otto Schultz, general merchant, Altona, Man., has sold out to W. and J. Coblentz.

MANIFEST OF THE FIRST DIRECT STEAMER.

THE following is the manifest of the first direct steamer in the St. John, N.B., and Jamaica service :

EXPORTS.

Per steamer Ask, for Kingston, Jamaica, by Canada Jamaica S.S. Co., 100 bbls. flour, 200 bbls. cornmeal, 20,000 shingles, 20 tons hay, 100 tons ice, 100 bags oats, 20 bags bran, 20 bags middlings, 20 bags shorts, 3,813 ft. pine boards, 150 bbls. flour; T. Collins & Co., 100 bbls. potatoes; Dearborn & Co., 1 box herring ; Lake of the Woods Milling Co., 1 bbl. flour; Canada Jamaica S.S. Co., 50 boxes peas, 25 boxes salmon ; Maritime Casket and W. M. Co., 5 packages coffins and caskets ; McCavour & Co., 20 bbls. potatoes, 300 boxes smoked herring, 5 bbls. pickled herring ; McClary Manufacturing Co., 1 box stamped ware ; Jas. Patterson, 200 cases smoked herring, 10 bbls. herrings ; John Sealy, 300 boxes smoked herring, 30 bbls pickled alewives, 2 cases canned fish, 2 ½-boxes cheese, 3 bbls. and 3 ½-bbls. pickled salmon, 65 bbls. pickled alewives; Welcome Soap Co., 1 box soap samples ; F. E. Williams Co., 520 boxes smoked fish, 38 boxes bloaters, 10 bbls. potatoes, 2 bbls. pork, ½-bbl. salt beef tongues.

For Montego Bay, Jamaica—T. Collins & Co., 5 bbls. potatoes ; McCavour & Co., 100 bbls. potatoes, 200 boxes smoked herring ; John Sealy, 10 bbls. pickled alewives, 150 boxes smoked herring, 1 bbl., ½-bbl. pickled salmon, 3 ½-bbls. pickled herring, 2 ½-boxes cheese, 2 cases canned fish, 1 case butter ; F. E. Williams Co., 1 box butter, 1 box cheese, 100 boxes smoked fish, 10 boxes bloaters, 1 box smoked meats, 4 bbls. pork.

Black River, Jamaica—McCavour & Co., 10 bbls. potatoes, 200 boxes smoked fish ; John Sealy, 10 bbls. pickled alewives, 10 boxes smoked herring, 2 ½-boxes cheese, 2 cases canned fish, 1 bbl., 1 ½-bbl. pickled salmon, 3 bbls pickled herring, 1 box butter.

Savanna-la-Mar—John Sealy, 100 boxes smoked herring, 10 bbls. pickled alewives, 1 bbl., 1 ½-bbl. pickled salmon, 3 bbls. pickled herring, 2 ½-boxes cheese, 2 cases canned fish, 1 box butter.

Lucia, Jamacia—John Sealy, 10 bbls. pickled alewives, 100 boxes smoked herring, 2 ½-boxes cheese, 2 cases canned fish, 1 bbl., 1 ½-bbl. pickled salmon, 3 bbls. pickled herring.

Frederick Magee, wholesale and retail general merchant, Port Elgin, N.B., has closed the retail branch and will only continue the wholesale business.

Out For Business.

If you're out for business, if you want to get all you can and hold it after you get it, don't waste your energy in pushing poor paint.

It's harder work to sell poor paint than good paint—because you have to keep after new customers all the time. No man who once gets fooled by poor paint wants it again.

THE SHERWIN-WILLIAMS PAINT

is good paint. It makes a constant customer out of every man who tries it. It does its own advertising. Every sale brings another. When you build up a good trade you are sure to keep it.

S.-W.P. is made right—to sell right, and wear right.

THE SHERWIN-WILLIAMS CO.

PAINT AND VARNISH MAKERS.

CHICAGO, NEW YORK, NEWARK, MONTREAL, CLEVELAND, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY.

THE FILE WORKS AT PORT HOPE.

Mr. Walter Grose, of Montreal, was in Toronto on Thursday. He was on his way west in the interest of the different concerns he represents. On his way to Toronto he spent a short time at the Dominion works of The Nicholson File Co., at Port Hope. These works have recently undergone extensive improvements. Two new buildings have been erected and large additions made to the machinery. The number of workmen employed is now about 120 and yet it is found necessary to run the works overtime. With increased facilities the company is now in position to supply the different brands which they control. The Nicholson File Co. have works at Providence, R. I. ; Pawtucket, R. I. ; Beaver Falls, Penn. ; Paterson, N.J. and Port Hope, Ont.

A GOOD OPENING FOR A TRAVELLER.

In another part of this issue will be found a condensed advertisement which should prove of particular interest to a traveller having a good connection with the Western hardware trade, namely, the one applying for a traveller for Montreal wholesale hardware firm for Manitoba and Northwest. HARDWARE AND METAL is well acquainted with the house seeking this representative, and without hesitation commends the opening to any man with the essential qualification. The firm in question is one of long established standing and carry a large and extensive range of all classes of shelf, and heavy hardware, etc. The advertiser assured us that a good remuneration will not stand in the way if the right man can be secured.

NEW RETAIL FIRM IN OWEN SOUND.

H. R. Manders & Co. is the style of a new retail firm that is opening up in business in Owen Sound. The firm, in addition to carrying a regular stock of hardware and stoves, will conduct a plumbing and tinsmithing business as well. Mr. H. R. Manders, the senior member of the firm, has been in Winnipeg during the past five years. Prior to that, he was with Butcher Bros., Owen Sound, so that he is no stranger to the part of the country in which he is now opening up business.

CHATHAM BINDER TWINE CO.

At the annual meeting of The Chatham Binder Twine Co., Limited, on February 13, the following were elected directors for 1902 : Messrs. J. J. Ross, A. Leverton, J. Holden, M. J. Wilson, J. B. Cousineau, L. Howard and J. A. Coulter.

BLAST FURNACE CAPACITY IN THE UNITED STATES.

The following comparative figures from Iron Age give the weekly capacity of the furnaces in blast on February 1, in the United States :

	Total capacity per week. Gross tons.	Coke capacity per week.	Charcoal capacity per week.
February 1, 1902	340,612	334,007	6,605
January 1	298,460	291,992	6,468
December 1, 1901	324,761	317,358	7,403
November 1	320,824	313,775	7,049
October 1	307,982	300,538	7,444
September 1	299,861	293,256	6,605
August 1	303,847	297,269	6,578
July 1	310,950	303,973	7,157
June 1	314,505	306,991	7,514
May 1	301,125	293,915	7,210
April 1	296,676	288,766	7,910
March 1	292,899	284,825	8,074
February 1	278,258	269,923	8,335

FURNACE STOCKS.

The position of furnace stocks, sold and unsold, was as below on February 1, as compared with the five preceding months, the same furnaces being represented as in former months. This does not include the holdings of the steel works producing their own iron :

	Sept. 1.	Dec. 1.	Jan. 1.	Feb. 1.
Anthracite and coke	318,069	181,021	179,993	121,762
Charcoal	62,005	42,441	38,091	32,438
Total	380,074	223,462	218,084	154,200

The production of pig iron of all kinds in January reached a total of over 1,450,000 gross tons, and yet, in spite of this fact, the stocks in the hands of merchant furnaces declined over 58,000 tons. This is an extraordinary record.

BRANCH BUSINESS AT VANCOUVER.

The Gurney-Tilden Co., of Hamilton, are opening a western branch in British Columbia. This firm, which is an old-established house largely engaged in the manufacture of stoves, furnaces, scales, etc., has previously been represented by its travellers, but it feels that by establishing a supply house it will greatly extend its trade. J. H. Tilden, who is one of the heads of the firm, has secured suitable premises in Vancouver.

Mr. Tilden is accompanied by C. A. Godfrey, who will be placed in charge. Mr. Godfrey has been with the firm a number of years, besides having several years' experience on the Coast, being with A. Godfrey & Co., hardware merchants, Vancouver.

Besides carrying a full line of their stoves and ranges, a large stock of builders' hardware will also be kept on hand by this company, who also will build up a trade in locks, hinges, etc.

Frederick Hamilton, general merchant, Port Credit, Ont., was united in wedlock one day last week to Miss Andrews, of Milton, Ont.

THE IVER JOHNSON

TRUSS FRAME.

Has a mechanical and commercial value not possessed by other bicycles.

The trade appreciates and recognizes the fact.

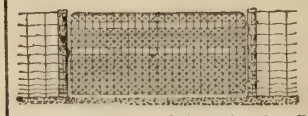
It responds to a long-felt demand for something new in cycle construction; it has the advantage of racing weight, with roadster strength; a rigid crank hanger—greater speed; no buckling of frame.

Made of one-inch Tubing.

Agents wanted in unoccupied territory. Send for catalog just issued.

(FRAME PATENTED.)

IVER JOHNSON'S ARMS & CYCLE WORKS,



New York Salesroom— 99 Chambers Street.

FITCHBURG, MASS., U.S.A.

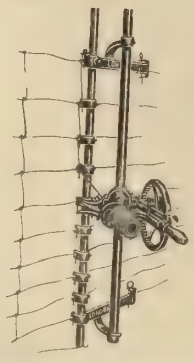
Zanzibar Paints

We do not say "there are no other good paints"; we do not have to sell our paints in that way, but we do say **ZANZIBAR PAINTS** in point of service and appearance are unequalled. Do you carry them in stock? You should. Write for our "Terse Talks."

THE ZANZIBAR PAINT CO., Limited - - Toronto, Can.

PAGE METAL GATES are so low in price no one can afford to use wooden ones. Light, and yet strong enough to support a heavy man on the end while he swings around the circle without causing them to sag. They are neat in appearance, will last a lifetime. Will not sag nor get rickety. They are supplied with latches which allow them to be opened either way and are self acting. The only good metal gate that is low enough in price for General farm purposes. We also make Farm and Ornamental Fence, Poultry Netting, Nails and Staples. **The Page Wire Fence Co., Limited, Walkerville, Ont.**

STANYON ENGINEERING CO.



402 McKINNON BUILDING,

Phone Main 2177. TORONTO

CONTRACTING AND CONSULTING ENGINEERS.

Steel Works, all kinds of Rolling Mills, Wire Mills, etc., all built complete. Machinery designed for any purpose.

GENERAL OFFICES, - - PITTSBURG, Pa.

LONDON FENCE MACHINES

We have a number of dealers who are making the LONDON their leader for the Spring. Nothing wins the farmers' favor like the LONDON. If you push it, it will make you money and draw custom. It's a hustler and a dandy. Get our Spring Catalogue and this year's prices.

THE LONDON FENCE MACHINE CO., Limited.

LONDON, CANADA.

Business and Its Management.

The Motive Power.

HOW few people with businesses of their own, especially if they are of the old-fashioned sort, realize how much a business depends upon its proprietor for its motive power, says Grocery, London. We not infrequently see two businesses in the same growing neighborhood, possessed apparently of equal advantages and conducted on right lines, which show very different results in the course of a few years. If you ask the more prosperous man of the two why he has succeeded so much better than the other, he probably would not be able to tell you the true reason; whilst his rival would probably put down his own comparative lack of success to the bad state of trade, the changing conditions of the times, or to some other factor which must have affected the two shops to an equal extent. The true reason of the difference is that in one case the head of the establishment is possessed of a large stock of personal energy, which he puts into his business; whilst the other is dreamy and easy-going, and, whilst no one would say that he did not attend to his business affairs, yet he takes things easy, and does not put his whole energy into the work. An outsider visiting the two shops would see a marked difference at once. In one there is a smartness and alertness on the part of the assistants, with no slip-shod ways. Everything in the shop is in apple-pie order and every assistant knows exactly where to put his hand on the goods he requires. The window-dressing is changed at frequent intervals, new goods and seasonable lines are pushed well to the front, and the influence of the head of the concern makes itself felt in every corner of the establishment. Moreover, he does not rule merely by precept, but by example. He gets to business sharp to time in the morning, so that his assistants would feel ashamed if they were not there too. They feel that their employer has all the details of the business at his fingers' ends and could do the work of any man in the place from the manager or first hand down to the errand boy, as well or better than the person in question, and they respect their employer accordingly. Another thing is that although their employer is not soft-hearted, he is eminently just and they know it. A man who is incapable or who shirks his work will not be wanted, whilst another who puts his heart into his work will be wanted badly, and will have his position improved. About accounts again, these will be kept thoroughly up-to-date and no laxness will creep in here, more than in any other part of the business. Long credits will be unknown, and the amount of dead capital in the business will be very small. Consequently the proprietor will be able to buy on the most advantageous terms, and to get his full discounts for everything. On the other hand, the less successful trader will, quite possibly, be a man of far greater capacity and brain-power than his rival, and capable of rising to any position he might aspire to, if, and this is a large "if," he only had the driving energy and force of character. But he has not got it. And his assistants, although they are all thoroughly honest and mean well, copy the slack ways of their employer. He gets to business late, and so do they; he does not worry about details, more do they; he is untidy, so are they. When any disputed point is raised he gives way to save trouble, so do they. He is lax about money matters himself, and consequently feels ashamed to press his customers for money, and they say to themselves, "Oh, he is a comfortable, easy-going man, he won't press us; let him wait," and he does wait. Consequently he always buys at a disadvantage, and is seldom able to secure cash discounts. Moreover, for want of ready money, he frequently misses bargains that are going, which his rival snaps up.

Taking it only from an advertising point of view, look what a different effect the two establishments must produce upon the public! The windows of one are always more attractive and seasonable than the other to start with; one establishment has always an air of smartness about it which the other lacks, and when the customer gets inside, how differently he is treated! He is served smartly, his wants are anticipated, the assistant puts his hand in a moment upon the goods required, instead of having to hunt for them or to ask whether they are in stock, and the waste of the customer's time is reduced to a minimum. It is a pleasure to a customer to deal at such a "live" establishment. At the shop of retailer No. 2, although the customer may receive equal civility, and the goods may be of equal quality, yet everyone seems half asleep, and the customer cannot help noticing it, and carrying away with him a very bad impression. The accumulation of such impressions, combined with an occasional visit to the shop of retailer No. 1, will result in the customer transferring his orders from one shop to another. If the proprietors of the two shops were to change places, taking their methods with them, in a very short time we should see the stream of success turned in favor of the previously backward business. The motive power of the proprietor's energy would be driving it ahead.

NEW TRAIL TO HORSEFLY COUNTRY

AT a meeting of the Inland Board of Trade, Kamloops, B. C., held recently, the report of the committee that had been appointed to report on the proposed route to the Horsefly Country and to frame a resolution and send it to the Local Government was received. President N. J. Hopkins was chairman.

The report states that the Inland Board of Trade, in view of recent discoveries, took upon themselves the duty of examining into the route, and report the results of their investigations. They explain how much shorter and more profitable it is to prospectors to reach the unexplored gold fields from Kamloops via North Thompson river, and thence up the Clearwater river, than from any other given point from railway communication. All that now is necessary is the blazing of a trail up the Clearwater river leading into the heart of the country, where the greatest prospecting activity is likely to be. This route would be some 45 miles in length.

The report states the disadvantages of several other routes, and ends up by giving a minute description of the trail recommended. This would open up a vast section of mineral and agricultural lands lying between the North Thompson and the Clearwater, including great and promising sections of territory lying east of the Mahood lake and river.

The resolution strongly urged the British Columbian Government to make a special appropriation of $2,500, which is the amount considered sufficient for the cutting of a trail from the mouth of the Clearwater River to the newly-discovered deposits.

Mayor Gordon, J. Gill and J. Vair were appointed delegates to interview the Government at Victoria and support the requirements.

MR. FULLER MARRIED.

At St. Paul's Church, Montreal, on Wednesday, February 19, Mr. Henry J. Fuller, manager of The Fairbank Company, was married to Miss Nancy Archibald, daughter of the Hon. Mr. Justice Archibald, the Rev. James Barclay, D.D., performing the ceremony. After the wedding, which was a very pretty one, a reception was held at the residence of the bride's parents on Mackay street.

Mr. and Mrs. Fuller left in the evening for an extended tour through the Southern States and California.

THE SOCIAL SIDE OF BUSINESS LIFE.

A. F. BRADY.

IT is my endeavor to present to you a few thoughts on "The Social Side of Business Life" as I have found them during my career as a clerk and business man, with the idea of calling your attention to a very important factor in business, and I trust that during the course of my remarks you may at least find a thought to place on the credit side of your profit and loss account when you return home.

As you glance back over the years in your business life you will find two very important factors that have helped to make your business career a success. One is hard work, coupled with judgment, and the other is social work, a recreation in a measure, but a necessary factor in your business life.

Your first instructions upon taking a position behind a counter were to keep yourself neat and clean and be polite and pleasant to customers. This is the first phase of the social part of business, and a very essential one for encouraging trade.

The next step is to meet socially people during business hours, and also outside of business hours, who may become customers at some time or another, and this calls you to take an active interest in the "social world," as we may term it, to know people and to become known.

You must learn to meet people easily, study their habits, understand human nature and be able to rely on your own judgment as to their responsibility, or suffer by experience with them.

KEEPING IN TOUCH WITH PEOPLE.

Progressive business men must keep in touch with the times that are ever changing, and to do so they must keep in touch with the people. In order to do this they must take an active part in the various affairs that affect the social and moral welfare of the city or town in which they are doing business, and identify themselves in every way possible with its common interest.

They are at their place of business from early morn until late at night, and in order to attend to the social calls and other outside duties, they must take the time from their business, or else they are obliged to neglect them entirely. Both conditions are unsatisfactory and there should be a remedy. We must have time for business and we must have time for the social side.

CHANGE OF EMPLOYMENT AND RECREATION.

Our minds and bodies are so constituted that each must have change of employment —recreation—new thoughts.

You may be able to move along and bear the great strain of work, work, work, while youth and strength are yours, but you are not building either a strong body or a strong mind for the latter years of your life, and for the time when the accumulated business interests demand a clear and ready mind to direct, at least, those who may be performing the labor for us.

In speaking to the assembly here at the present time let me say to you that we must educate ourselves in other lines than hardware if we wish to make a successful business career for ourselves. We must free ourselves from the chains of business cares and give a portion of our time to the social and intellectual department of business. Our social calls are imperative and demand a portion of our time and attention ; and not only that, we must take recreation and pleasure as we go along in life.

EARLY CLOSING.

Now, as a solution to this problem, let me suggest, if you are not already in line, that you join in promoting an early-closing movement, and I want every person within range of my voice to give the matter serious thought, not only here, but at home and at your place of business.

If possible get the merchants to close at 6 o'clock, and if not that early agitate the question and get them to close as early as possible, as it then gives you time for your social duties without interfering with your business, and vice versa.

We have had a trial of closing at 6 o'clock for a little over a month in the furniture, hardware and grocery stores in our city of about 7,000 inhabitants, and have found that it has proven satisfactory, as it has in a great many other cities throughout the State. At the first of the year we were successful in getting other lines of business to agree to closing their stores at the same time.

We find that it gives us time to read the daily papers and trade journals and keep abreast of the times, and to become acquainted with the market and the conditions that affect it. We find time to meet our friends socially and get acquainted with our competitors.

A married man can become acquainted with his family, and we can all find time to attend to the various duties that in the past we have attended to by stealing time from our business.

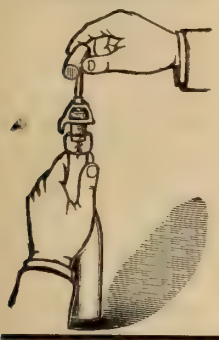
You will find some complaint on the part of a few customers on early closing, because we cannot all see things in the same light at the same time, but the customers, as a rule, will see the justice of the situation and conform with the new custom without a protest.

The time is not far distant when you will see the 6 o'clock closing movement general throughout the State, as it is a practical solution of the condition governing the social and working hours of business and is a step toward the advancement of a progressive age.

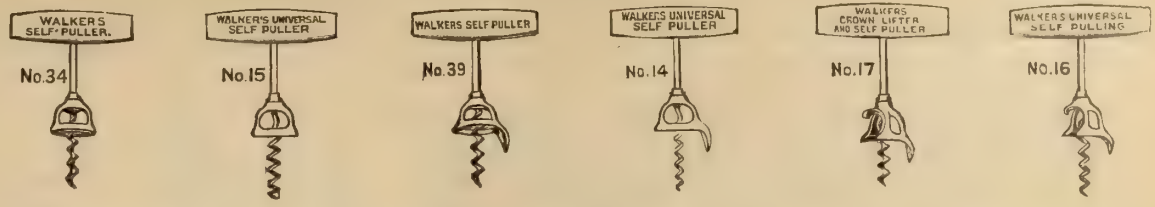
THE ROBB ENGINEERING CO.

AT a meeting recently of the directors of The Robb Engineering Co., engine boilermakers and machinists, Amherst, N.S., it was decided to issue a balance of $70,000 of debentures and $30,000 of stock held in the treasury. The bonds are 20 years' mortgage debentures bearing interest at 6 per cent. dividend. This completes the issue of capital.

During the past year the company's sales have increased considerably, and six months' of orders are now on hand for the year 1902. A further increase in the capacity of the plant is necessitated, although the various departments have already been enlarged and new ones erected.



John F. Stairs, president of the Nova Scotia Steel and Coal Co., and Mr. Grant, director of the Nova Scotia Building Society, were appointed to the directorate.



The company was formed in 1900 to take over the existing business of The Robb Engineering Co. The capitalization is $350,000, consisting of $200,000 of 6 per cent. debentures and $150,000 of stock. At that time $50,000 of debentures and $75,000 of stock was issued. In 1901 the proposed increase was carried along, and an additional $50,000 of debentures and $40,000 of stock was issued, and was almost entirely taken up by the shareholders and bondholders.

THE SOO CANAL 50 YEARS AGO.

The following is from The Toronto Globe of February 14, 1852 : "We observe that the Americans begin to move seriously in the work of building a canal at Sault Ste. Marie, and unless the enterprise is immediately undertaken on this side there seems every likelihood that they will proceed with it during the coming season. The work can be done infinitely better and cheaper on the Canadian side—and no one who looks at the rapidly-increasing traffic of Lake Superior can doubt that it is the duty of our Government to take it up at once as a national undertaking and complete it with the utmost despatch. The highest estimated cost is but £70,000."

MANITOBA MARKETS.

WINNIPEG, February 17, 1902.

THE market is quiet and steady, with few changes to report. Building papers have all dropped 5c. Sisal ropes have been advanced ½c. per lb. on all sizes. All wholesale houses have had many customers in this week, who have taken advantage of the bonspiel rates, and a good deal of buying in a quiet way has resulted, and there has also been business got under way that will develop later. There are plenty of signs that spring is not far off in the lines of goods being got ready for shipment. All the implement houses have been crowded this week with country dealers looking over stocks and talking new contracts for the coming season, which bids fair to be a good one in the implement line.

Price list for the week is as follows:

Barbed wire, 100 lb	$3 30
Plain twist	3 40
Staples	3 95
Oiled annealed wire, 10	3 85

NOTES.

Mr. Rae, hardware merchant, Medicine Hat, has been a visitor to the city. He reports the past year's business in his line very good in that town, and prospects are bright for the coming season.

Francis-Frost Co., makers of the "Ark" brand of paints, have decided to open a branch in Winnipeg, and are now looking out suitable premises.

Mr. McAndrews, of the Buffalo Pitts Threshing Machine Co., is getting his new office in shape and appointing agents throughout Manitoba and the West. He has had many callers this week.

"The Climax" is the name of the new cultivator now being offered on this market by the Frost & Wood Co. Those who tried these cultivators last year pronounce them satisfactory.

Mr. Case, of the Thomas Manufacturing Co., is in the city getting ready for spring business in rakes and mowers. M. O. Connor, of this company, also visited the city and attended the implement convention.

ANNUAL MEETINGS OF BOARDS OF TRADE.

THE BRANTFORD BOARD.

THE annual meeting of the Branford Board of Trade on February 12 was well attended. The reports of the president and secretary-treasurer were read and the officers elected for the year 1902.

Mr. Lloyd Harris, the president, commenced his address by alluding to the death of the Queen, and of Mr. Ignatius Cockshutt, the oldest member of the board. Several members also had either removed or resigned, but, nevertheless, by the addition of several new members, there were now 244 on the roll, a substantial increase for the year.

During the year just closed the Bain Wagon Co. had erected new buildings, the Canada Farmers' Cordage Co. had commenced operations and The Bailey Cutlery Co. had acquired new premises and were preparing to increase their output.

The increase in the number of employes was also satisfactory. In 1900 there were 3,896 workmen employed in Brantford, and this number had increased to 4,038 in 1901, an addition of 148, while, at the same time, there was an increase of $54 419 in the amount of wages paid, the respective figures being $1,328,017 for 1900, and $1,377,436 for 1901.

The control of the city parks had been taken over by the parks commission, a body which the Board of Trade had assisted to bring into being. A further responsibility had been added to these commissioners by the gift of the Agricultural Park to the city by the family of the late Ignatius Cockshutt.

The trading-stamp system has also been done away with by the cooperation of the leading retail merchants of the city.

A special committee of the city council had been appointed to cooperate with a special committee of the Board of Trade, and had conferred with the Grand Trunk Railway authorities to obtain the G. T. R. through line via Brantford, besides discussing other matters between that railway and Brantford city. Everything seems to indicate that the G.T.R. will now put its line through Brantford on a reasonable basis.

The treasurer's report showed a balance on hand of $393.29 for the past year, the total receipts being $623.88 and the expenditures $250.59. The total surplus now on hand amounts to nearly $900, and it was recommended that steps should be taken to provide a new home with this money.

The following were elected by acclamation :

President—Mr. Lloyd Harris.
Vice-President—Mr. John Mann.
Secretary—Mr. Hately.

The following nominations were made for the council and committees. The election will take place next meeting :

Council—J. Ruddy, F. Leeming, T. H, Whitehead, J. Sanderson, J. Muir, C. H. Waterous, J. F. Schultz, D. J. Waterous, C. Cook, H. Yeigh, E. L. Goold, C. Grobb, A. K. Bunnell, J. S. Hamilton, H. Cockshutt, C. Duncan, W. F. Cockshutt.

Transportation—W. G. Elliott, C. F. Hodges, F. Grobb, D. B. Wood, G. C. Schultz, C. H. Waterous, J. Muir, T. Elliott, M. E. Harris, P. Buck, J. M. Shuttleworth, A. J. Olive.

Arbitration—R. W. Robertson, E. M. Shadbolt, J. Hale, J. Stanley, A. J. Wilkes, R. Butt, R. S. Schell, T. White, R. M. Fullerton, S. G. Read, W. F. Shannon, J. Nicholl, M. E. Harris, W. F. Patterson, James Sutherland, W. R. Sutherland, W. B. Wood.

City Improvement—Last year's board reelected.

Representative to Southern Fair Board—W. D. Schultz.

Messrs. Bunnell, Yeigh and Duncan were appointed to nominate the retail merchants' committee.

The meeting then adjourned.

THE QU'APPELLE BOARD.

At Qu'Appelle, N.W.T., the Board of Trade has been reorganized. At a recent meeting, the following officers were elected :

President—J. P. Beauchamp.
1st Vice-President—J. P. Creamer.
2nd Vice President—S. H. Caswell.
Secretary-Treasurer—J. C. Starr.

The board is at present making an effort to secure a chartered bank branch for the town.

HAMILTON RETAILERS ORGANIZE.

THE Hamilton retail merchants held a large and representative gathering in the Hamilton Board of Trade rooms, on the evening of February 13, and perfected the work already begun of organizing the Hamilton branch of The Retail Merchants' Association of Canada. Joseph Kirkpatrick was chairman, and about 175 were present.

Speeches were made by E. M. Trowern, Toronto, general secretary of the Association; G. J. St. Leger, 2nd vice-president of the Toronto branch, and G. Shoebotham, vice-president of the London branch. Valuable advice was given in the work of organization and the working of the constitution was explained.

J. O. Carpenter reported for the committee that had been formed to arrange for the organizing work. They had found that everyone was in favor of such an organization.

The following officers were elected :

President—Adam Ballantyne.
1st Vice-President—H. Arland.
2nd Vice-President—R. A. Robertson.
Secretary—G. S. Klein.
Treasurer—John Ronan.

There were 10 sections formed altogether, comprising, amongst other branches, the grocers, butchers, boot and shoe, and hardware merchants. Those various sections were met the following day by Secretary Trowern, and organized on a proper basis.

By prying open a front door with a chisel, thieves entered John Armstrong's general store at Brigden, Ont., and carried off $5 in cash and $150 worth of merchandise, consisting of razors, etc.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, February 21, 1902.

HARDWARE.

MANUFACTURERS are very busy this week, and jobbers report a brisk demand in most lines. Most of the retail merchants have completed their stock-taking, and are now freer to order, with the result that shelf goods are in better demand. A new catalogue of Boeckh's brushes has been issued, and the following discounts are quoted: Parts 1, 2, 3, 4, 6 and 7, all 50, 25 and 10 per cent. off list; part 5, 10 per cent. off list; parts 9 and 10, net list.

BARB WIRE.—Trade is active. We quote per 100 lb., f.o.b. Montreal, $3.

GALVANIZED WIRE.—There is a moderate inquiry at unchanged prices. We quote: Nos. 6, 7, and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

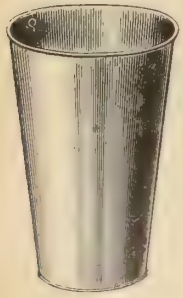
SMOOTH STEEL WIRE.—The business this week has been only fair. We quote bright iron and annealed on a base of $2.60 per 100 lb., f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras, per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—There is little doing. The discount is 22½ per cent.

BRASS AND COPPER WIRE.—Trade is considerably improved this week, and a good movement is noted. The discount on both wires is 60 per cent.

FENCE STAPLES.—Business for spring continues good. We quote per 100-lb. keg: Bright, $2.90; galvanized, $3.25.

WIRE NAILS.—The mills report wire nails very active, and jobbing houses are doing a fair business, mostly in small lots. Our quotations are as follows: $2.55 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.



CUT NAILS.—These are moving slowly. We quote: $2.35 per keg for small lots and $2.27½ in carlots. Flour barrel and coopers' nails are discounted at 40 per cent.

HORSE NAILS.—There is still a very small demand. We quote: "C" brand at 50 and 7½ per cent. off and "M" brand at 60 per cent. off on oval and new city heads and 66 2-3 per cent. off for new countersunk heads.

HORSESHOES.—The movement continues light. We quote as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—There is only a fair demand this week, though business for spring is looking up. The discounts are: Flat head bright, 87½ and 10 per cent. off list; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.

BOLTS.—Trade is good this week, showing a noticeable improvement over that of last week. We quote as follows: Norway carriage bolts, 60 and 5 per cent.; common, 55 and 5 per cent.; full square carriage bolts, 60 and 5 per cent.; machine bolts, 55 and 5 per cent.; coach screws, 70 per cent.; sleigh shoe bolts,

Try it for pattern and penetration from forty to seventy yards against any powder on the market. We make the powder, we make the shells, and we load them. Write for our booklet, "Powder Facts."
The Robin Hood Powder Company
SWANTON, VT.

70 per cent.; blank bolts, 60 per cent.; bolt ends, 60 per cent.; plough bolts, 55 and 5 per cent.; tire bolts, 67½ per cent.; stove bolts, 67½ per cent. To any retailer an extra discount of 5 per cent. is allowed. Nuts, square, 3¾c. per lb. off list; hexagon nuts, 4c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—There is a moderate demand this week. Nothing new has occurred in prices since our last report. Our quotations are as follows: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 30c. per roll; tar sheathing, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE.—The market is active in most lines. An advance has taken place in sisal rope of ½c., the price now quoted being 12½c., and in lathyarn there has been a rise of ¼c. There is not so much business being done on these ropes since the advance. We quote: Manila, 16c.; British Manila at 13½c.; sisal, 12½c.; single lathyarn, 11c.; double lathyarn, at 11½c.

RIVETS AND BURRS.—There is no change. There is still only a small inquiry. The discounts are as follows: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, 35 and 5 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—There is a good demand for spring delivery. The price is $1.25 per 100 square feet.

POULTRY NETTING.—Trade continues fair. Canadian or English is discounted at 60 per cent., off 2 x 2 mesh, 19 wire, and 55 per cent. off 2 x 2 mesh heavier, Canadian list.

HARVEST TOOLS.—The market is active. The discount is 70 per cent.

FIREBRICKS.—A better business has been done this week. We quote: Scotch, $19 to $23.50; English, $18.50 to $22.50 per 1,000.

CEMENT.—There is a fair demand at steady prices. We quote as follows: German cement, $2.30 to $2.40; English, $2.25 to $2.35; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.20 to $2.30 ex-cars.

METALS.

Business in metals is quite active this week, and prices remain firm in most lines. Black Canada plates are very strong on the primary market, and importers of tinplates do not care to cable any orders in the present uncertain state of the market. Chain remains firm, and there is a good business doing. Ingot tin is 2c. higher. Several changes have been made in prices of iron pipe. We quote as follows:

PIG IRON.—There is a fair inquiry at steady prices. Summerlee is worth $21 to $21.50, and Canadian, $18.50 to $19.

BAR IRON.—Trade is only fair. Some sizes are hard to get. Merchants' bar, in small lots, sells for $1.95; horseshoe iron, $2.15 to $2.20.

BLACK SHEETS.—There is a small business doing. Prices are still very firm. We now quote as follows: 28 gauge,

$2.65; 26 gauge, $2.60; 20 to 21 gauge $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—The market is quiet and prices steady. We quote: No. 28, Queen's Head, $4.40; Apollo, 10 oz., $4.40; Comet, $4.25 with 10c. extra in less than case lots.

INGOT COPPER. There is not much doing. We still quote 11c.

INGOT TIN.—The demand is light. Straits are quoted at an advance of 2c., now being 29c.

PIG LEAD.—There is a good inquiry. The price is $3.25.

LEAD PIPE.—In this, a moderate business is doing at unchanged prices. Composition waste sells at 7½c.; ordinary, 7c. The discount is 35 per cent.

IRON PIPE.—The market continues active. In standard pipe, ½ inch black pipe, is 15c. lower; 2-inch is 15c. higher. Galvanized, ½ inch, is 15c. lower; 2 inch, 15c. higher. In extra heavy pipe there have been the same changes in ½ inch and 2-inch sizes. We quote as follows, per 100 feet, for standard pipe, screwed and coupled, in lengths under 19 feet: Black pipe, ¼, $3; ⅜, $2.50; ½, $2.75; ¾, $3; ¾, $3.70; 1-inch, $5.25; 1¼, $7.40; 1½, $8.90; 2-inch, $12.40 Galvanized, ⅜, $3.55; ½, $4; ¾, $5.05; 1-inch, $7.25; 1¼, $10.10; 1½, $12.15; 2-inch, $16.70. Extra heavy pipe, plain ends, are quoted, per 100 feet, as follows: Black, ½, $4.35; ¾, $5.30; 1 inch, $7.60; 1¼, $10.60; 1½, $12.70; 2-inch, $17.45. Galvanized, ½, $5.35; ¾, $6.70; 1-inch, $9.60; 1¼, $13.30; 1½, $15.95; 2-inch, $21.75. For threads and couplings, 5 per cent. is added.

TINPLATES.—There is a moderate demand. Cokes are worth $4.50 per box; charcoal, $4.75 to $5.25.

CANADA PLATE.—The primary market is very strong, and one or two dealers have advanced the price 5c. all round. Others, however, are still selling at the figures we quote. These are as follows: 52's, $2.65 to $2.70; 60's, $2.75 to $2.80; 75's, $2.80 to $2.85; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL.—Business in steel is fair. We quote as follows: Sleighshoe, $2.05; tire, $2.15; bar, $2; spring, $2.85; machinery, $3; toecalk, $2.60.

SHEET STEEL.—There is a moderate demand. We quote as follows: Nos. 10 to 20, $2.50; 3-16, $2.50; ¼, 5-16, and ⅜, $2.40.

TOOL STEEL.—The inquiry for tool steel is better and a fair trade is doing. Diamond sells for 8c., and Jessop's for 13 cents.

TERNE PLATES.—The market is quite firm, but there is not much movement. We quote $7.75 to $8.

COIL CHAIN.—The market is firm. A good demand continues. We quote: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7½c. per lb.; 5-16, $4.80; 5-16 exact, $5.25; ⅜, $4.25; 7-16, $4.05; ½, $3.85; 9-16, $3.75; ⅝, $3.55; ¾, $3.50; ⅞, $3.45; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—There is a small inquiry. The price is $5.75 to $6.25.

ANTIMONY.—There is very little doing. We quote 10c.

ZINC SPELTER.—The demand is very light. The price is 5c.

SOLDER.—In solder there is a good business doing. There is no change in quotations. Bar solder is worth 18c., and wire solder, 20c.

PAINTS AND OILS.

It was hinted here last week that an advance in the price of linseed oil was imminent. This week there has been a sharp advance, raw being quoted at 80c. and boiled at 83c., in 1 to 4 barrels. It will be noticed that instead of there being, as is usual, 1c. difference between quantities of 1 to 4 barrels and 5 to 9 barrels, there is now 2c. difference. Those who have been looking for a break in the linseed-oil market are surprised at the strength which it exhibits. Eighty cents is a high price to pay, and whether business can be done under a higher figure is a question, but the present price is fully warranted by the conditions in the primary markets. Turpentine remains at our former quotations, and the price is still very firm. Business, generally, in paints and oils, is good. We quote as follows:

WHITE LEAD.—Best brands, Government standard, $5.87½; No. 1, $5.50; No. 2 $5.12½; No. 3, $4.75; No. 4, $4.37½ all f.o.b. Montreal. Terms, 3 per cent. cash or four months.

DRY WHITE LEAD—$5.25 in casks; kegs, $5.50.

DRY WHITE ZINC — Pure dry, 6½c.; No. 1, 5½c.; in oil, pure, 7¼c.; No. 1, 6¼c.; No. 2, 5¼c.

PUTTY — We quote: Bulk, in bbls., $1.90 per 100 lb.; bulk, in less quantity, $2.05; bladders, in bbls., $2.25; bladders, in 100 or 200 lb. kegs or boxes, $2.40; in tins, $2.55 to $2.65; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL—Casks, 7c.; 100 lb. kegs, 7¼c.; smaller quantities, 8¼c.

RED LEAD — Genuine red lead in casks, $4.50; in 100-lb. kegs, $4.75; less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE—Ground, casks, 5c.; less, 5½c.; flake litharge, casks, $5.25; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 80c.; boiled, 83c. In 5 to 9 bbls., 1c. less; 10 to 20 bbl. lots open, net cash, plus 2c. for four months. Delivered anywhere in Ontario between Montreal and Oshawa at 2c. per gal. advance and freight allowed.

TURPENTINE.—Single bbls., 67c.; 2 to 4 bbls., 66c.; 5 bbls. and over, open terms.

SHELLAC VARNISH — Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS—$1.20 to $1.45 per gal.

CASTOR OIL—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL—47½ to 49c.

COD OIL—32½ to 35c.

PARIS GREEN — Petroleum barrels, 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

Business in scrap metals is fair, and prices are steady, though on all iron the price is firm, owing to a continued scarcity. Our quotations are as follows: Heavy copper and wire, 10 to 10¼c. per lb.; light copper, 9c.; heavy red brass, 9c.; heavy yellow, 9c.; light brass, 4c.; lead, 2⅝ to 2⅝c.; zinc, 2 to 2¼c.; iron, No. 1 wrought, $14; machinery scrap, $14; stove plate, $8 to $9; light iron, No. 2, $5 per ton; malleable and steel, $4; rags, country, 60 to 70c. per 100 lb.; old rubbers, 6 to 6½c. per lb.

GLASS.

There is a good movement at unchanged prices. A few late import orders are still being booked. Quotations are: First break, 50 feet, $2.10; second, $2.20 for 50 feet; first break, 100 feet, $4.00; second break, $4.20; third break, $4.70; fourth break, $4.95.

HIDES.

There is a small demand. We quote: No. 1 hides, 7c.; No. 2, 6c.; No. 3, 5c. Lambskins are worth 65c.

MONTREAL NOTES.

Ingot tin is 2c. higher.

Some sizes of bar iron are hard to get.

Sisal rope has advanced ½c., and lath yarn is ½c. higher.

Some dealers are asking 5c. advance for Canada plate.

Linseed oil is 2c. higher for 1 to 4 barrels, and 1c. higher for 5 to 9 barrels.

An advance of 15c. per 100 feet has taken place in standard and extra heavy iron pipe, black and galvanized, in 2-inch sizes. In the ½-inch sizes there is a decline of 15c. per 100 feet.

McGinn & Abbott, general merchants and hotel proprietors, Kazabazua, Que., have disposed of their general stock there.

ONTARIO MARKETS.

Toronto, February 21, 1902.

HARDWARE.

WITH the improvement in the weather there appears to be some improvement in trade. For this time of the year trade is fair and the prospects for the immediate future are bright. Some orders are still being booked for barb wire, galvanized wire, and oiled and annealed, for future shipment. A fair trade is being done in wire nails. Bolts are in active demand, and a fair business is to be noted in screws and rivets. Considering the time of the year there is a fair business being done in rope. Enamelled ware and tinware are going out well. Sporting goods and cutlery are quiet. Ice-cream freezers and refrigerators are in request for forward shipment, and the wholesale dealers are taking these lines into stock. Poultry netting is still being shipped and wholesalers are beginning to make delivery of green wire cloth. There have been no changes in prices during the week worthy of note.

BARB WIRE.—A few orders for future shipment are still being booked. Our quotations are now as follows: F.o.b. Cleveland, $2.77½ for less than carlots, and $2.65 for carlots. From stock Toronto, $3.

GALVANIZED WIRE.—Nothing doing outside a few orders for forward shipment. We quote as follows: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15, $4.60 to $5.50; No. 16, $4.85 to $5.35. Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—Orders are being taken still for oiled and annealed for future delivery. Base price is $2.60 per 100 lb. Oiling, 10c.; coppering, 60c.; and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—Some business is being done, especially in wire for stovepipe purposes. Discount is 22½ per cent.

WIRE NAILS.—Some fairly good orders have been received for wire nails during the past week. Our quotations are as follows: $2.55 for less than carlots and $2.50 for carlots. Delivery points, Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—Only a small business is being done. We quote: Base price $2.35 per keg, with 7½c. allowance on carlots.

HORSE NAILS.—Business is just moderate. Discounts are as follows: "C" brand, oval head, 50 and 7½ per cent., and on "M" and other brands, 50, 10 and 5 per cent. Countersunk head 60 per cent.

HORSESHOES.—There is the usual quiet but steady trade being done. We quote f.o.b. Toronto as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

SCREWS.—The demand for screws keeps good. Discounts are: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.

RIVETS AND BURRS.—Business is still fairly good. We quote: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 and 10 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—An active trade is still being done in bolts. We quote as follows: Carriage bolts, common ($1 list), 55 and 5 per cent.; carriage bolts, full square ($2.40 list), 60 and 5 per cent.; carriage bolts, Norway iron ($3 list), 60 and 5 per cent.; machine bolts, all sizes, 55 and 5 per cent.; coach screws, 70 per cent.

ROPE.—A few orders are still being booked. We quote: Pure manila, 16c.; British manila, 13½c.; sisal, 12½c.; lath yarn, 11c.

DAIRY SUPPLIES.—There is still an active movement. The discount is 25 per cent.

SAP BUCKETS.—The demand for these continues brisk. The discount is 40 and 10 per cent.

TINWARE.—Fairly good quantities are going out. The discount is 40 per cent.

ENAMELLED WARE.—There is a fair demand for forward shipment, but very little is being done for prompt delivery.

SCREEN DOORS AND WINDOWS.—Only an occasional order is now being received for forward shipment. Common doors, 2 or 3 panel, are quoted f.o.b. factory points as follows: Walnut, stained, 3-in. style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-in. style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2 50 per dozen.

FREEZERS AND REFRIGERATORS.—Some business is still being done for

future shipment, and the wholesale houses are taking both these lines into stock.

EAVETROUGH.—Some business is being done on future account on the basis of $3.10 per 100 feet for 10-inch.

SPADES AND SHOVELS.—Only a small business is being done. The discount is 40 and 5 per cent.

GREEN WIRE CLOTH.—Wholesalers are now beginning to make delivery. We quote $1.25 per 100 square feet.

BUILDING PAPER.—We quote as follows: Dry sheathing, grey or straw, 30c. per roll; tar sheathing, grey or straw, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

POULTRY NETTING.—Orders are still being shipped. We quote: 2-in. mesh, 19 w.g., discount 60 per cent.; 2-in. mesh, 18 w.g. and heavier, 50 and 10 per cent.

CEMENT.—Trade still continues quiet and business will not pick up before the middle of next month. The prices are unchanged. We quote as follows: Canadian Portland, Rathbun's "Star," $2.25 to $2.65; "Beaver," $2.10 to $2.50; "Ensign," $1.90 to $2.30; German, $3.15; English, $3; Belgian, $2.50 to $2.75; Canadian hydraulic, $1.25 to $1.50 per bbl.

METALS.

The iron and steel markets continue strong, and in sheet metals trade is, as a rule, satisfactory.

PIG IRON.—The market both here and in the United States is very strong. The ruling price of Canadian pig on track Toronto is now $19 for No. 1 and $18.25 to $18.50 for No. 2. The output of pig iron in the United States is being greatly interferred with owing to the scarcity of fuel.

STEEL.—The market continues strong. In Pittsburg billets are not to be had and the price of foreign billets, which are in demand, have advanced $4 per ton in the United States during the past two months. All kinds of steel continue scarce and firm in price. Quotations by Toronto wholesalers are: Merchantable cast steel, 9 to 15c. per lb.; drill steel, 8 to 10c. per lb.; "B C" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe-calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2.25; reeled machinery steel, $3; hoop steel, $3.10.

BAR IRON.—The situation is without change, the demand being moderate and prices steady. The base price is $1.95 to $2.05. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

BLACK SHEETS.—The demand is fair. We quote as follows: Common, $3.15 for 28 gauge; and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—Orders are still being booked for import and the price is stiffening in the outside markets. We quote as follows: All dull, $3; half polished, $3.10; all bright, $3.75.

GALVANIZED SHEETS.—A good business is being done this week both for shipment from stock and on importation account. We quote: "Queen's Head" brand at $4.50 in case lots, and $4.65 in less quantities.

TIN.—The advances in the outside markets have stimulated buying here, although the demand is for small quantities. We still quote $28 to $29 per 100 lb. As we write the outside markets are a little easier.

TINPLATES.—A good business is being done both from stock and for import. The British market is steady, but we hear of no further advances since our last. We quote: I C, usual sizes, $4 per box.

TINNED SHEETS.—The demand is good. We quote: 72 x 30, up to 24 gauge, 7½c.; ditto, up to 26 gauge, 8c.

TERNE PLATES.—Very little doing. We quote: I C, 20 x 28 gauge, at $8.50.

COPPER.—There has been a good turnover during the past week in both ingot and steel copper. We quote: Half-and-half, guaranteed, 19c.; do. commercial, 18½c.; refined, 18c.; wiping, 17½c.

BRASS.—Trade is quiet. The discount is 15 per cent.

LEAD.—There is some inquiry. We quote: $3.50 to $3.75 for pig lead and $5 for bar.

IRON PIPE.—The market is decidedly firm, but local wholesale dealers quote as before. We quote: Black pipe, $5.40 for 1-inch; galvanized, $7.95 for 1-inch.

ZINC SPELTER.—Only a small busi- the past week. We quote $6 to $6.25 in $6 per 100 lb.

ZINC SHEET.—Business has been good the past week. We quote $6 to $6.25 in casks and $6.25 to $6.50 in part casks.

ANTIMONY.—Trade is quiet. We quote 10c. per lb.

SOLDER.—A good trade is being done. We quote: Half-and-half, guaranteed, 19c.; ditto, commercial, 18½c.; refined, 18c.; wiping, 17½c.

PAINTS AND OILS.

Trade in paints and oils still continues quiet, but merchants report that there are a good number of orders being received for future shipment. The price of raw and boiled linseed oil has been advanced 5c. owing to the firm feeling in Great Britain, and the high quotations for English oil for delivery here. Besides, the world's visible supply of flaxseed is limited this year. Turpentine also continues firm. We quote:

White Lead—Ex Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2, $5.12½; No. 3, $4.75; No. 4, $4.37½ in pkgs. of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.12½.

Red Lead—Genuine, in casks of 560 lb. $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

Litharge—Genuine, 6 to 6½c.

Orange Mineral—Genuine, 7½ to 8c.

White Zinc—Genuine, French V.M., in casks, $6 to $6.25; Lehigh, in casks, $6.

Benzine—In barrel lots, 16½c. per gal.; less quantities, 25c. per gal.

Paris White—90c. to $1 per 100 lb.

Whiting — 65c. per 100 lb.; Gilders' whiting, 80c.

Gum Shellac — In cases, 35c.; in less than cases, 40c. per lb.

Liquid Shellac—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

Putty—Bladders, in bbls., $2.25; bladders, in 100 lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.90.

GLASS.

There is a moderate number of orders being booked for import, but the market is unsettled, with an upward tendency. The local retail trade is light. We quote as follows : Under 26 in., $4.25 ; 26 to 40 in., $4.65; 41 to 50 in., $5.10 ; 51 to 60 in., $5.35 ; 61 to 70 in., $5.75; 71 to 80, $6.25 ; 81 to 85, $7 ; 86 to 90, $7.75 ; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

OLD MATERIAL.

The market for old brass and copper is stronger, owing to the upward tendency of copper. There is a moderate trade being done in all lines of old materials, the receipts being rather small, owing to the cold weather. The prices are steady. We quote : Agricultural, 60c. per cwt. ; machinery cast, 60c. ; heavy copper, 10c½. per lb.; stove cast, 40c. ; No. 1 wrought, 50c. per 100 lb. ; new light scrap copper, 7½c. per lb.; bottoms, 8c.; coil wire, 10c.; light brass, 5c.; heavy yellow brass, 7½c. ; heavy red brass, 8c. ; scrap lead, 2¼c. ; zinc, 2c. ; scrap rubber, 6c. ; good country mixed rags, 50 to 60c.; clean dry bones, 40 to 45c. per 100 lb.

HIDES, SKINS AND WOOL.

The market is steady and prices are about the same as last week. The trade still continues moderate. We quote what buyers pay on arrival :

HIDES—We quote : No. 1, green, 7c.; No. 2 green, 6c. ; No. 1 green, steers, 8c.; No. 2 green, steers, 7c.; cured, 7¾ to 8c.

SKINS—We quote : No. 1 calfskins, 9c.; and No. 2, 7c.; deacons (dairies) 55 to 60c. each ; sheepskins, 65 to 80c.; deerskins, 12½ to 14c. per lb.

WOOL—We quote : Fleece, 13c., and unwashed, 7 to 8c. per lb.

SEEDS.

The close of the export season for red clover has resulted in a slight decline of 20c. per bushel in that article. Alsike, on the other hand, is quite brisk, and prices have been advanced 50c. per bushel. Timothy is quiet. As usual, a little more will be paid for extra fine lots. We quote buying price at outside points : Red clover, $4.50 to $4.60; alsike, $7 to $8, and timothy, $2.50 to $3.25 per bush.

COAL.

The situation is more acute, the famine in cars being still pronounced, but there is an indication that there will be some relief shortly. The prices quoted below are only nominal, there being now no fixed prices at the mines. We quote at international bridges as follows : Grate, $4.75 per gross ton; egg, stove and nut, $5 per gross ton ; soft coal, $2.50 to $3.25 in bond, according to grade.

PETROLEUM.

There is a steady demand and prices are unchanged. We quote: Pratt's Astral, 16½ to 17c. in bulk (barrels, extra) ; American water white, 17 to 17½c. in barrels; Photogene, 16½ to 17c. ; Sarnia water white, 16 to 16½c. in barrels; Sarnia prime white, 14½ to 15c. in barrels.

MARKET NOTES.

The price of boiled and raw linseed oil has been advanced 5c. per gal.

PRESENTATION TO W. P. MILLAR.

On February 13, on the eve of his departure to fill a lucrative position with The China Mutual Insurance Co., Shanghai, China, W. P. Millar was visited by a delegation from The James Smart Manufacturing Co., Limited, Brockville, and presented with a complimentary address and a handsome cabinet of silver as a mark of their esteem.

Mr. Millar has been connected with the company several years as manager of their stove and furnace department, and during that time had won the confidence of all who had been associated with him. The address was read by Mr. J. H. A. Briggs, the vice-president of the company, and was signed on behalf of Mr. Miller's fellow-employes by J. H. A. Briggs, Alex. Foxton, W. K. Nicholson, A. E. Foxton. It set forth how high their estimation was of his abilities, and expressed their heartfelt wishes for his future success.

Mr. Millar thanked his friends for their generous act, and spoke of the friendly relations which had always existed between them and himself.

A complimentary resolution from The James Smart Manufacturing Co.'s board of directors was also handed to Mr. Millar.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

MAGNAN FRERES, hardware merchants, Montreal, have assigned to Kent & Turcotte.

Thomas Steele, general merchant, Ridgetown, Ont., is asking an extension.

MONTREAL ROLLING MILLS CO.'S DINNER.

THE second annual dinner of The Montreal Rolling Mills Company took place at the Place Viger Hotel on Saturday evening, February 15, and was attended by about 65 persons.

Mr. Wm. McMaster, vice-president and general manager of the company, was chairman. On his right sat Mr. J. K. Kinghorn, general sales agent, and on his left, Mr. M. F. Derrick, general superintendent, and vice-chairman of the evening. The head table was in the form of a crescent, and on it, beautifully executed in flowers, was the company's well-known trade mark. The menu card was shaped like a horseshoe, the inner covers containing the toast list, programme and menu.

When everyone had followed out the instructions at the top of the menu, "Strive mightly, but eat and drink as friends," the chairman proposed a toast to "The King," and had His Majesty been present he would have felt much pleased with the heartiness with which the National Anthem was sung.

"Our Guests," was proposed by Mr. Kinghorn, and responded to by Mr. Fred. S. Hickey. Mr. J. L. Waldie, the secretary-treasurer of the company, in what was acknowledged the speech of the evening, proposed the toast of "Our Chief." He outlined the progress of the business since its commencement, and referred to Mr. McMaster having been an office boy in the company when it was first started. "Mr. McMaster," he said, "was at that time, like the works, a very small affair." The chairman replied feelingly. He said, although his looks were against him, yet he felt as young as the youngest.

"Our Works," was the last toast. Mr. McMaster proposed it and Mr. M. F. Derrick responded. He spoke of the improvements now under way, and of contemplated extensions to the works. Other replies to this toast came from the several heads of the departments, Mr. Clowes speaking for the 12-inch mill; Mr. Myers, of the 9-inch mill; Mr. Fessenden, of the tacks and wire goods; Mr. Miller, of the galvanized department, and Mr. Higgs, who superintends the outside work of the mills, of the handling of the raw materials in the yard.

Mr. George Boyd, of the sales department, complimented the committee on the manner in which they had performed their work in connection with the dinner, and Mr. J. A. Gingras, on behalf of the committee, replied, making the wittiest speech of the evening.

During the evening the following programme was carried out:

1 Song ..... Selected
F. S. Hickey.
2 Legerdermain .....
T. Turner.
3 Song ..... Selected
C. Hempey.
4 A Few Imitations .....
H. Diplock.
5 Song ..... Selected
J. A. Gingras.
6 Recitation "Papineau's Gun" .. Dr. Drummond
E. Oborne.
7 Duet ..... Selected
C. Bradbury and C. Hempey.
8 Song ..... Selected
F. S. Hickey.
Accompanist, T. D. Edward.

One of the best songs of the evening, which was all the more enjoyed for not being on the programme, was given by Mr. Wm. R. Boyd, the company's timekeeper. It was a topical song, called "The Rolling Mill Ship," and was written and composed by Mr. Boyd himself.

That The Montreal Rolling Mills Co. have, in their numbers, an unusual roll of talent must be admitted when it is stated that everyone that took part in the above programme, with the exception of Mr. Hickey, was an employe of the company.

NOVA SCOTIA MARKETS.

Halifax, February 18, 1902.

THIS is about the middle of the dull season in the hardware line; yet both wholesalers and retailers are satisfied that the business doing is up to the average. Those handling only special lines have to content themselves with the conditions which are affecting other businesses; but those handling full lines, especially the retailers, are kept comparatively busy. Office work is abundant, and in many cases we find the heads of firms almost too busy to spare much time to giving information as to trade.

* * *

Travellers out on the road are sending in fairly good orders, which denotes a healthy condition throughout the country. The prospects are good for a busy season in the building line, in almost every section of the country, and this is looked forward to as indicating a profitable season in the hardware business in the city.

* * *

The firmness of the iron and steel markets, especially as denoted on the other side of the border, keep prices here firm. A short time ago the price of wire nails was cut some 30 per cent., but as manufacturers are not satisfied with present prices it is quite possible that they may again advance, as the reduction is not warranted by the general state of the iron and steel trade.

* * *

The prices of linseed oil and turpentine are not quite satisfactory, and a continuance of the high prices will depend, as far as the former is concerned, largely on the new seed-crop, reports of which are not yet definite, but are not encouraging. Turpentine, during the last month, has advanced 7c. Linseed oil is quoted at 82c. by the barrel for raw, and 85c. for boiled; in smaller quantities, 87 and 90c. Turpentine, barrels, 69c.; small quantities, 74c. The cordage line is firm with a good demand; prices are expected to run higher.

* * *

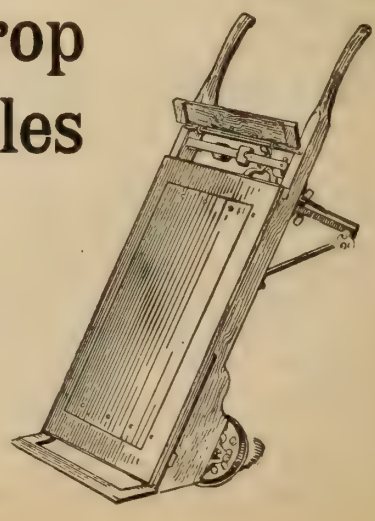
With reference to a number of steel billets imported here from England on two occasions during the last month, it may be stated that they were imported by The Nova Scotia Steel and Coal Co., of New Glasgow, some time ago to fill special orders. Now that The Dominion Iron and Steel Co., of Sydney, are manufacturing both steel ingots and steel billets, no such orders from England or elsewhere will be necessary for the future. Within the last week, so it is reported, representatives of two United States firms visited our great iron centre to inspect the new make of ingots and billets, with the view to purchase. They are reported as being perfectly satisfied with the quality.

* * *

Despatches to the Halifax papers last night state that a project is on foot to start a large wire-nail factory at Sydney. Mr. James Pender, of St. John, N.B., is at the head of the movement, and he is said to be backed by a number of leading men in the Maritime Provinces. The despatch adds: "It is learned that nearly $300,000 is the amount already subscribed for the project." It is understood that the capital required is $500,000. This is only the commencement of the movement to introduce kindred manufactories in iron and steel.

R. C. H.

PROPOSE TO MAKE THEIR OWN SEWER PIPE.



The Winnipeg Board of Works have accepted a tender for only a limited quantity of sewer pipe of United States manufacture. It is proposed that the city should purchase the necessary plant, which would cost about $5,000, and manufacture its own sewer pipe from cement. It is claimed that, by following this course, the city might have saved some $7,000 last season.

The National Machine Co., of Columbus, Ohio, have decided to open a branch in Winnipeg; in fact, all lines of implement concerns seem to have an eye on the capital of Manitoba at the present moment as a good vantage ground for business.

AYLMER IRON WORKS CO., Limited

AYLMER, ONT.

CATALOGUES, BOOKLETS, ETC.

A HAMMER FIRM'S CATALOGUE.

A CATALOGUE of 40 pages, handsomely printed on fine paper and clear type and containing numerous engravings exquisitley tinted in aluminum and yellow, representing the natural colorings of the Maydole solid crucible cast steel hammers, is that issued by the David Maydole Hammer Co., Norwich, Chenango County, New York. For more than 50 years this firm has been placing its hammers on the market, constantly adding new styles and sizes, till now every line of hammer from their adze eye nail, horseshoers', blacksmiths' to machinists' and boiler riveters' is made bearing the trade mark of the firm —"D. Maydole Cast Steel." On different pages throughout this catalogue are illustrated some of the awards made the Maydole hammers by industrial expositions.

AN 800-PAGE CATALOGUE.

The Canada Hardware Co. are working on a new catalogue, which, when completed will contain 800 pages. It will, of course, take some time to finish this work, but in the meantime, periodical supplements will be issued.

WOODENWARE AND BRUSH CATALOGUE.

The United Factories, Limited, of Toronto, have issued their new illustrated catalogue for season of 1902, which consists of 298 pages devoted to brushes, brooms, woodenware and grocers' sundries.

134 of the pages are used for displaying Boeckh's brushes, 8 pages for Boeckh's brooms and whisks, 81 pages for Bryan's brushes, 18 pages for Cane's Newmarket woodenware. The remainder is devoted to the large range of grocers' sundries and adjustable display tables.

In the combined list there are nearly 10,000 different kinds and sizes of brushes for every known purpose for which a brush is required; 100 varieties of corn brooms and whisks; 500 different kinds of woodenware, baskets, screen doors and windows and other sundries for the grocery trade. This is, without doubt, the finest and best displayed and illustrated catalogue ever issued to the Canadian trade in these particular lines. The design of the cover originated from their own advertising department.

The enormous growth of the business has brought them into prominence all over the British possessions, the company being well known as the leading brush and broom manufacturers of Canada. Their reputation for turning out first-class goods for the past 56 years is a record worth having, and the Canadians should be proud to know they have a factory of this nature to compete with the world on high-class brushes.

A copy will be sent to all their regular customers, or to any who may have been overlooked a copy will be cheerfully sent upon his applying to the head office or to any of the company's branches.

KENTVILLE BOARD OF TRADE REPORT.

The Kentville Board of Trade have issued their ninth annual report in a neatly printed booklet of eight pages, containing their president's address and their resolution regarding the holding of a Provincial winter fair of fat and dairy stock in Kentville, N.S. The annual meeting of this board was held on January 20, the proceedings of which were reported in HARDWARE AND METAL of a subsequent date.

CENTRAL PRISON BINDER TWINE

In the Ontario Legislature on Wednesday, Mr. Carscallen asked the following question:

Is it a fact that binder twine made by the Plymouth Cordage Company, of Plymouth, Mass., U.S.A., known as "Plymouth Special," is imported, either directly or indirectly, by the Central Prison authorities, or by any person or contractor having any rights or privileges in that institution, or by the Government, and received at the Central Prison, relabelled, and sold to farmers under the description of "Farmers' Special"?

The Provincial Secretary said that no binder twine had been imported by the Government or Central Prison. The Government did not interfere with the private business of the contractor. During nine months last year 48,850 pounds of binder twine had been manufactured at the Central Prison, a quantity about equal to that sold direct to farmers in the previous year. It was all sold. The Central Prison and Government purchased no twine from any company.

Mr. Carscallen claimed that this was not a complete answer to his question. He was imformed that this contractor had imported the Plymouth twine and sold it as "Farmers' Special," made at the Central Prison.

The Provincial Secretary replied that the contractor was bound to make four tons a day at the prison, and supply the farmers at a price fixed by the inspector. It might be that the contractor did not estimate the quantity absolutely required by the farmers, and obtained some from an outside party to supply the order. As to that, he was not able to say.

THE MARRIAGE OF MR. BIRGE.

Mr. Cyrus A. Birge, president of the Canada Screw Co., Hamilton, was married on Wednesday in Wingham to Miss Vanstone, of that place. The ceremony was performed by Rev. Dr. Perie. The happy couple are spending their honeymoon in the east.

Extract from a letter just received by The Canada Paint Company, Limited, Montreal, from Mr. A. Strachan, Hardware and Paint Merchant, Kingston, Ontario:

"By referring to your ledgers
"you will be able to ascertain
"the number of years we have
"been selling your paints.

"From the experience
"of these years and from
"actual and practical tests,
"backed by numerous testi-
"monials from our customers,
"we can confidently state that
"your Mixed Paints are
"second to none in Canada,
"and, indeed, far superior to
"any we have met with."

HEATING AND PLUMBING

PLUMBING INSPECTOR FOR OTTAWA.

AN inspector of plumbing who will work under the direction of the medical health officer, is likely to soon be appointed in Ottawa. The finance committee on Friday night heard a delegation of plumbers urge that the inspector be appointed, and the aldermen agreed to take the suggestion up.

The committee now clearly understand what steps must be taken if an inspector of plumbing is to be appointed. Such an official can only be appointed by the board of health under the Health Act, and must work under the direction of the medical health officer.

A delegation of master and journeymen plumbers asked that $700 be placed in the estimates to pay the salary of an inspector of plumbing. Messrs. F. G. Johnston and H. A. Knox, representing the masters, and Messrs. Jas. Brennan, M. M. O'Connell, F. W. Prodrick and J. Hurtubuise were the journeymen who attended.

Messrs. Knox and O'Connell were the spokesmen for the plumbers, and said Ottawa is behind the times in not having such an official. Much disease, they said, can be traced to defective plumbing, and if an inspector were appointed he could see that all work is properly done. In buildings where an architect is employed, he sees that all the work is well done, but where contractors build without an architect or competent inspector, cheap work is often put in, and when the building is in use the defects are noticed, and bad plumbing is frequently the cause of disease. Mr. Knox said the city could appoint an inspector who would keep a check on the plumbing in all buildings and who could collect a fee for his services, which fee would help to cover his salary.

City Solicitor McVeity explained the legal aspect of the matter, which is briefly that the city in 1893 passed a by-law to regulate plumbers and to appoint a plumbing inspector, but the by-law has not been enforced. The appointment of an inspector can only be made by direction of the board of health.

After a little discussion it was decided on motion of Ald. Stroud and Desjardins, to ask the council to repeal the by-law of 1893, and then the board of health may appoint the inspector.

The Public Health Act gives a sanitary inspector power to condemn unsanitary plumbing in any building, and to order sanitary work.

BUILDING IN TORONTO.

The building activity still continues in Toronto, as evidenced by the following permits taken out at the City Hall during the past week: John Robson, for a two-storey and attic brick and stone dwelling on Beatrice street, for $2,500; H. Smith, for a pair of two-storey brick dwellings on Albany avenue, for $6,000; H. J. Atkinson, for a two-storey brick addition to his dwelling on Yorkville avenue, for $400; N. V. Kuhlman, for a two-storey summer residence on Kenilworth avenue, for $1,000; Toronto Land & Insurance Co., for alterations to store on 528 Queen street west, amounting to $300; Thomas Holmes, for a one-storey and loft frame stable in rear of 106 Wells street, for $200; and Thomas Cruttenden, for a three-storey brick and stone store on the south-east corner of Sherbourne and Howard streets, for $4,000.

PLUMBING AND HEATING NOTES.

Cann & Wetmore, plumbers, Pictou, N. S., were partially burned out.

Hickey, Aubert & McGoldrick, plumbers, Montreal, are starting into business.

SOME BUILDING NOTES.

MOORE & WHITTINGTON, contractors, 159 Yates street, Victoria, B.C., are preparing to erect five modern houses on Pandora Hill, in that city.

John Moriarity will build a new brick house at Deer Park, Ont.

Flerschauer's block, Stratford, is nearing completion, one side having already been finished.

Several business firms intend putting up commodious business blocks at Qu' Appelle, Man., next summer.

John Stevenson has taken out a permit for the erection of a frame dwelling on William street, Ottawa, costing $600.

J. H. Ashdown, hardware merchant, Winnipeg, is preparing to enlarge his wholesale warehouse on Bannatyne avenue.

John Thaler is having his general store at Elmwood, Ont., thoroughly remodelled by putting in a new plate glass front and brick veneering the building.

PLUMBING AND HEATING CONTRACTS.

The Bennett & Wright Plumbing and Heating Co., Limited, Queen street east, Toronto, have secured contracts for the plumbing of a residence on Walmer Road for A. Nicholson, and the plumbing work in a store on Yonge street for Robert Barron.

WOLFVILLE'S SEWERAGE SYSTEM.

The town of Wolfville, N.S., is to have a system of sewerage put in this season, having voted $35,000 for the purpose. This town is steadily growing. According to the last Parliamentary blue book, but three towns in Nova Scotia paid a lower tax rate for general purposes, and 16 towns were higher.

THE QUESTION OF SEWAGE DISPOSAL.

CONTROLLER McMURRICH, of the Toronto City Council, has formulated a scheme for the disposal of all sewage west of Spadina avenue, Toronto, which will cost, if it is carried out, $527,400 for works, and for its operation about $12,000 per year. This is how the estimate is made up in the report of the city engineer:

"Intercepting sewer, Dufferin street to Spadina avenue, along Front street, including land damages, connections and Garrison Creek overflow, $61,500.

"Pumping station, with a capacity of 13,500,000 gallons per day, $8,500.

"Septic tanks, seven acres, including the filling in of the land on the water lots in front of Garrison Creek sewer and the cost of the purchase of two acres of land, $143,400.

"Bacteria beds, 16 acres in extent, including cribbing, filling and filtering materials, $374,000.

"The total flow of sewage in that district now is between 7,000,000 and 8,000,000 gallons. The septic tanks are to rid the sewage of all 'sludge' or solids. The effluent is then poured upon bacteria beds, where it soaks through the coke, broken stone or gravel and escapes into the lake. In the septic tanks the 'sludge' is rendered harmless to public health by the action of multitudes of bacteria which are cultivated in the septic tanks for the purpose. The material removed from the tanks, which would amount to less than 10 tons daily, may be dried and burned, carried out into the lake and dumped, or transported out to farms for use as a fertilizer."

It is further estimated by Engineer Rust that the total cost of a similar system for the whole city would amount to $1,880,000. To operate both plants would involve an expenditure of $40,000 annually. The tanks, pumping station and beds for the East End would be located on Ashbridge's Bay.

THE CHANGING USE OF GAS.

By ALTON D. ADAMS.

SINCE the introduction of electric lighting, early in the decade 1880-1900, gas has grown less important as an illuminant and its application to heating has greatly increased. This movement in the use of gas is away from a field where it is less efficient than electricity, to one where its heating qualities can be used to greater advantage. An ordinary gas burner consumes about five cubic feet of gas per hour and yields a light of approximately 16-candle power. Each cubic foot of this gas burnt develops about 650 heat units, or 3,250 units per hour at the burner of 16-candle power. Incandescent electric lamps of 16-candle power regularly consume energy at the rate of 50 watts each. One watt-hour is the equivalent of 3,412 heat units, so that the incandescent lamp of 16-candle power develops 170.6 heat units hourly. It follows that the energy required to maintain the open gas flame for a given illumination is 19 times as great as that necessary in incandescent lamps for equal service.

If the electrical energy required by the incandescent lamp be supplied to a heater, the amount of heat there produced is exactly the same as the amount that would have been developed in the lamp. If the gas required for a given illumination at an open flame be burned in a gas stove, the development of heat there is fully as great as it would be at the burner. Where the gas is perfectly burned and the products are cooled before they escape the electric heater and the gas stove are equally efficient. In many cases, however, the combustion of the gas is not complete, and even where it is completed the heat is not usually extracted from these products before they escape. In the transformation of electrical energy to heat the efficiency is necessarily exactly 100 per cent., and there are no products of combustion to carry away part of the heat. For the reasons just stated the efficiency of the gas stove may easily drop 75 or even 50 per cent. If the gas stove extracts from the gas passing through it only one half of the possible amount of heat, the gas is still 9.5 times as effective as a heating as it is as a lighting agent, taking the results attained with electrical energy as unity in each case.

The general tendency is to shift the use of gas to that field where it is under the least disadvantage. This tendency is well illustrated by changes in the number of gas street lamps and of gas stoves used in Massachusetts during the past 14 years. In the accompanying table the number of gas street lamps and of gas stoves operated in each year from 1887 to 1900 are stated as deduced from the reports of the Gas and Electric Light Commissioners of Massachusetts.

GAS STREET LAMPS AND STOVES IN USE IN MASSACHUSETTS.

Year Ending June 30.	Street Lamps.	Gas Stoves.	Gas Stoves in Boston.
1887	18,990	2,378	
1888	18,335	4,003	
1889	17,260	6,328	
1890	15,493	7,418	
1891	14,107	8,666	
1892	13,324	10,795	
1893	12,971	12,880	
1894	12,700	15,877	
1895	11,701	42,563	23,881
1896	11,693	72,195	49,610
1897	11,988	78,667	53,350
1898	12,407	79,335	47,698
1899	12,876	87,201	47,635
1900	13,308	95,547	48,064

For the fiscal year of 1887 the number of gas street lamps throughout the State was 18,990, but for 1900, 13 years later, the number of these lamps was only 13,308, a decline of 30 per cent. This decrease in the number of gas street lamps took place in spite of a rapid rise of population during the period under consideration. Figures are not at hand to show the rate of increase for the population of the State since 1887, but from 1890 to 1900 this increase was 25.2 per cent. If the use of gas street lamps had only kept pace with the rise in population, the number of these lamps in 1900 would have been more than 25,000 instead of 13,308. While it is not possible to give the number of gas lamps in years prior to 1887, it seems certain that there was a constant decline during nearly all of the decade from 1880 to 1890. This view is supported by the known increase of electric street lighting during these years. In 1880 the income from electric street lamps in Massachusetts was practically nothing. For the fiscal year of 1890 the value of electric street lighting was $776,986.18, and the sum paid for gas street lighting was only 42.1 per cent. of this amount.

The lowest point reached in the number of gas street lamps was in 1896, when it fell to 11,693. Since that date the increase to 13,308 has hardly done more than maintain a constant ratio to the growing population.

Quite different from the declining use of street lamps has been the application of gas stoves. For the year 1887 the number of such stoves reported was only 2,378, while for 1900 the number was 95,547. That is, during 13 years the number of stoves reported has grown to more than forty times the original magnitude. In the seven years from 1887 to 1894, the number of stoves increased to 15,877, the average yearly addition being nearly equal to the original. During this period the reports seem to be incomplete, as figures for various large companies, notably those in Boston, were omitted. Beginning with the fiscal year of 1895 the returns seem to include nearly all important companies, and the number of gas stoves goes up to 42,563, or more than two and one-half times the reported number for the previous year. Of the stoves included in the report for 1895, 23,881, or a little more than one-half, were at Boston. Near the close of the fiscal year of 1894, one of the Boston companies, under the spur of competition, offered gas stoves to its customers on very favorable terms. This action, no doubt, had much to do with the large increase of the number of stoves in Boston in 1895 and 1896. How many stoves were put into use at Boston from 1894 to 1895 cannot be stated, but from 1895 to 1896 the number was 25,729, or more than the entire number there in 1895. During the year just considered, the number of stoves throughout the entire State, including those at Boston, increased from 42,563 to 72,195, or 29,632. It follows that the stoves added throughout the State outside of Boston numbered only 3,903, or less than one-sixth of the increase in that city. In 1896 the severe competition at Boston came to an end, and the maximum number of gas stoves there was reached in the fiscal year of 1897, when it stood at 53,350. Since the date just named this number has declined, and stood at 48,064 in 1900. At the time of severe competition stoves were installed at Boston without any charge and under contracts that titles should pass to the users when gas to a certain value had been consumed. The small decrease in the number of gas stoves used at Boston is probably due to failures of some consumers to burn enough gas to earn the stoves. Evidently the number of stoves in Boston had been pushed much beyond the normal demand.

Outside of Boston the increase has been constant and rapid, from 22,585 in 1896 to 47,483 in 1900, thus more than doubling in four years. This increase is the more instructive because it has come about simply through the natural demand. In 1897 Boston had 67 per cent. of all the gas stoves in the State, but in 1900 this had fallen to 50 per cent. Boston still has four times as many gas stoves per unit of population as the remainder of the State, since its number of inhabitants is only one-fifth of that for the entire State.—Scientific American.

SUBSCRIPTIONS POURING IN.

The Victoria, B.C., Tourists' Association is being placed on its feet by the support of all classes of citizens. Canvassers have been over about half of the city seeking subscriptions in aid of the Association, and already the sum of $2,493 has been promised. The collectors will start out in a short time. They are greatly encouraged and helped by the fact that the State of Maine last year secured through summer tourists and sportsmen the sum of $10,000,000. They are hoping for the same success out there, providing they keep the movement alive for a few years.

MONTREAL Proprietors TORONTO

MR. J. H. MORIN has been appointed Managing Partner at our Toronto office from January 1st, 1902

OTTAWA TOURISTS' ASSOCIATION.

THE Ottawa Valley Tourist Association has been reorganized and is starting again with a new lease of life. This work was perfected at a meeting on February 11 in the Board of Trade rooms, Ottawa. Geo. F. Henderson occupied the chair, and amongst those present were: Lt.-Col. Coutlee, Lt.-Col. Hurdman, Major Brown, R. W. Shannon, John R. Reid, Andrew Holland, A. G. Pittaway, W. Lake Marler, Louis Simpson, N. E. Cormier, J. E. Walsh, King Arnoldi and others.

It was moved by W. Lake Marler and seconded by Louis Simpson that the association be organized with the following officers: Hon. presidents—Thos. Birkett, M.P., L. N. Champagne, M.P., Hon. F. R. Latchford; hon. vice-presidents, N. A. Belcourt, M.P., Charles Magee, Sir James Grant, M.D., K.C.M.G.; president, George F. Henderson; vice-presidents, C. B. Powell, M.P.P., W. E. Smallfield, mayor of Renfrew; N. E. Cormier, Aylmer, Que.; Peter White, jr., mayor of Pembroke; Colin Rankin, Mattawa, Que.; Mayor Cook; hon. treasurer, W. L. Marler, manager Merchants Bank, Ottawa; hon. secretary, A. M. Calderon, Ottawa; assistant secretary, G. A. White, Ottawa.

General Committee — A. E. Riddell, Galetta, Ont.; A. P. Logue, Maniwaki, Que.; R. G. Moles, Arnprior, Ont.; R. W. Shannon, Ottawa; J. R. Reid, Ottawa; W. H. Rowley, Ottawa; J. E. Walsh, Ottawa; C. Ross, Ottawa; Geo. Duncan, Ottawa; McLeod Stewart, Ottawa; H. Morrison, Ottawa; R. H. Haycock, Ottawa; F. W. Carling, Ottawa; F. X. St. Jacques, Ottawa; H. J. Gardiner, Ottawa; S. R. Poulin, Ottawa; A. Holland, Ottawa; Lieut.-Col. Hurdman, Ottawa; W. M. Southam, Ottawa; W. D. Morris, Ottawa; Ald. P. D. Ross, Ottawa; Lieut.-Col. Sherwood, Ottawa; Major Brown, Ottawa; A. A. Dion, Ottawa; D. E. Johnson, Ottawa; D'Arcy Scott, Ottawa; Louis Simpson, Ottawa; E. A. Olver, Ottawa; Ald. Payment, Ottawa; A. E. Palmer, Ottawa; W. A. Allan, Ottawa; Cecil Bethune, Ottawa; Lieut.-Col. Coutlee, Ottawa; Warden Cummings; A. G. Pittaway, Ottawa; Major Echlin, Ottawa; Henry C. Monk, Ottawa; C. A. Douglas, Ottawa; Ald. Sanderson, Ottawa; Lieut.-Col. Jarvis, Ottawa; Capt. Gorrell, King Arnoldi.

J. E. Walsh spoke of the Fish and Game Association, which met in Burlington recently and will meet in Ottawa next winter. He thought that a committee would have considerable benefit in distributing literature illustrating the beauties of the Ottawa Valley. He mentioned that the Canada Atlantic had spent on such work last year $9,000 in the United States, and the C.P.R. and other lines had done similar work also.

N. E. Cormier said that he realized that Ottawa was the gateway of the best game and fish district in the country.

R. W. Shannon explained how the Ottawa City Council had failed to donate the $1,000 asked for last year towards the work of the Association. He pointed out that the St. John Tourist Association had received a grant of $1,000 from the Provincial Government, and sufficient from the St. John merchants and council to bring up their funds in hand to $3,000 for the year. They had distributed 25,000 booklets and 25,000 picture postcards.

A committee was appointed to consider the question of a summer carnival of games, sports and tournament at Ottawa for 1902. A committee was also appointed to consider the resolution that was carried to the effect that it would be advisable to have a concentration of troops and a review at Ottawa some time in the year.

A committee will inquire into the suggestion that a characteristic stationery and literature would be of much value.

The following were appointed to the central executive committee: George F. Henderson, C. B. Powell, E. E. Smallfield, Major Brown, Ald. P. D. Ross, Mayor Cook, A. Holland, A. M. Calderon, Peter White, N. E. Cormier, E. A. Riddle, C. A. Douglas and C. E. E. Usher.

On motion, the executive were instructed to prepare a plan of finance and to draft a constitution and by-laws for the next meeting.

HALIFAX RETAILERS ORGANIZE.

ALTHOUGH only a few days have elapsed since the early-closing movement in Halifax began, considerable progress has already been made, and the result has been the formation of a retail merchants' association to complete the work. On February 5, a representative meeting was held, at which a number were present, to complete work of the organization, adopt a constitution and receive reports as to the workings of this movement. Different phases of the movement were discussed by a number of merchants, who all were in the fullest sympathy with the early-closing idea. A. W. Redden occupied the chair, and W. E. Webb was secretary.

When the meeting was finally called to order, William Crowe reported on behalf of a committee appointed to prepare a constitution and by-laws. The constitution states that the organization is to be known as the Halifax Retail Merchants' Association, which has for its object early closing and the discussion of all matters of interest to the various branches of trade represented in its members. Rules were adopted for the enrolment of members, election of officers, annual fees, duties of officers, date of regular meetings and other necessary matters.

The officers elected for the present year are as follows:

President—A. W. Redden.
Vice-Presidents—J. F. Colwell and H. L. Hart.
Secretary—W. E. Hebb.
Treasurer—F. P. Hayden.
Executive Committee—J. H. Emmett, W. J. Power, James Farquhar, J. J. Skerry, J. L. Archibald, W. E. Crowe, James Halliday, John Connolly, W. H. Merlin and Charles S. Lane.

Apollo galvanized iron is all alike; if not, send back to your jobber at our expense—we shall hear of it.

American Sheet Steel Company, New York

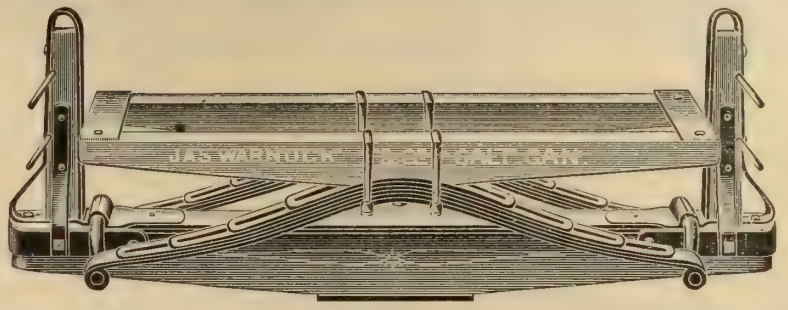
Montreal



"MIDLAND"
BRAND
Foundry Pig Iron.

Made from carefully selected Lake Superior Ores, with Connellsville Coke as fuel, "Midland" will rival in quality and grading the very best of the imported brands.

"The Peerless"
is the best Bolster Spring ever produced. A fine line for the hardware trade. Write Us For Prices.

James Warnock & Co. = Galt, Ont.

CURRENT MARKET QUOTATIONS.

February 21, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

FOR THE STREET

THE TRADE "M&M" MARK LIGHT

FOR THE STORE

What "M & M" Lamps Do.

They give a stronger, whiter, steadier light than the electric arc. Operate easily, safely, satisfactorily. Save money—actual 600 candle-power light at a cost of one-half cent an hour. Think of it! Write for circulars, etc. GOOD AGENTS WANTED. Exclusive territory allowed.

ACORN BRASS WORKS,
Dept. 8, 15-23 Jefferson Street CHICAGO, ILL.

What "M & M" Lamps Save.

Barrett Hardware Co, Joliet, Ill, write: "Gasoline and supplies for six "M & M" Lamps cost us $45.46 last year, an average of 60c. a month per lamp. We believe we had as good a light as though we had six electric arc lights at a cost of $360." No wonder that over 30,000 "M & M" Lamps are in use all over the United States and Canada. THEY KILL BIG GAS AND ELECTRIC LIGHT BILLS. It will pay you to investigate. Write for circulars. AGENTS WANTED. Dept. 8, 15-23 Jefferson St., Chicago.

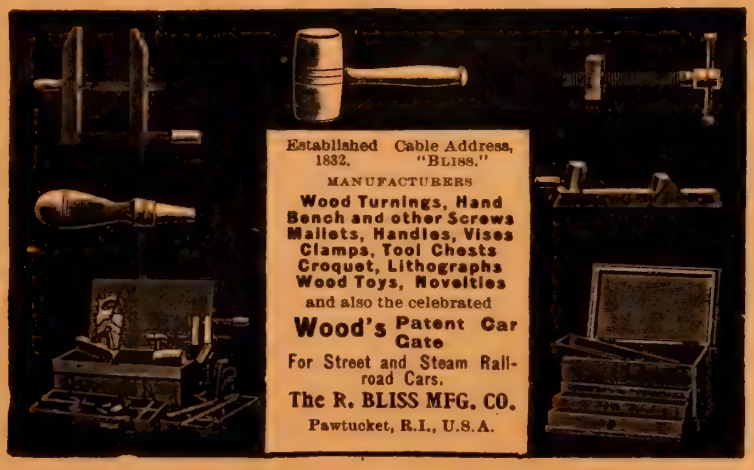
Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.



THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

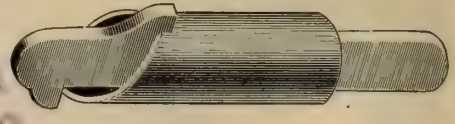
AGENCIES:—SAINT JOHN, N. B., VANCOUVER, B C.

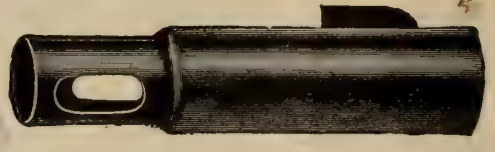
Supplies for the Maple Syrup Season



Sap Buckets.

Extra deep and straight. Three sizes. They possess many advantages over the ordinary flaring Buckets; being small in diameter they do not catch the rain or snow, and, as they are very deep, they hang perpendicularly and consequently will not overflow until full. Covers supplied if required. They nest close for shipping or storing.

We can also supply the ordinary Flaring or Western Sap Pails.



E. T. Sap Spouts.

Made of Retinned Steel. Strong and durable. Only require a ⅜-in. hole in tree. It does not cover the inside surface of the hole, therefore a larger amount of sap is obtained. Packed in cardboard boxes.

Maple Leaf Sap Spouts.

Made in Bronzed Steel. Require a ½-in. hole. Has a shoulder which prevents it being driven in too far. The hole in the tree is not exposed to wind and snow, consequently sap will flow longer. Packed in cardboard boxes.

Syrup Cans. Round or Square.

Plain or Decorated. Made in ¼, ½ and 1-gallon sizes—either Wine or Imperial measure.

A FULL STOCK CARRIED IN ALL LINES. ORDERS SHIPPED PROMPTLY.

WHEN WRITING ADVERTISERS PLEASE MENTION THAT YOU SAW THEIR ADVERTISEMENT IN THIS PAPER

THE U.S. CAPITALIST IN CANADA.

A GOOD many tears are being shed by some of the newspapers in Canada because the United States capitalists are becoming prominent in her industrial life.

These tears are either of the crocodile description, or inability on the part of those who shed them to appreciate the economic conditions which induced capitalists in the United States to invest their money in the Dominion.

One of the drawbacks to Canada in the past was the slowness with which her natural resources were being developed. We had not the necessary capital ourselves. And we deplored the fact that outside capital did not come in and assist us. The capital we most courted was British capital. And that capital we still prefer to all others.

But the British capitalist has prepared to invest his funds elsewhere: in Central and South America, in Africa, and almost everywhere but in Canada. True, he is showing some signs of departing from his normal apathetic condition; but his condition is still passive. It is the capitalist in the United States who is active in his investments on Canadian account. It is the United States capitalist who first saw the possibilities of the iron and steel industry in this country and devoted his dollars to the development of it; that saw the possibilities of the gold, silver and lead mining industries in British Columbia and the Klondike and exhibited his confidence in them by spending his money on their development; and that put new life and energy into the coal-mining industry of Nova Scotia. In fact, in nearly all branches of Canadian industrial activity the United States capitalist is much in evidence.

The fact that United States capitalists are paying so much attention to Canada is an evidence that they realize the vastness of her natural resources and the greatness of her possibilities.

Those who are ready to grasp opportunities are those who have not allowed time to slip through their fingers.

ADVERTISING CANADA IN THE SOUTHERN STATES.

THE Grand Trunk Railway Company is sending a car on a 70-day trip through the Southern States for the purpose of advertising Canada as a summer resort. The car is specially equipped for the purpose, and will distribute at the places at which it stops a large quantity of advertising matter regarding the many summer resorts to be found on the G. T. R. System.

Canada is at least second to no other country in the world as a summer resort. As for variety, we know of no other that can approach it, with the Atlantic on her east coast, the Pacific on her west coast, and her magnificent rivers and enormous inland seas between. And all supplemented by a dry and bracing climate, and the means for gratifying the most ardent of sportsmen.

All these things are gradually becoming known to the outside world, but the railways (the Grand Trunk and the Canadian Pacific) have done far more to bring this about than all other agencies combined. Naturally, the railways have their own interests first in mind, but their enterprise is none the less worthy of commendation. And all the benefit by no means accrues to them. Business men certainly gain a great deal, directly or indirectly, from the influx of tourists, and, wherever and whenever they can assist the railways to disseminate information about Canada as a tourist resort, self-interest, if nothing else, should induce them to do so.

THE SITUATION IN IRON AND STEEL.

THE strength and activity of the iron and steel market are increasing rather than diminishing. Those who have been watching the market during the past few weeks cannot but have been struck by this fact.

In the United States this feature is particularly striking, where pig iron and steel continue to advance. It is said that eight of the Southern furnaces have orders for 700,000 tons of pig iron on their books, most of which is for delivery first half of the year. The Southern furnaces, it will be remembered, make about one-half the pig iron turned out in the United States.

During January the furnaces in the United States turned out 1,500,000 tons of pig iron, or at the rate of 18,000,000 tons a year. A number of the Southern and Pennsylvania furnaces have sold everything they can make up to January 1, 1903.

In spite of the quantity of pig iron that is being made, there is a scarcity in the foundry description. One of the causes of this is the difficulty of obtaining prompt transportation, but the chief appears to be the fact that a number of the furnaces have been running on Bessemer iron in order to supply the very heavy demand from the steel mills.

Owing to the difficulty which large users of pig iron have lately been experiencing in getting supplies, and encouraged by the strong outlook for the future, a good many buyers have recently placed orders for their requirements for the second half of the year.

In spite of the heavy demand, however, the price of pig iron in the United States is only about 10 per cent. higher than it was a year ago. This is, no doubt, due to the influence of the United States Steel Corporation, or, as it is more familiarly known, the Trust, and to the efforts of the Southern furnaces, who have set their faces against any sharp advances in prices.

This conservative policy is the wise and proper one. Inordinate advances in prices are certain to bring about a curtailment of consumption. And the concomitant of that is, of course, a reaction in prices and a lack of confidence in the situation. Then exist what we call hard times. The Steel Trust recognized this, and its adherence to it has gained for it many friends in the commercial world.

While iron is only about 10 per cent. higher than a year ago, there have been some marked advances in steel. Steel billets, for instance, are 50 per cent. dearer than they were a year ago. In fact, it is the strength of the steel market which is the key to the present extraordinary situation. The New York Journal of Commerce says: "There never was a time when there was such an enormous demand for all kinds of iron and steel and at such profitable prices. The mills that roll beams and channels are so gorged with tonnage for months to come that a movement is on foot to import about 10,000 tons of structural shapes from abroad, something that has never before been thought of in the history of the iron trade."

In an attempt to relieve the situation it has been necessary to import steel billets from Germany. This in turn has led to an advance of $4 to $5 in German steel, and it is thought that the price of steel bars in the latter country is now at a figure which will prevent their importation. At a meeting of independent steel manufacturers in Pittsburg last week it was decided to send a commission to Great Britain and Germany to try and purchase 40,000 tons of steel bars. Without taking this into account, it is estimated that something like 150,000 tons of English and German steel have already been purchased on United States account.

The situation has been materially improved in Great Britain, as well as in Germany, on account of the demand for iron and steel for shipment to the United States. And to-day, pig iron in Great Britain is $1 to $1.25 per ton higher than it was a month or six weeks ago.

The strength of the iron and steel market in Canada is scarcely less marked than it is in the United States. The large users of pig iron are quoting about $2 per ton higher for Canadian pig iron than they were a couple of months ago, and the prices of nearly all staple lines are firm, in sympathy.

The condition of the steel market is a reflection of that in the United States. This appears to be particularly marked in regard to steel sheets.

Manufacturers in Canada are being put to some inconvenience owing to the scarcity of malleable iron. The makers of malleable iron are positively compelled to turn away orders because they cannot fill them. And some of them are unable to run to the full capacity of their works owing to a scarcity of molders.

In Canada as well as in the United States there is every indication of a continuance for some time to come of the present extraordinary activity in iron and steel.

PARTNERSHIPS FOR CLERKS.

THE keenest competition that merchants sometimes experience is that which arises from their own clerks who have gone into business on their own account.

It would be unwise to advise clerks not to go into business on their own account. On the contrary, it would be wise to induce them to cultivate an ambition in that direction. A young man who has no such ambition, or who has no desire to cultivate one, is lacking in those fundamentals which go to make a good clerk.

Merchants can, however, in many instances, prevent their clerks from becoming competitors by making them their partners.

It would not be reasonable for a merchant to give all his clerks an interest in his business. There are many who are not qualified for partnerships. But to the best clerk, where it is at all possible, it is only fair that an interest in the business should be held out as a reward for faithful services.

TRADE MARKS.

There seems to be an impression with the average dealer that a trade mark needs to be registered to make it valuable. Such is not the case.

Any name or trade mark, which is original with the user, is his own property and no person has any right to copy or imitate same. Of course it is advisable for any owner of a trade mark to have same duly registered so as to establish proof of priority, but it must be understood that a trade mark only becomes a trade mark after the goods bearing it have been marked.

TRADE IN COUNTRIES OTHER THAN OUR OWN.

PIG IRON IN THE STATES.

FORGE pig market is very excited and buying for the third and fourth quarters has put prices to $16.75 and $17. A majority of Southern furnaces are temporarily out of the market, while figuring how they stand. Consuming interests are losing their heads on both forge and foundry.—American Metal Market, February 25.

The feature of the week has been the general advance in quotations of pig iron. Not only on early shipments, but for delivery running up to the end of the year there was a general hardening of values. Conservative men have vigorously opposed the tendency upward, but market conditions became too strong to be ignored. Orders of great size were placed for delivery in the third quarter of the year at $16.75 Pittsburg, and 50c. more was readily paid for earlier shipment or smaller quantities. Grey forge and Southern foundry iron also shared the better feeling, although the latter is more stubbornly held. While the pressure of delivery of Bessemer pig is so great it is fortunate that coke cannot be had in desired quantity. More structural mills have refused to take new business at any terms, even where consumers agree to accept goods without any date specified. Pressure continues phenomenal as to rails and other railroad equipment, and even in pipe there is a fair business, thoughthe season is not yet fully opened. —Dun's Review, February 22.

BRITISH TINPLATE TRADE.

The market is very firm, and values all around have increased on the week. As much as 13s. 1½d. per box has been paid for common 14 by 20, 112 sheets, 108 lb., Bessemer cokes f.o.b. Wales, for quick delivery. Makers generally are asking 13s. 3d. per box for February delivery, with 1½d. to 3d. extra for Siemens' steel. Few transactions of any moment are reported however, the enhanced prices causing buyers to hold off as much as possible.—Iron and Coal Trades' Review, February 14.

BRITISH FINISHED IRON TRADE.

The Birmingham market for merchant iron was decidedly firmer yesterday. In black sheets and galvanized iron there has been a decided upward movement, the demand has expanded and prices are higher. In other branches business is better, without orders being any too plentiful, but prices are hardening all round, in view of a rising market for raw materials. South-African business is opening out, and trade with the Far East is certain to improve, now we know that we are allied with Japan in keeping the open-door and the peace in China. Marked bars at £8 10s. are selling steadily. Common Staffordshire bar iron is quoted at £6 15s., and some makers will not sell under £6 17s. 6d. The markets for common bar iron in Cleveland, South Wales and Scotland are quiet, but prices are rather firmer, owing to the move in pig iron.—Iron and Steel Trades' Journal, February 15.

PIG IRON IN GREAT BRITAIN.

Both Scotch and Cleveland warrants have taken an upward turn this week, and although in the former case the rise may, to some extent, be said to have a more speculative basis than in the latter, the advance, coming, as it has done, at a time when what is usually a busy period of the year—the spring season—is imminent, has exercised a favorable influence upon the general market, consumers apparently arguing that the movement may develop as the year grows older. As a result, there has been somewhat more demand in the Cleveland district, and, taking into account the downward tendency in coke prices, and the better rates obtainable for pig iron, the market may be considered to have assumed a more encouraging aspect for makers. Manufacturers of East Coast hematite are not so fortunate, however, for while their quotations are falling the price of ore is going up. Mixed numbers have sold at 54s. 9d. this week. On the West Coast the tone of the hematite market is steady, and in Barrow makers are quoting 58s. to 59s. per ton f.o.b., for mixed numbers. The following is a statement of the stocks of pig iron in public stores :—

Public stores stocks, in tons :	Wednesday.
Connal's at Glasgow	55,900
Connal's at Middlesbrough	140,600
Connal's at Middlesbrough, hematite	300
West Coast hematite	17,400
N.E.R. Stores, Middlesbrough	1,460

The decrease of stocks in Middlesbrough during the week ended February 11 was 1,050 tons, in Glasgow, 951 tons, and in Barrow, 1,746 tons.—Iron and Coal Trades' Review, February 14.

WIRE NAILS IN THE STATES.

The demand for wire nails is large and active. Recent storms added to the insufficiency of transportation facilities have temporarily increased the difficulty of getting prompt mill shipments. The market is strong, and is represented by the quotation in carlots of $2.05 to $2.15 f.o.b. Pittsburgh, plus actual freight to destination.—Iron Age.

AXES HIGHER IN THE STATES.

As referred to more fully in another column in connection with the notice of what is being done by the axe manufacturers in the way of consolidation, prices on this line of goods are slightly higher. The advance is from 5 to 10 per cent. on the leading goods. The manufacturers on the 17th began marketing their product for the coming season, thus putting the new prices into effect. While it is anticipated that the market will be quite regular, as the new prices are strictly maintained, there will probably be a good deal of enterprise shown by the manufacturers is securing orders for their various factories.—Iron Age.

THE OTTAWA BOARD OF TRADE

THE Ottawa Board of Trade held a well-attended meeting on the evening of February 19 to listen to the inaugural address of President Coates and take part in an informal discussion on the Temiscaming and Northern Ontario Railway, the Bill for the construction of which is now before the Dominion House. Mention was also made of the coming session of the Dominion Board of Trade at Ottawa on March 4 and 5.

The President, John Coates, commenced by stating the need that the board had for a new building. He then said that the question of what the future rates would be that would have to be paid in Ottawa for an efficient telephone service was an important one. The service, he admitted, that The Bell Telephone Co. was giving at the present time was very good, and the rates reasonable, but they had no guarantee as to the future. He would like to see a municipal telephone service, but questioned the wisdom of entering into competition with a long established and powerful company. The best safeguard was the appointment of a commission by the Government to regulate rates in a similar way that tolls are regulated by the Railway Commission whenever a complaint was made.

Preferential trade within the Empire was now an important question. Things are slowly but surely tending to a change in the fiscal policy of the Mother Country, where the conviction is steadily gaining ground that Great Britain can serve her own interests and that of her colonies by adopting such a change as would give colonial proddcts a preference against the products of foreign countries. We should take a lesson from the United States who were always aiming at getting the best in any trade negotiations, and as far as possible meet them on equal terms with the tariffs

He touched on the question of State-owned cables and thought that the first practical step to be taken in this direction was the nationalization of all the land lines in the Dominion, and the taking of immediate steps for the establishment of the best methods of telegraphy between Canada and the Motherland by a direct line under Government control.

He concluded his address by a reference to the Queen's death, the new King, and the recent tour of the Duke and Duchess of Cornwall around the world.

It was moved, and carried : "That this board has learned with much pleasure and hereby express its gratification that a conference of representatives from Australia and Canada is likely to be held in London during the present year, to discuss trade and cable matters."

The Temiscaming and Northern Ontario Railway Bill which is now before the Dominion House was touched on by R. W. Shannon. He stated that he had arranged for a special meeting with the Hon. F. R. Latchford and Messrs. Lumsden and Powell, M.P.P.'s and the Board of Trade, which will be held at some future date.

Mr. Shannon said the road was to be 106 miles long, and would run from the town of North Bay, on Lake Nipissing, to Lake Temiscaming. According to Premier Ross the estimated cost of this line was $1,750,000. Mr. Shannon thought that this line should be brought through to Mattawa if the city of Ottawa and surrounding district were to control the trade of that section of the country. If this road was not constructed through to Mattawa a large proportion of this trade would be diverted from Ottawa to Toronto.

A number of others also had something to say about this railroad.

President Coates referred to the revival of the Dominion Board of Trade. George Chapman, of Toronto, the secretary, had received word that delegates would be sent to Ottawa from over fifteen boards in the Dominion on March 4 and 5. Questions, some of them of an Imperial character, affecting the interests of the Dominion, would be discussed.

The delegates from the Ottawa Board are : President Coates, Vice-President Reid, Messrs. MacFarlane, Holland and Shannon. The sessions will probably be held in Goldsmiths' Hall.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

C. V. PRICE (late) general merchant, Copper Cliff, Ont., is offering to compromise.

E. Audet, general merchant, Black Lake, Que., has compromised at 50c. on the dollar

George Peters, planing mill proprietor, Merlin, Ont., has assigned to Wallace B. Shaw.

J. A. Renault & Co., general merchants, St. Ephrem de Tring, Que., have assigned.

N. St. Amour is curator of O. E. Leger & Frere, general merchants, Coteau Station, Que.

The estate of T. J. Metheral, general merchant, Singhampton, Ont., is to be wound up.

Desire Ricard, general merchant, Batiscan, Que., has compromised at 15c. on the dollar cash.

The creditors of Daniel Shaw, hardware merchant, Almonte, Ont., held a meeting on February 26.

Carr Bros., general merchants, St. Chrysostome, Que., have assigned to Lamarche & Benoit.

A consent for the assignment of Magnan & Frere, hardware merchants, Montreal, has been filed.

The creditors of A. Champagne, carriagemaker, Chambly Canton, Que., will hold a meeting on March 1.

The creditors of Charles Tremblay, general merchant, Shawenegan Falls, Que., held a meeting on February 22.

H. D. Allen, late general merchant, Cape Tormentine, N.B., offers to compromise at 25c. on the dollar.

The creditors of M. P. Plouffe, general merchant, Ladysmith and Shawville, Que., held a meeting on February 26.

H. Gilbert, general merchant, Chicoutimi, Que., has assigned, and a meeting to appoint a curator is called for February 28.

G. C. Bristow, general merchant, Aylmer, Ont., has assigned to R. Tew, Toronto, and his creditors held a meeting on February 27.

M. Richardson & Co., general merchants, Dundalk, Ont., have assigned to J. G. Strong, Toronto, and their creditors meet on March 3.

R. Bergeron & Co., general merchants, Shawenegan Falls, Que., have assigned to Lamarche & Benoit, and a statement of their affairs is being prepared.

The creditors of J. N. A. Carriere, general merchant, St. Phillipe D'Argenteuil, Que., held a meeting on February 20, and received an offer of 50c. on the dollar cash.

PARTNERSHIPS FORMED AND DISSOLVED.

Dumont & Rho, painters, Montreal, have dissolved.

Berry & Wilson, foundry owners, Warden, Que., have dissolved.

The Swan River Lumber Co., Swan River, Man., have dissolved.

Dormer & McGilvery, foundry owners, Morden, Man., have dissolved.

Smith & Barnes, bicycle merchants, Ottawa, Ont., are about dissolving.

Byrnes & Campbell, wholesale lumber merchants, Winnipeg, Man., have dissolved.

Bowser & McDonald, agricultural implement agents, Glenboro', Man., have dissolved.

Robert W. Cherry, agricultural implement agent, Russell, Ont., has admitted a partner.

The Dominion Showcase Co., Toronto, have dissolved partnership. A. T. Darragh has retired.

John Miller & Sons, hardware merchants, Montreal, have dissolved, and a new partnership has been registered.

Campbell & Co., general merchants, Richmond, Que., have dissolved, and a new partnership has been registered.

SALES MADE AND PENDING.

Mrs. A. McLaren, general merchant, Lower Argyle, N.S., is selling out.

E. H. Hannah, blacksmith, Hillsburg, Ont., is advertising his business for sale.

E. Bacon, blacksmith, Cartwright, Man., is advertising his business for sale.

D. A. Hyslop, general merchant, Ancaster, Ont., is advertising his business for sale.

James Dobson, general merchant, Bronte, Ont., is advertising his business for sale.

The assets of H. A. Lalonde, general merchant, River Beaudette, Que., have been sold.

The stock of J. C. Morton & Co., general merchants, White Horse, B.C., has been sold.

J. A. Hunter, general merchant, Durham, Ont., is advertising his hardware stock for sale.

R. McKenzie, agricultural implement agent, etc., Manitou, Man., has sold his blacksmith business.

A. O. Veitch, general merchant, Richmond, Bayham P. O., Ont., is advertising his business for sale.

The assets of Alf. Fradette, general merchant, Lafayette, Que., were to be sold on February 27.

The stock of T. J. Metheral, general merchant, Singhampton, Ont., is advertised for sale by auction on March 5.

The plant, etc., of The National Iron Works, Limited, Wingham, Ont., is advertised to be sold by auction on March 5.

The stock of the estate of Elliott & Borland, general merchants, Steinbach, Man., was advertised for sale by auction on February 21.

CHANGES.

Brosseau & Frere, tinsmiths, etc., Quebec, have registered.

Vezina & Goneau, blacksmiths, Three Rivers, Que., have registered.

H. K. Livingston, general merchant, Robson, B.C., is out of business.

T. H. Linton is removing his foundry from Orono, Ont., to Bowmanville.

Beaudry & Blouin, hardware merchants, Three Rivers, Que., have registered.

James Harris, blacksmith, Glencoe, Ont., has sold out to N. A. Leitch.

The Art Cabinet Fixtures Co., frames, signs, etc., Montreal, has registered.

Miss M. J. Fafard & Co., general merchants, St. Thecle, Que., have registered.

F. L. Irwin, general merchant, Treesbank, Man., has sold out to C. F. Wood.

W. J. Mathison, general merchant, Cathcart, Ont., has sold out to D. H. Stevenson.

Joseph Dudley, blacksmith and wagonmaker, London, Ont., has sold out to Thomas Moxworthy.

R. E. T. Pringle has registered for The Alpha Electric Manufacturing Co., electrical supplies, Montreal.

The Cockshutt Plow Co., Limited, and Noble & Graham, agricultural implement agents, Carman, Man., are both succeeded by Noble & Lytle.

FIRES.

E. H. Phelps & Co., Merritton, Ont., manufacturers of carriage woodwork, have suffered loss by fire.

The Dunnville Planing Mills Co., Limited, Dunnville, Ont., were partly burned out. The loss is covered by insurance.

The Gibson property of Emery Sewell, general merchant, Upper Maugerville, N.B., was burned; there was no insurance.

The premises and stock of Thomas Hunter, paint merchant, etc., Ottawa, were slightly damaged by fire. The loss is covered by insurance.

S. Brown, general merchant; J. A. Cargar, miller and grain merchant; and George Sibbett, liquor merchant, Bracebridge, Ont., were burned out; they were all insured.

DEATHS.

Thomas Kells, contractor, Ottawa, is dead.

George Copeland, carriagemaker, Smithville, Ont., is dead.

Philip S. Pellerin, general merchant, Scadonc, N.B., is dead.

C. Lautz, of Lautz & Co., lumber merchants, Milford, N.S., is dead.

Alfred C. Kuhn, of Holland & Kuhn, window shades, etc., Halifax, N.S., is dead.

M. Simon, general merchant, Alexandria, Ont., is offering 40c. on the dollar.

MARCELLUS HARTLEY'S ESTATE.

It has now been learned that the late Marcellus Hartley left a will. The estate had previously been estimated to be about $4,000,000, but it is thought that it will now amount to upward of $60,000,000. Mr. Hartley was the head of the firm of M. Hartley & Co., of New York, which was formerly known as Hartley & Graham.

The firm did a conspicuous business prior to the Spanish War, and it is said that most of the supplies in the way of ammunition and arms supplied to the Cuban insurgents in the many filibustering expeditions which left the shores of the United States for Cuba were either sold or collected through the agency of this firm. Mr. Hartley was also a stockholder and director in The Westinghouse Electric Co.

The finding of the will was a surprise, as it was at first believed that he died intestate.

M. H. Dodge, his grandson, who is named as the heir to this vast estate, is now 20 years old and is a junior in Columbia University.

Mr. Hartley died very suddenly about a month ago, while he was attending a meeting of the directors of The American Surety Co.

For many years Mr. Hartley had been prominent in commercial life in the metropolis, having large and varied interests in important institutions. At his death he was president of The International Banking Corporation recently 100,000 tons, of which Quebec supplies the formed, and which secured, after vigorous competition, the business of handling the Chinese indemnity for the United States.

Mr. Hartley was also president of The Remington Arms, The Union Metallic Cartridge, The Bridgeport Gun Implement, and of The M. Hartley companies. He was vice-president of The Western National Bank and director of the Lincoln and German-American National Banks, The Manhattan Railway, Westinghouse Electric, Mercantile Trust, American District Telegraph, American Ordnance, The Audit Co., and of The Equitable Life Assurance Society. He was a trustee of The American Deposit Loan, The Fifth Avenue Trust and the American Surety Companies.

The Best Time

to put your paint business on the right footing is at the beginning of the busy season.

It pays to start early to push

THE SHERWIN-WILLIAMS PAINT

It pays to be ahead of the "other fellows."

There's no other paint can do so much to place you at the top. We give you methods and advertising material that put you there, backed up by paint quality that holds the position for you.

If you're out for business this year go after it with

The Sherwin-Williams Paint and
The Sherwin-Williams Methods.

CHICAGO, NEW YORK, NEWARK, MONTREAL, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY.

TIN DEPOSITS BECOMING RARE.

Mr. Wahl, in The Journal of Franklin Institute, observes that it is a curious fact that the known deposits of tin in the world are far less extensive in area than those of gold. Specifically there are about 132 square miles yielding workable gold deposits to every square mile containing commercially available tin deposits. There is scarcely a country in the world in which gold might not be profitably obtained or from which it has not been obtained in the past, but there are at the present time probably not more than a dozen districts in the world where tin is being mined. The famous tin deposits of Cornwall are about exhausted, and the same is true of the deposits of Bohemia, Tuscany, Southern Spain and the Pyrenees. In all the vast area of Asia there are but two workable districts—one in China and the other in the Straits Settlement and adjacent principalities, from the latter of which by far the largest quantity of metal has been obtained in recent years. Africa has no known deposits, and but little is produced in South America. Several deposits have been discovered in the United States, but not in profitable quantities. Australia and New Zealand contain the most promising new deposits, though at present they only produce about one-tenth that of the Straits.

A LARGE SHINGLE MILL.

The Hastings Shingle Mill Co., Vancouver, B.C., are commencing on their huge new shingle mill which they expect to have in working order by May 1. It will be located on the old Powell estate, and will have an output of 1,000,000 shingles per day. The building will be 250 feet long, and will average 32 to 60 feet in width. Four boilers, 10 x 66 feet, fitted with Dutch ovens, will supply steam to a pair of twin engines, 20 x 24 feet. All these will be set on solid stone foundations. Ten upright machines, one ten-pound block, one single-block power-feed, and two band machines will comprise the outfit, and enough floor space will be left to allow of four uprights and one single-block power feed being added without alterations to the building. The dry kilns will be 88 x 152 feet. The sheds will be of sufficient length to contain enough stock to keep the mill in operation for four months.

The structure is to have a galvanized iron roof, and will be fitted throughout in the most modern style.

PORT HOOD COAL CO.

At the annual meeting of The Port Hood Coal Co., at Halifax, N.S., on February 14, the reports were quite satisfactory to the shareholders. Large quantities of coal have been sold by the company throughout the Province of Nova Scotia, and everywhere it seems to have given satisfaction. In the city of Halifax over 10,000 tons of their coal have been used during the past year. At present the daily output from their mines averages about 1,000 tons. Their coal areas extend over a space of 16 square miles, and there is an unlimited supply of coal. They are constantly adding new machinery, and since the close of navigation orders are being filled for the I.C.R. and points in the Province.

The officers and directors elected for the ensuing year were as follows :

President—George E. Faulkner.

Vice-President—Hon. G. E. Foster, Toronto.

Directors—H. G. Bauld, W. A. Black, Alex. A. McNeil, Lorne C. Webster (Quebec), Evan Thompson

William Lithgrow was appointed business manager.

The company propose to greatly increase their facilities shortly, and their output will be considerably larger.

HOW THE TRUST KILLED THE BICYCLE BUSINESS.

The convention of the L. A. W. at Torrington, Conn., was something like a funeral. The despatches from that cheerless meeting said that the reports showed that the League had shrunk over 50 per cent. in membership, but that is putting the case too mildly. Former Boston officials of the League said yesterday that the shrinkage is nearly 90 per cent. in less than four years. In 1898, the League membership was 103,000. It is now 10,500. Four years ago there were 50 newspapers in the country devoted to cycling interests. Now the 50 have dwindled to one. Four years ago there were 53 cycling clubs in Boston that were active in enrolling members, in holding club runs, etc. Now, who ever hears of a cycling club?

What is the reason for this tremendous change? The question was put yesterday to Secretary Bassett and to a number of Boston men who were once prominent in the L.A.W. Their answers were pretty nearly unanimous. The bicyle business, the L. A. W., the general interest in bicycling began to die together when the bicycle advertising business stopped. When the Bicycle Trust began to take shape, the managers of the Trust decided that, as they controlled the business anyway, the advertising could be and should be cut down. If they had hunted around for a club to kill their own business, they could not have hit upon a surer one.—Boston Advertiser.

GOOD NAME BETTER THAN RICHES

Neither ships, racehorses, nor anything else are so aptly named as the crack trains of the world—the Flying Scotchman, which is the Transinsular Limited of Great Britain; The Flying Yankee, from Boston to Bangor; the Congressional Limited, to Washington; the Empire State, to Buffalo, and the Sunset Limited, to Southern California. There is more in the name of a fast express train than in the title of a play or novel. The man who is going to travel on a railroad, and has the price in his pocket, wants to buy a ticket for one of those appropriately titled trains every time.—New York Press.

LARGER OFFICES FOR CANADA HARDWARE CO.

The Canada Hardware Co., Limited, Montreal, have found their general offices too small for their needs, and have been forced to make changes in the arrangement of the departments, which are now going on. The private offices are being removed to the ground floor, and the general offices will in future be on the first floor, where they will have considerably more space.

THE IVER JOHNSON

TRUSS FRAME.

Has a mechanical and commercial value not possessed by other bicycles.

The trade appreciates and recognizes the fact.

It responds to a long-felt demand for something new in cycle construction; it has the advantage of racing weight, with roadster strength; a rigid crank hanger—greater speed; no buckling of frame.

Made of one-inch Tubing.

Agents wanted in unoccupied territory. Send for catalog just issued.

(FRAME PATENTED.)

LONDON FENCE MACHINES

Are so light, durable and practical, and so easily and rapidly operated, that farmers cannot help seeing that they are unlike any of the big, clumsy and costly machines which have been on the market.

The LONDON builds the highest standard of coiled spring woven wire fence, and as it will more than pay for itself the first year, our machines find quick sales and fast friends.

The agency for the LONDON will pay the dealer, and never fails to draw custom and please the purchaser.

Our Spring Catalogue will be out shortly and a copy will be forwarded on request. Write for our trade prices on coiled spring wire.

THE LONDON FENCE MACHINE CO., Limited.
LONDON, ONTARIO.

The Woman who Buys

The White Mountain Freezer

helps to spread the story of its merit. You know the benefit of word of tongue advertising. Probably no household article sold to-day gets so much of this kind of advertising as the White Mountain Freezer. We know of hundreds of instances where a plate of good ice cream has resulted in a thirty-minute talk on the merits of the freezer.

Think of it! You sell a freezer. The woman you sell to uses it—she serves the cream. Her guests eat it, they like it, they want a freezer that will make cream as good. She tells them where it can be had. You sell more freezers.

Is it possible to exaggerate the wisdom of selling an article that is well spoken of?

If you're not thoroughly familiar with the various points of merit in the White Mountain, write to-day for the best freezer catalogue ever made. Write for it anyway. We'll mail it to you free.

THE WHITE MOUNTAIN FREEZER COMPANY

NASHUA, NEW HAMPSHIRE.

A NEW STEAMER.

THE new steamer Venture which is being built at Victoria, B.C., for N. P. Shaw & Co. for the freight and passenger business between Victoria, Vancouver and Skagway will be constructed more on the model of the vessels on the great lakes than those at present plying on the coast. She will be specially built for heavy weather. Her length is 165 ft., breadth 37 ft., moulded depth 9 ft. 6 in. Her draught when light will be 8 ft. 6 in., and when laden 10 to 11 ft. Her pilot house will be well forward, and back of it will be accommodation for a limited number of passengers. She will be equipped with derricks and steam hoisting gear and a steam winch. She will have two decks, and will have accommodation for 200 head of cattle on the main deck, and 500 sheep and pigs on the upper. In her hold will be cargo space for 300 tons. She will be propelled by twin screws driven by engines fitted with fore and aft condensors which will work under a pressure of 150 lb. of steam per sq. in. The engines and boilers are being built by Alex. McDonald, Victoria, and the hull by the Victoria Machinery Depot. Her speed will be from eight to nine knots per hour.

VICTORIA TOURIST ASSOCIATION.

AT a meeting of the Victoria, B.C., Tourist Association, presided over by Mayor Hayward, on February 20, the reports of the provisional committee were received and officers elected for the coming year. A large attendance evidenced the interest displayed by the people at large.

The provisional committee that had been appointed at the regular meeting of December 20 reported that they had had an interview with the Dominion Fisheries Commissioners and asked for certain amendments to the fisheries regulations. This request was subsequently embodied in a memorial and forwarded to the Minister of Marine and Fisheries and the members of Parliament representing the districts included in the Island of Vancouver.

Although their canvass had not by any means covered the city, they had met with hearty and substantial responses, and now over $3,700 has been subscribed towards the work of the association. In moving the report, Mr. E. S. Rowe, in part, said that he was in favor of judicious advertising by means of pamphlets, circulars, folders.

Comfortable hotel accommodation should be provided, as should also amusements such as games and band concerts.

The sanitary condition of the city should also be improved. People should be encouraged to beautify the city, and the streets should be bettered. In seconding this motion, C. H. Lagrin said it was of much importance to the city and the Island that the fish should be preserved, and commended the provisional committee for the action they had taken.

His idea of the work of the Association was to commence operations in the territory west of the Mississippi and extend its scope until the whole of Eastern Canada and the United States was covered. They might also advertise in Great Britain, where there were numbers of people who had plenty of wealth and were willing to cover vast distances provided something worth seeing was at the other end.

A resolution was passed to the effect that the executive committee be requested to memoralize the City Council of Victoria and the Provincial Government to contribute financial aid to the Association.

The following officers were elected :

President—The Mayor.
1st Vice-President—D. R. Ker.
2nd Vice-President—L. G. McQuade.
Honorary Treasurer—A. B. Fraser, sr.
Secretary—Frank I. Clarke.
Executive Committee—Ald. W. G. Cameron, Stephen Jones, E. E. Blackwood, James Forman, Anton Henderson.

TO BE REPRESENTED AT BOSTON.

At a meeting of the Tourist Association, Fredericton, N.B., the coming Boston Sportmen's Show was talked over, and it was arranged that one of their members, at least, should be at the show throughout its duration. At this show a large amount of advertising literature will be circulated, explaining the attractions that that section of New Brunswick has for the tourist and sportsman.

The city council will be asked to donate $250 for the aid of the association in its work. It is felt that much more effective work could be done by this increased grant. Last year the amount given was $150. The city of St. John gives $500 to the tourist association every year.

LAWN GOODS CATALOGUE.

A little catalogue just issued by Lewis Bros. & Co. contains a list of the various articles that will be in demand before long for getting lawns into shape. Mowers, reversible lawn rakes, sprays, hose reels, hose menders, weeding hooks and hoes, grass hooks and ladies' floral sets are among the many articles, all illustrated, described, and prices given. The catalogue is a timely one, and readers of HARDWARE AND METAL dropping a card to Lewis Bros. & Co. will find it also a very useful one.

HORSE NAILS

Are like other articles: — "You pay your money and you take your choice." If you want the best Horse Nails, you have to pay the best price, simply because the best article costs the most to produce. We could make "low-priced" Horse Nails as well as any other maker in Canada, but it would be at the sacrifice of quality. We have been loyally supported by the trade in our endeavors to make only the best, and we offer the "C" brand, made by this Company since 1865, as representing the perfection of Horse-Nail manufacture in this country.

They are made exclusively from the best obtainable imported Swedish Charcoal Mild Steel Nail Rods, which are hot hammer forged, giving all the good qualities of the old-fashioned hand-made Nail, but with greater uniformity. The difference between the cost of our Nails and the low-priced inferior goods sold only represents a trifle in the Nails used in shoeing a horse. One-third of one cent is the difference on a set of shoes, when the difference in price is one cent per pound.

Don't sacrifice quality; support the manufacturer who is trying to make the best goods. Order from your wholesale dealer the "C" brand made by the

begs to announce to the Manufacturers and Merchants of Canada that they have the most effective system for collecting past due and old accounts in Canada, United States and Europe, without using offensive methods to debtors. Our reputation has been established by doing business on business principles, and prompt remittances, and we will be pleased to refer prospective clients to the hundreds of patrons we are doing business with.

We will be pleased to quote our rates on application or send one of our representatives to call on you. Correspondence solicited.

THE INTERNATIONAL MERCANTILE AGENCY OF TORONTO

A Timely Talk to Business Men.

THE most necessary item in the preparation of a candidate for success is "self-stock-taking." He must make a careful inventory of his success-qualities and rate his possibilities so that he will know to a hair's breadth just what he measures, and, to a grain, just how much he weighs. In other words, he must first know himself, his powers and possibilities, before he can use them.

After he has taken his inventory, the next thing is to plan to get the most possible out of his capital; and, in doing this, he should be very careful not to allow his judgment and commonsense to be blinded by his ambition; for, if he does, in nine cases out of ten, he will destroy many of his possibilities by overtaxing them.

The man who would make the most of life must learn "to be good to himself"; that is, while he should strain every nerve to develop himself to the utmost, he must remember that his success will depend very largely upon the care he takes of his success-machine—that is, of himself.

Many so-called successful men are their own worst enemies. They would never think of abusing a horse or any other dumb animal as they impose upon themselves. They go without eating, are irregular at meals, and rob themselves of sleep and recreation; in fact, they violate every law of their physical and mental natures, and yet wonder why they are grey-haired, dyspeptic and broken-down before middle life. They cannot understand why their ambition and greed to get on in the world should not be the measure of their strength, and so they go on forcing their brains to work when every particle of nerve energy which was stored up the previous 24 hours has been exhausted.

THAT WHICH WILL MAINTAIN HEALTH IS NOT TOO COSTLY.

It makes all the difference in the world to you whether you cut off five, 10, or 15 years of your life by foolish indiscretion, abusing yourself by overworking, or depriving yourself of needed rest—by not knowing exactly how much you can stand — or whether you save those precious years by obedience to the laws of health.

Many people cramp their powers and dwarf their possibilities by denying themselves the comforts which make life harmonious and agreeable. For example, I have known people, who were travelling long distances by night, to go in a day coach, so as to avoid the expense of a sleeper, and either to carry their food and eat it on the train, or depend upon sandwiches or any little "pick-ups" that they could get at the stations along the road. Of course there are people who cannot afford the comforts—luxuries if you will—of travelling in sleeping cars and dining or lunching in dining saloons, in which case they must, of course, do the best they can. But those who can afford them make the greatest possible mistake by trying to economize at the expense of their physical and mental well-being, for they cramp themselves, and dwarf their energy and success-ability, just in proportion as they deny their bodies proper care.

There is nothing else so valuable as one's physical and mental energy, which should be preserved, at whatever cost. In other words, nothing is dear, which we can possibly afford, that will in any way help us to get on in the world faster and better.

Personal power is a great thing to achieve and maintain. Everywhere, in city and country, we see men and women, especially men, old at 30 or 35, their shoulders stooped, their hair grey, and their spirits broken. They have no elasticity in their step, no buoyancy in their bearing. They destroyed their possibilities in their overreaching ambition to become wealthy or famous — to out-distance all competitors. Their lives have become dry and sere, and they are nervous wrecks, when they should be in their physical and mental prime.

TAKE AMPLE TIME TO EAT YOUR LUNCHEON!

Thousands of well-meaning men deprive themselves of needed nourishing, force-giving food by trying to economize. They stand at a lunch counter and hastily swallow a sandwich and a glass of milk to economize time and money, when they owe it to themselves and to their highest well-being to go to a good restaurant or hotel, take time enough to eat a nutritious, properly-cooked and properly-served meal and give the stomach time to begin the process of assimilation before resuming work.

There is not only no economy in this, but it is the worst kind of extravagance. The greatest economy a success-candidate can practise is storing up the largest amount of success-force, vitality, nervous and mental energy in his constitution for effective and efficient achievement. To rob oneself of the food material which gives this magic force is like killing the goose which lays the golden eggs.

Many a man has mocked a magnificent natural ability with mediocre achievement, simply because he has ruined his success-machine by neglect, in failing to supply the motive power to run it.

Thousands of men have died amid the wreck of disappointed ambitions, having failed to carry out one tenth of what they expected and had the ability to accomplish, simply because they did not take proper care of themselves.

Would you not think that man insane who, possessing a reservoir of precious elixir of life, should bore gimlet holes through it, here and there, and let the life-power run to waste? Yet this is exactly what thousands of us are doing. We start out with a great pond or lake of life-power, and let the major part of it escape through the leaks made in the reservoir by our own carelessness or ignorance.

We are all the time cutting off our success-possibilities by wasting, here and there, life's force and energy, robbing ourselves of the reserve which alone would make great achievement possible; and yet we wonder why we do not succeed.

Lack of sleep, lack of exercise in the open air, lack of nourishing food, and of congenial intercourse with friends, overwork, doing our work in the spirit of drudgery—all these things are leaks which sap our energy and rob us of the great reserve of life-force which enables one to achieve results.

On account of the influence of your clothing upon your habits, your character and your success generally, be as generous with your dress, especially in material, as you can possibly afford.

If you have been handicapped in early life by lack of education, or of social advantages, and do not feel certain of yourself in society, it will help you wonderfully to dress well. It will tend to give you ease of manner and make your awkardness and lack of general culture less apparent. In other words, it will help to cover up little defects which may embarrass you, especially if you are over self-conscious.

culture and social usages tends to aggravate those defects, and you should avoid self-consciousness in every possible way. Neat, bright, yet fashionable well-fitting clothing will help you very materially.

The wise man tries to compensate for his deficiencies in every way he can. It pays, therefore, to avoid bad impressions when strangers first meet you, for they will put you to a great disadvantage if you are too self-conscious and timid.

People who have not had early advantages, but have come into prominence through achievement, are often placed at great disadvantage, and they should study ways to compensate for these deficiencies. In other words, we should do everything possible to bring ourselves into harmony with our surroundings, because we cannot exhibit strength or use our success-force until we are at ease or in harmony with our environment.

Many shrewd men and women have been able to cover up early deficiencies in education and culture generally by close observation, and by adopting dress and manners like those with whom they associate. [A keen observation is one of the greatest assistants in the acquirement of ease and power.

Many hard-worked business and professional men think they cannot afford a vacation. These people know very well that they cannot work their horses all the time, nor could they expect any of their employes to work all the time and stand it.

There is, perhaps, nothing which pays better or is more beneficial than a vacation. Most of us, sooner or later, learn — unfortunately, most of us learn later—that we cannot get more money out of a bank than we deposit there. Our drafts on nature's bank cannot exceed the reserve of the deposits.

In youth, we store up a reserve of physical and mental energy, which, if properly used, will enable us to overdraw temporarily in emergencies, but, if we use, from day to day, more nervous or vital force than is generated during each 24 hours, it does not require a great mathematician to convince us that we shall soon be bankrupt.

A man, therefore, who has been tied up many months in his store or office, or confined by his vocation, whatever it may be, although he may not have worked very hard, requires a complete change of surroundings; he needs a new mental environment.

GO INTO THE COUNTRY FREQUENTLY AND GET NEW LIFE!

People in routine work soon lose their elasticity of mind, their buoyancy and spontaneity of thought; their imagination becomes torpid, and nothing else will then refresh the faculties and functions so quickly as a complete change of surroundings.

How quickly, for example, one's whole nature responds to a change from the city to the country! A man who feels heavy, tired, and languid, in the city, feels ten years younger when he gets into the country. He is a boy again; his imagination becomes enlivened, and his whole life is rejuvenated. It is not always because one is overworked that he needs a vacation; for man is an omnivorous animal, and requires a variety of food.—Success.

COPPER CONSUMPTION IN EUROPE.

The diminished consumption of copper in Europe in 1901 had a very important effect on the copper market for the year, as has been heretofore noted. The following table, the figures for which are furnished by the circular of Henry R. Merton & Co., of London, show approximately the consumption of copper in Great Britain and on the continent of Europe for the year, and the sources from which the supplies were drawn. The figures are in long tons of 2,240 lb.:

	1900.	1901.	Changes.
Stocks January 1	22,817	28,860	I. 6,043
Receipts from—			
North America	161,209	94,670	D. 66,539
Spain and Portugal...	26,749	24,134	D. 2,615
Other countries	45,919	53,267	I. 7,348
Chili	25,700	30,650	I. 4,950
Australia	20,800	25,200	I. 4,400
Total supplies....	280,377	227,921	D. 52,456
Totals	303,194	256,781	D. 46,413
Deliveries for consumption	269,635	227,533	D. 42,102
Shipment of standard to U. S.....	4,699	7,197	I. 2,498
Totals	274,334	234,730	D. 39,604
Stocks Dec.31....	28,860	22,051	D. 6,809

The total falling off in consumption, as shown by this statement, was 15.6 per cent., which was due in part to the depressed condition of trade.

KAMLOOPS BOARD OF TRADE.

At the annual meeting of the Kamloops, B.C., Board of Trade there was a good attendance, and several new members were added.

A letter to Andrew Carnegie was read and adopted, asking him for assistance towards the erection of a sanatorium somewhere in the dry belt of British Columbia.

It was decided to withdraw from the membership of the Associated Boards of Trades of Eastern British Columbia.

It was moved that the C.P.R. be asked to hurry forward the equipment of their engines with electric headlights.

The election of officers resulted as follows:

President—J. T. Robinson.
Vice-President—J. R. Michell.
Secretary—J. F. Smith.
The Council—Messrs. J. A. Gill, M. P. Gordon, F. J. Fulton, J. M. Harper, T. J. Roadley, Dr. Proctor, J. Vair, N. J. Hopkins, H. Ashby, Dr. Wade and A. McIntyre.

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, February 28, 1901.

HARDWARE.

THE hardware business in general this week is active, and in nearly every item of the trade prices have been steady. The change in the discount of pressed spikes was inadvertently overlooked in these columns. It is now 25 per cent. instead of 22½ per cent. Prices on washing machines also show a slight reduction. Wholesale hardware houses report a rapidly increasing sale for paints and oils, while other lines of trade are much the same as last week.

BARB WIRE.—We quote $3 per 100 lb. f.o.b. Montreal.

GALVANIZED WIRE. Trade fair. We quote: Nos. 6, 7, and 8 gauge, $3.15; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—A big improvement is noted this week in the demand. Our quotations are as follows: Bright iron and annealed on a base of $2.60 per 100 lb., f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras, per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE. The discount is 22½ per cent.

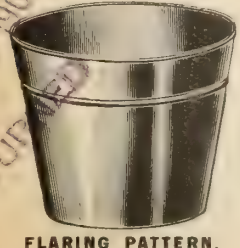
BRASS AND COPPER WIRE.—Business is as usual. The discount on both brass and copper wire is 60 per cent.

FENCE STAPLES.—These are in good demand for spring delivery. Prices per 100-lb. keg are: Bright, $2.90; galvanized, $3.25.

WIRE NAILS.—Trade is active at current quotations. We quote as follows: $2.55 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—There is little doing. The price is $2.35 per keg in small lots and $2.27½ in carlots. Flour barrel and coopers' nails are discounted at 40 per cent.

HORSE NAILS.—There is very little doing. We quote: "C" brand at 50 and 7½ per cent. off and "M" brand at 60 per cent. off on oval and new city heads and 66 2-3 per cent. off for new countersunk heads.



HORSESHOES.—There is nothing doing. We quote as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—The demand for screws steadily improves, and a good number of orders have been booked this week for spring. The discounts follow: Flat head bright, 87½ and 10 per cent. off list; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.

BOLTS.—The demand continues good. Our quotations are as follows: Norway carriage bolts, 60 and 5 per cent.; common, 55 and 5 per cent.; full square carriage bolts, 60 and 5 per cent.; machine bolts, 55 and 5 per cent.; coach screws, 70 per cent.; sleigh shoe bolts, 70 per cent.; blank bolts, 60 per cent.; bolt ends, 60 per cent.; plough bolts, 55 and 5 per cent.; tire bolts, 67½ per cent.;

The Robin Hood Powder Company
SWANTON, VT.

stove bolts, 67½ per cent. To any retailer an extra discount of 5 per cent. is allowed. Nuts, square, 3¾c. per lb. off list; hexagon nuts, 4c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—There is a fair inquiry, and prices are steady at our last quotations. We quote as follows: Tar red felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 30c. per roll; tar sheathing, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE. Since the advance of last week in sisal rope there has been nothing new. Business continues brisk. We quote as follows: Manila, 16c.; British manila, 13½c.; sisal, 12½c.; lathyarn 11c. Prices on binder twine are as follows: Blue ribbon, 650 feet to the pound, 14½c.; Redcoat, 600 feet to the pound, 13½c.; Tiger, 550 feet to the pound, 12½c.; Standard, 500 feet to the pound, 11c.; sisal, 500 feet to the pound, 11c. Prices are subject to a rebate of ½c. in carload lots.

RIVETS AND BURRS. Trade is only fair. The discounts are as follows: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, 35 and 5 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—There is still an active inquiry for spring delivery. The price is $1.25 per 100 square feet.

POULTRY NETTING.—The demand is moderate. Canadian or English is discounted at 60 per cent. off 2 x 2 mesh, 19 wire, and 55 per cent. off 2 x 2 mesh, heavier, Canadian list.

HARVEST TOOLS.—The discount is 70 per cent.

FIREBRICKS.—There is not much doing. Scotch sell for $19 to $23.50 and English, $18.50 to $22.50 per 1,000.

CEMENT.—The demand for cement continues moderate. We quote as follows: German cement, $2.30 to $2.40; English, $2.25 to $2.35; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.20 to $2.30 ex-cars.

METALS.

The strong position of practically all metals on the foreign markets continues, and there is no prospect of a break for some time to come. The fact that manufacturers have taken about all the orders they can fill up to April or May, and the firm price of the raw material, will further tend to keep a strong metal market. Locally, business is quite active for forward shipment. Some houses are in receipt of a record-breaking number of orders. We quote:

PIG IRON.—Business is good. Summerlee sells for $21 to $21.50 and Canadian, $18.50 to $19.

BAR IRON.—There is an active inquiry for bar iron at our last quotations. Merchants' bar, in small lots, is worth $1.95; horseshoe iron, $2.15 to $2.20.

BLACK SHEETS.—There is a moderate demand and the market continues firm. No quotable change has occurred. Our quotations are as follows: 28 gauge,

There is a sale for "Ark Brand" everywhere it is carried in stock.

The live dealer will not overlook this item in stocking paint for the coming season. Let us hear from you. Our guarantee on every can of "Ark Brand."

THE FRANCIS-FROST CO. Limited

TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

$2.65 ; 26 gauge, $2.60 ; 20 to 24 gauge. $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON. The demand is light and prices are steady, as follows : No. 28, Queen's Head, $4.40 ; Apollo, 10¾ oz., $4.40 ; Comet, $4.25 with 10c. extra in less than case lots.

INGOT COPPER.—We quote 14c.

INGOT TIN.—There is a small amount of business being done. Straits are worth 29 cents.

PIG LEAD.—Trade is active. The price is $3.25.

LEAD PIPE.—The demand is fair. We quote : Composition waste, 7½c.; ordinary, 7c. The discount is 35 per cent.

IRON PIPE.—There has been no change since our last report and at current quotations there is a good demand. Our quotations are as follows per 100 feet, for standard pipe, screwed and coupled, in lengths under 19 feet : Black pipe, ⅛, $3 ; ¼, $2.50 ; ⅜, $2.75 ; ½, $3 ; ¾, $3.70 ; 1-inch, $5.25 ; 1¼, $7.40 ; 1½, $8.90 ; 2-inch, $12.40 Galvanized, ⅜, $3.55 ; ½, $4 ; ¾, $5.05 ; 1-inch, $7.25 ; 1¼, $10 10 ; 1½, $12.15 ; 2-inch, $16.70. Extra heavy pipe, plain ends, are quoted, per 100 feet, as follows : Black, ½, $4.35 ; ¾, $5.30 ; 1-inch, $7.60 ; 1¼, $10.60 ; 1½, $12.70 ; 2-inch, $17.45. Galvanized, ½, $5.35 ; ¾, $6.70 ; 1-inch, $9.60 ; 1¼, $13.30; 1½, $15.95 ; 2-inch, $21.75. For threads and couplings, 5 per cent. is added.

TINPLATES.—The demand keeps up. Cokes sell for $4.50 per box, and charcoal, $4.75 to $5.25.

CANADA PLATE.—There is a good business being done this week in Canada plates, and prices have, if anything, a firmer tendency. Our quotations are as follows : 52's, $2.65 to $2.70 ; 60's, $2.75 to $2.80 ; 75's, $2.80 to $2.85 ; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL.—There is a good demand for steel, and prices, generally, are firm. Sleighshoe has advanced 5c., and bar steel is also 5c. higher. We quote as follows : Sleighshoe, $2.10 ; tire, $2.15; bar, $2.05 ; spring, $2.85 ; machinery, $3.00 ; toecalk, $2.60.

SHEET STEEL.—Trade is not active. We quote : Nos. 10 to 20, $2.50 ; 3-16, $2.50 ; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—There is only a moderate trade doing. Diamond is worth 8c., and Jessop's, 13c.

TERNE PLATES. The demand is still light, and the price is $7.75 to $8.

COIL CHAIN.—All chains are going well this week, and as the season advances the market improves. No quotable change has occurred, but prices remain firm. Our quotations are as follows: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.; No. 3, 9½c.; ¼-in., 7½c. per lb.; 5-16, $4.80 ; 5-16 exact, $5.25 ; ⅜, $4.25 ; 7-16, $4.05 ; ½, $3.85 ; 9-16, $3.75 ; ⅝, $3.55 ; ¾, $3.50 ; ⅞, $3.45 ; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—There is not much doing. The price is $5.75 to $6.25.

ANTIMONY.—We quote 10c.

ZINC SPELTER.—The market is dull. We quote 5c.

SOLDER.—An active inquiry continues at steady and unchanged prices. Bar solder sells for 18c.; wire solder, 20c.

PAINTS AND OILS.

There has been no quotable change since our last report. The turpentine and linseed oil markets remain firm at current quotations. The latter is fluctuating on the primary markets, but there has been no marked change either one way or the other. Paris green is in heavy demand, and it looks as though dealers were expecting to do an unusually good business when the active season opens. We quote as follows :

WHITE LEAD.—Best brands, Government standard, $5.87½; No. 1, $5.50 ; No. 2 $5.12½ ; No. 3, $4.75 ; No. 4, $4.37½ all f.o.b. Montreal. Terms, 3 per cent. cash or four months.

DRY WHITE LEAD—$5.25 in casks ; kegs, $5.50.

DRY WHITE ZINC — Pure dry, 6¼c. ; No. 1, 5¼c. ; in oil, pure, 7¼c. ; No. 1, 6¼c. ; No. 2, 5¼c.

PUTTY — We quote : Bulk, in bbls., $1.90 per 100 lb. ; bulk, in less quantity, $2.05 ; bladders, in bbls., $2.25 ; bladders, in 100 or 200 lb. kegs or boxes, $2.40 ; in tins, $2.55 to $2.65 ; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL—Casks, 7c. ; 100-lb. kegs, 7¼c. ; smaller quantities, 8¼c.

RED LEAD — Genuine red lead in casks, $4.50 ; in 100-lb. kegs, $4.75 ; less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE—Ground, casks, 5c. ; less, 5½c. ; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 80c.; boiled, 83c. In 5 to 9 bbls., 1c. less ; 10 to 20 bbl. lots open, net cash, plus 2c. for four months. Delivered anywhere in Ontario

between Montreal and Oshawa at 2c. per gal. advance and freight allowed.

TURPENTINE.—Single bbls., 67c.; 2 to 4 bbls., 66c.; 5 bbls. and over, open terms.

SHELLAC VARNISH — Pure white, $2.35 to $2.45; orange, $2.25 to $2.35.

MIXED PAINTS—$1.20 to $1.45 per gal.

CASTOR OIL—8¾ to 9¼c. in wholesale lots, and ¼c. additional for small lots.

SEAL OIL—47½ to 49c.

COD OIL—32½ to 35c.

PARIS GREEN — Petroleum barrels, 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c.; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms: 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

Business in scrap metals is as good as can be expected at this season. A few small advances have been made in copper and brass scrap. There is practically no cast scrap iron in the market, and wrought iron is also scarce. We quote: Heavy copper and wire, 11½c. per lb.; light copper, 9c.; heavy red brass, 11c.; heavy yellow, 9c.; light brass, 6c.; lead, 2⅞ to 2⅝c.; zinc, 2 to 2¼c.; iron, No. 1 wrought, $17; machinery scrap, $16; stove plate, $9 to $11; light iron, No. 2, $7 per ton; malleable and steel, $4; rags, country, 60 to 70c. per 100 lb.; old rubbers, 6 to 6½c. per lb.

GLASS.

There is an active demand for glass for spring delivery, and a good business is doing in small lots for immediate requirements. The market remains firm, but no changes have occurred in prices. Our quotations are as follows: First break, 50 feet, $2.10; second, $2.20 for 50 feet; first break, 100 feet, $4.00; second break, $4.20; third break, $4.70; fourth break, $4.95.

HIDES.

The hide market remains quiet and featureless. No. 1 hides are worth 7c.; No. 2, 6c.; No. 3, 5c. Lambskins, 65c.

MONTREAL NOTES.

The discount on pressed spikes is 25 per cent.

Sleighshoe and bar steel have each advanced 5c.

ONTARIO MARKETS.

Toronto, February 28, 1902.

HARDWARE.

THERE has been no material change in the situation since last week. The wholesale hardware trade is not active, and at this season of the year it seldom is. Most of the orders on spring account have been booked, and shipments will begin in a week or so. In such lines as sap buckets, milk-can trimmings, and dairy and cheese-factory supplies generally, the shipments have been quite heavy during the week. The sorting up business in general hardware is fair for this time of the year, and what is being ordered in that way just now is wanted immediately. Orders for wire nails are not coming in as fast as they were, but there are still a few being booked. A slightly better movement is reported this week in both tinware and enamelled ware. Some orders for refrigerators have been booked during the week for future delivery.

BARB WIRE.—Not many orders have been booked during the past week, most of them for spring delivery having already been placed. We quote: F.o.b. Cleveland, $2.77½ for less than carlots, and $2.65 for carlots. From stock Toronto, $3.

GALVANIZED WIRE.—Most of the business on spring account has also been done in this line, only an occasional order now coming forward. Our quotations are as follows: Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity; No. 9, $2.85 to $3.15; No. 10, $3.60 to $3.95; No. 11, $3.70 to $4.10; No. 12, $3 to $3.30; No. 13, $3.10 to $3.40; No. 14, $4.10 to $4.50; No. 15 $4.60 to $5.50; No. 16, $4.85 to $5.35 Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—Business is confined to an occasional order for spring delivery. Base price is $2.60 per 100 lb. Oiling, 10c.; coppering, 60c.; and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—There is a little business being done in stovepipe wire. Discount 22½ per cent.

WIRE NAILS. Orders are not coming in as fast as they were. For immediate shipment a few sorting-up orders are coming in. Our quotations are as follows: $2.55 for less than carlots and $2.50 for carlots. Delivery points, Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—Still dull. We quote as follows: Base price $2.35 per keg, with 7½c. allowance on carlots.

HORSE NAILS.—Practically nothing doing. Discounts are as follows: "C" brand, oval head, 50 and 7½ per cent., and on "M" and other brands, 50, 10 and 5 per cent. Countersunk head 60 per cent.

HORSESHOES.—Very little doing. We quote f.o.b. Toronto as follows: Iron shoes, No. 2 and larger, light, medium and heavy, $3.60; snow shoes, $3.85; light steel shoes, $3.70; featherweight (all sizes), $4.95; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85; snow shoes, $4; light steel shoes, $3.95; featherweight (all sizes), $4.95.

SCREWS.—Trade is fair. Discounts are as follows: Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.

RIVETS AND BURRS.—Trade is just fair. We quote: Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 and 10 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—A fair business is being done this week. Quotations are as follows: Carriage bolts, common ($1 list), 55 and 5 per cent.; carriage bolts, full square ($2.40 list), 60 and 5 per cent.; carriage bolts, Norway iron ($3 list), 60 and 5 per cent.; machine bolts, all sizes, 55 and 5 per cent.; coach screws, 70 per cent.

We have on hand a large stock of steel sheets for making

EMBOSSED CEILINGS,

etc., and are now prepared to make prompt shipment of anything required in our line, and shall be pleased to receive your orders which shall have our best attention.

The Metallic Roofing Co.
LIMITED
Wholesale Manufacturers
TORONTO, - - - CANADA

ROPE.—Trade is dull. The outside hemp markets rule steady. We quote: Pure manila, 16c.; British mbnila, 13½c.; sisal, 12½c.; lathyarn, 11c.

MILK-CAN TRIMMINGS.—Shipments have been going forward freely during the past week. Discount is 25 per cent.

SAP BUCKETS.—The demand has shown increased activity during the week, and dealers have been pressing for delivery. Discount is 40 and 10 per cent.

TINWARE AND ENAMELLED WARE. There has been an increasing demand during the week, and compared with the early part of the month business is much better.

EVETROUGH.—A few shipments have gone forward, but the regular movement can hardly be said to have begun. The movement to fix up prices has not yet obtained its object, and the ruling price for 10-inch is still $3.10 per 100 feet.

REFRIGERATORS.—A few orders are being booked for future delivery, but they are so far only for small quantities.

SCREEN DOORS AND WINDOWS.—Very few orders are now being taken and shipments will soon begin. Common doors, 2 or 3 panel, are quoted f.o.b. factory points as follows: Walnut, stained, 3-in. style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-in. style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2 50 per dozen.

GREEN WIRE CLOTH.—Trade is quiet and price unchanged at $1.25 per 100 square feet.

SPADES AND SHOVELS. There is a little more doing than there was, but the volume of business is still light. It is yet too early to begin shipments. Discount is 40 and 5 per cent

HARVEST TOOLS.—A few are beginning to move out, and wholesalers are looking for a good season. Discount 70 per cent.

BUILDING PAPER.—There is quite a little building paper going out although it is getting towards the end of the season. Our quotations are as follows: Dry sheathing, grey or straw, 30c.

per roll; tar sheathing, grey or straw, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll.

CUTLERY.—Business is seasonably quiet.

CEMENT.—The demand is recovering and travellers report prospects good for an unusually big season. The market is strong. We quote: Canadian Portland, $1.90 to $2.65; English, $3; German, $3.15; Belgian, $2.50 to $2.75; Canadian hydraulic, $1.25 to $1.50 per bbl.

METALS.

The position of the metal market continues strong, with the demand, on the whole, good.

PIG IRON—The position of the pig iron market shows increasing, rather than diminishing, strength. Canadian pig iron on track Toronto is quoted at $19 for No. 1 and $18.25 to $18.50 for No. 2 foundry.

BAR IRON — There is a fair demand for bar iron and the price keeps firm. Base price, $1.95 to $2.05. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

STEEL—The price of steel continues to advance in both the United States and Germany. The scarcity is still pronounced, particularly in sheets. Quotations by Toronto wholesalers are: Merchantable cast steel, 9 to 15c. per lb.; drill steel, 8 to 10c. per lb.; "B C" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe-calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2.25; reeled machinery steel, $3, hoop steel, $3.10.

BLACK SHEETS—The demand has been fair during the past week and prices firm. We quote as follows: Common, $3.15 for 28 gauge; and dead flat, $2.50 for 26 gauge.

CANADA PLATES—Shipments from stock are small, but there has been considerable booking for import. Prices have advanced quite perceptibly on the outside market. We quote as follows: All dull, $3; half polished, $3.10; all bright, $3.75.

GALVANIZED SHEETS—A good trade is being done. Trade if anything is better than it was a week ago, which, with the improvement in the weather, is natural. A great deal of difficulty is being experienced in getting delivery. We quote: "Queen's Head" brand at $4.50 in case lots, and $4.65 in less quantities.

TIN—Early in the week the tin market in both New York and London showed considerable firmness, but at the time of writing this has given place to weakness. On Wednesday the market closed in London £1 15s. lower on spot tin, and 5s. lower on futures. New York was dull and considerably lower in sympathy. Locally quotations are unchanged, and business has been confined to small lots. We quote $28 to $29.

TINPLATES — The demand for prompt shipment is active, and stocks have become much reduced, in consequence. Prices are 25 to 50c. higher, and we now quote IC, usual sizes, at $4.25 per box.

TINNED SHEETS—The demand is active. We quote as follows: 72 x 30, up to 24 gauge, 7½c.; ditto, up to 26 gauge, 8c.

COPPER—There has been more inquiry for ingot copper, and a good business has been done in sheet copper during the week. The London and New York markets are easy. We quote: Half-and-half, guaranteed, 19c.; do. commercial, 18½c.; refined, 18c.; wiping, 17½c.

BRASS—There has been a little more demand. Discount 15 per cent.

LEAD—While prices are firm in the United States they are a little lower in London. Locally the market is active and the tendency of prices upward. We still, however, quote pig at $3 50 to $3.75 and bar at $5.

IRON PIPE — The market is firm and trade fair. We quote: Black pipe, $5.40 for 1-inch.; galvanized, $7 95 for 1-inch.

ZINC SPELTER—The demand is fair. We quote $5.50 to $6 per 100 lb.

ZINC SHEET—A fair trade is being done. We quote $6 to $6 25 in casks and $6.25 to $6 50 in part casks.

SOLDER—A fair amount of business is being done. We quote: Half-and-half, guaranteed, 19c.; do. commercial, 18½c.; refined, 18c.; wiping, 17½c.

ANTIMONY—The demand is moderate at 10c. per lb. for Cookson's.

PAINTS AND OILS.

The most important feature in the paint and oil market this week is the unsettled condition of white leads ground in oil, owing to the lower quotations of one or two houses. There is a small local trade in dry colors. Manufacturers are placing their orders early this season. Turpentine is steady, and the movement is normal. The advances in boiled and raw linseed oil have been maintained, and the market for it is strong. We quote:

WHITE LEAD—Ex Toronto, pure white lead, $5.87½; No. 1, $5.50; No. 2. $5.12½; No. 3, $4.75; No. 4, $4.37½ in pkgs. of 25 lb. and upwards; ½c. per lb. extra will be charged for 12½-lb. pkgs.; genuine dry white lead in casks, $5.12½.

RED LEAD—Genuine, in casks of 560 lb. $5.12½; ditto, in kegs of 100 lb., $5.50; No. 1, in casks of 560 lb., $4; ditto, kegs of 100 lb., $4.50.

LITHARGE—Genuine, 6 to 6½c.

ORANGE MINERAL—Genuine, 7½ to 8c.

WHITING — 65c. per 100 lb.; Gilders' whiting, 80c.

GUM SHELLAC — In cases, 35c.; in less than cases, 40c. per lb.

LIQUID SHELLAC—Pure orange, in bbls., $2.25 to $2.35; white, $2.35 to $2.45 per gal.; in less quantities, 10c. extra.

PUTTY—Bladders, in bbls., $2.25; bladders, in 100 lb. kegs, $2.40; bulk in bbls., $1.90; bulk, less than bbls. and up to 100 lb., $2.05; bladders, bulk or tins, less than 100 lb., $2.90.

PLASTER PARIS—New Brunswick, $1.90 per bbl.

PUMICE STONE — Powdered, $2.50 per cwt. in bbls., and 4 to 5c. per lb. in less quantity; lump, 10c. in small lots, and 8c. in bbls.

LIQUID PAINTS—Pure, $1.20 to $1.30 per gal.

CASTOR OIL — English, in cases, 9½ to 10c. per lb. and 10 to 10½c. for single tins.

LINSEED OIL—Raw, 1 to 4 barrels, 82c.; boiled, 85c.; 5 to 9 barrels, raw, 81c.; boiled, 84c., delivered. To Toronto, Hamilton and London, 2c. less.

TURPENTINE—Single barrels, 68c.; 2 to 4 barrels, 67c., delivered. Toronto, Hamilton and London 1c. less. For less quantities than barrels, 5c. per gallon extra will be added, and for 5-gallon packages, 50c., and 10-gallon packages, 80c. will be charged.

GLASS.

Enough import orders are being booked to make trade steady. The local demand is light. We quote: Under 26 in., $4 25; 26 to 40 in., $4.65; 41 to 50 in., $5.10; 51 to 60 in., $5.35; 61 to 70 in., $5.75; 71 to 80, $6.25; 81 to 85, $7; 86 to 90, $7.75; Toronto, Hamilton and London. Terms, 4 months, or 3 per cent. 30 days. Discount off pane price list, 33⅓ per cent.

OLD MATERIAL.

There is a a pronounced quietness in trade for old material owing to the unsuitable weather. The recovery of the copper market has resulted in an advance of ½c. in copper bottoms and heavy red brass. The other prices are steady. We quote: Agricultural, 60c. per cwt.; machinery cast, 60c.; heavy copper, 10c½. per lb.; stove cast, 40c.; No. 1 wrought, 50c. per 100 lb.; new light scrap copper, 7½c. per lb.; bottoms, 8½c.; coil wire, 10c.; light brass, 5c.; heavy yellow brass, 7½c.; heavy red brass, 8½c.; scrap lead, 2¼c.; zinc, 2c.; scrap rubber, 6c.; good country mixed rags, 50 to 60c.; clean dry bones, 40 to 45c. per 100 lb.

HIDES, SKINS AND WOOL.

Trade is slack in hides and skins and wool is stagnant. Prices are steady We quote buyers' prices on arrival:

HIDES—We quote: No. 1, green, 7c.; No. 2 green, 6c.; No. 1 green, steers, 8c.; No. 2 green, steers, 7c.; cured, 7¾ to 8c.

SKINS—We quote: No. 1 calfskins, 9c.; and No. 2, 7c.; deacons (dairies) 55 to 60c. each; sheepskins, 65 to 80c.; deerskins, 12½ to 14c. per lb.

WOOL—We quote: Fleece, 13c., and unwashed, 7 to 8c. per lb.

SEEDS.

The prices this week are unchanged and the market is quiet. As usual, a little more will be paid for better and a little less for poorer samples. We quote buying price at outside points: Red clover, $4.50 to $4 60; alsike, $7 to $8, and timothy, $2.50 to $3.25 per bush.

COAL.

Matters are unchanged as far as the scarcity of cars goes, and no stock shipments are being received. Prices are nominal. We quote at international bridges as follows: Grate, $4 75 per gross ton; egg, stove and nut, $5 per gross ton; soft coal, $2.50 to $3.25 in bond, according to grade.

PETROLEUM.

Trade continues fair, although there is the usual slackness this time of the year. We quote as follows: Pratt's Astral, 16½ to 17c. in bulk (barrels, extra); American water white, 17 to 17½c. in barrels; Photogene, 16½ to 17c.; Sarnia water white, 16 to 16½c. in barrels; Sarnia prime white, 14½ to 15c. in barrels.

MARKET NOTES.

Tinplates are quoted 25 to 50c. per box higher.

Copper bottoms and heavy red brass have both advanced ½c.

Though trade is not in anything like a satisfactory condition at the heavy steel works of the district, there is some satisfaction in reporting that after a protracted period of depression, more or less acute, there is an improved tone in both heavy iron and steel departments. Things are a shade better at the bar iron works, which are now busier than a week since. Most of the large firms are replenishing stocks, which had become low, and purchases are being made with more freedom. Pig iron sales have distinctly improved. In the heavy industries it is hoped that the worst has now been seen. —Iron and Steel Trades' Journal, February 15.

SESSENWEIN BROS., - Montreal

NOVA SCOTIA MARKETS.

HALIFAX, February 25, 1902.

THE general state of the hardware business for the last week or two has been extremely good, and both the retail and wholesale departments have been kept busy. The dull season is fairly over, and business is brightening up considerably. A fair start has been made towards the spring movement of goods, and the trade generally have every confidence of a brisk season's trade.

* * *

Orders from travellers are coming in well, and they denote that many parts of the Province are looking forward to a large amount of building operations, the dealers in outside towns being quite free in their orders in the builders' line. Fishing supplies are also in demand, and the merchants who handle mill and mining machinery have every evidence that there is a big boom opening up in the gold and other mining fields.

* * *

Prices remain firm in all lines on account of the general firmness of the world's market in iron and steel. Higher prices in some lines may, however, be expected, as manufacturers are slow in filling orders—an inconvenience which hampered the trade somewhat last year. Tinplates have advanced in England to some extent, and there is also a slight increase in sheet lead and in manila cordage.

* * *

Oils, especially linseed and turpentine, are subject to the late advance from causes already noted. Linseed oil advanced 6c. on Monday, and raw is quoted at 85c. by the Imperial Oil Co., and boiled at 88c. Turpentine is quoted at 68c., 8c. higher than a fortnight ago. The same firm quotes illuminating oils: Mayflower, American W. W. at 20c.; 1½c. less if delivered from tank wagon.

* * *

The steamer Maverick arrived in port from Philadelphia on Friday last with 509 728 gals., equal to 2,200 tons, to be placed in the big oil tank three miles from the city, on Bedford Basin. The Maverick is always an interesting visitor here now, as it was she who was burned and sunk in Bedford Basin while unloading her cargo some two years ago. Those who saw the grand illumination from her cargo of burning oil will never forget the sight.

* * *

The general state of the hardware business in the city may be practically gauged by the wording of the advertisement of one of the progressive firms, as follows: "We are as busy as nailers making room for spring stock and preparing to ship orders taken in advance. These are larger and more numerous than before, but we have made special preparations for prompt and careful shipments when the time comes."

R.C.H.

LEWIS BROS.' IMPROVEMENTS.

The alterations being made in Lewis Bros. & Co.'s warehouse are nearing completion, and visitors who have not been to call on them for a few weeks will find a great difference in the appearance of things. All the offices have been brought together now, and the whole of the second floor will be used for them. In the warehouse, they have now more than double the room they had formerly, and a very fine ironware house will be found added to the departments. They are deciding on where to locate their new sample-room. For this, they have ordered the finest fittings, and it will be finished in oak. When completed, they claim it will be one of the best sample-rooms in Canada.

The Dowd Milling Co., Almonte, Ont., has just purchased the Guest & Steed mills and Francis' powers at Parkenham, Ont. This embraces grist and woollen mills, planing factory, electric light power and a cheese factory.

"AFTER-HOLIDAY" ORDERS.

Every merchant is interested in this subject just now. It is easy enough to sell Silverware before the Christmas season, but the "after-holiday" orders are the ones you want. Consult us and we will tell you how to do business in Silverware twelve months in the year.

Standard Silverware sells all the year round.

Its **beauty of design and finish** makes it popular always with the buyer, while its **absolute guarantee of quality** insures the seller. Last of all the price is within the reach of everybody.

MANITOBA MARKETS.

WINNIPEG, February 24, 1902.

IN common with their neighbors, hardwaremen have been very busy all week attending to visitors, and some considerable business has resulted. There have been quite a number of changes in the price list during the week. Solder has dropped 3c., and is now 18c. Planished copper and tinned sheets are 6c. lower. A new price list on coil chain has been issued as follows: 3-16, 10½c.; ¼, 8¾c.; 5-16, 5½c.; ⅜, 5½c.; 7-16, 5c.; ½, 4¾c.; ⅝, 4¾c.; ¾, 4¾c. Galvanized wire has also been changed: 6 to 8 gauge, $4; 9 gauge, $3.50; 10 gauge, $4.05; 11 gauge, $4.20; 12 gauge, $3.65; 13 gauge, $3.75; 14 gauge, $4.45; 15 gauge, $4.60; 16 gauge, $4.75.

Lumbermen are predicting the largest business they have ever had, as the great influx of settlers will necessitate a large quantity of lumber for building purposes. The western lumbermen's convention was largely attended and most successful.

Price list for the week is as follows:

Barbed wire, 100 lb	$3 30
Plain twist	3 40

TRADE CHAT.

THE stock of Gus. Tweedale & Co., hardware merchants, St. John, N.B., has been taken possession of by sheriff under an execution at the suit of Judge Gregory. The amount involved was about $2,000.

The Sunlight Gas Co., Limited, Montreal, is applying for a charter.

The Sleeper Engine Co., Limited, Montreal, is applying for a charter.

The Frazer Electric Co., Fredericton, N.B., is applying for incoporation.

The International Linseed Co., Limited, Montreal, are applying for a charter.

The Bay of Fundy Oil Co., Limited, Moncton, N.B., is applying for a charter.

The Trethway Train Pipe-Coupler Co., Limited, Montreal, is applying for a charter.

The Bay of Fundy Oil Co., Limited, Moncton, N.B., are applying for incorporation.

The Nicola Valley Iron and Coal Co., Limited, Vancouver, B.C., has been incorporated.

Amiot, Lecours & Lariviere (incorporated), wholesale hardware merchants, etc., Montreal, have applied for a charter.

Earl & Wolfe, hardware merchants, Olds, N.W.T., have taken over the McCormick machinery business from W. J. Brumpton.

As a result of a fire on February 20 in the factory of The Canadian Wheel Works, Merritton, Ont., owned by E. Phelps & Co., the entire plant was destroyed, entailing a loss of $43,000, of which $27,000 is covered by insurance. The cause of the fire is unknown.

Emery Sewell's blacksmith shop, machine shop and carpenter shop at Maugerville, N.B., were burned on February 18, together with the parts and machinery of several tugboats, which were in the building for repairs. The origin of the fire is unknown. The total loss amounts to about $5,000.

NEW ELEVATORS AT PORT ARTHUR.

At a meeting of the Canadian Pacific Railway Co.'s officers at Port Arthur, Ont., it was decided to build two elevators there during the season. The first will be a cleaning elevator and the second an addition to the steel tank elevator D. This structure will be enlarged to hold an additional 1,500,000 bushels. This and the new cleaning elevator will increase Port Arthur's storage capacity to over 7,000,000 bushels of grain. Altogether $400,000 will be spent by the company on improvements in that town.

HEATING AND PLUMBING

SOME BUILDING NOTES.

A NEW business block, 40 x 125 feet, and three storeys in height, will be built at Chatham, Ont., for Northway & Co.

J. McKenzie will build a new house at Brookbury, Que.

Allison & Paul will erect a factory on Fort street, Victoria, B.C.

James Humphrey will build a new house at Troy, Ont., next summer.

Zink Bros. are building a three-storey brick store at Brandon, Man.

A two-storey brick hall will be erected by the Orangemen at Hintonburg, Ont.

There is to be a new Presbyterian church built at Dutton, Ont., to cost $10,000.

Henderson & Dower are preparing to build a new hotel at Maple Creek, N.W.T.

A new convent is to be constructed at Masham Mills, Que., at a cost of $25,000.

Michael Bates will erect a two-storey brick building on Charlotte street, Sydney, C.B.

R. McIlwain is advertising for tenders for the erection of a schoolhouse at Nile, Ont.

Dr. Dodd is going to build a new dwelling at Charlottetown, P.E.I., in the spring.

A new hotel is being built at Vancouver, B.C., for Jos. Daley, at an estimated cost of $7,000.

The Wallaceburg, Ont., Baptists are considering the advisability of building a new church.

Tenders are being advertised for the erection of a schoolhouse at Clover Bar, N.W.T., to cost $2,000.

Tenders are being advertised for by A. M. King, Arkwright, Ont., for the building of a house on his farm nearby.

The Crow's Nest Coal Co. announce their intention of building a store at the Fernie Creek Mines, Fernie, B.C.

McDonald, Hanrahan & Co. are to build a three-storey brick structure on the site of their present store at Sydney, C.B.

A BOOM IN MONTREAL IN THE SPRING.

A building boom is expected in Montreal this spring. Already all the leading architects are busy preparing plans for several new buildings, while a number which are now in course of erection will be finished as soon as the weather permits.

A few of the new buildings which will be constructed are as follows : The renovating of the Bank of Montreal's St. James street building at a cost of $100,000; the erection of a large ten storey office building on St. James street for the Guardian and London, Liverpool and Globe Insurance Companies ; the construction of the new Board of Trade building, involving an expenditure of $500,000 ; the proposed new C.P.R. workshops in Hochelaga Ward to be erected at a cost of $400,000 ; the building of additional fruit and freight sheds for the G.T.R. on Chaboillez Square, the estimated cost of which has not been given, and the rebuilding of St. Mary's Church.

A LARGE APARTMENT HOUSE FOR WINNIPEG.

Lord Strathcona has decided on the erection of a large modern apartment house on the property owned by him on the corner of Main street and Broadway, Winnipeg. The plans, which are being prepared by George Brown, call for a large dwelling house, the Main street facade of which will be some 200 ft. in length, and that on Broadway 150 ft. There will be an inside open court, 47 x 108 ft. The interior will be fitted in the most approved manner. There will be complete suites of seven rooms or less, each being a separate house by itself, practically having all the necessary conveniences.

PLUMBING AND HEATING NOTES.

Several new members were initiated into the Toronto branch of the National Plumbers' Association at their regular meeting in Pythian Hall on Monday night, February 24.

E. Riopelle & Fils, plumbers, Montreal, have dissolved.

PLUMBING AND HEATING CONTRACTS.

The Bennett & Wright Co., Limited, plumbers and steamfitters, Toronto, have secured the plumbing and electric wiring of a house on Crescent Road belonging to the Macpherson estate. They have also resumed work on the plumbing and steamfitting of the new hotel on King street.

BUILDING IN TORONTO.

Building permits amounting to over $48,000 were taken out from the Toronto City Commissioner's office for the past week. They are as follows : R. Davies, for alterations of glass and wood to restaurant at 70 Yonge street, for $2,000 ; Thos. Wilkins, for three attached two-storey and attic brick houses on Maitland Place, for $7,000 ; S. Henderson, for a two-storey and attic brick and stone dwelling on Jameson avenue, for $4,500 ; Charles William Chadwick, for the erection of a two-storey and attic brick dwelling on Delaware avenue, for $3,000 ; Alexander Manning, for four-storey brick additions to warehouses on 73-79 Colborne street, for cold storage purposes, to cost $6,000 ; S. Crance, for brick additions and alterations to three dwellings on the southeast corner of Duke and Sherbourne streets, for $1,800 ; E. S. Rupert, for a two-storey and attic detached brick dwelling on Wills street, for $3,500 ; W. J. Wilson, for the erection of a 1½-storey stable, covered with galvanized corrugated iron, in rear of 43 Henry street, for $125 ; W. H. Smith, for a one-storey brick horse-sales ring on Nelson street, near Simcoe, for $6,000 ; Henry Davies, for a two-storey and attic brick detached dwelling on 248 Major street, for $2,000 ; T. Phillips, for a pair of semi-detached two-storey dwellings of brick and wood on Manning avenue, for $2,000 ; T. J. Madill, for a two-storey detached brick dwelling on 33 Summerhill avenue, for $2,000, and Charles Parker, for a pair of semi-detached, two-storey and attic brick dwellings on 11 and 13 Bernard, avenue, for $6,500.

PERSONAL MENTION.

Mr. Frank H. Scott, manufacturers' agent, Montreal, was in Toronto for a few days this week. Mr. Scott represents James Deakin & Sons, Limited, silversmiths and cutlers, and Maleham & Yeomans, cutlery manufacturers, both of Sheffield, England, and his visit to the west is in the interest of those firms.

A new Methodist church is to be built at Athens, Ont., and tenders have been let for the stone and carpenter work and roofing.

Plans for the new Carnegie library at Collingwood, Ont., are being prepared by William and Walter Stewart, architects, Hamilton.

During the coming season a good many customers will hold up that tin of mixed paint to you and ask you what you honestly think about it. That customer wants your opinion and he will remember it. If you are offering him a poor paint with no reputation—he will remember it. But poor paints without a reputation and cheap paints in general will not be in demand in 1902. With Ramsays Paints, ready for work, any dealer can recommend his goods and know that he can build up the biggest paint trade in his district with good profit to himself and satisfaction to the user. Don't you think it would be well for you to have a paint of that kind, and see our advertising matter with which we assist you? Any of our travellers will be glad to see you at once and talk the matter over with you, or we shall write if you say so.

The Fairbanks Company

747 and 749 Craig Street, MONTREAL.

AN OLD BUSINESS REORGANIZED.

THE old-established business of John Lysaght, Limited, of Bristol, England, has recently been reorganized under the same name and same management, with an increased capitalization amounting now to $5,000,000, of which $1,500,000 is in 4½ per cent. debenture shares; $1,500,000 in 6 per cent. preference shares, and the remaining $2,000,000 in ordinary shares. The proprietors of the old company, which was formerly a close corporation, received for their interests the whole of the ordinary shares and $500,000 worth of the preference shares, showing their confidence in the future of the business by taking the ordinary stock. The additional capital will be used in further extending their present large business, which controls the following other properties:

The sheet steel works formerly located at Wolverhampton, but now almost entirely removed to their new property at Newport, where they have an area of nearly 80 acres, including a river frontage of more than half a mile, with a wharf at which ocean steamers can load and unload. These works are considered to be second to none in the world in their equipment, which is all thoroughly up-to-date.

The St. Vincent Iron Works in Bristol, where all the galvanizing and corrugating of their sheets is done; also wire netting works, spelter works, structural iron works, and works for the manufacture of tanks and galvanized specialities for agricultural and other purposes, all these latter at Bristol.

They also own their own warehouses at many of the leading points in Australia, New Zealand and South Africa, besides carrying large stocks in Canada, and, in fact, almost everywhere in the British Empire. The name of Lysaght is well known in Canada, especially in connection with their brands of galvanized iron, which have been on the market for probably 30 years, but there are not many who realize the extent of the business carried on by this company. This change in the company does not in any way affect their arrangement in Canada, A. C. Leslie & Co., of Montreal, continuing to act as managers of their Canadian branch.

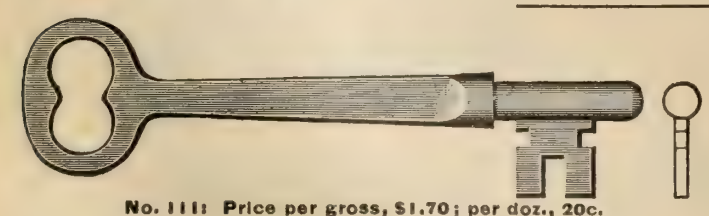
EMPLOYES AND COMPETITORS.

AT the recent meeting of The Wisconsin Retail Hardware Association one of the delegates during the delivery of an annual address expressed some sentiments in regard to the treatment of employes and competitors that are worth the consideration of the retail hardware trade in Canada. His remarks were:

"Employ good help, treat them well, take pains to post them about your lines, give them the management and care of certain lines and hold them responsible for the success of their department. Encourage a friendly rivalry, notice and appreciate their efforts, see that goods are not misrepresented and that full measure and weight are given. This is necessary to your success.

"Your competitor. Do not think hard of him simply because he happens to be in the same lines of business that you are. Do not imagine for one moment that you are entitled to all the trade. You cannot get it all, but get all you can, and get it as honorably as you can. Talk your own goods; do not advertise him or his by complaining of them. Your aims ought to be alike, to sell all the goods you can at a fair living profit, and not to 'do each other.' Do not cut prices below a living profit. Your competitor will certainly meet your cut and the chances are that he will 'go you one better.'"

A HINT TO RETAILERS.



YOU will pardon me for calling the attention of dealers to one important feature of the retail business, which causes an endless amount of trouble to the retail man, says a writer in an exchange. In the natural course of business every retailer gets an endless amount of circulars, catalogues, etc., from manufacturers and wholesalers. These he carelessly suffers to lie around on the counter, stool, or elsewhere, often using portions of them to wrap up various articles. Now, the farmer considers himself a sharp business fellow; and in hundreds of cases he tries to get alongside the manufacturer or wholesaler through means of letter writing. Sometimes he succeeds far better than Mr. Retailer imagines. These careless circulars put him in the possession of all the various addresses and the means of opening correspondence, which always, no matter how terminated, works an injury to the legitimate retailer.

Within a week past I have seen two men taking sundry names from such printed matter, one going through a large machinery catalogue, taking several names and addresses. I called the dealer aside (a new man), cautioned him and advised putting these catalogues out of sight, or burning, if not wanted. And I would strongly urge every retailer to be most particular and careful with all such matter that may come to him. It would be well for the several State conventions meeting soon to take this one little matter up and discuss it thoroughly.

A good many manufacturers and jobbers respond to these fellows, make small sales and then try to use it as a leverage for business with dealers. Some will sell such trade anyway for what there is in it. Mr. Retailer, consign to ashes all such matter and make your business strong and aggressive. Don't encourage the peddler by conspicuous use of his printing.

JOHN MILLEN & SONS
Branch: 132 Bay Street, Toronto, Ont.
MONTREAL, CANADA

USE your ice cream freezer more and your stove less. You will be more comfortable in summer if less time is spent over a hot stove. It pays in the time saved and in comfort. Part of the meal must be cooked, but part may be frozen. It takes less time to freeze than it does to cook—if you use the

Peerless Iceland Freezer

Or the **One Motion** *Freezer*

Three minutes is the freezing time. Ice cream, ices, frozen fruits and puddings are more wholesome and delicious than any other dessert, especially in summer. The only expense is the materials, which you have in the house. Patented Dasher makes one motion enough, and the Peerless Iceland the simplest, most economical and best freezer for you to get. "ICE CREAM SECRETS" (free) gives many new recipes as well as all the good old standbys, all easy to make.

To Remove all doubt: If you've never made ice cream at home, or if you have had enough experience with another freezer, get a Peerless Iceland from your dealer, take it home, and if not perfectly pleased, return it, and *dealer will refund your money*. If your dealer hasn't it, he can get it; or write us and we will see that you are supplied. Be sure and get a ***Peerless Iceland.*** Easily recognized from above photograph; notice label.

DANA & CO., Dept A, Cincinnati, Ohio.

The Peerless Ice Chipper to chip ice properly, saves ice, time and hands. 25c at all dealers or from us.

Your Customers will see it.

This is another of a series of advertisements which will appear in all the leading magazines and ladies' papers this Spring and Summer. All of your women customers take one or more of these publications. Don't you want to have your store identified with the very best advertising?

Order Peerless Iceland Freezers and Peerless Ice Chippers from your jobber early so that he can put you in touch with our advertising department. If yours doesn't handle them, see one who does, or write us and we will see that you are supplied.

New York: 10 Warren St. **DANA & CO., Cincinnati.** San Francisco: 105 Front St.

INQUIRIES ABOUT CANADIAN GOODS.

The following were among the recent inquiries relating to Canadian trade received at the Canadian Government office in London :

1. A London firm importing grained-split hides wishes to correspond with Canadian tanneries producing such for export.

2. The addresses of large exporters in Canada of canned and dried fruits are asked for by a provision and produce broker in Liverpool.

3. A Manchester firm desires to get into communication with importers and users of textile machinery in Canada.

4. A correspondent in the Midlands with experience of Bradford and Manchester goods is open to act as buying or selling agent for Canadian houses in the trade.

5. An agent having an extensive experience in the grocery and confectionery trade, and having facilities for doing a large agency business, desires to hear from Canadian firms desiring representation.

6. The makers of horse clothing of all kinds, saddle girths, knee caps, dog sheets, body belts, etc., wish to extend their business in Canada, and ask to be referred to importers of these goods.

7. Information respecting Canadian hard woods for street paving purposes is asked for by a selling agent who has experience in placing such goods on the English market.

8. A London firm at present doing a good business in chair stock—backs, seats, legs, etc., ask for names of additional exporters of such goods in Canada.

9. A firm of West of England woollen manufacturers are looking for a first-class agent to represent them in Canada, and also desire to get into touch with wholesale houses in the Dominion purchasing best cloths.

10. A Birmingham house exporting gas and electric fittings is desirious of extending its business with Canada.

11. Inquiry is made for particulars of good slate quarries in Canada, in working order, adjacent to ports or waterways, by an agent who can sell large quantities if prices are competitive.

12. Another inquiry for roofing slates of durable quality from Canada has been received from a correspondent in the north of England.

13. A Hamburg, Germany, house have asked for names of packers and exporters of dried cod, haddock, stock fish, in the Maritime Provinces of Canada.

14. A Dublin grain, corn and flour and produce broker wishes to obtain the direct agency for a good Canadian firm of millers.

15. Inquiry has been made for names of Canadian dealers in motor-carriages and similar goods.

16. A correspondent at Cork, Ireland, has asked to be furnished with a list of millers and firms exporting oatmeal from Canada.

17. An application has been received from a Bradford merchant for the names of importers of yarns—either worsted, mohair, cotton, silk or fancy.

18. An import firm of cotton waste merchants and agents desire to get into communication with users of this material in Canada.

19. A firm of wholesale and export druggists' sundriesmen wish to hear of probable buyers in Canada of such specialties as they manufacture, tooth pastes, disinfectants, etc.

20. A forage company in Cheshire ask to be furnished with the names of hay and straw exporters in Canada.

21. The makers of artistic glazed tiles, etc., who are anxious to extend their business with Canada, desire to hear of firms willing to take up the sale of their productions.

[The names of the firms making the above inquiries can be obtained on application to the editor of HARDWARE AND METAL.]

Inquiries received by the Canadian section of the Imperial Institute :

1. A firm in the north of England desires information as to the production of fish glues in Canada, and invites manufacturers of the material to forward samples and prices.

2. An important firm of wholesale stationers asks to be placed in communication with Canadian manufacturers of woodwork drawing materials, such as drawing boards, T squares, set squares, etc.

3. Another firm of brokers and importers is prepared to represent a Canadian packer of canned goods.

TERNE ROOFING PLATES.

THERE is no doubt that the best and most durable article to cover the roof of your house with is the high-grade old-fashioned roofing terne plates, says Architect and Builders' Journal. It is light, easily put on, not inflammable, will not crack, indestructible and durable (not the cheapest), and yet the cheapest and most serviceable in the end.

Half a century has passed since tin first began to be used for roofing, and during that time it has more than established its superiority over all other forms of roofing. The various new methods and materials being offered have tended to establish its superiority upon a sounder foundation, particularly as the general public and the prosperity of the country has justified them in using only the best old-method terne plates.

The untried new roofing material (supposed to be cheaper) launched upon the market at various times can hardly catch the attention of the practical person much less the trained eye of the architect or builder, unless it is the frequent cry "must cheapen the building and must use cheaper material." This is the greatest mistake for anyone to be guilty of in covering or building the home. Experimenting will, however, continue to go on, until experience demonstrates to the cheap user their undesirableness and the heavy cost in the end.

The writer knows of tin roofs that have stood the storms of nearly 50 years, and are just as good to-day as when first put on. It is not always the owner's fault or the builder's, and surely not the architect's, but the fault lies with the sub-contractors, many of whom take work at about cost on account of the sharp competition, and then to save themselves resort to using poorer materials and slighting their work where possible.

Seek only responsible dealers, contractors, mechanics and others if you want to get what you pay for. Let each in turn protect the other and accept no bargain-counter business. We are not living for to-day only, but we all have a future. So has the roof of your house. Look well to it. Have it covered with terne plates that will stand the test of time and put on with the patent soldered standing joint by responsible workmen.

To good management men and tools, add Apollo galvanized iron.

There is no way to do so good work or to make so much profit on it.

CURRENT MARKET QUOTATIONS.

February 28, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

FOR THE STREET

THE TRADE "M&M" MARK LIGHT

FOR THE STORE

They are Where Best Liked Best Known!

What a Man Says "M. & M." Hardware About Lamps.

Over 30,000 "M. & M." Lamps are in daily use in the United States and Canada, and our largest orders come from localities where they are best known. The most efficient, most practical, most economical store-lighting proposition on the market, a claim which is amply proven by the enthusiastic testimonials constantly received from users and our agents. Send for circulars. AGENTS WANTED.

ACORN BRASS WORKS,
Dept. 8, 15-23 Jefferson Street. CHICAGO, ILL.

Acorn Brass Works, Chicago, Ill., Madison, Neb., Oct. 21, 1901.
Gentlemen:—I am using five of your 'M. & M." Arc Vapor Lamps in my store, and have been for the past three years. They are as good as the day I put them up, so far as I can see. My store is lighter than daylight. The store next to mine has 26 incandescent electric lights in a room 23x84, and it looks as if he had so many tallow candles compared to the light in my store. Respectfully yours, WM. PARKINSON.

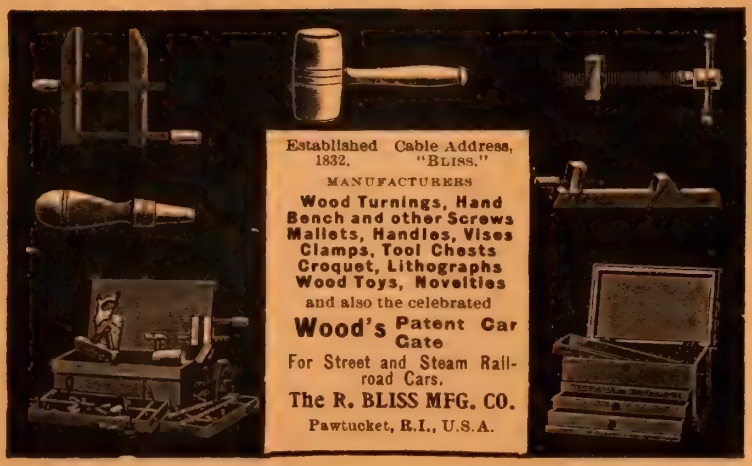
BRADSTREET'S

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.



THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

THE SPRING TRADE IN HARDWARE.

MARCH has opened up well in the wholesale hardware trade. During the past week business has received quite a stimulus, and while the various wholesale houses are busy shipping goods out by one door they are busy taking in goods for stock at another.

There is every indication that the spring trade of 1902 will be one of marked activity; and, in fact, more so than is usual.

The season is opening up rather early, and country dealers are, in consequence, pressing for the delivery of goods previously ordered.

While speculative buying is to be deprecated, it would seem to be a wise policy for hardware dealers to keep their stocks well assorted. Not only are prices, as a rule, likely to be maintained, but there is the difficulty of getting prompt shipment to be borne in mind.

The tendency of prices in iron and steel is still upward. Within the last few days the price of both steel bars and bar iron has been advanced $2 per ton. Pig iron is about 50c. dearer than it was two weeks ago and $2.50 dearer than it was a year ago.

Wireless telegraphy and wireless telephones are all right, but what is still more desirable are elections without wire-pulling.

ANNEXING THE UNITED STATES.

An immigration agent of the Dominion Government estimates that 75,000 people from the Northern and Western States of the American Union will settle in the Canadian Northwest during 1902.

What with United States capital and United States people that are being attracted to Canada, we are evidently on a fair way to annex the territory of the neighboring Republic. But we hope before this is consummated our cousins will have finished their campaign in the Philippines. While we are not very positive about it, we expect to have the Boer War settled by that time.

A STIFF BACKBONE.

Iron is said to be the backbone of trade. If this be true, the backbone is just now a pretty stiff one.

BUSINESS MEN AND POLITICAL CORRUPTION.

Corruption at elections is a grave social disorder and is the canker and the disgrace of a free people. It is a thing which affects and is a danger to the good and efficient administration of the affairs of a country.

THE words given in the above paragraph are from the address of Judge Wurtele when charging the grand jury in Montreal a few days ago. They are strong words, but they are true words, and what, unfortunately, is equally true, there is a reason for their utterance.

A generation ago men, actuated by party zeal, stood at the polling booths and by physical force prevented their political opponents from registering their vote. But disgraceful as these practices were they were not nearly as heinous as the practices which are resorted to to-day in order to prevent the expression of the popular will at the polls.

The bribery that is practised in elections is the least of the methods employed. It is the official who stuffs the ballot box and manipulates the ballot after it has been cast whose practices are the most reprehensible.

While it is quite true that the law is neither as effective nor as drastic as it might be, it possesses a great deal more utility for the punishment of the corrupt than the politicians are disposed to call into operation.

The law, however, should be made both more effective and more drastic. None should be more concerned in bringing this about than the business men of the country, for good government, whether it be in the municipality, the Province or the Dominion, means a great deal to them.

CANADA AND THE TRADE OF JAPAN.

JAPAN, the country which during the past few weeks has been so much in the public eye on account of the treaty which has recently been arranged between her and Great Britain, did a foreign trade of about $244,000,000 in 1900. Of this, $101,500,000 was exports, and $142,500,000 imports. The aggregate foreign trade of Japan is about where that of Canada was eight or ten years ago.

The best customer for Japanese products is the United States, 26 per cent. going to that country. Hong Kong comes next with 19¼ per cent. The percentage which goes to China is 15½, to the United Kingdom 5½, to India 4¼, to Germany 1¾, and to all other countries 18¼.

Japan buys more from the United Kingdom than from any other country, of her total imports 25 per cent. being from that country. The United States furnishes 22 per cent., China 10½, Germany 10¼, India 8¼, France 2¾, and other countries 21¼ per cent.

The chief imports of Japan are as follows, being in the gold yen, worth in Canadian currency 99.7c. :

	Gold yen.
Machinery	6,150,000
Provisions	9,470,000
Books and stationery	5,470,000
Drugs, medicines, chemicals	7,161,000
Dyes and paints	7,322,000
Grain and seeds	15,545,000
Metals and manufactures of	37,667,000
Oil and wax	15,914,000
Sugar	26,692,000
Textiles, fabrics, yarns	115,458,000

In contributing to Japan's import trade, Canada does but little. Last year, it is true, we did better than usual. But even then the total export trade with that country only aggregated $188,683. In 1900 it was $112,308; 1899, $135,265; 1898, $148,728. The amount of money expended last year in subsidies on the C.P.R. steamships running to Japan and China was $73,000.

Our chief items of export to Japan during the last three years were as follows :

CANADIAN EXPORTS TO JAPAN.

	1899.	1900.	1901.
Flour	$	$ 6,434	$ 8,410
Carriages, bicycles, etc.	130	3,021	17,696
Coal	40	11,653	8,298
Cotton and manufactures of	6,430	6,320	13,117
Fish and fish products	40,270	47,773	97,085
Provisions	2,458	3,049	1,909
Sugar	42,535	....	....
Wood and manfactures of	36,819	21,946	30,471
Metals and manufactures of	....	1,462	5,075
Leather and manufactures of	2,762	7,519	12

At present our trade with Japan is somewhat one-sided, for, while we sell, according to the figures for 1901, only $188,683 worth of goods to that country, our purchases therefrom are $1,620,868. In other words, our exports to Japan are scarcely 10½ per cent. of our agregate trade with that country.

Although our export trade with Japan is at present so small, there is nothing discouraging in the possibility of increasing it. What is wanted is enteprise on our part.

REBATES ON WHITE LEAD.

Just as we go to press we are advised of a change in the special discounts to the retailer in white leads ground in oil.

It seems that there has been considerable competition by those outside the White Lead Grinders' Association for the white lead trade, which has led to the outsiders selling their leads at lower prices than those adopted by the Association. On account of this, at a meeting of the Association on March 6, it was decided to give a rebate of 5 per cent. on 1-ton lots of white lead, 7½ per cent. on 5-ton lots and 10 per cent. on 15-ton lots, besides an additional rebate of 2½ per cent. on 5 and 10 ton lots to those dealers who exclusively sell the Association's white leads.

Previous to this, the rebates were 5 per cent. for 5-ton lots and 7½ per cent. for 15 tons.

ANNUAL MEETING OF HARNESS-MAKERS.

THE third annual meeting of the Harnessmakers' Association of Ontario was held in the Confederation Life Building, Toronto, on March 4 and 5, when delegates to the number of 100, from all parts of the Province, were present. One of the principal propositions before the assembly was that of affiliation with the Retail Merchants' Association of Canada, which was referred to a committee to investigate and report.

Another subject of considerable importance was the problem of how the wholesale dealer could be prevented from selling direct to the consumer, a long-standing evil which many unsuccessful attempts had been made to overcome. Last year, this question had been left over to the executive committee to deal with, and the members of the Association were urged to confine their patronage only to those who sold to the trade exclusively.

An effort will be made to induce the business men to adopt a uniform system for cutting leather. At present, nearly every firm has a scale of its own.

Another thing that will probably be done is the adoption of a uniform list of prices for harness. In numerous cases they claim that they have actually been selling things at less than cost price, and they hold that it is time for a change.

On the evening of the last day the members of the Association were the guests of the wholesale merchants and manufacturers at a banquet in the Temple building. C. J. Miller was in the chair, and everything passed off happily.

The election of officers resulted as follows :

President—C. Kelly, Uxbridge, reelected.
First Vice-President, J. Broderick, Mitchell.
Second Vice-President, H. Dennis, Chatham.
Third Vice-President, T. H. McKee, Stirling.
Fourth Vice-President, E. Kirkpatrick, Toronto.
Treasurer—J. Finlayson, Hamilton.
Secretary—Alexander Downey, Toronto.
Auditors—James Pease, A. H. Daville and W. J. Micks.

TOURISTS IN NEW BRUNSWICK.

AS a result of being interviewed on February 28 by a deputation from the St. John, N.B., Tourist Association, the treasury board of that city have asked the council for a grant of $750 towards the work of that organization.

It was pointed out by Mr. D. J. McLaughlin that the association was doing more work every season. It was shown that last year between $8,000,000 and $10,000,000 was realized from tourist travel by the State of Maine alone, and that every year saw more visitors going to Nova Scotia. They wanted travel to increase likewise in New Brunswick.

Mr. W. S. Fisher explained that the association contemplated publishing 50,000 booklets, instead of the 25,000 they issued last year. He also stated that $1,000 was contributed by the Government last year, $500 by the city of St. John, $1,300 by private citizens and $300 in subscriptions to the band-concert fund. This made a total of $3,100.

It was estimated that $200 was spent for every moose killed by the hunters who went to New Brunswick last season.

After the deputation withdrew, the board recommended that a grant of $750 be made by the city.

TRADE IN COUNTRIES OTHER THAN OUR OWN

NEW YORK METAL MARKET.

IRON AND STEEL.- Although accord burgh this morning the floods having to telegrams received from Pitts subsided and mills and furnaces are starting up again, some time must elapse before normal conditions can be resumed. In the meantime the further retarding of deliveries by the interruption and congestion of railroad traffic is adding to the troubles of consumers who are in immediate need of supplies but can get no relief from sellers. As a consequence spot business is almost suspended, but in futures transactions continue on a very satisfactory scale. In pig iron a number of good-sized contracts in Southern foundry for delivery during the last half of the year have been closed at full prices. Advices from Philadelphia state that a little No. 2 X foundry pig might possibly be picked up at $18.50, but that at least in one case $20 was asked for March shipments. A great deal of iron is being sold for delivery during the last three or four months of the year, this report says, but so much is being taken that the companies are beginning to pick their trade, although they still express confidence in their ability to furnish all the iron that will be required for consumption. Since it became apparent to buyers that there is no fear of a famine in iron interest in imports of English metal has disappeared, with the result that prices on the other side are again receding: the decline amounting to 1s. 9d. within a week. Prior to that time the indications pointed to a boom on the other side.

TINPLATE. Nothing new was presented in this department. The market is rather quiet, but prices are maintained.

The firm tone of the market for spot tin was accentuated somewhat by the stronger tenor of advices from London, where prices at the close showed a gain of 15s. over those of last night, so far as spot was concerned, and an advance of £1 in futures. Business in the former, on the English market was considerably larger than for several days, while the latter were comparatively neglected. There was nothing of consequence done here today. Buyers raised their bids to 25.60c., while holders wanted 25.70c. for spot. There was very little interest in futures, the only reported business being a sale of five tons for April delivery at 24.75c. The bid and asked prices at the close were 25 @ 25.40c. for March; 24.70 @ 24.75c. for April, and 24.25 @ 24.75c. for May. It is reported that the Arcara is discharging her cargo into lighters. The Minnehaha, from London, is landing 90 tons, and the Amsterdam, from Rotterdam, 30 tons, making the arrivals for the month to date, not including the Acara's tin, 560 tons.

COPPER.—The market here remains dull and weak notwithstanding the bid price on Lake was raised an eighth of a cent. There was no business reported and the market closed at 12⅛ to 12¼c. for Lake and 12 @ 12⅜c. for either electrolytic or casting. In London the tone was firmer and 12s. 6d. of yesterday's decline in spot was recovered, while futures advanced 15s. over last night's closing figures.

PIG LEAD.—The market was quiet and unchanged at 4.10 @ 4.15c., as to quantity and date of delivery. St. Louis also was quiet at 4.05c. There was no further change in London.

SPELTER. Nothing new was presented in connection with this metal. A steady feeling prevails, though there is little demand. We continue to quote 4.25 @ 4.30c. In St. Louis the market was easier under free offerings at 4.10c. London was unchanged.

REGULUS ANTIMONY.—Trade is slow, but the market remains steady at 10¼c. for Cookson's; 8c. for Hallett's, and 7½c. for other brands.

OLD METALS. The market was dull and somewhat easier.—N. Y. Journal of Commerce, March 5.

BRITISH TINPLATE MARKET.

The market continues strong and higher prices have had to be paid this week, Business has been done well into the third quarter of the year, and some works seem to have no spare room till August. Prompt plates are in good demand at full prices, with the exception of oil sizes, and these are comparatively quiet at the moment. Wasters show a further appreciation, especially for March delivery.—Iron and Steel Trades' Journal, February 22.

The market generally keeps very firm. There has been a good deal of inquiry during the week, but owing to the high prices asked by makers business has been limited. Common 14 by 20, 112 sheets, 108 lb. Bessemer cokes are held for quick delivery at 13s. 3d. and 13s. 4½d. per box f.o.b. Wales, and some transactions have taken place at the former figure. For March and March—April delivery works quote generally 13s. 1½d. to 13s. 6d. per box, Siemens steel, 1½d. to 3d. per box extra f.o.b. Wales.—Iron and Coal Trades' Review, February 21.

MANUFACTURED IRON AND STEEL IN ENGLAND.

The report to hand from the various centres regarding the present condition and the prospects of the market for finished materials are not, on the whole, of a less favorable character. The current booking is somewhat heavier generally, although in some districts the improvement is not very apparent. There is a feeling, however, that we are on the eve of an expansion in the demand, which will result in a good spring trade The few small advances that have taken place, coupled with the increased firmness of prices in some branches of the trade, have apparently led many consumers to believe that a move is imminent, and accordingly several new orders have been placed at once before a possible rise. In Sheffield the heavier departments are rather quiet, but when the expected Admiralty work is given out we may expect to see a decided improvement. The bar trade is good and prices are well maintained, especially in South Staffordshire, where, as we briefly announced in our telegram last week, quotations for black sheets, trunk sheets, and tinplates, have been advanced.—Iron and Coal Trades' Review, February 21.

PIG IRON IN GREAT BRITAIN.

On Monday the Glasgow market for Scotch pig-iron warrants was excited by highly-colored reports of large inquiries and orders from America, and at the close of the day the price was 53s. 5½d., an advance of 2s. since Friday. On Tuesday business was again active, and the market closed with buyers at 53s. 7d., sellers, 53s. 10d. cash. On Wednesday morning, apparently, a large number of small speculators were taking quick profits, and the market went back a little, but was steadier in the afternoon, closing 53s. 5d. Yesterday, buyers again predominated, and the market closed with buyers at 53s. 9½d. cash. To-day the market closed at 53s. 2½d. cash buyers. Quotations for makers' iron are advanced from 1 to 2s. per ton. A small quantity of iron has gone out of Connals' stores, reducing the total to 54,800 tons.—Iron and Steel Trades' Journal, February 22.

In its issue of February 22 The London Ironmonger has the following: "The animation that marked proceedings on the Glasgow pig iron warrant market during the past week exceeded anything that has been seen for years. Big lines of all classes of warrants changed hands; on more than one day as much as 60,000 tons were dealt in, and that though prices were firm and advancing. The stir and strength have been derived from the bullish advices, public and private, received from America as to the activity and buoyancy of the steel and iron trades there. These have been accompanied by orders for Scotch warrants and inquiries for Cleveland and hematite, and that fact has no doubt gone a long way to emphasize the favorable impression created in speculative circles by the trade reports referred to. Doubt exists as to whether

the purchases of Scotch warrants were on legitimate account, not a few experts being of the opinion that they were mere gambling operations and did not forecast the early placing of legitimate orders on this side. Already some Cleveland iron has been sold for shipment to New York, 50,000 tons of Cleveland gray forge are said to be wanted for Philadelphia, and 60,000 tons of steel billets are inquired for in the Glasgow market for the same destination.

THE AXE TRADE IN THE STATES.

The past week was an active one in the axe market, as the representatives of the various factories were entering the field and making known to the trade the new prices adopted by the associated manufacturers. As a rule, there is a general disposition to regard the prices as reasonable, and complaints in regard to the extent of the advances are few. The policy of the manufacturers to discourage the sale of low-grade axes, as well as their action in making the prices of the various brands uniform, meets with little criticism from the trade at large. As the result of the existing agreement the market is certainly in a much more even condition than for a long time, and if the jobbers are conservative and reasonable in accepting and maintaining the new prices there should be for them as well as for the trade generally, a large and profitable business. On the basis of the prices determined by the manufacturers, the following are about the figures at which the retail trade should be able to purchase the goods :

	Per doz.
Standard factory brands	$6.00
Jobbers' special brands	5.75
Second quality	$5.00 to 5 25

The jobbing trade are beginning to place their orders, and the indications are said to be favorable for an excellent business.—Iron Age.

BAR IRON HIGHER IN THE STATES.

At a meeting of The Eastern Bar Iron Association, held at the Waldorf-Astoria, New York, a few days ago, it was decided to advance prices $2 a ton. What has been primarily instrumental in leading up to this move is the scarcity of pig iron, together with the recent rise in the same. The last previous advance made by the Bar Iron Association was about six weeks ago.

MANILA ROPE HIGHER IN THE STATES.

Manufacturers have advanced the price of Manila rope to 13½c. per lb., on the basis of 7-16-in. and larger. Some makers are quoting sisal rope, on the same basis, at 10c., while others are holding it at 9½c. In large lots, ¼c. per lb. rebate is allowed. Demand for rope continues moderate.—Iron Age.

HARDWARE STORE WINDOW DISPLAY.

By B. Seebe.

I HAVE always wondered why it is that the dry-goods merchants take so much pains and spend so much money for elegant displays in their show windows, while the majority of the hardware merchants neglect it entirely or arrange their goods in a careless and tasteless way. I have even heard several of them remark that they felt sorry for having show windows at all, and that they preferred only doors. They do not know or believe that by a fine display of their goods they have the cheapest advertising medium existing. It would attract the attention of the people passing by, not the regular customers of their business. They would be led thereby to step into the store, and will by the aid of a good salesman only leave the same after having purchased some articles which they never intended to buy, at least not on that particular day. This is my experience. I have afways made it a point to watch the people attracted by our display. After having examined nearly every article, they finally step inside and always make some purchases. This was solely caused by the display in the window.

CHIEF CAUSE OF NEGLECTED WINDOWS.

The frequent neglect of window displays is, in my opinion, mainly the fault of the proprietor himself in not giving his clerk the necessary time and some means to make a creditable display. He thinks a large window can be fixed up in 15 minutes, and does not take into consideration that it requires an amount of thought and labor to make even the preparations for the same, such as fitting the bunting for the decoration of the background, ceiling and sides, going over the stock, selecting the proper articles and arranging them in groups. If he would take the little trouble to watch the effect of a real nice window display on the people passing by, and see how many are induced to step inside, I believe he would be more willing to appropriate funds, and give time to a clerk who takes an interest in such work. He would be cured of the erroneous idea that every customer who comes to the store has left his or her home solely for the purpose of going to this hardwareman's store to buy some certain articles, when, in fact, the passing trade, not the regular customers, are in nine cases out of ten invited by the attractive display.

STUDY REQUIRED.

The clerk whose duty it is to decorate the windows must take a great deal of interest in his work, always thinking and studying about new displays. On the arrival of new goods his first thought should be how to use same to the best advantage in his next display. Any chance he has he should carefully look at all show windows, no matter in what line. Often he will find some new ideas which he, with probably a few changes, can use. He should study all descriptions, especially pictures of windows. He should not fail to receive all the encouragement, help and necessary time from his employer.

A PROPERTY ROOM SHOULD BE PROVIDED.

If a merchant wants his windows properly and regularly decorated, he first should provide for his man a suitable place or room in his store where the necessary preparations can be made, where all fixtures and buntings are nicely kept and conveniently arranged. Nearly all fixtures can be used over again. By having them always on hand a great deal of time and money can be saved.

BRIGHT-COLORED BUNTING.

In decorating a show window the first object should be to attract the attention of the people passing by, and nothing will do this better than bright colors. In the background, on the sides and ceiling harmonizing colors of bunting should always be used, arranged in various forms, either plain, in pleats or in rays. I always decorate the ceiling first with bunting, on which I arrange jack chains or other bright goods. This helps a great deal to catch the eye of the passers-by.

The colors of bunting I have found to show the different lines of hardware best are bright red, old gold, bright, deep blue, and, in some cases, white and black. With bright colors as an underground, and, if the man has a little taste, a nice display can be made with old scrap iron.

The floor of the show window should be covered with bunting of various colors with the goods arranged on the color best suited to the article. By changing the designs or the color of the bunting

an entirely different exhibit can be arranged of the same articles.

FIXTURES.

A great many fixtures and appurtenances can be used in building up a proper foundation for the display, such as round boards in different sizes, full, half to quarter circles, which are best made of soft wood; steps for background or corners; arches for which different sizes of rims can be used; stars, padlocks, horseshoes, and coats of arms. All these fixtures, nicely trimmed with bunting, with the different articles tastefully arranged thereon and used for background and side decorations, will make a good impression.

MECHANICAL APPLIANCES FOR MIRRORS.

If the proprietor is generous enough to allow the necessary funds for mechanical appliances, something movable placed in the window with a liberal distribution of electric lights set in different colors, as the occasion demands, will greatly heighten the effect. The window in a hardware store, with its large variety of bright and shining articles, can be made brilliant and dazzling. A very fine effect can also be had with looking-glasses set either straight or at proper angles, but the same ought to be at least two feet high; also concave and convex mirrors, placed in proper positions, will draw crowds to the window.

A STOVE AND KITCHEN GOODS DISPLAY.

We have in our store two large show windows each with glass on two sides and entirely closed up in the back. I always use one window for a special display, as, for instance, a steel or cast range, or some other cook stove, with kitchen and household goods. This is a display which interests the ladies, and the best way to arrange these goods is to show a model kitchen with shelves in the background and on the sides, trimmed with shelf paper and filled with kitchen and stove utensils of every description. The other places are filled with woodenware, which, if nicely arranged on a good background, will make a very fine display. The floor in front of the stove can be used for nicely arranged groups of table cutlery, spoons, carving sets, and other articles used in a kitchen. The stove should be regularly set up with stovepipe, elbows, ring, etc.; the pipe should run into a flue. A long box or pick-handle crate lined with red bunting and marked with chalk or white lead, to represent bricks, will answer for this. Sometimes I use little brownies properly dressed up in these displays; one dressed as a cook on top of the stove with a large basting spoon; another carrying wood; one or two trying to steal a roasted goose, made of paper, out of the oven. All such little tricks help to make a window attractive. If a wax figure can be secured, dressed as a cook, and placed near the stove, it will also greatly improve the display.

TOOL WINDOWS.

A blacksmith and wheelwright display should be made on the same plan, to imitate as much as possible a blacksmith shop, with a wax figure properly dressed as a blacksmith, standing either at the forge or at the anvil. The background or sides can be decorated with rims, single or double trees, dash boards, buggy bows, and the ceiling with trace chains, etc.

The same plan is to be followed in showing carpenters' tools and builders' hardware. A carpenter's shop should be fixed up for such a display, with dummies representing carpenters in the execution of their several jobs. I believe it is best to use wax figures, as figures built out of articles in the store look clumsy and unnatural. During the time of the war I had a warship in the window, a description of which is hardly necessary, as it has too often been described, and with probably few changes one has been like the other. It is the same with the railroad train. The chief aim in these displays is to make them as natural as possible.

RAILROAD TRAIN IN THE WINDOW.

When I had the railroad train in the window I used an empty whip box for the foundation of the embankment; throwing gravel on top of the box, I let it slowly roll down and by this I got the finest gravel embankment. The vacant space in front of same I used for garden plots, as seen at nearly all the depots, by building little flower beds of ox balls, picture nails, etc. The smoke I made as natural as possible by using carded cotton colored with black lead and attached same with small hair wire to the telegraph wire made of wash lines. This produced a fine and natural effect and improved the display considerably.

SPECIAL AND STRIKING DISPLAYS ADVERTISE.

Now all these special and original displays form, without doubt, a very fine advertising medium even if they do not effect such ready and quick sales as other displays, but they surely advertise the store, as the following will prove: One of our drummers came back from a trip of several weeks' duration and the first question was, "Where was that warship that he had heard the people talk so much about?" He told me that people in places from 70 to 100 miles away talked about it and advised their friends not to fail to look at it in case they came here, thereby proving that this special display did a great deal of advertising at a very low cost.

GENERAL DISPLAYS IN OTHER WINDOWS.

The other window I use for a general display of goods, such as small mechanics' tools, paints, enamels, ammunition, guns, pistols, specialties, etc., and these are the displays that bring in the quickest returns in cash sales. A great many varieties of goods can be shown in one window, but they should be arranged in groups, all varieties as much as possible together. Seasonable goods should always be shown at the proper time, and should be left in the window for some time, or as long as they are in demand. —Iron Age.

The Best Time

to put your paint business on the right footing is at the beginning of the busy season.

It pays to start early to push

THE SHERWIN-WILLIAMS PAINT

It pays to be ahead of the "other fellows."

CHICAGO, NEW YORK, NEWARK, MONTREAL, CLEVELAND, BOSTON, TORONTO, SAN FRANCISCO. KANSAS CITY.

TWO WEST-INDIAN LETTERS.

MR. ROBERT MUNRO, president of the Canadian Manufacturers' Association, and Assistant-Secretary Stewart, who are on a trip to the West Indies to see what sort of opening there is there for Canadian trade, have written home two interesting letters on their observations.

They write their first letter from Bermuda. That colony has been enjoying general prosperity, and its imports are about $2,000,000 annually. Of this trade in 1900, $520,000 went to Great Britain, $1,250,000 to the United States and $155,000 to Canada. In the figures for 1901, which are about the same, the Dominion had the best of it in box material, sending 274,425 ft., as to 11,700 ft. from the United States. Of butter, the United States has the largest share of the trade, exporting to those islands 124 tons, as compared with 38 tons from Canada. The Bermudas import 51 tons of United States cheese and 30 tons of the Canadian product.

In flour the imports were 2,682 barrels from Canada, and 26,648 from the Republic. Canada has about half of their cattle feed imports, but her share of the canned goods trade is very small. The lumber trade of that colony with the United States in 1901 amounted to 2,813,663 feet, as compared with 464,970 feet with the Dominion. Importers desire to be placed in communication with Canadian mills for doors, sashes and building material. The best way to work up trade would be to have a resident general agent of ability, who might be paid by commission.

Mr. Stewart wrote the second letter from the Island of St. Lucia, where the condition of affairs are about the same.

The figures for 1901 include the following: Bacon and hams, United States, 23,480 lb.; Great Britain, 3,938 lb.; Canada, 429 lb. Beef and pork, salted, United States, 294,000 lbs.; Great Britain, 204 lb.; Canada, 411 lb. Biscuits, Great Britain, 11,784 lbs.; United States, 11,456 lb.; Canada, nil. Butter, United States, 4,112 lb.; Great Britain, 4,716 lb.; France, 6,000 lb.; Canada, 18,035 lb. Cheese, United States, 17,000 lb.; Great Britain, 382 lb.; Canada, 11,000 lbs. Flour, United States, 17,139 barrels; Canada, 92 barrels. Lumber, United States, 1,399,000 ft.; Canada, 64,000 ft.

It is pointed out that much could be done by Canada with a little effort to greatly increase trade in these lines, for these islands are anxious to trade with Great Britain and their sister colonies.

The quality of the cheese from Canada has not been always as good as it might be, although there has been a considerable increase in the quantity shipped. Up till now butter has usually been sent in tightly sealed tins, but one Canadian manufacturer is experimenting with the butter put up in glass fruit jars.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES.

J. A. BRUNET, general merchant, Moose Creek, Ont., is in financial difficulties, and a statement of his affairs is being prepared.

Archibald Strachan, hardware merchant, Kingston, Ont., is offering to compromise.

Levi Bourgeois, carriagemaker, Berthier, Que., is offering 50c. on the dollar cash.

Daniel Shaw, hardware merchant, Almonte, Ont., is offering 35c. on the dollar.

Wm. Bennett, general merchant, Calumet, Que., has assigned to Lamarre & Galaise.

Kent & Turcotte are the curators of Magnan Freres, hardware merchants, Montreal.

A. Champagne, carriagemaker, Chambly Canton, Que., is offering 20c. on the dollar cash.

The creditors of Wilfrid Chausse, hardware merchant, Montreal, held a meeting on March 7.

H. L. Hamel, general merchant, Nicolet, Que., has compromised at 50c. on the dollar.

Eugene Audet, general merchant, Ste. Anne du Sault, Que., has assigned to Kent & Turcotte.

Liens aggregating $1,101 have been filed against The Texada Gold Mines Co., Texada Island, B.C.

The creditors of O. Leger & Frere, general merchants, Coteau Station, Que., held a meeting on March 4.

The creditors of Mrs. Geo. E. Champagne, general merchant, Pierreville, Que., held a meeting on March 5.

Lefebvre & Taschereau have been appointed curators of F. X. Roy, general merchant, St. Phillipe de Nery, Que.

H. W. Green, blacksmith, Algonquin, Ont., has assigned to Alex. G. Dobbie; his creditors held a meeting on March 5.

H. A. Madden, general merchant, Sault Ste. Marie, Ont., has assigned to W. J. Morrin. His creditors met on March 4.

Kent & Turcotte are the curators of P. Plouffe, general merchant, Ladysmith and Shawville, Que. His assets are to be sold.

A bailiff is in possession of the general store and sawmill of Duncan McIntyre, Clarence, Ont., and his assets are to be sold.

Lefebvre & Taschereau have been appointed curators of John Lavalle, wholesale general merchant, St. Charles (Bellechasse), Que.

The American Tire Co., Limited, bicycle sundries and sporting goods, Toronto, is being wound up. E. R. C. Clarkson is provisional liquidator.

The creditors of R. Bergeron & Co., general merchants, Shawenegan Falls, Que., held a meeting on February 28. Lamarche & Benoit were appointed curators.

PARTNERSHIPS FORMED AND DISSOLVED.

A. R. Williams & Co., machinery supplies, Montreal, have dissolved.

Turnbull & Davidson, lumber merchants, Manitou, Man., have dissolved.

Gregoire & Bourque, saw and grist millers, St. Germain, Que., have dissolved.

Smith & Barnes, bicycles, etc., Ottawa, have dissolved; the business is continued by E. G. Barnes & Co.

S. E. Bancroft & Co., general merchants, Roundhill, N.S., have dissolved; S. E. Bancroft succeeds.

C. H. Anderson, A. Archibald and M. McMann have registered at Moeer River, N.S., as partners in a general store.

SALES MADE AND PENDING.

Bailey Bros., Huntsville, Ont., are advertising their mill for sale.

The real estate of J. A. Choquette, contractor, Montreal, has been sold.

M. Procunier, wagonmaker, Nilestown, Ont., is advertising his business for sale.

The assets of J. C. Giroux, general merchant, Berthier, Que., have been sold.

A. S. Baker, general merchant, Hilton, Man., is advertising his business for sale.

The assets of Joseph Cousineau, coal and wood merchant, Montreal, have been sold.

M. J. Otto, stove and tinware merchant, Ayr, Ont., is advertising his business for sale.

Meader & Co., general merchants, Hazel Cliff, N.W.T., are advertising their business for sale.

The assets of L. A. Frechette, general merchant, Thetford Mines, Que., were to be sold on March 6.

The stock of Gus Tweedale & Co., hardware merchants, Fredericton, N.B., has been sold by sheriff.

The assets of Lecourse & Lefrancois, general merchants, Shawenegan Falls, Que., have been sold.

Charles Kitchen, carriagemaker, etc., Kleinburg, Ont., is advertising his blacksmith shop for sale.

The stock of the (late) W. L. Coutler, general merchant, Creemore, Ont., is advertised for sale by tender.

The stock of G. C. Bristow, general merchant, Aylmer, Ont., is advertised to be sold by auction on March 5.

The stock of Alfred Fradette, general merchant, St. Philemon, Que., has been sold at 70½c. on the dollar.

The stock belonging to the estate of Elliott & Borland, general merchants, Steinbach Station, Man., has been sold at 51c. on the dollar.

CHANGES.

Bouthillier & Bernard, plasterers, Montreal, have registered.

Brousseau & Frere, electricians, Quebec, have registered.

Williams & Wilson, machinery supplies, Montreal, have registered.

Roussin & Freres, carriagemakers, Montreal, have registered.

The Zozo Co., stove polish manufacturers, Montreal, have registered.

The N. P. McMullan Co., railway supplies, Montreal, have registered.

A. Portlance, carriagemaker, Ste. Anne de Bellevue, Que., has registered.

A. Binette & Cie., tinsmiths, roofers, etc., Lachine, Que., have registered.

J. H. Roseborough, blacksmith, Birtle, Man., has sold out to H. Bowser.

H. E. Poynter, blacksmith, Cherrywood, Ont., has sold out to Robt. Davidson.

O. R. Taylor, general merchant, Wheatley, Ont., has sold out to M. Chamberlain.

W. R. Bennett, carriagemaker, etc., Somerset, N.S., has sold his undertaking business to The Barwick Undertaking Company.

Edmond Neve, general merchant, L'Orignal, Ont., has sold out to D. J. Jamieson.

Archibald McNabb, agricultural implement agent, Alexander, Man., is leaving that place.

J. B. Taylor, hardware merchant, Minnedosa, Man., has sold out to J. W. and James Black.

E. Jordan, general merchant, Thornhill, Man., has removed his Thornhill stock to Darlingford.

Wagner Bros., agricultural implement agents, Plum Coulee, Man., have sold out to McKay & Cochrane.

John Dewar & Sons, Limited, lumber and general merchants, St. George, N.B., have sold their lumber business to E. G. Murphy.

FIRES.

The factory of A. C. Lariviere, carriagemaker, Montreal, was damaged by fire; it was insured.

The stock and store of Nelson Weir, general merchant, Upper Kennetcook, N.S., have been burned.

The North Bay Supply Co., Limited, departmental store, North Bay, Ont., was burned out; the property was insured.

The New Hamburg Manufacturing Co., Limited, agricultural implements, etc., New Hamburg, Ont., were burned out; the premises were insured.

DEATHS.

A. R. Bowie, general merchant, Annan, Ont., is dead.

John Bugg, of J. Bugg & Son, tinsmiths and stove merchants, Wingham, Ont., is dead.

F. R. Graham, of T. Graham & Son, locksmiths and hardware merchants, Toronto, is dead.

Happy is the Painter who uses the

PAINTERS PERFECT WHITE LEAD.

He will **please** his **customers** and himself. To obtain these benefits he must be sure that the following name is on the label:

THE

CANADA PAINT COMPANY

LIMITED.

PAINTERS PERFECT WHITE LEAD

We have had this paint in hands of the Canadian trade for two seasons. The reports received confirm all we have said about it, and we have, therefore, adopted it for 1902 AS A SPECIALTY.

Any chemist can analyze it, but no other maker can construct it. The idea is quite unique, and, we believe, will prove of great value.

This Lead we offer in competition with Pure White Lead for the best class of work—indoor and outdoor.

Decorators have noticed how sharp and clear tints show up on this Lead. It takes the full amount of thinners, works and covers equal to any Lead with which it competes.

THE CANADA PAINT COMPANY,
LIMITED.

NEW ALLOYS OF NICKEL AND ALUMINUM.

THE difficulty in attempting to produce an alloy of nickel and aluminum arises from the great difference between the melting points of the two metals—1,450 and 600 deg., respectively. If the experiment is made it is found that the resulting alloy contains scarcely 2 per cent. of aluminum.

Now, a manufacturer in Berlin has introduced an alloy under the name of "nickel-aluminum." This is really an alloy of nickel, aluminum and copper, consisting for the most part, however, of aluminum, as is shown by its specific gravity—2.86.

The method of production depends on the fact that the melting point of copper is about a mean between the melting points of the other two metals; the aluminum first unites with the copper, thus preparing it to take up the nickel.

The process depends largely for its success on a special furnace designed by the manufacturer who has introduced the alloy, and also on the addition of certain fluxes. The complete explanation, however, is kept secret.

The alloy can be rolled into plates and bars, and the author gives the average of six tests on such bars as showing an ultimate tensile strength of 25.9 kilos per square millimetre (16.44 tons per square inch).

Another new alloy is "minckin." It is similar to the so-called new silver, but it appears to contain more nickel. Ordinary new silver contains about 26 per cent. nickel, and it has hitherto been difficult to get more than this in the alloy, owing to the development of gases in the mass. The furnace employed plays here again, according to the author, perhaps the most important part.

"Minckin" is being largely employed on account of its resistance to the corrosive effects of weak acids and alkalies. The firm of Slemens & Halske use it almost entirely in the construction of the water meters sold by them.

The author also mentions a new method of plating aluminum with other metals. The difficulty in attempting to plate, for example, aluminum on copper arises from the formation, during heating, of a film of oxide on the copper surface.

Even when this difficulty has been overcome the resulting compound plate has been brittle and liable to split.

The Wachitz method overcomes all these objections by first forming a thin skin of copper-aluminum-bronze on the copper plate, preparatory to the actual plating process.

The same method is applicable to iron, and the author suggests the construction of ships having plates with iron surfaces and aluminum body.—Inst. C.E.: Foreign Abstracts.

THEY WANT MANITOBA FLAXSEED.

A despatch from Minneapolis under date of February 28 says:

"Minneapolis flax handlers and linseed oil men are the latest to take up the question of bringing the Manitoba product into this market. Now that the millers have satisfied themselves as to just what they would have to do in order to grind Manitoba wheat in bond the linseed oil crushers have taken up the question and are making inquiry on the same lines.

"It was reported on 'Change yesterday that, in addition to the inquiry regarding the possibility of obtaining storage capacity here for 6,000,000 bushels of wheat, there was a letter received by a local elevator company asking what capacity they had for carrying Manitoba flax if sent here to be stored in bond.

"The question of crushing flax into linseed oil in bond, and of grinding wheat into flour in bond, are two different propositions. The miller could pay the duty on Manitoba wheat, make flour of it, and by exporting the flour, get the drawback. But the linseed oil crusher does not export his product. He does export practically all of the oilcake. This oilcake would average 75 per cent. of the weight, but would not represent any such proportion of value, which lies principally in the oil obtained from the seed."

BABBITTING PULLEY SLEEVES.

A correspondent of Steam Engineering gives the following method of babbitting pulley sleeves, which he says is a good one, if the sleeves are turned on the outside:

Take a piece of shaft the size of the shaft on which the pulley runs, or, say, 1 64 in. larger. Take two collars and bore them the size of this arbor. Countersink one end of each, and put one collar on the arbor with the countersunk side up. Place the two halves of the sleeve on the arbor resting on the countersunk part of the collar, then slide the other collar down on the sleeve, catching the sleeve the same way. Have two holes drilled through the top collar, one on each side, to pour the babbitt through; separate the two halves with strips of tin well coated with white lead, or something of that kind. It will be seen that the collars will bring the sleeve central with the arbor. When the rig is adjusted one side can be poured and then the other. All that is required to hold them in place is something to press down on the top collar.

LARGER PREMISES.

Owing to the increase of business, McCaskill, Dougall & Co. have found it necessary to make a considerable addition to their factory in Montreal. Accordingly, an adjoining property has been secured, and arrangements for the enlargements of the works are going forward. When completed the new works will have a frontage on three streets, Manufacturers, St. Patrick's and D'Argenson, along the canal bank. The firm's agent in Boston was recently in Montreal, and a consultation was held regarding the increasing of their stock in that city.

OTTAWA AND TOURIST TRAVEL.

A deputation from the Ottawa Valley Tourist Association were present at a meeting of the Finance Committee of the Ottawa City Council on March 1 and obtained a grant of $500 to assist the association in the work of advertising the city. This grant is conditional. The organization must raise $1,000 by private subscriptions.

The deputation consisted of G. F. Henderson, J. R. Reid, A. Holland, and King Arnoldi, who all asked for the grant to help hem in their work. Mr. Henderson claimed that the Tourist Association was the best medium for advertising obtainable and that the Municipal Act authorized a grant being made to such an organization. The influx of tourists, he thought, would fully repay any outlay that might be made by the corporation.

After some discussion the money asked for was granted.

NO BUSHEL ON HIS LIGHT.

The caller explained his mission.

"It's a worthy cause," he said.

"It is, indeed," admitted the up-to-date merchant. "You may put down our firm for $5,000."

"Good!" exclaimed the caller. "It's to be done very quietly and unostentatiously, of course. The money will be given in a lump sum from 'a few friends,' without any names whatever."

"No one will know who gives?" asked the merchant.

"No one," answered the caller.

"No list published?"

"None."

"Cross the name of our firm off."—Chicago Post.

MANITOBA MARKETS.

WINNIPEG, Mach 3, 1902.

THERE has been a fair amount of business doing throughout the week, and preparations for spring shipments are very active at the present time. No change in price is on record in any line of hardware. The outlook for the sale of building hardware this spring has never been as good. The inquiry for farm implements, garden tools and barb wire is good.

Prices of binder twine are now quoted, the opening price for sisal being 11⅝c. f.o.b. Winnipeg. The high price of manila is considered to make it almost prohibitive on this market. Quotations, however, are given at 12⅞c. for 550 feet length, and 14⅛c. for 600 feet length for pure manila.

In paints, oils and glass there is nothing new to note. Inquiries are rather more active than a few weeks ago, but the spring trade has not yet opened up.

Price list for the week is as follows:

Barbed wire, 100 lb	$3 30
Plain twist	3 40
Staples	3 95
Oiled annealed wire, 10	3 85
" 11	3 90

MARKETS AND MARKET NOTES

QUEBEC MARKETS.

Montreal, March 7, 1902.

HARDWARE.

THE very bad roads, which, during the latter part of last week and one or two days in the current week, kept many buyers from the country from coming into the city markets, have much improved, and country merchants are making up in their purchases for lost time. Although a certain amount of business was lost in this way, yet the volume of trade for the week was hardly lessened, as other orders, by mail and from local buyers, seemed to make up for it. Business for spring is rapidly increasing, and among other lines builders' hardware has taken a decided turn for the better. Sap spouts and buckets, and sugar kettles are moving rapidly. The prices of sap spouts are considerably lower than last year. Japanned spouts sell for $1.20 per 1,000; galvanized, for $10.20 per 1,000, and cast iron, for $6.30 per 1,000. Except in one or two cases quotations in other lines remain unchanged.

BARB WIRE.—The price is the same, $3 per 100 lb. f.o.b. Montreal.

GALVANIZED WIRE.—There is an improvement in the demand this week. We quote: Nos. 6, 7, and 8 gauge, $3.45; No. 9, $2.80; No. 10, $3.55; No. 11, $3.65; No. 12, $2.95; No. 13, $3.05; No. 14, $4.05; No. 15, $4.55; No. 16, $4.80; No. 17, $5.20; No. 18, $5.45.

SMOOTH STEEL WIRE.—Trade is quite active, and prices are unchanged. Quotations are as follows: Bright iron and annealed on a base of $2.60 per 100 lb., f.o.b. Montreal, Toronto, Halifax, London, Hamilton and St. John. Net extras, per 100 lb. are as follows: Coppered wire, 60c.; tinned wire, $2; oiling, 10c.; spring wire, $1.25; best steel wire, 75c.; bright soft drawn, 15c.; special hay-baling wire, 30c.

FINE WIRE.—There is no change. The discount is 22½ per cent.

BRASS AND COPPER WIRE.—Both brass and copper wires are discounted at 60 per cent.

FENCE STAPLES.—Business is brisk. We quote per 100-lb. keg: Bright, $2.90; galvanized, $3.25.

WIRE NAILS.—The market continues active. Our quotations are as follows: $2.55 for small lots and $2.50 for carlots f.o.b. Montreal, London, Hamilton, Toronto, Gananoque, Brantford, Windsor, Ont., St. John and Halifax.

CUT NAILS.—The demand is light. We quote: $2.35 per keg in small lots and $2.27½ in carlots. Flour barrel and coopers' nails are discounted at 40 per cent.

HORSE NAILS.—The market is dull. We quote as follows: "C" brand at 50 and 7½ per cent. off and "M" brand at 60 per cent. off on oval and new city heads and 66 2-3 per cent. off for new countersunk heads.

HORSESHOES.—There is no improvement. Business is almost at a standstill. Our quotations are as follows: Iron shoes, light and medium pattern, No. 2 and larger, $3.50; No. 1 and smaller, $3.75; snow shoes, No. 2 and larger, $3.75; No. 1 and smaller, $4; X L steel shoes, all sizes, 1 to 5, No. 2 and larger, $3.60; No. 1 and smaller, $3.85; feather-weight, all sizes, $4.85; toe weight, steel shoes, all sizes, $5.95 f.o.b. Montreal; f.o.b. Hamilton, London and Guelph, 10c. extra.

SCREWS.—Trade is quite active, and the demand for spring is growing. The discounts are as follows: Flat head bright, 87½ and 10 per cent. off list; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.

BOLTS.—There is a good business doing in bolts at current quotations. We now quote as follows: Norway carriage bolts, 60 and 5 per cent.; common, 55 and 5 per cent.; full square carriage bolts, 60 and 5 per cent.; machine bolts, 55 and 5 per cent.; coach screws, 70 per cent.; sleigh shoe bolts, 70 per cent.; blank bolts, 60 per cent.; bolt ends, 60 per cent.; plough bolts, 55 and 5 per cent.; tire bolts, 67½ per cent.;

"CLIMAX" TEA KETTLES.
MADE IN TWO SIZES, NOS. 8 AND 9.

NICKEL-PLATED TEA KETTLES

All Spouts and Bottoms are Double-Seamed to Body.

This is an extra heavy kettle, being made of 18-ounce copper throughout, and is plated with an extra heavy coat of nickel, which is given the finest possible finish.

The "Climax" will outwear any other kettle on the market, and you need have no hesitation in recommending it to your customers.

"PERFECTION" TEA KETTLES.—MADE IN THREE SIZES, NOS. 7, 8 AND 9.

The "Perfection" is a somewhat lighter kettle than the "Climax," but for its weight has no equal, and is a first class seller.

Is also made with flat bottoms, in four sizes, for base-burners and oil-stoves.

You should be able to do a good Spring business (during house-cleaning and moving-time), in these lines.

Each kettle is carefully packed in a cardboard box for shipping.

Nos. 4, 5, 6 and 7.

The Robin Hood Powder Company
If you want the best Trap or Game load in the world, buy "Robin Hood Smokeless," in "Robin Hood" Shells. It is quick, safe, and reliable. Try it for pattern and penetration from forty to seventy yards against any powder on the market. We make the powder, we make the shells, and we load them. Write for our booklet, "Powder Facts."
The Robin Hood Powder Company
SWANTON, VT.

stove bolts, 67½ per cent. To any retailer an extra discount of 5 per cent. is allowed. Nuts, square, 3¾c. per lb. off list; hexagon nuts, 4c. per lb. off list. To all retailers an extra discount of ¼c. per lb. is allowed.

BUILDING PAPER.—Along with other builders' supplies, building paper is moving better, and the present demand is a large one. Prices have not changed. Our quotations are as follows: Tarred felt, $1.70 per 100 lb.; 2-ply, ready roofing, 85c. per roll; 3-ply, $1.10 per roll; carpet felt, $2.25 per 100 lb.; dry sheathing, 30c. per roll; tar sheathing, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c. per roll; O K and I X L, 65c. per roll; heavy straw sheathing, $30 per ton; slaters' felt, 60c. per roll.

CORDAGE.—British manila has advanced ½c. and is now quoted at 14c. Other lines are unchanged in price. The demand, for the season, is quite satisfactory. We quote: Manila, 16c.; British, manila, 14c.; sisal, 12½c.; lathyarn, 11c. Prices on binder twine are as follows: Blue ribbon, 650 feet to the pound, 14½c.; Redcat, 600 feet to the pound, 13½c.; Tiger, 550 feet to the pound, 12½c.; Standard, 500 feet to the pound, 11c.; sisal, 500 feet to the pound, 11c. Prices are subject to a rebate of ½c. in carload lots.

RIVETS AND BURRS.—There has been a better movement this week. The discounts are as follows: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., coopers' rivets and tinned swedes rivets, 60 and 10 per cent.; swedes iron burrs are quoted at 55 per cent. off; copper rivets, 35 and 5 per cent. off, and coppered iron rivets and burrs, in 5-lb. carton boxes, are quoted at 60 and 10 per cent. off list.

SCREEN WIRE CLOTH.—Business is brisk. We quote $1.25 per 100 square feet.

POULTRY NETTING. There is a fair trade doing. Canadian or English is discounted at 60 per cent. off 2 x 2 mesh, 19 wire, and 55 per cent. off 2 x 2 mesh, heavier, Canadian list.

HARVEST TOOLS.—There is some business doing, but the market is still quiet. Discount is 70 per cent.

FIREBRICKS.—There is no change. We quote: Scotch, $19 to $23.50; English, $18.50 to $22.50 per 1,000.

CEMENT.—This is selling fairly well. Prices steady and unchanged. We quote: German cement, $2.30 to $2.40; English, $2.25 to $2.35; Belgian, $1.70 to $1.95 per bbl. ex-wharf, and American, $2.20 to $2.30 ex-cars.

METALS.

The local demand for most hardware metals is very good and prices are firm. The position of metals in the primary markets is as strong as ever. Several advances have been made there. Canada plates have gone up 5s. per ton; sheet lead, 2s. 6d. per ton; terne plates, 1s. per box; charcoals, 10s. 3d. per box, and cokes, 10s. ½d. per box. Dealers are quoting the same prices as last week on this market, but present stocks on many metals are running low, and an advance is looked for. We quote:

PIG IRON.—Summerlee, $21 to $21.50; Canadian, $18.50 to $19.

BAR IRON.—The market is active. Merchants' bar, in small lots, sells for $1.95; horseshoe iron, $2.15 to $2.20.

BLACK SHEETS.—Trade is fair at

Don't sink it in stuff you cannot recommend.

If you are not wholly convinced that

"Ark Brand" Paint

is the best ready-mixed paint on the market send for our booklet and see what our customers say about it.

THE FRANCIS-FROST Co. Limited
TORONTO.

Canadian Distributing Agents for Grippin's Crack Filler.

current quotations. We quote : 28 gauge, $2.65 ; 26 gauge, $2.60 ; 20 to 24 gauge, $2.50, and 8 to 20 gauge, $2.50.

GALVANIZED IRON.—There is not much doing. We quote as follows : No. 28, Queen's Head, $4.40 ; Apollo, 10¾ oz., $4.40 ; Comet, $4.25 with 10c. extra in less than case lots.

INGOT COPPER.—The price is 14c.

INGOT TIN.—Some improvement is noted this week. Straits are quoted at 29 cents.

PIG LEAD.—There is an active inquiry for pig lead at $3.25.

LEAD PIPE.—Business is moderate and the prices are unchanged. Composition waste sells for 7½c., and ordinary 7c. The discount is 35 per cent.

IRON PIPE.—The market is active, and nothing new in prices has occurred during the week. We quote, per 100 feet, for standard pipe, screwed and coupled, in lengths under 19 feet, as follows : Black pipe, ⅛, $3 ; ¼, $2.50 ; ⅜, $2.75 ; ½, $3 ; ¾, $3.70 ; 1-inch, $5.25 ; 1¼, $7.40 ; 1½, $8.90 ; 2-inch, $12.40 Galvanized, ⅜, $3.55 ; ½, $4 ; ¾, $5.05 ; 1-inch, $7.25 ; 1¼, $10 10 ; 1½, $12.15 ; 2-inch, $16.70. Extra heavy pipe, plain ends, are quoted, per 100 feet, as follows : Black, ¼, $4.35 ; ¾, $5.30 ; 1-inch, $7.60 ; 1¼, $10.60 ; 1½, $12.70 ; 2-inch, $17.45. Galvanized, ¼, $5.35 ; ⅜, $6.70 ; 1-inch, $9.60 ; 1¼, $13.30; 1½, $15.95 ; 2-inch, $21.75. For threads and couplings, 5 per cent. is added.

TINPLATES.—The local market is quite firm. An advance in both cokes and charcoals has been made in the primary markets, but prices, locally, are as yet unchanged. A very good business is doing. The price for cokes is $4.25 to $4.50 per box ; for charcoal, $4.75 to $5.25 per box.

CANADA PLATE.—This, also, is a rising market in the Old Country, and here prices are stiffening but can be quoted at last week's figures still. We quote as follows : 52's, $2.65 to $2.70 ; 60's, $2.75 to $2.80 ; 75's, $2.80 to $2.85 ; full polished, $3.75, and galvanized, $4.25 to $4.35.

STEEL.—Since the advance of last week there have been no further changes in prices. The market continues active. We quote : Sleighshoe, $2.10; tire, $2.15 ; bar, $2.05 ; spring, $2.85 ; machinery, $3; toecalk, $2.60.

SHEET STEEL.—There is little doing. We quote : Nos. 10 to 20, $2.50 ; 3-16, $2.50 ; ¼, 5-16 and ⅜, $2.40.

TOOL STEEL.—Trade shows some slight improvement, but there is still only a light demand. Diamond is quoted at 8c., and Jessop's at 13c.

TERNE PLATES.—The price is somewhat firmer here, due in a measure to an advance of 1s. per box in the primary markets, but no quotable change has taken place. Terne plates are not a seasonable commodity just yet, and the demand has not improved. The price remains at $7.75 to $8.

COIL CHAIN.—The market continues in an active state, and prices are firm. Stocks are becoming low in some sizes and an advance in the price is by no means unlikely. At present there is no change to note. We quote as follows: No. 6, 12½c.; No. 5, 10½c.; No. 4, 10c.: No. 3, 9½c.; ¼-in., 7¼c. per lb.; 5-16, $4.80 ; 5-16 exact, $5.25 ; ⅜, $4.25 ; 7-16, $4.05 ; ½, $3.85 ; 9-16, $3.75 ; ⅝, $3.55 ; ¾, $3.50 ; ⅞, $3.45 ; 1-in., $3.45. In carload lots an allowance of 10c. is made.

SHEET ZINC.—We quote $5.75 to $6.25.

ANTIMONY.—The market is dull. The price is 10c.

ZINC SPELTER.—There has been no improvement in the demand, which is still very light. We quote 5c.

SOLDER.—In solder there is a good business doing at steady prices. The price of bar solder is 18c., and of wire solder, 20c.

PAINTS AND OILS.

A change for the better has come over the paint and oil trade. Business started off with a tremendous volume, and with the advent of March a large number of orders were received by the leading manufacturers, all of whom seem to be going along at a quick step. In view of such conditions it is almost unnecessary to say that prices are firm in all lines. Liquid paints, especially, are in good demand. On account of the high price and scarcity of linseed oil some makers are thinking of asking an advance in the present price of ready-mixed colors, and if such a movement be general, it will be advisable for hardware merchants who make a specialty of this branch of the trade to look well forward for their supplies. Bridge and construction paints, such as oxides, graphites, and black japans are being largely inquired after, and a good, healthy tone seems to permeate the whole of this trade in this market.

Linseed oil is reported to be somewhat easier on the primary markets, but the change has not been pronounced enough

to warrant any change in the local market. At all events, there is little to justify anyone in taking a lower price here. Turpentine continues to fluctuate, but the market shows no decided tendency either up or down. We quote :

WHITE LEAD.—Best brands, Government standard, $5.87½; No. 1, $5.50 ; No. 2 $5.12½ ; No. 3, $4.75 ; No. 4, $4.37½ all f.o.b. Montreal. Terms, 3 per cent. cash or four months.

DRY WHITE LEAD—$5.25 in casks ; kegs, $5.50.

DRY WHITE ZINC — Pure dry, 6¼c. ; No. 1, 5¼c. ; in oil, pure, 7¼c. ; No. 1, 6¼c. ; No. 2, 5¼c.

PUTTY — We quote : Bulk, in bbls., $1.90 per 100 lb. ; bulk, in less quantity, $2.05 ; bladders, in bbls., $2.25 ; bladders, in 100 or 200 lb. kegs or boxes, $2.40 ; in tins, $2.55 to $2.65 ; in less than 100-lb. lots, $3 f.o.b. Montreal, Ottawa, Toronto, Hamilton, London and Guelph. Maritime Provinces, 10c. higher, f.o.b. St. John and Halifax.

ORANGE MINERAL—Casks, 7c. ; 100 lb. kegs, 7¼c. ; smaller quantities, 8¼c.

RED LEAD — Genuine red lead in casks, $4.50 ; in 100-lb. kegs, $4.75 ; less quantities, $5.75 per 100 lb. No. 1 red lead, casks, $4.25 ; kegs, $4.50, and smaller quantities, $5.50.

LITHARGE—Ground, casks, 5c. ; less, 5½c. ; flake litharge, casks, $5.25 ; smalls, $5.75 per 100 lb.

LINSEED OIL.—Raw, 80c.; boiled, 83c. In 5 to 9 bbls., 1c. less ; 10 to 20 bbl. lots open, net cash, plus 2c. for four months. Delivered anywhere in Ontario between Montreal and Oshawa at 2c. per gal. advance and freight allowed.

TURPENTINE.—Single bbls., 67c. ; 2 to 4 bbls., 66c. ; 5 bbls. and over, open terms.

SHELLAC VARNISH — Pure white, $2.35 to $2.45 ; orange, $2.25 to $2.35.

MIXED PAINTS—$1.20 to $1.45 per gal.

CASTOR OIL—8¾ to 9¼c. in wholesale lots, and ½c. additional for small lots.

SEAL OIL—47½ to 49c.

COD OIL—32½ to 35c.

PARIS GREEN — Petroleum barrels, 16¾c. per lb.; arsenic kegs, 17c.; 50 and 100-lb. drums, 17½c.; 25-lb. drums, 18c. ; 1-lb. packages, 18½c.; ½-lb. packages, 20½c.; 1-lb. tins, 19½c.; ½-lb. tins, 21½c. f.o.b. Montreal. Terms : 3 per cent. 30 days, or four months from date of delivery.

SCRAP METALS.

The scarcity of all kinds of iron continues to be the only feature in the scrap metal market. Cast iron cannot be obtained. A moderate business is being done, though the market is not as active as the season warrants. We quote : Heavy copper and wire, 11½c. per lb. ; light copper, 9c,; heavy red brass, 11c. ; heavy yellow, 9c.; light brass, 6c.; lead, 2⅜ to 2⅝c.; zinc, 2 to 2¼c.; iron, No. 1 wrought, $17 ; machinery scrap, $16 ; stove plate, $9 to $11 ; light iron, No. 2, $7 per ton ; malleable and steel, $4 ; rags, country, 60 to 70c. per 100 lb.; old rubbers, 6 to 6½c. per lb.

GLASS.

There is nothing new to report in the situation of glass. A good trade is doing at firm prices. We quote as follows: First break, 50 feet, $2.10 ; second, $2.20 for 50 feet ; first break, 100 feet, $4.00 ; second break, $4.20 ; third break, $4.70 ; fourth break, $4.95.

HIDES.

The market is dull. Prices are steady, as follows : No. 1 hides, 7c.; No. 2, 6c.; No. 3, 5c. Lambskins, 65c.

ONTARIO MARKETS.

Toronto, March 7, 1902.

HARDWARE.

THE warm spring-like weather of the past week has had quite a stimulating effect upon the wholesale hardware trade, and the quietness which characterized the shipping rooms of the various firms has given place to a decided activity. The demand is good for such seasonable lines as horse clippers, clipping machines, pruning shears, sprayers, spray pumps, barb wire, plain galvanized wire, manure forks, corn planters, game traps, etc. There is a moderate demand for wire nails. Bolts, rivets and screws are all going out fairly well. Very little is being done in horseshoes and horse nails. One feature of trade this week is the rather good quantities of hardware that are being shipped to points in New Ontario, the desire evidently being to get the goods in before the roads break up.

BARB WIRE.—A number of shipments are going forward this week. We quote : F.o.b. Cleveland, $2.77½ for less than carlots, and $2.65 for carlots. From stock Toronto, $3.

GALVANIZED WIRE.—There is quite a good movement in this line. Our quotations are as follows : Nos. 6, 7 and 8, $3.50 to $3.85 per 100 lb., according to quantity ; No. 9, $2.85 to $3.15 ; No. 10, $3.60 to $3.95 ; No. 11, $3.70 to $4.10 ; No. 12, $3 to $3.30 ; No. 13, $3.10 to $3.40 ; No. 14, $4.10 to $4.50 ; No. 15, $4.60 to $5.50 ; No. 16, $4.85 to $5.35 Nos. 6 to 9 base f.o.b. Cleveland are quoted at $2.52½ in less than carlots and 12c. less for carlots of 15 tons.

SMOOTH STEEL WIRE.—There is some demand this week for hay-baling wire, but very little is being done in this line. The base price is $2.60 per 100 lb. Oiling, 10c.; coppering, 60c.;and tinning, $2 per 100 lb. extra. Delivery points Toronto, Hamilton, London and Montreal, with freights equalized on those points.

FINE STEEL WIRE.—There is a little being done. Discount is 22½ per cent.

WIRE NAILS.—The movement is steady although not large. Prices are steady and unchanged. Our quotations are as follows : $2.55 for less than carlots and $2.50 for carlots. Delivery points, Toronto, Hamilton, London, Gananoque and Montreal.

CUT NAILS.—Trade is still quiet. The base price is $2.35 per keg, with 7½c. allowance on carlots.

HORSE NAILS.—There is very little doing. Discounts are as follows : "C" brand, oval head, 50 and 7½ per cent., and on "M" and other brands, 50, 10 and 5 per cent. Countersunk head 60 per cent.

HORSESHOES.—Business is only light. We quote f.o.b. Toronto as follows : Iron shoes, No. 2 and larger, light, medium and heavy, $3.60 ; snow shoes, $3.85 ; light steel shoes, $3.70 ; featherweight (all sizes), $4.95 ; iron shoes, No. 1 and smaller, light, medium and heavy (all sizes), $3.85 ; snow shoes, $4 ; light steel shoes, $3.95 ; featherweight (all sizes), $4.95.

SCREWS.—A fairly good movement is to be noted this week. The discounts are as follows : Flat head bright, 87½ and 10 per cent.; round head bright, 82½ and 10 per cent.; flat head brass, 80 and 10 per cent.; round head brass, 75 and 10 per cent.; round head bronze, 65 per cent., and flat head bronze 70 per cent.

RIVETS AND BURRS.—Business is fair. We quote : Iron rivets, 60 and 10 per cent.; iron burrs, 55 per cent.; copper rivets, with usual proportion of burrs, 45 and 10 per cent.; copper burrs alone, 30 and 10 per cent.

BOLTS AND NUTS.—A good trade is being done this week and prices are firm. We quote : Carriage bolts, common (S1 list), 55 and 5 per cent.; carriage bolts, full square ($2.40 list), 60 and 5 per cent.; carriage bolts, Norway iron ($3 list), 60 and 5 per cent.; machine bolts, all sizes, 55 and 5 per cent.; coach screws, 70 per cent.

ROPE.—An advance of ½c. per lb. has taken place in the price of British manila, making the figure 14c. Sisal lead cord is 20 per cent. higher, and we quote 3 cord as follows : 48 ft., 65c.; 60 ft., 80c.; 72 ft., 95c. per dozen. We quote : Pure manila, 16c.; British manila, 14c.; sisal, 12½c.; lathyarn, 11c.

PINE TAR. The makers of pine tar have advanced their prices 10 per cent., and we quote ½-pint tins at $7.80 and 1-pint tins at $9.60 per dozen.

MILK-CAN TRIMMINGS.—Business is good and discount unchanged at 25 per cent.

SAP BUCKETS. The movement in sap buckets is brisk. The discount is 40 and 10 per cent.

EAVETROUGHS.—Business is fairly active. We quote 10-in. at $3.10 per 100 feet.

SCREEN DOORS AND WINDOWS.—

We have on hand a large stock of steel sheets for making

EMBOSSED CEILINGS,

etc., and are now prepared to make prompt shipment of anything required in our line, and shall be pleased to receive your orders which shall have our best attention.

The Metallic Roofing Co.
LIMITED
Wholesale Manufacturers
TORONTO, - - - CANADA

Shipments are not yet being made and not many orders are coming forward. Common doors, 2 or 3 panel, are quoted f.o.b. factory points as follows: Walnut, stained, 3-in. style, $6.80 per dozen; stained, yellow, $7; natural color, oil finish, $8.15; 4-in. style, 20c. extra per dozen. Windows: No. 0, $1.60; No. 1, $1.70; No. 2, $1.95; No. 3, $2.10; No. 4, $2 50 per dozen.

GREEN WIRE CLOTH. Very little of this is being shipped. We quote $1.25 per 100 square feet.

SPADES AND SHOVELS.—These are moving out fairly well this week. Discount 40 and 5 per cent.

HARVEST TOOLS.—A big demand has developed during the week for manure forks, and country dealers are pressing for prompt shipments. Discount 70 per cent.

BUILDING PAPER.—Quite a few orders are coming in and a good many shipments are being made. We quote: Dry sheathing, grey or straw, 30c. per roll; tar sheathing, grey or straw, 40c. per roll; dry fibre, 50c. per roll; tarred fibre, 60c per roll.

CUTLERY.—A steady trade is to be noted this week.

SPORTING GOODS.—Some of the manufacturers in the United States are advancing their prices on Flobert rifles and single barreled guns about 10 per cent. Local wholesalers report that large quantities of game traps are being shipped this week.

LAWN MOWERS.—Some business is being done. We quote: Discount on high wheel mowers, 50 per cent.; "Star" mowers, 9 in. wheels, $2.50 to $3; "Daisy" mowers, 17-in. wheels, $2.25 to $2.50.

WHEELBARROWS.—Jobbers are advancing their prices on navvy barrows. The manufacturers advanced their figures some time ago. We quote full-bolted at $18 per dozen, for wood wheels, and $21 for iron wheels.

CHAIN.—There is quite a good movement in this line this week.

CHURNS.—Quite a number of orders are being received this week.

CEMENT.—Trade still continues to improve. We quote: Canadian Portland, $1.90 to $2.65; English, $3; German, $3.15; Belgian, $2.50 to $2.75; Canadian hydraulic, $1 25 to $1.50 per bbl.

METALS.

The condition of the iron and steel market continues strong and healthy. The demand for sheet metals is good both on import account and for shipment from stock.

PIG IRON. The market is still strong and business steady. We quote: Canadian pig, $19 for No. 1, and $18.25 to $18.50 for No. 2 on track, Toronto.

BAR IRON.—Prices have advanced $2 per ton in the United States, but while no change has been made here prices are firm. The demand for bar iron is fair. The base price is $1.95 to $2.05. Extras cut to length while rolling: 2 ft. and over, 10c. per 100 lb.; 1 ft. and under 2 ft., 15c.; under 1 ft., 20c.; over 20 ft. by special agreement, according to length and size.

STEEL.—The situation in steel continues strong and the difficulty of getting delivery is still a feature of the trade. In the United States steel bars have been advanced $2 per ton since our last review of the market. Quotations by Toronto wholesalers are: Merchantable cast steel, 9 to 15c. per lb.; drill steel, 8 to 10c. per lb.; "B C" and "Black Diamond" tool steel, 10 to 11c.; Jessop's, Morton's and Firth's tool steel, 14c.; toe-calk steel, $2.85 to $3; tire steel, $2.30 to $2.50; sleighshoe steel, $2.10 to $2.25; reeled machinery steel, $3; hoop steel, $2.90.

BLACK SHEETS.—Local wholesalers are experiencing an active demand this week. We quote as follows: Common, $3.15 for 28 gauge; and dead flat, $2.50 for 26 gauge.

CANADA PLATES.—A good business is being done on import account, but from stock little is being done. We quote as follows: All dull, $3; half polished, $3.10; all bright, $3.75.

GALVANIZED SHEETS.—There is quite an active demand. A good business is being done on import account. We quote: "Queen's Head" brand at $4.50 in case lots, and $4.65 in less quantities.

TIN.—The outside markets are firm. On Wednesday London closed at an advance of 15s. on spot and 12s. 6d. on futures compared with the previous day. In Toronto during the past week business has been very fair, and quotations still rule at $28 to $29.

TINPLATES.—The demand continues good and stocks are being rapidly reduced. We quote I C at $4.25 per box.

TINNED SHEETS.—The demand has improved during the past week and a good business is now being done. We quote as follows: 72 x 30, up to 24 gauge, 7½c.; ditto, up to 26 gauge, 8c.

COPPER.—There is a good demand for ingot copper and a fair trade is reported in sheet copper. The outside markets are firmer. Locally, prices are unchanged. We quote: Half-and-half, guaranteed, 19c.; do. commercial, 18½c.; refined, 18c.; wiping, 17½c.

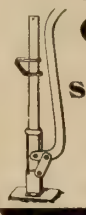
BRASS.—Trade is fair and the discount unchanged at 15 per cent.

PIG LEAD.—Business is active. Although the London market closed slightly lower on Wednesday the general market is strong. There is a heavy consumptive demand in the United States, and stocks there have been reduced to a minimum. Locally we still quote $3.50 to $3.75 for pig, and $5 for bar lead.

IRON PIPE.—Prices are firm and there is a fair demand. We quote: Black pipe, $5.40 for 1-in.; galvanized, $7.95 for 1-in.

ZINC SPELTER.—There is some trading in small lots. We quote $5.50 to $6 per 100 lb.

ZINC SHEET.—Only a fair amount of business is being done. We quote $6 to $6.25 in casks and $6.25 to $6.50 in part casks.



SOLDER. The demand is good. We quote: Half-and-half, guaranteed, 19c.; do. commercial, 18½c.; refined, 18c.; wiping, 17½c.

ANTIMONY.—There is a light demand for small lots at 10c. per lb. for Cookson's.

PAINTS AND OILS.

The market for raw and boiled linseed oil and turpentine continues strong, and prices are unchanged. Business has commenced recovering from its quietness of the past winter, and jobbers are busy on their spring orders. Mixed paints and white lead are quite active, while varnishes are active and firm, with an upward tendency, on account of the high prices which are now being asked for varnish gums. The White Lead Grinders' Association is at present holding a meeting to consider the

SESSENWEIN BROS., - Montreal

HIDES, SKINS AND WOOL.

There is a moderate demand for green and cured hides, and skins are steady. Wool is still quiet. We quote buyers' prices on arrival:

HIDES—We quote: No. 1, green, 7c.; No. 2 green, 6c.; No. 1 green, steers, 8c.; No. 2 green, steers, 7c.; cured, 7¾ to 8c.

SKINS—We quote: No. 1 calfskins, 9c.; and No. 2, 7c.; deacons (dairies) 55 to 60c. each; sheepskins, 65 to 80c.; deerskins, 12½ to 14c. per lb.

WOOL—We quote: Fleece, 13c., and unwashed, 7 to 8c. per lb.

SEEDS.

Owing to the heavy roads, the receipts of red clover and alsike have been greatly diminished, and prices have accordingly been advanced 15c. per bush. for red clover and 25c. for alsike. The market is steady at these prices. We quote buying price at outside points: Red clover, $4.50 to $4 75; alsike, $7.25 to $8.25, and timothy, $2.50 to $3 25 per bush.

COAL.

The recent washouts in the United States have resulted in such a delay that exporters are a week behind with their orders, consequently making the strigency here the greater. The local supply of soft and hard coal is small. Prices are nominal. We quote at international bridges as follows: Grate, $4 75 per gross ton; egg, stove and nut, $5 per gross ton; soft coal, $2.50 to $3.25 in bond, according to grade.

PETROLEUM.

There is a fair demand, and prices are unchanged. We quote: Pratt's Astral, 16½ to 17c. in bulk (barrels, extra); American water white, 17 to 17½c. in barrels; Photogene, 16½ to 17c.; Sarnia water white, 16 to 16½c. in barrels; Sarnia prime white, 14½ to 15c. in barrels.

MARKET NOTES.

Sisal bed cord is about 20 per cent. higher.

"British Manila" rope is ½c. per lb. higher at 14c.

H. S. Howland, Sons & Co. are in receipt of shipments of Boker's razors and Wostenholm's pocket knives.

Some of the manufacturers in the United States are advancing their prices on Flobert rifles and single-barrel guns 10 per cent.

NOVA SCOTIA MARKETS.

Halifax, N.S., March 4, 1902.

A WEEK ago I reported that the hardware trade was brightening up, and during the last week there have been abundant signs that the trade has almost overcome the usual mid-winter dullness, and everything is looking well for the spring trade. The wholesalers are getting in large importations of their spring stock and making up advance orders ready for early spring shipment. Orders are coming in of considerable value and in good number, and the prospects are considered unusually bright.

* * *

The mild weather and the apparent breakup of winter has opened up all the ice-closed shore ports and the fishermen are overlooking their boats and gear and have commenced to order the necessary supplies somewhat earlier than usual. This creates quite an activity among those merchants who make a specialty of fishing gear and supplies.

* * *

Considerable hardware was thrown on the market last week, consisting of tinplates, chains, and other iron and steel material, from the cargo of the wrecked steamer Grecian. The auctioneer, however, was accommodating and everything was sold in large lots, thus throwing it into the hands of the regular dealers, and there will be no reduction in price to affect this market except in the case of damaged goods.

* * *

Prices are firm and materially unchanged owing to the firmness of the iron and steel markets of the United Kingdom and the United States. So great is the demand abroad that Mr. James Ross, manager of The Dominion Iron and Steel Co., Sydney, has announced that it is not material just now to the success of that industry that the company should either run its blooming mills for the manufacture of steel ingots, or the mill for manufacture of steel rails. The company can, he says, find a market for their steel billets faster than they are turned out.

* * *

Building operations are largely contemplated throughout the Provinces this summer, and the demand for builders' hardware continues fair and will increase steadily. Prices are firm: Cut nails, $2.35 base; wire, $2.55. Dealers expect these to advance slightly within the next month.

* * *

Though tinware has largely gone out of use for kitchen utensils, being replaced by enamelled ware, and the greater quantity of tin goods is bought ready-made, there is a large demand for tinplates through the lobster-packers, who make up their spring stock during the winter months. This demand is now about over for heavy orders, but the prices remain firm at regular quotations: $4 to $4.25 for I C coke; $4.50 for I C charcoal; $5 for I X charcoal.

* * *

Linseed oil remains firm at prices last quoted, 85 and 88c. for raw and boiled respectively. The demand is fair and there is considerable stock in this market. Prices are not expected to be lower until the seed-crop in Argentina and other localities is definitely figured up. Reports anticipate quite a shortage.

* * *

The demand in building paper is good, consequent on conditions already noted. Regular stock is quoted at $1.80 per 100 lb. for tarred, and 35c. a roll for dry. These prices are some 5c. lower than prices quoted a month ago.

* * *

As a general rule the retail trade is brightening up and there is every prospect of a good spring business ahead for both wholesale and retail.

R. C. H.

SARNIA BOARD OF TRADE.

At the annual meeting of the Sarnia, Ont., Board of Trade, President A. D. McLean in the chair, communications were received from the Toronto Board of Trade recommending that Great Britain adopt a preferential tariff for wheat and all other grains produced within the Empire; and also from the Windsor Board of Trade recommending the abolition of fees for overtime for Customs officials. It is claimed that such fees are a hardship to local corporations and private individuals.

The treasurer's report showed that after paying all accounts there was a balance of $177.02 in the treasury.

The officers elected for 1902 were as follows:

President—A. D. McLean.
Secretary—C. S. Ellis.
Treasurer—F. J. Winlow.

The 1901 council was elected for 1902.

Secretary Ellis was instructed to correspond with the F. & P. M. Railway relative to crossing connections at Sarnia, and with the M. C. R., requesting them to come to Sarnia.

W. J. Proctor urged the board to make representations to the stockholders of the Grand Trunk Railway in England regarding the way that railway's management is taking everything away from Sarnia and making Port Huron the principal terminal. Even the local trains going east now start from Port Huron. This was done to extort fees for the passage of trains through the tunnel.

It was stated that the new elevator which the Grand Trunk is building at Point Edward will not be completed this year, and it was thought that something ought to be done to secure this elevator for Sarnia.

UNJUST FREIGHT RATES.

Some time ago action was taken against the White Pass & Yukon Railway Company by a Victoria, B.C., firm for the recovery of freight and passenger rates, which that railway had illegally extorted from them owing to their tariff not being approved by the Dominion Government, and also because these rates are alleged to be unjust and extortionate.

Justice Martin, of the Supreme Court, has decided that a right of action exists against the railway on this head under the Railway Act. Consequently three more writs have been issued by Victoria firms. These are on behalf of the Upper Yukon Consolidated Company, Joseph Clearihue and J. St. Clair Blackett & Co. The claim of the latter firm is $40,000.

So far the total amounts sued for are over $300,000, and in addition the Victoria-Yukon Trading and Transportation Company is bringing in a claim for $100,000. It is estimated that when all the firms have taken action, the writs issued in Victoria alone against the railway will bring the total up to three-quarters of a million dollars. These cases are all expected to be tried at the March Assizes.

HORSE NAILS

Are like other articles:—"You pay your money and you take your choice." If you want the best Horse Nails, you have to pay the best price, simply because the best article costs the most to produce. We could make "low-priced" Horse Nails as well as any other maker in Canada, but it would be at the sacrifice of quality. We have been loyally supported by the trade in our endeavors to make only the best, and we offer the **"C"** brand, made by this Company since 1865, as representing the perfection of Horse-Nail manufacture in this country.

They are made exclusively from the best obtainable imported Swedish Charcoal Mild Steel Nail Rods, which are hot hammer forged, giving all the good qualities of the old-fashioned hand-made Nail, but with greater uniformity. The difference between the cost of our Nails and the low-priced inferior goods sold only represents a trifle in the Nails used in shoeing a horse. One-third of one cent is the difference on a set of shoes, when the difference in price is one cent per pound.

Don't sacrifice quality; support the manufacturer who is trying to make the best goods. Order from your wholesale dealer the **"C"** brand made by the

Canada Horse Nail Company,

Mr. D. G. Bell, of Bell & McEachern, general merchants, Stayner, Ont., was in Toronto this week for a few days. He said that while the recent storms had interfered with business a great deal, trade conditions were now much improved, and the outlook was bright.

GALT BOARD OF TRADE.

A MEETING of the Galt Board of Trade was held on February 27, when a report of the present condition of beet-sugar affairs in that centre was presented. The beet-sugar committee reported progress, and said that things were in a satisfactory shape.

F. Stewart Scott gave an account of his visit to Ottawa. He was a member of the deputation that waited on the Government, asking that for one year longer machinery for the manufacture of beet sugar be admitted free, and also requesting the imposition of countervailing duties against bounty-fed sugar.

Resolutions were received from the Toronto Board of Trade, stating that any tax imposed by Great Britain on outside productions should be so levied as to grant a preference to the colonies within the Empire; from the Brantford Board of Trade, asking for a revision of the tariff to preserve our markets from unfair competition, and from the Orillia Board of Trade, praying for preferential trade within the colonies.

THE WATER PAIL FORGE.

The idea must necessarily strike one as inconsistent that metals may be heated to a welding heat by dipping them in water, yet this in substance is what is accomplished by the strange "Water Pail Forge" of Lagrange and Hoho. It was discovered by these two experimenters that if an electric circuit was closed by dipping the negative terminal into a conducting liquid, the cathode or negative terminal became very hot, and would melt if the voltage was as high as 125 volts. In fundamental principle, it amounts simply to a means of transforming one form of energy into another, electricity into heat.

Burton found, after exhaustive experiments, that the best liquid was a solution of 10 parts of carbonate of soda and one part of borax dissolved in water until the specific gravity of the solution is 1.16 at 70 degrees Fahrenheit.

In February, 1894, Burton lectured in Boston. He used a wooden water pail containing the above solution, and in the bottom of the pail he placed a large lead sheet, which was made the positive pole. The negative pole consisted of an iron bar placed across the top of the pail. The current was taken from the street car mains, and had a voltage of about 240. The depth to which the metal was submerged was the only way to regulate the strength of the current. The metal to be heated or welded was placed in contact with the iron bar which was one terminal, and then on sliding the piece into the solution the circuit was completed, and the metal became hot. It required 4 seconds to heat nails to a welding heat, and 1 minute to heat a large soldering iron to a bright red.

The advantage of the forge lies in its convenience and the fact that the iron does not scale. Welds can be made in the liquid, or the pieces can be heated in the liquid and then welded upon the ordinary anvil. This forge may have a great future before it, but at present the cost of the electric current is too great and the imperfections of the forge too numerous to admit of putting it to practical use.—American Blacksmith.

700 TONS OF RAILS A DAY.

The Toronto Globe of March 7 said: "A visitor to the Parliament Buildings yesterday was Mr. F. H. Clergue, the well-known Sault Ste. Marie capitalist. Mr. Clergue said to a representative of The Globe that his visit was for the purpose of inviting the members of the Government to visit the Soo and witness the process of steel-making in his new plant, which, he said, would be turning out 700 tons of steel rails per day by the end of the month. He said that there were now 6,000 men employed in the syndicate's various works, and that that number would probably be increased to 10,000 by midsummer. Surveys on the Manitoulin & North Shore Railway had been completed, and the line would by fall be built from Meaford to Owen Sound at the south end, and from Sudbury to Little Current at the north end. He also stated that the line had been almost located from Sudbury to Sault Ste. Marie, paralleling the Soo branch at a distance of from 30 to 50 miles to the north. Three thousand men were now at work on the Algoma Central Railway, and he expected that its whole length of 225 miles would be completed before the end of the season. Arrangements had been made for bringing out 3,000 Scandinavian settlers this spring, which he hoped to repeat annually for some years to come."

"IRON AND STEEL" CHANGES HANDS.

Iron and Steel, a publication which for 40 years has represented the iron and steel industry of Chicago and vicinity, was issued on March 1 under new ownership. The Bruce V. Crandall Company are the new proprietors, and an effort is to be made to make Iron and Steel even more interesting and valuable to the trade it represents than before. Improvements, in fact, are already noticeable.

THE LATE MR. D. J. M'ARTHUR.

Mr. David J. McArthur, president of Colin McArthur & Co., Montreal, died at his residence in that city, 52 Park avenue, on Wednesday morning, February 26. He had been suffering for about a month from an attack of pneumonia, and it was this that caused his death.

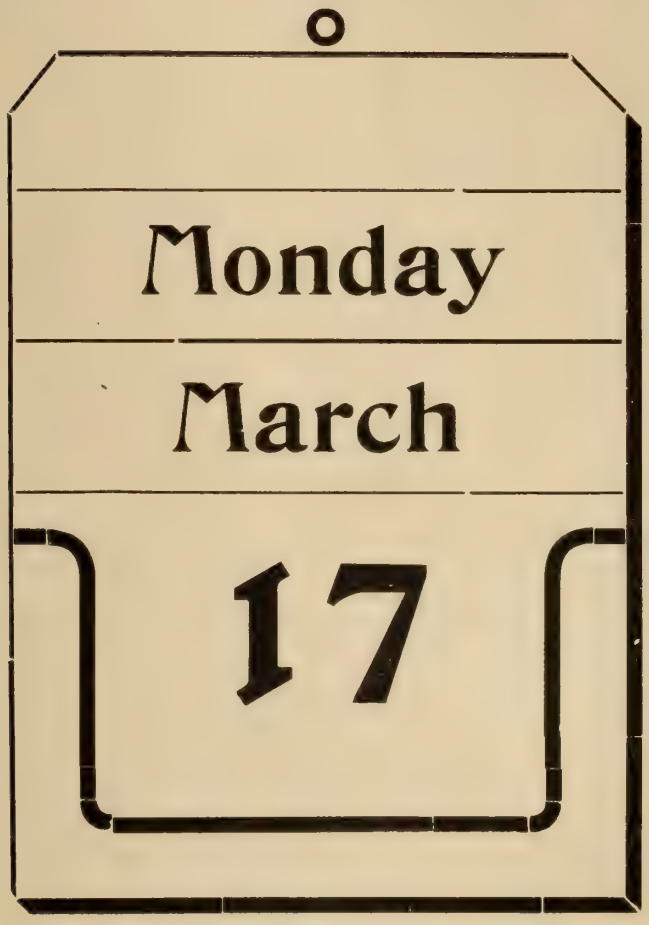
Mr. McArthur was a comparatively young man, having been born in Glasgow, Scotland, in 1861. When still a young boy he came to Canada with his father, the late Colin McArthur. He subsequently went into the business conducted by his father, and when the latter died, a few months ago, he became president of the company.

A widow and three young children survive him. The funeral, which took place on Friday, February 28, was very largely attended by the employes of the firm, as well as many of Mr. McArthur's friends, of whom he had made a great number in both his business and social relations.

WALKERTON BOARD OF TRADE.

The annual meeting of the Walkerton Board of Trade was held on February 27, when the following officers were elected:

President—L. C. Benton.
Vice-President—H. A. Havill.
Secretary—D. Traill.
Treasurer—J. W. Bundy.
Council—Messrs. Truax, Hefferman, Huether, McIntyre, Munroe, Robertson, Vogan and Lembke.



A SOLAR MOTOR.

From an engineering point of view, says A. G. Miner in Shop Talk, the solar motor erected at the ostrich farm at South Pasadena, Cal., is of quite an interest. This means of utilizing the heat energy which comes from the sun is the outcome of many investigations and experiments in that line and is only one of the various means that have long been experimented with to utilize the earth's natural forces. Tidal machinery is another one of these power-developing ideas. Properly utilized this form of motor should serve to somewhat allay the fears of those who predict the exhaustion of the world's coal supply and the subsequent end of the world.

The reflector is in the shape of a huge open umbrella, 32 feet in diameter. The parabolic reflecting surface, 640 square feet, is always automatically turned toward the sun by means of clock work, so that the rays are focussed in rings on the central tube or boiler, which takes the place of the stick in the umbrella. The boiler is a tubular one holding about 100 gallons of water. At a test 192 lb. of water per hour was evaporated, forming steam of 150 lb pressure. The boiler is used to supply steam for pumping water for irrigating purposes, and at this test the pumps delivered 1,400 gallons of water per minute against a head of 12 feet.

Naturally, the efficiency of the motor is decreased in the absence of direct sunshine, but it generates steam nevertheless, and is located in a country where the sun is to be depended upon. It is rated at about 15 horsepower and cost approximately $2,500.

HEATING AND PLUMBING

AN IMPORTANT JOB FINISHED.

THE Bennett & Wright Co., Limited, Toronto, have completed their contract for the plumbing, heating and electric wiring of the new free consumptive hospital at Gravenhurst, Ont. There are over 300 electric lights and 120 hot water radiators installed in that building, which are supplied with steam at a low pressure from a 45-horse-power boiler in the basement, conveyed by over 3,000 feet of piping.

In the whole building there are eight bathrooms. These are equipped with porcelain baths, 5 ft. 6 in. x 2 ft. 6 in., of most approved design, and syphon jet-water closets, a type which is considered most sanitary. In this hospital there are also 25 water basins all handsomely fitted up.

Two large tanks of several hundred barrels capacity are situated at the top of the building, and supply the water to the bathrooms, etc. An hydraulic ram, about 500 yards away from the building, furnishes the water supply.

What is known as the Geo. S. Waring system has been adopted for the disposal of the sewage. This consists of a settling chamber, a discharge chamber and an automatic flushing syphon jet, all at a considerable distance from the structure. This syphon periodically discharges the liquid sewage into agricultural tiles, which cover an area of three acres, where it is disposed of.

The Bennett & Wright Co., Limited, have also been doing work on the present main Sanitorium, Gravenhurst.

PLUMBING AND HEATING CONTRACTS.

Purdy, Mansell & Co., Toronto, have secured the contract from the Ontario Government for the heating of the new physical and biological laboratory at the Ontario Agricultural College, Guelph, and the plumbing and heating of the new Collegiate Institute at Cobourg, Ont.

HOW TO TEMPER AND HARDEN TAPS.

A successful method of tempering and hardening taps is described by W. B. Allen in The American Blacksmith :

The completed tap is first brought to a blood red and even heat. Dissolve a handful of salt in a bucket of clean water, set the water to whirling by stirring in it a stick and thrust the heated tap vertically into the votex of the whirlpool.

The tap is to be drawn to a straw color. Heat a piece of cast iron tube to a dull red heat. The tap is then to be held in the centre of the tube and carefully turned until the proper color is produced. Quenching will fix the color and finish the tap.

BUILDING PERMITS IN TORONTO.

BUILDING permits in Toronto during the week have been granted as follows : W. Keeler, for a two-storey brick dwelling on 92, alterations to dwelling on 94 and a brick and roughcast dwelling on 96 Givens street, for $2,000 ; John Westcoth, for five attached two storey brick stores on Fuller street, for $4 000 ; Samuel Carruthers, for a pair of one-storey and mansard brick-front and roughcast dwellings on Gerrard street, for $1,900 ; T. Granthan, for alterations to his dwelling on 255 Ontario street, consisting of a brick front and planking cellar, for $150 ; Arthur J. Moody, for a two-storey brick and roughcast dwelling on 198 Hamilton street, for $1,000 ; E. Howard, for a two-storey brick detached dwelling on 63 Walker avenue, for $2,400 ; Wm. & J. G. Greey for a three-storey brick addition to their warehouse in rear of 51 Front street east, for $800 ; Mrs. M. Roberts, for a two storey detached roughcast dwelling on 175½ Howland avenue, for $850 ; J. S. Montgomery, for a pair of semi-detached two-storey and attic brick dwellings on Euclid avenue, for $6,000 ; W. F. Langlois, for a two storey roughcast stable in rear of 18 Gordon street, for $300 ; W. G. Magennis, for a two-storey frame and roughcast dwelling on Pearce avenue, for $400 ; Bates & Dodds, for alterations and additions to warehouse in rear of 931 Queen street west, for $450 ; Mrs. L. H. McFadden, for a brick and frame mansard roof to dwelling on Carlton street, for $250 ; Thomas Wright, for a detached two storey and attic brick dwelling on Chicora avenue, for $3 400 ; Mrs. Wm. Atkinson, for a pair of brick and stone two-storey semi-detached dwellings on Clarens avenue, for $3,000 ; John Melding, for a detached two-storey brick dwelling on College street, for $1,500.

The Fairchild Co., Limited, will erect a large brick and stone receiving, storage and shipping warehouse four storeys in height, at Winnipeg.

SOME BUILDING NOTES.

A new separate school is to be built at Parkdale, Toronto.

D. W. Teetzel is erecting a brick-veneered house at Ridgetown, Ont.

Douglas Davidson will build a residence on the Lake Shore Road, Mimico, Ont.

A residence is being built for Judge Gregory, on George street, Fredericton, N B.

A new three storey iron and glass structure, 55 x 165 ft., will be built for T. J. Trapp & Co., New Westminster, B.C.

At Portage la Prairie, Man., T. A. Newman & Bro. will erect a business block on Main street ; T. W. Prout will add a solid brick front to his warehouse on Main street ; J. F. Rowe, John Costigan and B. A. St. John will each erect business blocks ; The Graphic will build an addition to its premises on Campbell street, and G. W. Beynon and W. P. Campbell will both erect dwellings, as soon as spring opens up.

A RECIPE FOR ACID PICKLE FOR BRASS CASTINGS.

If greasy, the castings should be cleaned by boiling in lye or potash. The first pickle is composed of nitric acid, one quart ; water, six to eight quarts. After pickling in this mixture the castings should be washed in clear warm or hot water, and the following pickle be then used : Sulphuric acid, one quart ; nitric acid, two quarts ; muriatic acid, a few drops. The first pickle will remove the discolorations due to iron, if present. The muriatic acid of the second pickle will darken the color of the castings to an extent depending on the amount used. —American Machinist.

DOMINION IRON AND STEEL CO.

At a meeting in Montreal, on March 1, of the directors of The Dominion Iron and Steel Co., it was decided to issue new common stock to the amount of $10,000,000 to the shareholders. The whole of this amount has already been underwritten, and all that is now necessary is that the necessary legislation be granted by the Nova Scotia Government.

David Baker has been appointed general manager, in succession to A. J. Moxham, who recently resigned. During the fiscal year of the company, which closed on February 28 last, they had shipped over 2,650,000 tons of coal, as compared with 2,000,000 the year previous.

THE TRAVELLING SALESMAN IN RELATION TO THE RETAILER.*

By H. L. McNAMARA.

THE travelling salesman stands in several relations to the retailer, and not the least important of these would seem to be his friendship for him in giving him every point of advantage. As a rule, there is a motive behind this too obvious to mention. He is working for his own good while doing good to others, and certainly this is in accordance with good Christian doctrine. The house that employs the salesman don't think much of the doctrine, however. The house is apt to consider the doctrine quite unchristian, and sometimes harbors and even gives expression doctrine quite un Christian, and some

THE TRAVELLING AGENT AS AN EDUCATOR.

Aside from all pleasantries, however, the travelling salesman has one distinctive function to perform in his vocation, and this function is preeminently of an educational character. The travelling agent is an educator, and his most important and efficient work must lie in that direction.

WOULD NOT JUSTIFY THE EXPENSE.

To assume that the sales agent is sent out merely to be on hand when the retailer happens to be out of something, would make of him just an errand boy, and to go even a step farther, and say that he is sent out to keep competitors from monkeying with customers, would still hardly justify the expense. To be sure, the expense is eventually borne by the retailer, and he in turn gets it out of the customer. But the point is, couldn't the retailer send in his orders to the house, or any house, by mail, if it were simply a matter of ordering what he is out of, and save time and expense? Certainly he could. The agent then would have no particular office to perform.

REAL FUNCTION OF THE TRAVELLING MAN.

The fact is, however, that the agent's business is not merely that of collector of orders for goods that the retailer is out of or that he needs for a season's supply. Left to himself, neither the retailer nor the consumer would ever change styles or enlarge the variety of purchases.

Did you ever think how few articles are really required to satisfy actual needs? How few these are can be seen in pioneer towns, where, to start with, only staples are handled. Compare the store of today with the store of 50 years ago in the same line, and note the great variety of goods kept now as against then.

THE SALE OF NOVELTIES.

Very few real necessaries have been added, but the hardware dealers' stock, like every other, has been greatly enlarged by the addition of new things—things for procuring greater comfort or saving time. Did the dealer or consumer demand them? No. Anything different from what we are accustomed to is never demanded. If the manufacturer makes, or the dealer buys, something new and waits for people to want it, there would be a long wait, and this applies to the most popular things in use to-day. The consumer asks for nothing new, ever, and the dealer is afraid of new things. He does not want to buy things that have not already an established demand. Right here comes in the educative function of the travelling salesman. He is the one who makes a demand for the thousand and one things that have come into use. He presents the new article to the dealer and very often he goes and educates the consumer first and shows up the points of merit. If the consumer asks for it, there is no trouble in getting the dealer to handle it. The article, of course, must have merit.

INTRODUCTION OF WASHING MACHINES.

A new article is supposed to be an improvement on old ones, if it does better work for the same money, or as good work for less money; or it is time and labor saving; or it adds comfort; or it is more artistic in design, or fills some new niche in household use. Now, all these points, whatever they may be, have to be talked up and explained. The dealer has to be convinced, and it takes a good man to do it. He has got to be on to his job to do it. Nearly all the goods we sell nowadays have been added to by slow stages. Take the washing machine. A few years ago they were not part of a hardware stock. To-day they are an article of staple commerce. Years before, the washing machine was a county or village right scheme. It was not to sell washers, but rights, whatever that meant. Gradually the machine was perfected, and men were sent out to the trade and consumers to show their workings and points of merit, and by a gradual process of educational work the washer, like thousands of other valuable articles, has become a staple article of use and demand.

EDUCATION OF THE PUBLIC.

The natural tendency is to let well enough alone as to all things that involve an outlay of money or a change of our habits. More than half the things found on the counter were once so-called new-fangled notions, and only by a gradual process were people educated to a point of demand for them. As an illustration of this, I will repeat what an old hardwareman told me the other day, which is right to the point. We were speaking of the wringer business. He said: "I commenced business in the early sixties. Travelling salesmen in those days were not as numerous as in later years. A young fellow came along one day with a machine for wringing clothes. He knew how to work it and how to talk it to perfection. He spent the best part of two days trying to educate me in the mysteries and uses of his machine. As a last resort, he wanted me to let him come to the house and show the women folks how it worked. But my wife, after seeing it and trying it, said she didn't want any such new-fangled notions in her house. The old way was plenty good enough, and it would be a long time before any of those chaps could convince her. Failing to make me buy, he offered to put a dozen in stock for me, 'no sale, no pay,' but I wouldn't even do that. My wife said it was no good, and our neighbor's wife said the same thing. But the fellow got my competitor to put in a few, and he sold them. Six months later, another agent came along. He sold my competitor more this time, and I put in a few in self-defence. The price was $80 a dozen then, or somewhere along there, and no comparison to the present article. Look at the output of wringers to-day," the old hardwareman said. "Every family in the country, and in other countries as well, uses the wringer."

CIVILIZATION DEFINED.

With as good a thing as the wringer, as the above narrative shows, what hard work it was to get the people to use it. It took years of work to educate them up to it, and it was the travelling salesman who did the educating. Man does not willingly relinquish the things that he has been used to, but beyond that he is just as unwilling to accept anything new. Man is, in reality, not the progressive being that is claimed for him, and were the incentive of money-making left out, I doubt if much progress were made or many comforts added. Civilization, in fact, may be summed up as representing the cultivation of taste and of new desires and needs, and the more complex and various these desires and needs become, the higher we proclaim the civilization.

In the few minutes allotted to me, I think I have made out my case as well as could be done in so short a space—namely, that the travelling salesman is an educator and a very important factor in the civilizing influences of the world.

*Paper read at convention of the Wisconsin Retail Hardware Dealers' Association.

LESSENING THE EXPENSE IN PRODUCTION.

In this age of progress and advancement in the production of manufactured articles, the interests of the consumers are often lost sight of in the effort to secure large profits. Such has not been the case in the consolidation that has taken place under the title of United Factories, Limited, which has undertaken to operate Boeckh's Toronto factories, Bryan's London factories and Cane's Newmarket factories. The products of these factories enter into the needs of the everyday consumer perhaps more directly than most lines of manufacture. The object of the consolidation has been to lessen expense in management and production which will reflect directly in the reduction of prices of such universal household necessities as brooms, brushes and woodenware, which are their specialties. The United Factories, Limited, will henceforth put on the market the very best and most reliable goods that money, skill and manufacturing facilities can produce, and at prices that will be even less than second or third-rate domestic or foreign goods can ordinarily be purchased at. It will therefore be in the interest of all customers to ask for and insist upon having goods produced by the United Factories.

CREDIT AND CHARACTER.

E. M. SKINNER, in a recent article on "Credit and Character," draws this picture of the gradual change in the personnel of the credit man :

"Don't look as you did in olden times for a gray-haired gentleman of long and tried experience, but often of crusty and cold tempermanent ; don't expect to find an Arctic atmosphere surround his desk, and a line of questions as to your habits, family pedigree, age and birth of your family, etc., shot at you in tone of voice that soon works you up to such a murderous frame of mind that you reveal your true nature and character, and then get refused. Do not look for this, I say, you old-timers in business, for the methods that have gained for the credit desk the name of "sweat box" are no longer used. The credit man has gone in with this great rush of progress and reform, and has come out more in keeping with his duties and in touch with the times. You will no doubt find him young—but do not think without experience. You will almost surely find him pleasant and courteous ; you will find him able in his particular branch ; you should find him cautious and careful. His knowledge of general and local conditions is wide without being wonderful ; his memory marvelous without being miraculous. He will strive to learn all he can from you as to your affairs, so easily and pleasantly you hardly know you are talking about yourself, and you often leave wondering why you met him ; but he does not. While he looks harmless, he can be firm, and while he is sometimes careless and makes bad credits, it does not happen often enough to make any sure thing of it."

REAL AND IMITATION CHAMOIS SKIN.

From a report which The American Druggist summarizes, it appears that very little of the so-called chamois skin which is marketed is genuine. The real article comes from an animal found only in the Alps. There are two kinds of imitation known to commerce. The best is prepared from the skin of the doe, the cheaper grades from the flesh side of the split sheepskin. The grain of the skin is first removed by scraping with a round knife or pumice stone. The skins are then put into a bath of bran liquor, wrung out, dried, again soaked in water, and then fish oil is forced into the grain of the skin by beating several layers of skin soaked with oil with heavy wooden hammers. This process is repeated several times, the skins are then suspended on hooks in a warm room until a slight fermentation takes place, which dilates the pores and promotes the incorporation of the oil. The skins are then scraped and freed from excess of oil by treatment with weak patash lye, washed in an infusion of oak bark to give them a buff color, dried, smoothed and made supple by passing between iron rollers. After sorting, both as to quality and size, the skins are put up in packages of 30, each package being called a "kip." The skins vary from 6 x 8 inches to 20 x 33 inches in size. There seems to be no practical difference between the true skin of the chamois and the imitation, which is the commercial article, but there is some difference in the texture which enables an expert to distinguish between the two.

THE U.S. CANNING INDUSTRY.

There are in the United States, according to an exchange, not less than 2,000 firms engaged in packing canned goods, and the number of canning establishments is something larger.

The value of the canned goods annually put up in the United States is close to $100,000,000. Tomatoes are a leading staple of the Maryland packers, and of packers generally in the Middle States ; beef is canned mostly north and west of the Ohio River ; sardines and lobsters are leading features in Maine ; salmon is put up in Washington and Oregon, and oysters in New Jersey, Delaware, Maryland and New York. Massachusetts is naturally the State which makes the largest output of canned beans. Corn, milk, apples, pears, pineapples, small fruits of various kinds, pumpkins, squashes, etc., are canned in large quantities wherever they are plentifully grown.

The amount of capital invested in the American canneries approximates $50,000,000. Machinery has greatly operated to minimize the hand labor employed in the canneries, and cheapen the cost of the goods.

EXTENSIVE LINE OF BRASS GOODS.

James Cartland & Sons, Limited, of Birmingham, England, have their traveller, Mr. W. W. Mitchell, doing Canada at the present moment. He is showing a very extensive line of brass goods, and will call upon the leading firms of Canada before returning to England. His present address is the Windsor Hotel, Montreal.

THE ALBERT MIDLANE FUND.

Subscribers to the Midlane fund of The Ironmonger, which, it will be remembered, was closed by us in September last, when the amount collected reached the total of £98 2s. 3d., and when we had convinced ourselves that the totals of the various funds which had been started was more than sufficient to fill the wants of Mr. and Mrs. Midlane, will be pleased to hear that arrangements for an annunity have recently been completed. The joint fund of The Ironmonger and The Daily Express reached £514 11s. 7d., and of this amount £500 has been spent with The Liverpool and London and Globe Insurance Co. in the purchase of an annunity of £60 2s. 6d., payable half-yearly, on June 20 and December 20, during the joint lives of Mr. Albert Midlane and his wife, Maria. The delay in settling the matter has been caused by the difficulty in proving the ages of the annuitants. The balance of £14 11s. 7d. left after the purchase of the annuity has been forwarded to Mr. Midlane in cash. It will be remembered that in addition to The Ironmonger and The Daily Express funds some £1,400 was collected by various agencies, but we have no knowledge of the manner in which this money has been spent.—Ironmonger.

APOLLO BEST BLOOM
GALVANIZED IRON

What does anyone gain by using common galvanized iron?

Nothing; and loses time (which is wages) and standing (which also is money).

American Sheet Steel Company, New York
Representatives for Canada
B. & S. H. Thompson & Company
26 St. Sulpice Street
Montreal

"MIDLAND"
BRAND

Foundry Pig Iron.

Made from carefully selected Lake Superior Ores, with Connellsville Coke as fuel, "Midland" will rival in quality and grading the very best of the imported brands.

CURRENT MARKET QUOTATIONS.

March 7, 1902.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list as the desire is to make it perfectly accurate.

FOR THE STREET

THE TRADE "M&M" MARK LIGHT

FOR THE STORE

They are Where Best Liked Best Known!

What a Man Says "M. & M." Hardware About Lamps.

Over 30,000 "M. & M." Lamps are in daily use in the United States and Canada, and our largest orders come from localities where they are best known. The most efficient, most practical, most economical store-lighting proposition on the market, a claim which is amply proven by the enthusiastic testimonials constantly received from users and our agents. Send for circulars. AGENTS WANTED. ACORN BRASS WORKS, Dept. 8, 15-23 Jefferson Street. CHICAGO, ILL.

Acorn Brass Works, Chicago, Ill., Madison, Neb., Oct. 21, 1901.
Gentlemen:—I am using five of your "M. & M." Arc Vapor Lamps in my store, and have been for the past three years. They are as good as the day I put them up, so far as I can see. My store is lighter than daylight. The store next to mine has 26 incandescent electric lights in a room 23x84, and it looks as if he had so many tallow candles compared to the light in my store. Respectfully yours, WM. PARKINSON.

Capital and Surplus, $1,500,000. **Offices Throughout the Civilized World.**

Executive Offices: Nos. 346 and 348 Broadway, New York City, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices. **Correspondence Invited.**

"That Made the Hit"

This is a drawing of the Patent Connection that made the "SAFFORD" famous the world over; that revolutionized radiator building; that made it possible to put a radiator together without bolts, red lead, rods or packing.

The "SAFFORD" is the only radiator on the market for hot-water and steam heating. It means satisfaction every time—is easy to handle for the contractor.

WHEN WRITING ADVERTISERS PLEASE MENTION THAT YOU SAW THEIR ADVERTISEMENT IN THIS PAPER

THE HARVEST TOOL SITUATION.

QUITE a strong tone has developed on the harvest tool market in both Canada and the United States.

Since our last issue there has been an advance of 7½ to 8 per cent. in the price of harvest tools of Canadian manufacture, the discount now being 60, 10 and 10 per cent. Scythes and other goods quoted at net figures are without change.

Last autumn, it will be remembered, here was a reduction of about 40 per cent. in prices. It is said that at the prices which have been ruling since then the manufacturers have not been making money. They evidently were not doing bad before that, however.

The reduction that was made in prices last autumn was due to the collapse of the agreement among the manufacturers in the United States, which left them free to sell in Canada as well as in the home market at open figures. Until the collapse of the agreement in the United States there was an understanding between them and the manufacturers of this country whereby the one was not to interfere with the trade of the other. As our readers are aware, this understanding no longer exists, with the result that a large business has been done on Canadian account by some of the manufacturers in the United States.

One firm, The American Axe and Tool Co., sold through its Canadian representatives all the scythes that it could make for this market. In fact, it was compelled to refuse orders. And it is alleged that Canadian manufacturers have endeavored to prevent dealers from importing certain lines from the United States by threatening to refuse to supply other lines if they did so.

How, hitherto, the Canadian manufacturers have controlled the market in scythes may be gathered from a glance at the following table showing the imports of scythes, snaths and reaping hooks during the last two years :

	1900. Dozens.	1901. Dozens.
Scythes, snaths and reaping hooks.....	3,238	3,181

Figures for the present fiscal year are, of course, not yet obtainable.

The Canadian import duty on harvest tools is 25 per cent.

At present the harvest tool situation in the United States appears to be even stronger than it is in Canada, as far as prices are concerned. Owing to the activity of the demand there is difficulty in filling orders, and prices have been advanced about 10 per cent., while it is intimated that another advance is not at all improbable.

BUY WISELY.

ALTHOUGH the prospects for a continuance of the present active condition of trade are bright, merchants should be careful not to allow themselves to be persuaded to overstock. There is nothing, probably, that, as a rule, is more conducive to hard times than reckless buying.

The demoralization which characterized the iron and hardware trade in the United States and Canada for several months in 1900 was due to excessive buying ; for the action of the Steel and Wire Trust in suddenly reducing prices $20 a ton was in turn born of the fact that dealers had more rails and wire on hand than they required.

Excessive buying is speculation, and speculation is not a good thing for the permanency of trade.

Whatever is salable is advertisable. It is true and ever true that a supply can create a demand as surely as a demand will bring about a supply. If one have anything, however simple, which another might want, he will have no trouble in finding customers provided he advertises judiciously and properly.

TRAVELLERS' LIFE INSURANCE.

A MEETING of considerable interest to many of our commercial friends was held on Saturday at St. George's Hall, Toronto, when the adjourned annual meeting of the Commercial Travellers' Mutual Benefit Society took place. For some months past, considerable interest has been taken in this matter, as the rates charged by this society have been under discussion. It would appear that during the months of May, June and July last the directors of this institution found that owing to several claims on their funds being held over from the year 1900 to that of 1901, and that the death rate for the first months in 1901 was rather higher than usual, that the income from the regular assessments was likely to be insufficient to meet the claims of the policies falling due, and as they feared that making special calls might be objectionable to some members of the society, they called a special meeting to consider the desirability of advancing the rates on all persons who were then members of the society. This was considered important, as in the early history of the society the scale of rates charged was very low, and that it was then found that no less than three different classes of rates were being used.

As the attendance at this meeting was not very large, owing to many persons being away on their holidays, it was considered wise to hold over the consideration of the rates then proposed by the board until the annual meeting. At the annual meeting, in January, it was found that two members had given legal notice of amendments which they proposed for the consideration of the Association. As a new board of directors had been elected, a resolution was then passed that the meeting should be adjourned for six weeks, to give the new board an opportunity of considering the whole matter of rates and introducing their policy. At this meeting, which took place on Saturday last, a rate was proposed that was claimed to be based upon a report presented some years ago by Mr. Blackadar, of the Insurance Department at Ottawa, in an address that he gave before the actuaries of this country, which he offered as the experience of one of our oldest life insurance companies as their actual cost, without anything being allowed for agents' expenses or loss on investments, or anything of this character. This scale has since been considered by Mr. Howard Hunter, of the Ontario Government Insurance Department, and, by his advice, engrafted into the insurance laws of Ontario. It has also been adopted by the Province of Quebec.

In the discussion which took place on Saturday, it was claimed that these rates would be found to be positively safe for the adoption of the Mutual Benefit Society, and in comparison with the largest assessment association doing business in the world, it was found to be a very small percentage higher than the one used by them. At the same time by comparison it was shown that it was lower than the lowest rate used by any regular insurance company doing business in Canada on the all-life plan, without any participation in profits. This scale of rates was made a substantive motion at the meeting, as only such motions as had been properly advertised before the annual meeting could be introduced to this adjourned meeting, but to which any amendment might be moved, the new board of directors presented their alternative as an amendment to this scale of prices.

Special Notice to Advertisers.

ON account of the large amount of additional press work connected with the issuing of the Special Spring Number of HARDWARE AND METAL next week, we wish to notify regular advertisers that all advertising matter, instructions for changes, etc., etc., must reach us on **MONDAY, 17th inst.**, in order to take effect in the issue of March 22.

THE PUBLISHERS.

In the report of the president he showed that two regular line companies were anxious to take over the business of the Mutual Benefit Society, one of them demanding that each member should pass a medical examination, and the company have the privilege to accept or reject same. The other company offered to take all the members without medical examination. The rate to be charged in future in each case, taking the ages at which the members joined the association, was only a slight advance over the lowest rate found not offered by any regular line insurance company, but each policy was expected to have charged to it a lien for the number of years the person had been a member of the Mutual Benefit. After a full discussion these two plans were voted on. The policy proposed by the board of directors to transfer the business to the regular line asking for the medical examination was voted down at once. Then the first resolution to adopt the scale proposed by Mr. Fielding, which was claimed to be about equivalent to the rates spoken of as proposed by Mr. Hunter and Mr. Blackadar, but when the votes were counted for and against, it was found that it lacked a few of being the full two-thirds majority of those present, which any change of the by-laws must have in order for it to have force and effect, consequently no change has thus far been effected in the rates of the society.

The board of directors then announced that this might necessitate the making of some special calls during the present year.

As considerable comment has been made on the stability of this organization and the probability of their continuing to do business, we have made some little investigation and find that even with the three special calls that may be made this year before anything is taken from the surplus, the amount to be paid will not exceed the lowest rate charged by any regular life insurance company doing business in Canada, and, as the reserve fund of $36,000 appears to be larger than many assessment companies doing business in Canada, there does not appear to be any necessity for alarm.

The Bulletin of Assessment Life Insurance Chart, issued for the year 1901, shows that there are no less than 12 insurance companies doing business in Canada whose average reserve only amounts to $5.71 per thousand of the insurance they carry, while the same report gives $14.79, being the amount of the reserve for every $1,000 carried by the C. T. Mutual Benefit Society. This would appear to be a guarantee of the solvency of the Association.

TRADE IN COUNTRIES OTHER THAN OUR OWN.

SKATE SALES IN ENGLAND.

THE prolonged frost has led to a great demand for skates, and many ironmongers doubtless have been able to clear out the accumulations of several seasons. Last year was a bad year for the skate trade, but this year retailers' stocks have been exhausted, and the result has been urgent pressure upon the Sheffield works. From the retailers' point of view it is satisfactory to note that one of the features of the trade during the last few weeks has been the widespread demand for skates of the finest patterns and, consequently, of the highest prices. — Hardwareman.

PIG IRON MARKET IN SCOTLAND.

There has not been quite so much animation in the Glasgow market for pig iron warrants during the week, but, at the same time, proceedings have evoked a great deal of interest, which was not confined to local centres. Some 20,000 tons was about the average turnover, all classes included. London has been a steady operator from day to day, sometimes buying and at others securing profits, yet, on balance, it is believed that the quantity held in the South has, if anything, grown during the eight days. Dealers in Canada have been purchasing Cleveland warrants, but whether on speculation or with a view of future shipments cannot be said. So far as known there has been only one boat fixed—the Myrtledene—to carry iron from Middlesborough to Philadelphia. Another steamer, to take 5,000 tons, will probably be loading by the time these lines appear. There is no question as to the large extent of the inquiries for iron and semi-manufactured steel which have been received from the United States. The prices named by the buyers, however, are altogether unworkable, being shillings below what can be commanded for home business. Merchants having close relations with America are confident that large quantities of both iron and steel will require to, and are sure to, go to the United States, and next month, it is said, will witness a big expansion of exports across the Atlantic. On the other hand, it remains that manufacturers are not managing to put much real business through, and there is no probability of such unless the Yankees raise the terms of their offers. Some people go the length of suggesting that the rise in values on this side has been artificially aided by the Americans so as really to prevent imports, of which as a nation they do not wish to admit the necessity. At the same time public and private advices from all the leading industrial centres show that the American position is phenomenally active and healthy, and if consumption overlaps production to the extent indicated—and continues to do so—it is hard to see how America can overtake her requirements without drawing upon foreign resources. The dealing in Scotch warrants on the week has been comparatively light, yet the price has risen 9d., to 54s. sellers. Cleveland has receded 1½d., to 47s. 11d.; but hematite has risen 5d., to 59s. 3d. one month. Connal's stock of Scotch iron has decreased 520 tons to 54,400 tons, but the aggregate stock in the United Kingdom is 1,830 tons greater, at 216,376 tons.

WIRE AND WIRE NAILS IN THE STATES.

The American Metal Market says: "Independent wire and wire nail mills are rapidly filling up with orders, and, at a meeting of makers to be held in the latter part of March, prices will probably be advanced $2 per ton. Muck bar is scarce. Pig iron is quiet."

TINPLATES IN GREAT BRITAIN.

The market is strong, with an upward tendency, owing partly to the firmness of steel, and partly to the excellent demand experienced from all quarters, America included. There is some grumbling by makers regarding the unwillingness of the leading steel-bar makers to book contracts for future delivery, and it is alleged that this cause of action is hampering business. There has been some heavy buying, and large orders are still awaiting execution. 14 x 20, 13s. 9d. to 14s., 28 x 20, 14s. to 14s. 6d. (half-boxes). Quarters, 13s. 9d. to 14s.; 14 x 20 wasters, 13s. Three-quarter wasters, 12s. 9d., all f.o.b. Wales.—Ironmonger, March 1.

NEW YORK METAL MARKET.

IRON—Although nearly all consumers of pig iron have contracts for supplies amply sufficient for their requirements for months to come, the delays in deliveries from the furnaces are causing a very strong demand for metal to keep the foundries going until supplies due on contracts are forthcoming. The necessity felt for getting material at once is so great that the question of price receives little consideration at the hands of buyers, who cheerfully pay high premiums on such lots as they can get, and we learn that up to $25 has been paid in several instances on small lots for immediate delivery. Many foundries, it is reported, cannot get enough fuel and iron to keep going, and more of them are shut down at present on this account than at any time within a year. There are many inquiries in the market for large as well as small lots of foundry pig iron for delivery before July 1, very few of which, it is said, can be filled. One prominent Southern company is reported to have received within a few days from its various agencies inquiries for 40,000 tons for early delivery, but is not in a position to negotiate sales for any part of this quantity. The expected advance in the price of Southern foundry iron has not yet been made, but it is believed to be a question of but a short time before the higher rates are established.

TINPLATE — The market has a tame appearance, the current wants of consumption being covered by contract deliveries and little new business being reported. There has been no change made in quotations.
